wool (wūl), *n.* [Formerly also *wooll*; see *woo*; < ME. *woll*, *wolle*, *wulle*. < AS. *wull*, *wol* = OFries. *wolle*, *ulle* = D. *wol* = LG. *wulle* = OHG. *wolla*, MHG. G. *wolle* = Icel. *ull* = Sw. *ull* = Dan. *uld* = Goth. *wulla*, *wool* (Tent. **wolla*, assimilated from **wolina*), = OEng. *wlina* = Lith. *wilna* = Russ. *wolna* = L. *villosus*, shaggy hair, *rellus*, a fleece, *wool*, = Skt. *ūru*, *wool*; lit. a 'covering,' formed, with suffix *-na*, from a root seen in Skt. *√rar*, cover. Connection with Gr. *epur*, *wool*, *epur*, *wool*, *epur*, woolly, shaggy, thick, etc., is doubtful.] 1. The fine, soft, curly hair which forms the fleece or fleecy coat of the sheep and some other animals, as the goat and alpaca, in fineness approaching fur. The wool or fleece of the sheep furnishes the most important material for clothing in all cold and temperate climates. The felting property from which wool derives its chief value, and which is its special distinction from hair, depends in part upon the kinks in the shaft or fiber, but mainly upon the scales with which the surface is imbricated. These scales are minute, from about 2,000 to nearly 4,000 to the inch, and whorled about the stem in verticils; the stem itself is extremely slender, being less than one thousandth of an inch in diameter. Wool is kept soft and pliable by the wool-oil, commonly called *yolk*. In different animals wool shades by imperceptible degrees into hair; and that of the sheep simply represents an extreme case of the most desirable qualities, namely, fineness, kinkiness, and scalliness of the fiber, together with its length, strength, and luster, and the copiousness of the fleece, which consists entirely of wool, without hair; in all of which particulars the wool of the different breeds of sheep varies to a degree. (Compare def. 2.) Wool when shorn is divided into two classes, *short wool*, or *carding-wool*, seldom exceeding a length of 3 or 4 inches, and *long wool*, or *combing-wool*, varying in length from 4 to 8 inches, each class being subdivided into a variety of sorts, according to the fineness and soundness of the staple. The finest wools are of short staple, and the coarser wools usually of long staple. Wools which unite a high degree of fineness and softness with considerable length of staple bear a high price. English-bred sheep produce a good, strong combing-wool, that of the Scotch breeds being somewhat harsher and coarser. The finest carding-wools were formerly exclusively obtained from Spain, the native country of the merino sheep, and at a later period extensively from Germany, where that breed had been successfully introduced and cultivated. Immense flocks of merinos are now reared in Australia, North and South America, and South Africa.

Mandeville, *Travels*, p. 208.

Eye of newt and toe of frog,

Wool of bat and tongue of dog.

Shak., *Macbeth*, iv. 1. 15.

3. The short, crisp, curly or kinky hair of the head of some persons, as negroes; humorously, the hair of any person's head. [Colloq.]

From a strange freak of nature, not unusual in these Virginia mountains, his knotty *wool* was of a pale tan-color. *Harper's Mag.*, LXXVI. 203.

4. Any light, downy, fleecy, or flocculent substance resembling wool. (a) The dense furry or woolly coat of many insects, as the pubescence covering the moths known as *pillers*, that on various caterpillars, that spun by various larvae for a case or cocoon, etc. Secretions of various insects are very nicely graded from a solid waxy consistency through various frothy states to a light dry fleecy condition resembling wool; see *was-insect*, *spittle-insect*, and *woolly aphid* (under *woolly*). In another large class of cases the spun-out secretion is gossamer, cobweb, or true silk. See these words, and *silkworm*. (b) In bot. (1) A sort of down or pubescence, or a clothing of dense curling hairs, on the surface of certain plants. (2) The fiber of the cotton-plant, commonly called *cotton-wool*.—**Angora wool**, the wool of the Angora goat, from which angora is made.—**Berlin wool**, a kind of the dyed wool used for worsted work, knitting, etc. It is harder and closer than zephyr wool.—**Camel's wool**, mohair.—**Cape wool**, a somewhat inferior variety of wool brought from the Cape of Good Hope.—**Carding-wool**, wool of short fiber worked upon a carding-machine. It is distinguished from *combing-wool*, which has a long fiber and is prepared for spinning by combing.—**Dyed in the wool**, tinged in the fiber; hence, permanent; lasting; not liable to fade or change; thorough; out-and-out; as, a *dyed-in-the-wool* democrat. [U. S.]—**Fleece-wools**. See *fleece*, 1.—**German wool**. Same as *Berlin wool*.—**Glass wool**, a mass of the filaments of glass forming together a cotton-like substance similar to mineral wool.—**Great cry and little wool**, much cry and little wool. See *cry*.

And so his hyghnes shal have theroff but as hadd the man that sherd is hogge, *much cry and little wool*. *Sir John Fortescue* (c. 1475), on the Governance of England, x., quoted in N. and Q., 7th ser., VI. 186.

But if you compare his threatenings and his after-alterations you would say of them, as that wise man shearing his hogs: Here is a great deal of *cry*, but a little *wool*. *Rev. T. Adams*, *Works*, 1. 477.

Hamburg wool, one of the varieties of German or Berlin wool made for fancy work.—**Hand-washed wool**, wool washed before the sheep were shorn.—**Holmgren's wools**, skins of wool of different colors used as tests for color-blindness.—**Laid wool**, wool from sheep which had been smeared with tar and butter as a protection from the rigor of winter.—**Leviathan wool**. See *leviathan*.—**Long wool**. See *def. 1*.—**Mineral wool**. See *mineral*.—**More squeak than wool**, more noise than substance. [Colloq.]

For matter of title he thought there was more *squeak* than *wool*. *Roger North*, *Lord Guilford*, II. 17. (*Dacies*.)

Philosopher's wool, philosophic wool. See *philosophic*.—**Pine-wool**, pine-needle wool. See *pine-needle*.

—**Scoured wool**. See *scour*.—**Shetland wool**, a thin hairy undyed and very tenacious and strong worsted, spun in the Shetland Islands from the wool of the native sheep, and very extensively used in the knitting of fine shawls and other garments. *Encyc. Brit.*, XIV. 127.—**Skirted wool**. See *skirted*.—**Spanish wool**, wool impregnated with rouge.—**To pull the wool over one's eyes**, to deceive or delude one; throw dust in one's eyes; prevent one from seeing clearly in any way.—**Wool-handling machine**, a machine for compressing and tying fleeces into bales; a fleece-folder or wool-packer.—**Wool in the grease**, the technical name for wool which has not been cleaned either before or after shearing. (See also *cinder-wool*, *cotton-wool*, *dead-wool*, *lamb's wool*, *skin wool*, *slay wool*.)

wool-fat (wūl'fat), *n.* 1. Same as *suint*.—2. A fatty substance obtained from wool and used as a basis for ointments; lanolin.

woolfell (wūl'fel), *n.* [*< wool* + *fell*.] The skin of a wool-bearing beast with the fleece still on it.

The duties on wool, sheepskins, or *woolfells*, and leather, exported, were . . . payable by every merchant, as well native as stranger. *Blackstone*, *Comm.*, I. viii.

In 1333 the merchants granted ten shillings on the sack and *woolfells*, and a pound on the last, but this also was regarded as illegal, and superseded by royal ordinance.

Stubbs, *Const. Hist.*, § 277.

woolfist (wūl'fist), *n.* Same as *wolf's-fist*.

wool-gathering (wûl'gath'ér-ing), *n.* The act of gathering wool; usually applied figuratively to the indulgence of idle fancies or to any foolish or fruitless pursuit. The allusion is probably to the practice of gathering the tufts of wool to be found on bushes and hedges, necessitating much wandering to little purpose.

His wits were a *wool-gathering*, as they say, and his head busied about other matters. *Burton, Anat. of Mel., p. 189.*

I cast the water in my gown and slippers,
To see my rents and buildings of the Bankside,
And I am shipt clean out of ken, fore-god,
A *wool-gathering*.

Hamlet, If you know not me (Works, ed. 1874, I. 302).

What! I think my wits are a *wool-gathering* to-day.
Swift, Polite Conversation, iii.

wool-grass (wûl'grás), *n.* A rush-like plant, *Eriophorum cypripurum* (*Scirpus Eriophorum*), common in low grounds through the eastern half of North America. It grows from 2 to 5 feet high, bearing at the summit a spreading and drooping panicle of very numerous small heads which are woolly with the rusty tortuous bristles of the flowers.

I am particularly attracted by the arching and sheaf-like top of the *wool-grass*. *Thoreau, Walden, p. 331.*

wool-grower (wûl'grô'ér), *n.* One who raises sheep or goats for the production of wool.

wool-growing (wûl'grô'ing), *a.* Producing sheep and wool; especially noting a tract of country.

woolen, woolenette. See *woolen, woolenette*.
woolliness (wûl'i-nes), *n.* A woolly character or quality; the state of being woolly in fact or appearance; pubescence; flocculence.

woolly (wûl'i), *a.* [*< wool + -y*]. 1. Consisting of wool; fleecy; as, the *woolly* coat of the sheep, of a young seal, etc.—2. Resembling wool; exhibiting woolliness; having the appearance of wool; as, *woolly* hair; *woolly* clouds.

When clouds look *woolly*, snow may be expected.

Abercromby, Weather, p. 114.

3. Clothed or covered with wool, or something like it; pubescent; flocculent.

When the work of generation was
Between these *woolly* breeders in the act,
The skilful shepherd peep'd me certain wands.

Shak., M. of V., I. 3. 84.

4. In *bot.*, covered with a pubescence of long and soft hairs like wool; lanate; tomentose.—**White woolly currant-scale.** See *white*.—**Woolly aphid**, a plant-louse of the family *Aphididae* and either of the subfamilies *Lachninae* and *Pemphiginae*. Many of them secrete a white filamentous substance resembling wool. *Schizoneura lanigera* is the woolly root-louse of the apple, or the American blight of Great Britain and the British colonies. See *Lachninae, Pemphiginae, Pemphiginae, root-louse*, and *Schizoneura* (with *ent*).—**Woolly bear** the larva of any arctiid moth which is densely clothed with woolly hairs, as that of the tiger-moth, a member of the *Uresia*. See *ent* under *beet*; *Euprepia*, and *tiger-moth*.—**Woolly beard-grass.** See *beard-grass*.—**Woolly chetah**, the south African form of the cheetah or hunting-leopard, which differs in some respects from that of India, has been described as a distinct species (*Felis tanaur*), and is also called *Cynopithecus* or *Cynopithecus jubatus*, var. *tanaur*. The fur is somewhat woolly, and the spots are brown instead of black.—**Woolly elephant**, the hairy mammoth, *Elephas primigenius*. See *mammoth*.—**Woolly indri**, the woolly lemur. See *indri*.—**Woolly lemur**, the Madagascan *Indri* lemur. See *Indri*.—**Woolly louse**, a woolly aphid of the genus *Schizoneura*, as *S. lanigera*; a woolly plant-louse, see *ent* under *Schizoneura*.—**Woolly macaco**, the Madagascan *Leontideus*.—**Woolly maki**, the woolly lemur.

Woolly monkey, any South American monkey of the genus *Leopithecus*, see *ent* under *Leopithecus*.—**Woolly pastinacum**, a name given in the East Indies to a kind of red cotton, or a kind of arsenic.—**Woolly ragwort.** See *ent* at *ent*, alluded to.

Woolly rhinoceros, the tichorhine rhinoceros, *Elasmotherium*. See *rhinoceros*.—This is the best-known fossil rhinoceros, and the only one whose remains, like those of the woolly rhinoceros, have been found in Siberia, embedded in ice. It is supposed to have been a two-horned, with the anterior horn of great size, and the posterior of moderate size. It was widely distributed in northern latitudes of Europe and Asia and existed from the Miocene to the Pliocene.—**Woolly root-louse.** See *woolly aphid*, and *woolly louse* (with *ent*), and *Schizoneura*.

woolly-but (wûl'i-but), *n.* A gum-tree, *Euraphia longituba*, of New South Wales, reaching a height of 200 feet. The wood is hard, straight-grained, and easily worked, and the bark is covered with a variety of papery scales. The name refers to the fibrous bark of old trees, which is also applied to the manna-gum or black-but, *E. rostrata*, a moderate or sometimes very large tree, with woolly wood for general building purposes.

woolly-haired (wûl'i-hard), *a.* 1. Woolly-headed, as a person or race of men; ulotrichous. See *Ulotrichi*.—2. Having the pelage more or less woolly or fleecy; woolly, as a beast.

woolly-head (wûl'i-hed), *n.* A negro: so called from the woolly hair of his head. [*Colloq.*]

woolly-headed (wûl'i-hed'ed), *a.* Woolly-haired or ulotrichous, as a person.—**Woolly-headed thistle.** Same as *frink's-screw*.

wool-mill (wûl'mîl), *n.* A building where the spinning of wool and the weaving of woolen cloth are carried on.

woolmonger (wûl'mung'gér), *n.* A dealer in wool. *English Gilds* (E. E. T. S.), p. 353.

wool-moter (wûl'mô'tér), *n.* A person employed in picking wool and freeing it from moles and impurities.

wool-needle (wûl'nê'dl), *n.* A blunt needle with a large long eye, used for wool-work or worsted-work.

wooloid (wûl'oid), *n.* [*< wool + -oid*]. A factitious kind of wool prepared by chemical processes from cows' and buffaloes' hair, largely used in the United States in making ingrain carpets. [*A trade-name.*]

wool-oil (wûl'oil), *n.* The secretion of the sebaceous glands of the sheep, which greases the fleece; lanolin; popularly called *yolk*. Compare *wool-fat*.

wool-oiler (wûl'oi'lér), *n.* An attachment to a wool-carding machine for adding oil to the wool to prevent the fibers from becoming felted together in the process of spinning.

wool-pack (wûl'pak), *n.* [*< ME. wolpak; < wool + pack*]. 1. The package in which wool was in former times done up for transportation and sale; specifically, a bundle or bale weighing 240 pounds.

Two gentlemen making a marriage between their heirs over a *woolpack*. *Dekker and Webster, Northward Ho, I. 1.*

Enforcing a sack as big as a *wool-pack* into rooms at the first too narrow for your arm, when extended by their instruments: so that often they make the very decks to stretch therewith. *Sandys, Travels, p. 12.*

A cannon-ball always doth mischief in proportion to the resistance it meets with, and . . . nothing so effectually deadens its force as a *woolpack*. *Fielding, Amelia, x. 4.*

As *wool-packs* quash the leaden ball.

Shenstone, Progress of Taste, i.

2. In *her.*, a bearing representing a sort of cushion usually having four tufts at the corners.—3. Cirro-cumulus cloud; a cloud made up of rolled masses, with a fleecy appearance.—4. A concretionary mass of crystalline limestone in the beds of earthy and impure calcareous rock of which the Wenlock limestone is made up. These concretionary masses vary in size from a few inches up to 80 feet in diameter. Also called *ballstone*.—**Woolpack corded**, in *her.*, a bearing representing a bale tied round with cords in several places.

wool-packer (wûl'pak'ér), *n.* 1. One who puts up wool for the market, as into woolpacks. See *woolpack*.—2. A table having various arrangements for collecting loose wool or fleeces into bundles ready for tying and otherwise preparing for transportation.

wool-picker (wûl'pik'ér), *n.* A machine for freeing wool from foreign matters by heating it with rapidly revolving blades; a wool-cleaner.

wool-powder (wûl'pon'dér), *n.* Powder or dust obtained by scraping very dry wool. It is used for mosaic powder-work, wall-papers, etc.

woolsack (wûl'sak), *n.* [*< ME. wollesack; < wool + sack*]. 1. A sack or bag of wool.—2. A cushion stuffed with wool, especially that on which the lord chancellor sits in the House of Lords. It is a large square bag of wool, without back or arms, covered with cloth.

He [Warren Hastings] was then called to the bar, was informed from the *woolsack* that the Lords had acquitted him, and was solemnly discharged.

Macaulay, Warren Hastings.

In the reign of Queen Elizabeth an Act of Parliament was passed to prevent the exportation of wool; and that this source of our national wealth might be kept constantly in mind, *woolsacks* were placed in the House of Peers, whereon the Judges sat. *Brewer, Diet. Phrase and Fable.*

In front of the throne were the *woolsacks* on which the judges sat, and the table for the clerks and other officers of parliament. *Stubbs, Const. Hist., § 425.*

woolsack-piet (wûl'sak-pî), *n.* A kind of pie once to be had at "The Woolsack." a rather low ordinary and public house in London.

Her grace would have you eat no more *Woolsack pies*.

B. Jonson, Alchemist, v. 2.

wool-sale (wûl'sál), *n.* A periodical public sale of wool in London, Melbourne, and other places where large quantities of wool are offered.

wool-scribbler (wûl'skrib'lér), *n.* A machine for combing wool and forming it into thin, downy, translucent layers, preparatory to spinning. *Simmonds.*

woolsey (wûl'si), *n.* [*Abbr. of linsey-woolsey.*] 1. A material made of cotton and wool, as distinguished from linsey, which is made of linen and wool. *Diet. of Needlework.*

Who could possibly have substituted chance for fate here? unless he thought his verses were to sell by the foot, no matter for the stuff, whether linsey or *woolsey*.

Bentley, On a Late Discourse of Free-Thinking, liv.

2. Same as *linsey-woolsey*, 1.

wool-shears (wûl'shêr), *n. sing. and pl.* Shears of the kinds used for shearing sheep, consisting of two sharp-pointed blades so connected by a spring at the back of the handles that they remain open when not in use. The blades are closed and brought into contact for cutting by the hand of the operator. See *ent* under *sheep-shears*.

wool-sorter (wûl'sôr'tér), *n.* One who sorts wool; especially, one skilled in dividing wool into lots according to its quality, as length and fineness of fiber.—**Wool-sorters' disease**, blood-poisoning, probably anthrax (although there is not always an external lesion), occurring in those engaged in handling and sorting alpaca, mohair, and other varieties of similar wools which have not been previously disinfected. See *anthrax*.

wool-sower (wûl'sô'ér), *n.* A woolly many-celled cynipid gall occurring on white-oak twigs in the United States, and made by the gall-fly *Andricus seminator*. This gall is round,

a, Wool-sower gall, made by *Andricus seminator*; b, an individual cell (the gall is composed of many such cells).

usually an inch or more in diameter; the woolly material with which the cells are surrounded is rose-colored early in the season, but becomes rusty-brown toward the middle of the summer.

wool-sponge (wûl'spunnj), *n.* A kind of bath-sponge, more fully called *lamb's-wool sponge*.

wool-staple (wûl'stâ'pl), *n.* 1. A city or town where wool was formerly brought to the king's staple for sale.—2. The fiber or pile of wool. See *staple*², 7.

wool-stapler (wûl'stâ'plér), *n.* 1. A dealer in wool; a wool-factor.

They bought the foreign wool directly from the importer, and the native in the fleece, or from the *wool-stapler*. *English Gilds* (E. E. T. S.), *Int.*, p. cxxii.

2. A sorter of wool.

woolstock (wûl'stok), *n.* [*< wool + stock*]. 1. A heavy wooden hammer with a broad smooth face, employed in dressing woolen cloth.

woolward (wûl'wârd), *a. and adv.* [*Early mod. E. wolwârde; < ME. wolward, wolward, wulward; lit. 'against wool,' i. e. with the skin against wool; < wool + -ward*]. With wool as clothing, especially next the skin; apparently always with the idea of doing penance by wearing an irritating and uncomfortable garment.—**To go woolward**, to wear uncomfortable clothing; specifically, to do penance, especially by wearing woollens next the skin.

And wortes flechles wroughte & water to drinken,
And wecten & wolward you as we wrecches vsen.

Piers Plowman's Crede (E. E. T. S.), l. 788.

Barfote and wolwarde I have thyght.

Thyder for to go.

Lytell Geste of Robyn Hode (Child's Ballads, V. 121).

I have no shirt; I go *woolward* for penance.

Shak., I. L. L., v. 2. 717.

Poor people fare coarsely, work hard, go *woolward* and bare. *Burton, Anat. of Mel., p. 526.*

woolward-going (wûl'wârd-gô'ing), *n.* The act of one who goes woolward.

Fasting, watching, *woolward-going*, pilgrimage, and all bodily exercise must be referred unto the taming of the flesh only.

Tyndale, Ans. to Sir T. More, etc. (Parker Soc., 1850), p. 80.

Woolwich gun. See *gun*¹.

wool-winder (wûl'win'dér), *n.* A person employed to wind wool or make it up into bundles to be packed for sale.

wool-work (wūl'wérk), *n.* Needlework imitating tapestry, usually done on canvas with Berlin wools. The name is sometimes given to other forms of embroidery with wools.—**Mosaic wool-work.** See *mosaic*.

woom (wōm), *n.* [Origin obscure.] A trade-name for the fur of the beaver. There are four sorts—silvery, pale, white, and brown.

woon (wōn), *n.* [*<* Burmese *wun*, a burden.] An administrative officer; a governor; as, *myo-woon*, chief governor; *yo-woon*, water-governor; *woon-gyre*, high minister, or member of the council of state.

The most arbitrary confiscation of their goods by every petty Woon who flourished one gold umbrella.
J. W. Palmer, *Up and Down the Irrawaddy*, p. 36.

woon², *n.* A variant of *woon¹*, *woon²*, *woon³*.
woont¹, *v.* An obsolete form of *woon¹*. *Spenser*.
woorali, **woorara**, **woorari** (wō'ra-li, -ri, -ri), *n.* South American arrow-poison: same as *curari*. Also *wourali*, *wourari*.

Upon the application of a stimulus . . . contractions will still take place after the animal has been poisoned by *woorara*, which is known to paralyze the motor set of nerves.
J. M. Carmichael, *Operative Surgery*, p. 116.

woorst¹, *a.* An obsolete form of *worst*.

wootz (wōts), *n.* [Supposed to be an orig. error or misprint, perhaps for **wook*, repr. *Canarese ukku* (pron. wukku), steel.] The name given to steel made in India by fusing iron with carbonaceous matter. This is done in small crucibles holding a pound or two of the iron, and the wood selected to furnish the carbon to the metal is always that of *Cassia auriculata*, which is cut into small pieces, the same being done with the iron, and the whole covered by one or more green leaves, usually of a species of *Cassia*, the crucible being then covered with a lid of clay. A number of these crucibles are placed together in a hole dug in the ground, and heated in a charcoal fire urged by a pair of bellows made of ox-hide, the blast being kept up for three or four hours. The steel thus obtained is hard in temper, and requires much care in working. This is the oldest method of making steel of which anything definite is known, having been in use, without change, for an indefinite length of time, and being, as generally believed, original with the Hindus.

Gr. *tipos*, speak, *ipis*, question, *pytup*, speaker, (see *rhetor*). Doublet of *verb*.] 1. A sound, or combination of sounds, used in any language as the sign of a conception, or of a conception together with its grammatical relations; the smallest bit of human language forming a grammatical part of speech; a vocable; a term. A word may be any part of speech, as verb, noun, participle, etc.; it may be radical, as *love*, or derivative, as *lover*, *lovely*, *loveliness*, or an inflected form, as *loves*, *lored*; it may be simple, or compound, as *love-sick*. Anything is a word that can be used as an individual member of a sentence, and that is not separable into parts usable independently and coordinately in making a sentence. A word is a spoken sign that has arrived at its value as used in any language by a series of historical changes, and that holds its value by virtue of usage, being exposed to such further changes, of form and of meaning, as usage may prescribe. The conception involved in a word may be of any grade, from the simplest, as *one*, to the most derived and complicated, as *political*, and the grammatical relations involved may also be of any degree, from *true* to *untruthfulness*, or from (Latin) *ama* to *amabitur*.

8. To blossom, as water; become full of some vegetable substance. See the quotation.

Nearly all the ponds, rivers, and lakes *work*, or what is generally called "blossom," some waters once and some twice during the summer months. A vegetable substance that grows on the bottom, and during the summer the seed or bloom, breaks loose from the bottom and floats in the water. The leaves of the blossoms are of the same weight as the water, so that some kinds do not come to the top and float, but float about in the water, giving the water a thick oily appearance. Very few fish are caught when the water is in blossom.

Seth Green.

To work at arm's length. See *arm's length*. — **To work at work.** See *case*. — **To work double tides.** See *tide*. — **To work free.** See *free*. — **To work off,** to be evacuated or eliminated, as poison from the system, by the bowels or kidneys. — **To work on or upon.** (a) To act or operate upon; exert a force or active influence upon; affect. (b) To rely on.

A mark, and a hope, and a subject for every sophister in religion to *work on*.
Donne, Letters, xc.

We were now at a great loss, not knowing what course to take, for we tempted him [an Indian] with Beads, Money, Hatchets, Wacchets, or long Knives; but nothing would *work on* him.
Dampier, Voyages, i. 13.

(b) To rely on.

"I schal, sire," seide the child, "for satisfliche y hope I may *worche on* your word to wite him fro harm."
William of Palerne (E. E. T. S.), i. 257.

To work with, to endeavor to influence, as with reasoning, entreaty, etc.; strive with in order to influence in some particular way; labor with.

I *wrought with* him in private, to divert him From your assur'd destruction, had he met you.
Beaumont and FL, Little French Lawyer, iii. 1.

= *Syn. Act, Work, etc. See act.*

II. trans. 1. To prepare by labor; manipulate: as, to *work soil* or clay.

Fate hande ydougnd moist and wel *ywrought* Onyons desire.
Palladius, Husbandrie (E. E. T. S.), p. 82.

A felle man in fight, fuerse on his enmys, And in battell full bigge, & myche hale a roght.
Destruction of Troy (E. E. T. S.), i. 3971.

Allas! wrecchis, what haue we *wrought*? To byggly blis we bothe wer brought.
York Plays, p. 30.

Than he taught hir ther a pley that she *wrought* after many tynes, for he taught hir to do come a grete river ouer all theras he liked.
Merlin (E. E. T. S.), ii. 312.

For our light affliction, which is but for a moment, *worketh* for us a far more exceeding and eternal weight of glory.
2 Cor. i. 17.

Changes were *wrought* in the parts
Bacon, Physical Fables, i. Expl.

Not long after there tell out an unexpected Accident, that suddenly *wrought* the Lords Confusion.
Baker, Chronicles, p. 110.

The emancipation is observed, in the islands, to have *wrought* for the negro a benefit as sudden as when a thermometer is brought out of the shade into the sun.
Emerson, West Indian Emancipation.

6. To put or set in motion or action: as, to *work one's fingers*.

The mariners all 'gan *work* the ropes, Where they were wont to do.
Coleridge, Ancient Mariner, v.

They are every one of them dead dolls, wooden, *worked* with wires.
Kinsley, Hypatia, xiii.

Nothing in a familiar manner to the coachman, as if any one of them would be quite equal to getting on the box and *working* the team down street as well as he.
T. Hughes, Tom Brown at Rugby, i. 5.

7. (a) To direct the action or movements of; manage; handle: as, to *work a sawmill*.

Mere personal valour could not supply want of knowledge in building and *working* ships.
Arbutnot.

(b) In music, to handle or treat (a voice part or a theme). — **8.** To bring by action or motion into some particular state, usually indicated by an adverb or adverbial adjunct, as *in, out, over, up, etc.* See phrases below.

Practise all things chiefly at two several times, the one when the mind is best disposed, the other when it is worst disposed; that by the one you may gain a great step, by the other you may *work out* the knots and stands of the mind.
Bacon, Advancement of Learning, ii. 286.

So the pure limpid stream, when foul with stains Of rushing torrents and descending rains, *Works* itself clear, and as it runs refines.
Addison, Cato, i. 6.

9. To manage or turn to some particular course or way of thinking or acting by insidious means; influence in some respect by plying with arguments, urgings, threats, bribes, etc.; prevail on or gain over; induce; persuade; lead: as, to *work the committee*; to *work the jury*.

There is noe hope that they will ever be *worked* to serve faithfully against their old friends and kinsmen.
Spenser, State of Ireland.

I will try his temper; And, if I find him apt for my employments, I'll *work* him to my ends.
Fletcher, Spanish Curate, v. 1.

The Clergy being thus brought on, on the nine and twentieth of April, the Cardinal came into the House of Commons, to *work* them also.
Baker, Chronicles, p. 270.

Many of the Jews were *wrought* into the belief that Herod was the Messiah.
Sir P. Broune, Vulg. Err., i. 3.

10. To excite by degrees; bring into a state of perturbation or passion; provoke; agitate.

Some passion That *works* him strongly.
Shak., Tempest, iv. 1. 141.

Sir Lucius has *wrought* me to it. He has left me full of rage—and I'll fight this evening, that so much good passion mayn't be wasted.
Sheridan, The Rivals, iv. 1.

11. To succeed in effecting, attaining, or making; win by labor; achieve: as, to *work a passage* through something.

Through winds and waves and storms he *works* his way.
Addison, Cato, i. 3.

Some months afterwards Amory made his appearance at Calcutta, having *worked* his way out before the mast from the Cape.
Thackeray, Pendennis, xxv.

We passed heavily laden junks slowly *working* their way upstream amidst what to any but the Chinese would have appeared insurmountable difficulties.
The Century, XLII. 729.

12. To endeavor; attempt; try.

By reason she was fast in the latch of our cable . . . she could not cleave her selfe as she *wrought* to do.
Quoted in Capt. John Smith's Works, II. 43.

13. To operate on, as a purgative or other drug; purge.

Every time it operates, it carries off a Distemper; but if your Blood is Wholesome, and your Body Sound, it will *work* you no more than the same quantity of Ginger bread.
Quoted in Ashton's Social Life in Reign of Queen Anne, [II. 106.

14. To ply one's trade, calling, vocation, or business in; carry on operations in or on: as, to *work a district* in canvassing for a publication. [Colloq.]

I've *worked* both town and country on gold fish. I've served both Brighton and Hastings.
Mayhew, London Labour and London Poor, II. 91.

As a general rule, the "casual ward" of a workhouse, so far from being the temporary refuge of deserving poor, is a place of rendezvous for thieves and prostitutes and other vagabonds of the lowest class, gangs of whom *work* allotted districts, and make their circuits with as much regularity as the Judges.

A. Doyle, quoted in Ribton-Turner's Vagrants and Vagrancy, p. 263.

The first day I started alone to explore the forest with gun and dog, leaving my friends to *work* the river.
Fortnightly Rev., N. S., XLIII. 632.

15. To exact labor or service from; keep busy or employed: as, he *works* his horses too hard.

Until the year 1820, the people [in Great Britain] had been forbidden to combine. Their only power against employers who *worked* them as many hours a day as they dared, and paid them wages as small as they could, who took their children and locked them up in unwholesome factories, was in combination, and they were forbidden to combine.
W. Besant, Fifty Years Ago, p. 80.

16. To solve: as, to *work a sum* in arithmetic or a problem in algebra. [Colloq.] — **17.** To cause to ferment: said of anything which is put into a liquid for that purpose. — **To work an observation.** See *observation*. — **To work a traverse.** See *traverse*. — **To work in.** (a) To intermix, as one material with another, in the process of manufacture or the like: weave or stir in; as, he *worked* the good yarn in with the bad. (b) To cause to enter or penetrate by repeated efforts: as, the wire was slowly *worked in*. — **To work into.** (a) To introduce artfully; insinuate: as, he easily *works* himself into confidence by

his plausibility. (b) To change or alter by gradual process or influence.

This imperious man will *work* us all From princes into pages.
Shak., Hen. VIII, ii. 2. 47.

To work off, to get rid of; free or be freed from or from the effects of: discharge; evacuate: as, to *work off* the effects of a debauch. — **To work one's passage,** to give one's work or services as an equivalent for passage-money.

To work one's will. See *will*. — **To work out.** (a) To effect or procure by continued labor or exertion; accomplish. (b) To work out your own salvation with fear and trembling.
Phil. ii. 12.

Who can hide, When the malicious fates are bent On *working* out an ill intent?
Wordsworth, The Waggoner, iv.

o lift your natures up; Embrace our aims: *work* out your freedom.
Tennyson, Princess, ii.

(b) To elaborate; develop; reduce to order; study out.

She [Italy] did not *work out* the basilican type for herself; she left it to others to do that for her, and consequently never perfectly understood what she undertook or why it was done.
J. Ferguson, Hist. Art, i. 428.

The minerals, which are now in the British Museum, were *worked out* by Mr. Davies of that establishment.
Amer. Jour. Sci., 3d ser., XLI. 406.

(c) To solve, as a problem.
Mal. M., Malvolio; M., why that begins my name—
Fab. Did not I say he would *work* it out?
Shak., T. N., ii. 5. 139.

(d) To erase; efface; remove.
Tears of joy, for your returning spite, *Work* out and expiate our former guilt.
Dryden, Astraea Redux, l. 275.

(e) To exhaust: as, to *work out* a mine or quarry. — **To work out a day's work** (naut.), to compute a ship's position from the course and distance sailed. — **To work the twig.** See *twig*. — **To work up.** (a) To excite; stir up; raise; rouse.

It is no very hard Matter to *work up* a heated and devout Imagination to the Fancy of Raptures and Ecstasies and Mystical Unions.
Stillingfleet, sermons, III. iii.

We cannot but tremble to consider what we are capable of being *wrought up* to, against all the ties of nature, love, honour, reason, and religion.
Steele, Tatler, No. 172.

They [the Moslems] *work* themselves up to such agonies of rage and lamentation that some, it is said, have given up the ghost from the mere effect of mental excitement.
Macaulay, Lord Clive.

(b) To use up in the process of manufacture or the like; expend in any work: as, we have *worked up* all our materials.

The industry of the people *works up* all their native commodities to the last degree of manufacture. *See* *up*.

(c) To expand; enlarge; elaborate: as, to *work up* a story or an article from a few hints.

We have read of "Handkerchief Moody," who for some years persisted in always appearing among men with his face covered with a handkerchief—an incident which Hawthorne has *worked up* in his weird manner into the story of "The Minister with the Black Veil."
H. B. Stone, Oldtown, p. 454.

(d) To master by careful study or research: as, to *work up* a theme. (e) To achieve or attain by special effort: as, to *work up* a reputation for one's self. (f) *Naut.* To discipline or punish by setting at an unnecessary or hateful job, like scraping the anchor-chain. Such a piece of work is called a *working up job*. — **To work water.** See the quotation.

Water is also frequently carried over from the boiler with the steam. When this occurs the boiler is said to prime, or to *work water*.
Forney, Locomotive, p. 170.

work (wɜrk), *n.* [*<* ME. *work*, *werk*, *wure*, *wore*, *were*, *wore*, *<* AS. *worc*, *worc*, *wice* = OS. OFries. D. *werk* = LG. *werk* = OHG. *werch*, *wereh*, MHG. *were*, G. *werk* = Icel. Sw. *verk* = Dan. *værk* = Goth. *ga-wunnuk*; cf. Gr. *ippon*, *work*; see *work*, *v.*] 1. Effort or exertion directed to the accomplishment of some purpose or end; expenditure of strength, energy, etc.; toil; labor; striving.

Fie upon this quiet life! I want *work*.
Shak., 1 Hen. IV., ii. 4. 118.

Man hath his daily *work* of body or mind Appointed.
Milton, P. L., iv. 638.

Here *work* enough to watch The Master work, and eat his Hints of the proper craft.
Browning, Rabbi Ben Ezra.

2. Opportunity of expending labor (physical or mental) in some useful or remunerative way, especially as a means of earning a livelihood; employment; something to do: as, to be out of *work*; to look for *work*. — **3.** That upon which one is employed or engaged, and in the accomplishment of which labor is expended or some operation performed; a task, undertaking, enterprise, or project.

If it would please Him whose *work* it is to direct me to speak such a word over the sea as the good old woman of Abel did over the wall in the like exigent.
N. Ward, Simple Colter, p. 33.

The great *work* of erecting a way of worshipping of Christ in church fellowship.
N. Morton, New England's Memorial, p. 160.

To her dear *Work* she falls; and, as she wrought,
A sweet Creation followed her hands.
J. Burton, *Psyche*, iii, 61.

4. Something accomplished or done; doing; deed; achievement; feat; performance.

Thei knowlechen wet that the *Workes* of Jesu Crist ben gode, and his *Workes* and his *Deeds* and his *Doctrines* by his *Gospelles* weren trewe, and his *Miracles* also trewe.
Mandeville, *Travels*, p. 134.

It is a damned and a bloody *work*;
The graceless action of a heavy hand,
If that it be the *work* of any hand.
Shak., *K. John*, iv, 3, 58.

A people of that beastly disposition that they performed the most secret *work* of Nature in publique view.
Purchas, *Pilgrimage*, p. 223.

Once more,
Act a brave *work*, call it thy last adventure.
B. Jonson, *Epigrams*, cxxiii.

It would be easy to multiply illustrations of the difference between . . . the philosophy of words and the philosophy of *works*.
Macaulay, *Lord Bacon*.

5. *pl.* In *theol.*, acts performed in obedience to the law of God. According to Protestant theology, such works would be meritorious only as they constituted a perfect and complete observance of the law; according to Roman Catholic theology, such works, if proceeding from grace and love, are so far acceptable to God as to be truly deserving of an eternal reward. See *supererogation*.

And gif I shal werke be here *werkis* to wyne me benene,
And for here *werkis* and for here wyt wynde to pync,
Thanne wrougte I vniwisly with alle the wyt that I here!
Piers Plowman (A), xl, 268.

For by grace are ye saved through faith: and that not of yourselves; it is the gift of God: not of *works*, lest any man should boast.
Eph. ii, 9.

6*pl.* Active operation; action.

Where pride, fulness of bread, and abundance of idleness set them on *work* against God.
Purchas, *Pilgrimage*, p. 41.

7. *Perment*: trouble. [*Rare.*]

Tokay and Coffee cause this *Work*
Between the German and the Turk.
Prior, *Alma*, iii.

8. That which is made or manufactured; an article, fabric, or structure produced by expenditure of effort or labor of some kind, whether physical or mental; a product of nature or art.

The *work* some praise,
And some the architect.
Milton, *P. L.*, i, 731.

Hence, specifically—(a) That which is produced by mental labor; a literary or artistic performance; a composition: as, the *works* of Addison; the *works* of Mozart. See *opus*.

You are rapid, sir, in some *work*, some dedication
To the great lord.
Shak., *T. of A.*, i, 1, 19.

No other Poet that I know of [save Ben Jonson], in those days, gave his Plays the pompous Title of *Works*; of which Sir John Suckling has taken notice in his Sessions of the Poets. . . . This puts me in mind of a Distick directed by some Poet of that Age to Ben Jonson:—
Pray, tell me, Ben, where does the myst'ry lurk?
What others call a Play, you call a *Work*;
which was thus answered by a Friend of his:

The Author's Friend thus for the Author says,
Ben's Plays are *Works*, when others *Works* are Plays.
Longbaine, *Eng. Dramatic Poets* (1691), p. 264.

When I contemplate a modern library, filled with new *works* in all the bravery of rich gilding and binding.

Levent, *Sketch-Book*, p. 165.

(b) An engineering structure, as a building, dock, embankment, bridge, or fortification.

And now ye Sarrasins have taken vp the stones of the same tumber and put them to the *workes* of their Muskey.
Sir R. Gough, *Polygraph*, p. 52.

I will be walking on the *works*.
Shak., *Othello*, iii, 2, 3.

Don Guzman, . . . who commanded the sortie, ought to have taken the *work* out of hand, and annihilated all therein.
Kingsley, *Westward Ho*, ix.

Frail were the *works* that defended the hold that we held with our lives.
Tennyson, *Defence of Lucknow*.

(c) Design; pattern; workmanship.

Ther ys a gret Cholis of fine gold of Curus *werke*.
Tuckington, *Diary of Eng. Travell*, p. 11.

Let the robe be three or five line inopals in the length of it, placed at equal distance, and the coloured windows of several *works*.
Bacon, *Building* (ed. 1873).

All his followers likewise were, in their faces in part or in whole, painted, . . . some with crosses and other antick *work*.
Moore's Journal, in *Appendix to New England's Memorial*, p. 355.

(d) Embroidery; ornamental work done with the needle; needlework.

I thought I have found this napkin.
. . . I'll have the *work* taken out.
And give it to you.
Shak., *Othello*, iii, 3, 396.

I never saw any thing prettier than this high *Work* on your Point Desperance.
Thackeray, *Man of Mode*, iii, 2.

9. An establishment for manufacturing, or for performing industrial labor of any sort; generally in the plural, including all the buildings, machines, etc., used in the required operations: as, iron-*works*; hence the plural is used as a collective singular, taking then a singular article: as, there is a large glass *works* in the town.

They have a Salt *Work*, and with that salt preserve the fish they take.
Capt. John Smith, *Gen. Hist. Virginia* (Arber's *Eng. Garner*, II, 285.)

Whereupon he got a patent of the king (Chap. 1.) for an allum *work* (which was the first that ever was in England), which was worth to him two thousand pounds per annum, or better.
Aubrey, *Lives* (Thomas Chaloner).

10. In *mech.*: (a) The product of a force by the component displacement of its point of application in the direction of the force; or, if this is variable, the integral of all successive infinitesimal such products for any motion of the point of application. The work is thus the same whatever be the velocity of the motion or the mass moved, so long as the force and the displacement are the same. Thus, if an electrified body is moved by an electrical force along a horizontal surface, the work is the same whatever the mass of the body moved. But if the same electrical force moves the body for the same distance but upward against gravity, less work on the whole is done, since the force of gravity undoes a part of the work which the electrical force performs. Negative work, or work undone, is also called *resistant work*, in contradistinction to *motor work*. The total work performed upon a particle is equivalent to the kinetic energy it gains; the total work undone, to the kinetic energy it loses. If a force is resisted by friction, the same amount of work is done as if it were not resisted; for, though the resultant force upon the mass moved is less by the amount of the friction, so that less work is done upon the mass as a whole, yet heat is produced and the particles receive displacements in the direction of the action of friction, the work of which makes up the balance. *Mechanical work* is work done in the displacement of sensible masses, as opposed to work done in the displacement of molecules. If a gun is shot off in a horizontal direction, a force is brought to bear upon the bullet, and in carrying this a certain distance work proportional to the acceleration is performed; at the same time, the heat of the confined gases is reduced by a proportional amount, and heat is said to be transformed into mechanical work.

We have thus arrived at the immensely important conclusion that no heat-engine can convert into *work* a greater fraction of the heat which it receives than is expressed by the excess of the temperature of reception above that of rejection divided by the absolute temperature of reception.
Encyc. Brit., XXII, 482.

(b) The negative of the work as defined above. In this sense a ball shot upward is said to do work by removing itself from the attracting earth. (Both these uses of the word *work* were introduced by Clausius, first in German.)

11. In *physics and chem.*, the production of any physical or chemical change. For example, if a body is heated, the effects are said to be the internal work of increasing the kinetic molecular energy—that is, increase of temperature—of change of volume, cohesive elasticity and the external work involved in its expansion, and hence overcoming the surrounding atmospheric pressure. An example of work in the chemical sense is that done when a chemical compound is decomposed, as by an electrical current in electrolysis. See further under *energy*, 7.

12. In *mining*, ores before they are cleaned and dressed.—13. *pl.* The mechanism or effective part of some mechanical contrivance, such as a watch.—14. Manner of working; management; treatment.

It is pleasant to see what *work* our adversaries make with this innocent canon: sometimes 'tis a mere forgery of heretics, and sometimes the bishops . . . were not so wise as they should have been.
Stillingfleet.

Accommodation works. See *accommodation*.—**Advanced works**, works placed beyond the covered ways and glacis of a permanent fortification, but in defensive relations with it. When placed beyond the range of small arms such works are termed *detached works*.—**Agra work**, an inlay of hard stones, such as agates and carnelians, and other costly materials in white marble, made at Agra in British India.—**Bareilly work**, woodwork decorated in black and gold lacquer, made in the Northwestern Provinces of India.—**Beaten work**. See *beaten*.—**Berlin work**, fancy work on canvas in Berlin woods or worsted.

Best work. See *best*.—**Bone-work**. Same as *bone-lace*.—**Carnul work**, decoration by means of lacquer painted with flowers in slight relief on a green ground, gold being freely used: from Carnul, or Kurnul, a town of India.—**Cashmere work**, a kind of metal-work in which copper or brass is deeply engraved, and the engraved lines are filled wholly or in part with a black composition like niello; small raised flowers of white metal are then applied to the surface in connection with the design engraved upon the body of the piece.—**Combed-out work**. See *combed*.—**Covenant of works**. See *covenant*.—**Damascene work**. See *damascene*.—**Day's work**. See *day*.—**Delhi work**, a variety of Indian embroidery distinguished by a free use of chain-stitch, usually in gold and silver mixed with colored silk on colored grounds.—**Dinged work**. See *dinged*.—**Drawn and cut work**, decorative work done upon fine linen or the like by cutting away parts and pulling out the threads in places: a kind of work often associated with embroidery. In the more elaborate sorts, a network of threads is fastened down upon a piece of linen lawn, the pattern is stitched (usually in buttonhole-stitch) upon the lawn, and after its completion the threads of the network and some of those of the lawn are pulled out and parts of the lawn cut away.

Embossed-velvet work. See *velvet*.—**External work**. See *internal work*, below.—**False work**. See *false*.

There are voices and a sound of tools, and we come to a wooden staging, or *false work*, and climb a short ladder, and stand close to the work among a group of workmen.
The Century, XXXIX, 221.

Fancy, fat, frosted work. See the adjectives.—**Gnarled work**. Same as *gnarled*.—**Granulated work**. See *granulated*.—**Hammered work**. See *hammered*.

Hiroshima work, fine decorative metal-work made in Japan, in which various ornamental appliances are combined. The name is derived from the town of Hiroshima, where much of the finest has been made.—**Holbein work**, a kind of embroidery done in modern times in imitation of decorative borders and the like shown in paintings of Holbein and other artists of his time. The design is in outline without filling in, and consists of borders and other patterns of slight scrolls, zigzags, etc. It is worked especially with thread on washable material, and has the advantage of showing alike on both sides.—**Honeycomb work**. See *honeycomb*.—**Incusted work**. See *incrust*.—**Internal work**, in *physics*, work done in or among the molecules of a body upon change of temperature, as in increasing their velocity, changing their relative position, etc.: contrasted with *external work*, that done against external forces as the body changes in volume.

—**Irish work**. See *Irish*.—**Lacertine work**. See *lacertine*.—**Laid work**. See *lay*.—**Lap-jointed work**. Same as *clinker work*.—**Lean, lump, madras, mechanical, meshed work**. See the qualifying words.—**Madra work**, embroidery in white thread upon lawn or cambric, made in the island of Madeira, and of remarkable fineness of execution.—**Morghyr work**, Indian decorative carving in black ebony, inlaid with ivory.—**Mcrabad work**, decorative work in metal in which two plates of different metals are soldered together and then engraved on one side in deep incisions, so as to show the one metal through the incisions in the other. In another variety the incisions are filled in with a black composition similar to niello.—**Mother-of-pearl work**. See *mother-of-pearl*.—**Mounted work**. See *mounted*.—**Mynpuri work**, an inlay of wood with brass and other metals similar in its character to bulli, practised in India in recent times.—**Mysore work**, decoration by painting in vivid opaque colors on a brilliant ground composed of translucent green lacquer laid upon tin foil.—**Niello work**. See *niello*.—**Nullled work**. See *null*.—**Out of work**. (a) Out of working order.

There rises a fearful vision of the human race evolving machinery which will by and by throw itself fatally out of work.
George Eliot, *Theophrastus Such*, xvii.

(b) Without employment: as, he was out of work and ill.—**Phrygian work**. See *Phrygian*.—**Pierced work**. See *pierced*.—**Pitched work**. See *pitched*.—**Plated string work**, pounced work, process work, public works. See *plated*, *pounced*, etc.—**Punctured work**. See *punctured*.—**Raised work**. See *raised*.—**Random work**. See *random*.—**Reisner work** [from its inventor, Reisner, a German of the time of Louis XIV.], a kind of inlaid cabinet-work in which woods of contrasted colors are employed, designs being formed in woods lighter or darker than the ground; marquetry.—**Reticulated work**. See *reticulated*.—**Rubbed work**. See *rub*.—**Russian-tapestry work**, rustic work, Saracenic work. See *Russian*, etc.—**Side of work**, in *coal-mining*. See *man-of-war*, 2.—**Sikh work**, decorative work done by the Sikhs of northern India, especially embossed work in thin copper done with the hammer and punch.—**Sindh work**, decoration produced by laying upon wood several strata of lacquer in different colors, and afterward cutting through the lacquer to various depths, as in engraving on onyx.—**Spanish work**, embroidery of simple character, such as that done upon pillow-cases and table cloths: a term of the seventeenth century.—**Spiritual and corporal works of mercy**. See *mercy*.—**Stamped work**. See *stamp*.—**Swedish work**. See *Swedish*.—**Tabular work**. Work**, *Labor*, *Toil*, *Drudgery*, occupation, exertion, business. *Work* is the generic term for exertion of body or mind: it stands also for the product of such exertion, while the others do not. *Labor* is heavier: the word may be qualified by strong adjectives: as, confinement at hard *labor*. We may speak of light *work*, but not of light *labor*. *Toil* is still heavier, necessarily involving weariness, as *labor* does not. *Drudgery* is heavy, monotonous *labor* of a servile sort.

All *work*, even cotton-spinning, is noble.

Carlyle, *Past and Present*, iii, 4.

He had been so far that he almost despair'd of getting back again; for a Man cannot pass thro' those red Mangroves but with very much *labour*.

Dampier, *Voyages*, I, 156.

With burden of our armour here we sweat.

This toil of ours should be a work of thine.

Shak., *K. John*, ii, 1, 93.

The every-day cares and duties which men call *drudgery* are the weights and counterpoises of the clock of time.

Longfellow, *Kavanagh*, xiii.

workability (wér-ka-bil'i-ti), *n.* [*< workable + -ity* (see *-ibility*).] Practicability; feasibility.

The *workability* of compulsory notification would depend on the general practitioners. *Lancet*, 1890, II. 21.

workable (wér'kə-bl), *a.* [*< work + -able.*] 1. That can be worked, or that is worth working; as, a *workable* mine; *workable* coal. The term *workable*, as applied to coal, has two meanings; one refers to the maximum limit of depth, the other to the minimum limit of thickness of the bed of beds. In the Report of the English Royal Commission appointed in 1866, the limit of workable depth was taken as 1,000 feet, that of thickness at 1 foot. But no coal has yet been worked to so great a depth as that, and it has only very rarely happened that a seam of less than 2 feet in thickness has been actually mined.

Clay . . . soft and *workable*. *Ascham*, *Toxophilus*, ii.

I apprehend that the Commissioners [the English of 1866] placed the limit of thickness as low as 12 inches because their inquiries were not in that connection directed to the question what amount of coal would ultimately be found commercially *workable*; it was the simple physical limits which they were chiefly regarding.

Marshall, *Coal: its Hist. and Uses*, p. 307.

2. Practicable; feasible: as, a *workable* scheme for lighting the streets.—3. Capable of being stirred or influenced.

These have nimble feet, forward affections, hearts *workable* to charity. *Rev. T. Adams*, *Works*, II. 410.

4. Capable of being set at work.

At the time of taking the last census there were very nearly seven millions of wives and children of a *workable* age still unemployed.

Mayhew, *London Labour and London Poor*, II. 358.

workableness (wér'kə-bl-nes), *n.* Practicableness; feasibility.

That fair trial which alone can test the *workableness* of any new scheme of social life. *J. S. Mill*, *Socialism*.

workaday (wér'kə-dā), *n.* and *a.* [Formerly also *workday*. Cf. *workday*.] 1. † *n.* A working-day.

Trade, I cashier thee till to-morrow; friend Onion, for thy sake I finish this *workday*.

B. Jonson, *Case is Altered*, iv. 3.

We find a great deference paid to Saturday Afternoon, above the other *work-days* of the Week.

Bourne's Pop. Antiq. (1777), p. 145.

II. *a.* Working-day; relating to workdays; plodding; toiling.

Your face shall be tann'd

Like a sailor's *work-day* hand.

Middleton and Rowley, *Spanish Gypsy*, iv. 1.

Work-a-day humanity.

Dickens, *Uncommercial Traveller*, iv.

This is a *workaday*, practical world, and . . . we must face things as they are. *The Century*, XXXIX. 630.

work-bag (wér'kə-bag), *n.* A small bag of some textile material, formerly carried by women, and used to contain their needlework. The term was often used for the reticule.

The lawful line of the pledged *work-bag* of the king's wife. *O'Curry*, *Anc. Irish*, II. xxiv.

work-basket (wér'kə-bás'ket), *n.* A basket used by women either to hold the implements for sewing, as needles, thread, scissors, or thimble, in which case the basket is small, or to hold partly made garments, articles needing repair, etc., for which use the basket is large and has a wide opening.

On the table is . . . Elizabeth's *workbasket*.

Rhoda Broughton, *Alas*, xxxiv.

work-box (wér'kə-boks), *n.* A box used by women to hold their materials for sewing and the needlework itself when not too bulky.

Here, lately shunt, that *work-box* lay.

There stood your own embroidery frame.

F. Locker, *The Castle in the Air*.

workday (wér'kə-dā), *n.* and *a.* [*< ME. werkday, werkedei, werkedei, werkedei, workday, working-day, < AS. weore-day (= G. werk-tag, werket-tag = lev. verketag); as work + day.*] I. *n.* A working-day; a week-day.

For a-pon the *workday*

Men be so byss in vche way,

So that for here occupyone

They lene myche of here denocoyne.

Myrc, *Instructions for Parish Priests* (E. E. T. S.), I. 1005.

II. *a.* Of or pertaining to a working-day or working-days.

Allow me my friends, my freedom, my rough companions, in their *work day* clothes. *Thackeray*, *Philip*, vi.

worked-off (wér'kə-ot'), *n.* In *printing*, noting a form of type from which a required edition has been printed.

worker (wér'kér), *n.* [*< ME. *worker, worcher; < work + -er.*] 1. One who or that which works; a laborer; a toiler; a performer; a doer.

False apostles, deceitful *workers*.

2 Cor. xi. 13.

Men, my brothers, men the *workers*, ever reaping something new:

That which they have done but earnest of the things that they shall do.

Tennyson, *Locksley Hall*.

With co-partnership between employer and employed, the *worker* would feel he was more nearly the equal of the capitalist.

N. A. Rev., CXLII. 615.

2. In *entom.*, the neuter or undeveloped female of various social hymenopterous and a few other insects, as bees, ants, and termites, which collect pollen, makes honey, builds or fabricates cells or a nest, stores up food, cares for the young, herds and milks the aphids kept as cows, and performs other services for the community of which it is a member. Among bees the worker is distinguished from the queen and the drone, or the perfect female and male. Among ants certain of the workers are specialized and specified as soldiers; these make war and capture slaves. See cuts under *Apis*, *Atta*, *Monomorium*, *Termites*, and *unbrella-ant*.

3†. Maker; erector.

And therfor in the *worker* was the vyce,

And in the covetour that was so nyce.

Chaucer, *Complaint of Mars*, l. 261.

4. In a carding-machine, one of the urechins, or small card-covered cylinders.—5. A leather-workers' two-handled knife, used in scraping hides.

worker-ant (wér'kér-ánt), *n.* A working ant. See *worker*, 2.

worker-bee (wér'kér-hē), *n.* A working bee. See *worker*, 2.

worker-bobbin (wér'kér-bob'in), *n.* In *lace-making*, one of the bobbins that are kept passing from side to side, as distinguished from a hanger-bobbin, the thread of which is left stationary while the other threads pass over and under it.

worker-cell (wér'kér-sel), *n.* One of the cells of a honeycomb destined for the larva of a worker-bee. Eggs are laid in these first, afterward in the drone-cells and queen-cells.

workfellow (wér'fel'ō), *n.* One engaged in the same work with another. *Rom.* xvi. 21.

work-folk, work-folks (wér'fok, wér'foks), *n. pl.* Persons engaged in manual labor; workpeople.

Oversee my *work-folks*,

And at the week's end pay them all their wages.

Fletcher (and another), *Noble Gentleman*, ii. 1.

workful (wér'fui), *a.* [*< ME. workful; < work + -ful.*] Full of activity and work; laborious; industrious. [Rare.]

You saw nothing in Coketown but what was severely *workful*.

Dickens, *Hard Times*, i. 5.

workgirl (wér'görl), *n.* A girl or young woman who works or is engaged in some useful manual employment.

There are men and women working perpetually for every other possible class, but none for the *workgirl*.

Nineteenth Century, XXII. 371.

In the establishment were seated nine *workgirls*.

Lancet, 1890, II. 951.

work-holder (wér'höl'dér), *n.* A device for holding a fabric in a convenient position for needlework. It consists usually of spring-jaws for holding the material, and a clamp for securing the holder to the edge of a table. Compare *sewing-bid*.

workhouse (wér'hous), *n.* [*< late ME. werke-house, AS. weore-hūs; as work + house.*] 1. A house in which work is carried on; a manufactory.

Protagenes . . . had his *workhouse* in a garden out of town.

Dryden, *Obs.*, on *Dufresnoy's Art of Painting*.

But, indeed, that which most surprised me in the Louvre was the *Attelier or Work-house* of Monsieur Gerardon; he that made Cardinal Richelieu's Tomb, and the Statua Equestris designed for the Place de Vendôme.

Lister, *Journey to Paris*, p. 43.

2. A house in which able-bodied paupers are compelled to work; a poorhouse. Under the old poor laws of England there was a workhouse in each parish, partaking of the character of a bachelors' house, where indigent, vagrant, and idle people were set to work, and supplied with food and clothing, or what is termed *indoor relief*. Some workhouses were used as places of confinement for rogues and vagabonds, who were there confined and compelled to labor; whilst others were large almshouses for the maintenance and support of the poor. In the United States the workhouses or poorhouses are sometimes under the charge of the county, sometimes under that of the town or township.

Our Laws have wisely determin'd that *Work-houses* are the best Ho-pitals for the Poor who are able to help themselves.

Stillington, *Sermons*, II. vii.

A miser who has amassed a million suffers an old friend and benefactor to die in a *work-house*, and cannot be questioned before any tribunal.

Macaulay, *Gladstone on Church and State*.

This poor old shaking body has to lay herself down every night in her *work-house* bed by the side of some other old woman with whom she may or may not agree.

Thackeray, *On some Carp at Sans Souci*.

workhouse-sheeting (wér'hous-she'ting), *n.* Stout twilled cotton cloth, used for the roughest service, and occasionally as a ground for embroidery.

working (wér'king), *n.* [*< ME. werking, werkyng, warkynge, worching; verbal n. of work,*

v.] 1. Action; operation: as, the *workings* of fancy.

Thei ben square and poynted of here owne kynde, bothe above and benethen, with outen *workinge* of mannes hand.

Manderly, *Travels*, p. 158.

For maunking they say a Woman was made first, which by the *working* of one of the gods conceived and brought forth children. *Quoted in Capt. John Smith's Works*, I. 95.

The *working* of my own mind is the general entertainment of my life.

Steele, *Spectator*, No. 4.

The proposition does not strike one; on the contrary, it seems to run opposite to the natural *workings* of causes and effects.

Stearns, *Tristram Shandy*, viii. 5.

The head which owns this bounteous fall of hazel curls is an excellent little thinking machine, most accurate in its *working*.

Charlotte Brontë, *Shirley*, xxxv.

2. Method of operation; doing.

At his *working* was but fraude and deceit.

Chaucer, *Canon's Yeoman's Tale*, l. 356.

3. Fermentation: as, the *working* of yeast.—4. *pl.* The parts of a mine, quarry, or open-work in which, or near which, mining or quarrying is actually being carried on. The abandoned portions of a mine are generally designated as "old workings," and in Cornwall as the "old man."

The men hurried from different parts of the *workings* to be out of the way of an impending blast.

Geddie, *Geol. Sketches*, i.

Close to the mouth of the Kennet, gravel has been extracted for many years, as shown by the old *workings*.

Quart. Jour. Geol. Soc., XLVI. 590.

5. The process which goes on in water when it blossoms. See *work*, *v.*, 1., 8.—**Batch-working**, in *telegr.*, a system of working in which every station in turn sends several (usually five or more) messages at a time, before giving place to another station.—**Closed-circuit working**, that method of operating telegraph-lines in which the battery-circuit is always closed throughout the line, except when broken by the operation of the sending-key during the transmission of messages.—**Double-current working**. See *double*.—**Line-current working**, that method of operation in which the receiving instruments on a telegraph-circuit are worked directly, without the intervention of a relay.—**Open-circuit working**, that method of operating a telegraph circuit in which the battery is not in contact with the line between messages.—**Open working**. Same as *openwork*, 3.—**Single working**, in *telegr.*, the sending of messages in one direction only at one time.—**Up-and-down working**, on a telegraph-circuit, the transmission of messages alternately between stations at the opposite ends of a line.

working (wér'king), *p. a.* [*Pr. of work, v.*] 1. Active; busy.

I know not her intent; but this I know,

He has a *working* brain, is minister

To all my lady's counsels.

Ford, *Love's Sacrifice*, iii. 2.

He was of a middle stature; strong set; curled hair; a very *working* head, in so much that, walking and meditating before dinner, he would eat up a penny loaf, not knowing that he did it. *Aubrey*, *Lives* (Thomas Fuller).

2. Engaged in physical toil or manual labor as a means of livelihood; laboring; as, *working* people. Compare *working-man*.—3. Connected with the carrying on of some undertaking or business; as, *working* expenses.

working-party (wér'king-pár ti), *n.* A party of soldiers told off for mechanical or manual work, as in the repair of fortifications, or the building of a causeway or a bridge.

working-plan (wér'king-plan), *n.* Same as *working-drawing*.

working-point (wér'king-point), *n.* In *mach.*, that part of a machine at which the effect required is produced.

working-rod (wér'king-rod), *n.* Same as *poutil*.
work-lead (wérk'led), *n.* [Tr. G. *werklei*.] In *metal*, the lead as it comes from the smelting-furnace, still containing a small percentage of impurities (to be removed by softening or refining) and the silver which the ore originally contained, and which is separated from the lead by patination. See *Pattinson process*, under *process* and subsequent cupellation. The word is the literal translation of German *Werkblei*, designating what is called in English (by Percy and others) *blast-furnace lead*.

workless (wérk'les), *a.* [*< work + -less.*] 1. Without work; not working; unemployed; as, a lazy, *workless* fellow. [Rare.]—2. Without works; not carried out or exemplified in works.

Ydle *worklesse* faith. *Sir T. More, Works*, p. 411.

workman (wérk'mán), *n.*; pl. *workmen* (-men). [*< ME. werkmán, werkmán, weremán, weorcman, < AS. (ONorth.) weorcman (= lecl. wearmathr), workman; as work + man.*] 1. A man who is employed in manual labor, whether skilled or unskilled; a worker; a toiler; specifically, an artificer, mechanic, or artisan; a handicraftsman.

Worthi is the *workman* his hure to hane.

Piers Plowman (A), ii. 32.

The work of the hands of the *workman* with the ax.

Jer. x. 3.

As a *work-man* never weary,
And all-sufficient, he his works doth carry
To happy end.

Sylvestre, tr. of Du Bartas's Weeks, i. 4.

As for matter to build with, they want none; no more do we *workmen*; many excellent in that Art, and those Christians, being inticed from all parts . . . to work in their Vnsenals.

Sandys, Travailes, p. 40.

2. In general, one who works in any department of physical or mental labor; specifically, a worker considered with especial reference to his manner of or skill in work—that is, *workmanship*—*Employers and Workmen Act*. See *employer*. *Master workman*. See *master*.—*Workman's* can'testick, a simple candlestick consisting of a horizontal stem pointed at one end to be driven into a wall, and supporting at the other end a nozzle or socket.

Hucknab's Voyages, iii. 304.

workmanly (wérk'mán-li), *a.* [*< workman + -ly.*] Skilful; workmanlike.

In most of the houses the roofes are covered with fine gold, in a very *workmanly* sort.

Belbe, Travels (ed. Arber), p. 33.

workmanly (wérk'mán-li), *adv.* [*< workmanly, a.*] In a skilful manner; in a manner worthy of a competent workman.

The chapel [in Calicut] is on every syde full of painted deuyls, and every corner thereof syteth a deuyll made of clappir, and that so *workmanly* handeled that he seemeth like to be a lye, miserably consuming the soules of men.

R. Edw. tr. of Sebastian Munster (First Books on America), ed. Arber, p. 17.

And at that sight shall all Apollo weep,
So *workmanly* the bloot and teares are drawn.

Shak., T. of the S., Ind., ii. 62.

A notable great cup of silver curiously wrought, with verses grauen in it expressing the histories *workmanly* set out in the same.

Hucknab's Voyages, i. 377.

workmanship (wérk'mán-ship), *n.* [*< ME. werkmanshipe; < work + -ship.*] 1. The art or skill of a workman; as, his *workmanship* was of a high order.—2. The execution or finish shown in anything made; the quality of anything with reference to the excellence or the reverse in its construction or execution.

A gorgeous girdle, curiously embost
With pearls and precious stone, worth many a marke;
Yet did the *workmanship* bare passe the cost.

Spenser, F. Q., IV. iv. 15.

The *workmanship* [of sculptures of Wells Cathedral] is comparatively coarse and sketchy, and far removed from the delicacy of French carving.

C. H. Moore, Gothic Architecture, p. 287.

3. The product or result of the labor and skill of a workman.

The mystere of the waxe, the only *workmanship* of the bonie Bee, was left to lighten the Catholike Church.

Guevara, Letters (tr. by Hellowes, 1577), p. 352.

What more reasonable than to think that, if we be God's *workmanship*, he shall set this mark of himself upon all reasonable creatures?

Tillotson.

workmaster (wérk'más'tér), *n.* 1. The author, designer, producer, or performer of a work, especially of a great or important work; a skilled workman or artificer.

What time this worlds great *Workmaister* did cast
To make all things such as we now behold.

Spenser, In Honour of Beautie, l. 29.

Thy desire, which tends to know
The works of God, thereby to glorify
The great *Work-master*, leads to no excess.

Milton, P. L., iii. 696.

2. A superintendent of work.

A rich *work-master*,
That never pays till Saturday night!

Maddelon, Women Beware Women, i. 1.

work-mistress (wérk'mis'tres), *n.* A female author, designer, producer, or performer of any work.

Dame Nature (the mother and *workmistresse* of all things).

Holland, tr. of Pliny, xxxi. l. (*Richardson*).

The word has taken on extended applications; the sense of 'the earth' is not found in AS.] 1t. An age of man; a generation.

If any Prince or Romane Consul did chaunce to make any lawe either necessarie or very profitable for the people, they did use for custome to intitule that law by the name of him that did inuent and ordeine the same, for that in the *worlds* to come it might be known who was the author thereof.

Guevara, Letters (tr. by Hellowes, 1577), p. 18.

2. Any state or sphere of existence; any wide scene of life or action; as, a future *world*; the *world* to come.

Yet tell me this, will there be no slanders,
No jealousies in the other *world*; no ill there?

Beau. and Fl., Philaster, iv. 3.

He tried each art, repoved each dull delay,
Allured to brighter *worlds*, and led the way.

Goldsmith, Des. Vil., l. 170.

3. The system of created things; all created existences; the whole creation; the created universe: a use dating from the time when the earth was supposed to be the center and sum of everything.

Par aventure se haue no3t iherde
How oure ladi went out of this *werde*.

King Horn (E. E. T. S.), p. 75.

For god that al by-gan in gynnynge of the *werde*,
Ferde furst as a fust, and gut is, as ich leyce.

Piers Plowman (C), xx. 112.

Prior, to Boileau Despreaux (1704).

2. To engage in discussion and disputation; argue, debate; hence, formerly, in some universities, to dispute publicly; defend or oppose a thesis by argument.

The Philosophers, as they scorn to delight, so must they be content little to moue; saving *wrangling* whether Vertue bee the chief or the onely good, whether the contemplative or the active life doe excell.

Sir P. Sidney, Apol. for Poetrie (ed. Arber), p. 41.

Then, in the scale of reasoning life, 'tis plain,
There must be, somewhere, such a rank as man:
And all the question (*wrangle* e'er so long)
Is only this, if God has placed him wrong.

Pope, Essay on Man, i. 49.

=*Syn.* 1. To bicker, spar, jangle. See *quarrel¹*, *n.*
II. *trans.* To contest or dispute, especially in the usually brawling manner of the schools.

wrangle (rang'gl), *n.* [*< wrangle, v.*] An angry dispute; a noisy quarrel.

I have found the court of assistants usually taken up in little *wrangles* about coachmen, and adjusting accounts of meal and small-beer.

Swift, Proposal for giving Badges to Beggars.

=*Syn.* *Squabble*, *Altercation*, etc. (see *quarrel¹*), controversy.

wrangler (rang'glér), *n.* [*< wrangle + -er¹*.] 1. One who wrangles or disputes; a debater; especially, an angry or noisy disputant.

True, true, ever at odds: They were the common talke of the towne for a paire of *wranglers*.

Brome, Sparagus Garden, i. 1.

You should be free and pleasant in every answer and behaviour, rather like well-bred gentlemen in polite conversation than like noisy and contentious *wranglers*.

Watts, Improvement of Mind, l. xiii. § 20.

I burn to set th' imprisonment of *wranglers* free,
And give them voice and entrance once again.

Cooper, Task, iv. 34.

As thy great men are fighters and *wranglers*, so thy mighty things upon the earth and sea are troublesome and intractable incubraunces.

Landor, Imag. Conv., Diogenes and Plato.

2†. A stubborn opponent or adversary.

Tell him he hath made a match with such a *wrangler*
That all the courts of France will be disturbed
With chaires.

Shak., Hen. V., i. 2. 264.

3. In Cambridge University, one who has attained the first class in the elementary division of the public examination for honors in pure and mixed mathematics, commonly called the *mathematical tripos*, those who compose the second rank of honors being designated *senior optimes*, and those of the third order *junior optimes*. The student taking absolutely the first place in the mathematical tripos used to be called the *senior wrangler*, those following next in the same division being respectively termed *second*, *third*, *fourth*, etc., *wranglers*. But in the final examination now, to which only wranglers are admitted, the names are arranged in divisions alphabetically. The name is derived from the public disputations in which candidates for degrees were until recent times required to exhibit their powers. Compare *tripos*.

Mauie was senior *wrangler* and senior medallist at Cambridge, and is a lawyer. *Greville*, Memoirs, Jan. 2, 1831.

wranglership (rang'glér-ship), *n.* [*< wrangler + -ship.*] In Cambridge University, the position or rank of a wrangler.

wreathe (rēth), *v.*: pret. and pp. *wreathed* (pp. also *wreathen*), pp. *wreathing*. [Also *wreath*; < ME. *wrethan*; < *wreath*, *n.*] I. *trans.* 1. To twist; form by twisting.

Of them the shepherd which hath charge in chief
 Is Triton, blowing loud his *wreathed* horn.
Spencer, Colin Clout, I. 215.
 Two chains of pure gold . . . of *wreathen* work.
Edw. xviii. 14.

An adder
 Wreathed up in fatal folds.
Shak., Venus and Adonis, I. 879.
 And in the world's ship, with a well-wreath'd cord,
 They straitly bound me. *Chapman*, Odyssey, XIV. 185.

They killed a man which was a first borne, *wreathing*
 his head from his body, and embowing the same with
 salt and spices. *Parchon*, Fitzhugh, p. 157.

2. To writhe; contort; distort.
 Then walks off in lurch-like, and stands *wreathed*,
 As he were pinned up to the air by thine.
Edw. xiv. 14.
 Impetuous of the wound,
 He rolls and *wreathes* his shrunken body round
Go. Rural sports, i.

3. To form into a wreath; adjust as a wreath or circularly; cause to pass about something.

About his neck
 A green and gilded snake had *wreathed* itself.
Shak., As you Like it, iv. 3. 109.
 Then he found a door
 And darning felt the sculptured ornament
 That *wreathen* round it made it seem his own.
Tennyson, Metlin and Vivien.

4. To form or make by intertwining; also, to twist together or intertwine; combine, as several things into one, by twisting and intertwining.

From his slack hand the garland *wreathed* for Eve
 Down dropp'd.
Milton, P. L., ix. 892.

5. To surround with a wreath or with anything twisted or twined; infold; twist, twine, or fold round.

Each *wreathed* in the other's arms.
Shak., Tit. And., ii. 3. 25.

Dusk faces with white silken turbans *wreathed*,

II. *intrans.* 1. To take the form of a wreath; hence, to mingle or interlace, as two or more things with one another.

A bow'r
 of *wreathing* trees.
Dryden, tr. of Virgil's Eclogues, ix. 85.

2. In *milling*, to hug the eye of the millstone so closely as to retard or prevent its descent: said of flour or meal.

wreathen (rē'thū), *p. a.* [*<* ME. *wrethen*, var. of *writen*, pp. of *writhe*: see *writen*. In present use *wreathen* is regarded as a poetical form for *wreathed*, pp. of *wreath*, *v.*] Wreathen: twisted; specifically, in *her.*, having many coils or circular curves, as a serpent when the body is coiled in different parts of its length.

The hegg also . . .
 With sicamour was set and eglare
 Wreathen in fere so wcl and cunningly.
Flower and Leaf, I. 57.

wreather (rē'thēr), *n.* One who or that which wreathes, twists, or twines.

Wreather of poppy buds and weeping willows!
Keats, Sleep and Poetry.

wreath-shell (rēth'shel), *n.* Any member of the *Turbinidae*, and especially of the genus *Turbo*. The species are numerous, and some of them highly ornamental when polished. See cuts under *Turbo*, *Turpator*, and *apertum*.

wreathy (rē'thi), *a.* [*<* *wreath* + *-y*.] 1. Twisted; curled; spiral. *Sir T. Browne*.—2. Surrounded or decked with a wreath or with something resembling a wreath.

Shake the *wreathy* spear.
Dryden, Æneid, iv. 438.

wrecchet, wrecchedt. Middle English forms of *wreath*, *wreathed*.

wrechet, *n.* See *wrecked*.

wreck¹ (rek), *n.* [*<* ME. *wrak*, *wrec*, *wrec*, < AS. *wrac*, expulsion, banishment, exile, misery (= D. *wrak*, *wreck*, = *leel*, *rek* (for *rak*), also *reki*, anything drifted or driven ashore. = Sw. *wrak*, refuse, trash, *wreck*, = Dan. *wrag*, *wreck*), < *wreccan* = *leel*, *reka*, etc., drive: see *wrak*, and cf. *wrak*, a doublet of *wreck*.] 1. The destruction, disorganization, disruption, or ruin of anything by force and violence; dilapidation: as, the *wreck* of a bridge; the *wreck* of one's fortunes.

Hence grew the general *wreck* and massacre.
Shak., I Hen. VI., i. 1. 135.

The *wreck* of matter and the crush of worlds.
Addison, Cato, v. 1.

2. That which is in a state of wreck or ruin, or remains from the operation of any destroying agency: as, the building is a mere *wreck*; he is but the *wreck* of his former self.

But still the brave old soul held on, making the most
 of the *wreck* of life, now drifting alone to the Islands of
 the Blessed. *Theodore Parker*, Historic Americans, vi.

Naught remains the saddening tale to tell,
 Save home's last *wrecks*. The cellar and the well!
G. W. Holmes, Island Ruin.

3. The partial or total destruction of a vessel at sea or in any navigable water, by any accident of navigation or by the force of the elements; shipwreck.

Go, go, begone to save your ship from *wreck*,
 Which cannot perish, having thee on board.
Shak., T. G. of V., i. 1. 156.

4. A vessel ruined by wreck; the bulk and spars, more or less dismembered and shattered, of a vessel cast away or completely disabled by breaching, staving, or otherwise breaking.

In the statute of Westminster the first [3 Edw. I., c. 4], the time of limitation of claims given by the charter of Henry II. is extended to a year and a day, . . . and it enacts that, if a man, a dog, or a cat escape alive, the vessel shall not be adjudged a *wreck*. *Blackstone*, 4 com., i. viii.

5. That which is cast ashore by the sea: shipwrecked property, whether a part of the ship or of the cargo; wreckage; in *old Eng. common law*, derelict of the sea cast upon land within the body of a country, and not in the possession of the owner or his agents. *Wreck*, or more fully *wreck of the sea*, was at common law applied only to wrecked property cast by the sea upon the land; and this included things grounded—that is, not floating at the time of seizure, although in a position where the tide would float them again. All such property was originally the perquisite of the crown, or of its tenant the lord of the manor; but in course of time an exception was made of wrecks from which any living thing escaped to land, in which case a presumption that an owner would appear arose and the property was preserved for a year and a day, after which if no claim was established the right of the crown was recognized. Wrecked matter floating was within the jurisdiction not of the common-law courts, but of admiralty, and known as *derelict*, or *derelict of the sea*. This too was a perquisite of the crown, claimed under the name of a *droit of admiralty*. Such matter was classed as *flotsam*, *jetsam*, and *lagam* or *lignam* (which see). In the United States the right to derelict for which the owner does not appear is in the Federal government; the right to wreck for which he does not appear is in the State to whose coast it comes, subject usually in either case to the right of the rescuer of it to a compensation known as *salvage*.

6. Seaweeds cast ashore by storms; wrack.—Commissioners of wrecks (in Maine, Massachusetts, and Rhode Island), receivers of wrecks (in Great Britain), wreck-masters (in New York and Texas), officers whose duty it is to take charge of wrecked property on the part of the coast for which they are appointed, and preserve it for the owner, or, if unclaimed, for the state.—Wreck commissioner, in Great Britain, one of a tribunal consisting of not more than three, appointed by the lord chancellor, under the Merchant Shipping Act, 1876 (39 and 40 Vict., c. 80), for the purpose of investigating shipping casualties.

wreck¹ (rek), *v.*: pret. and pp. *wrecked*, pp. *wrecking*. [*<* *wreck*, *n.*] I. *trans.* 1. To cause the wreck of, as a vessel; suffer to be ruined or destroyed in the course of navigation or management: said specifically of the person under whose charge a vessel is at the time of its wreck, and usually implying blame, even in case of misfortune.

Friends, this frail bark of ours, when sorely tried,
 May *wreck* itself without the pilot's guilt,
 Without the captain's knowledge.
Tennyson, Aymer's Field.

2. To cause the downfall or overthrow of; ruin; shatter; destroy; bring into a disabled or ruinous condition by any means: as, to *wreck* a railroad-train or a bank; to *wreck* the fortunes of a family.

Weak and envy'd, if they should conspire
 They *wreck* themselves, and he hath his desire.
Daniel, Civil Wars, iii. 17.

The meeting-houses of the Dissenters were everywhere
wrecked.
Lecky, Eng. in 18th Cent., i.

3. To involve in a wreck; imperil or damage by wreck: as, a *wrecked* sailor; *wrecked* cargo.

Here I have a pilot's thumb,
 Wreck'd as homeward he did come.
Shak., Macbeth, i. 3. 29.

The spurious tea men are also the buyers of *wrecked* tea—that is, of tea which has been part of the salvage of a *wrecked* vessel.

Mayhew, London Labour and London Poor, II. 151.

Like golden ripples lasting to the land
 To *wreck* their freight of sunshine on the strand.
Lowell, Legend of Brittany, i. 33.

II. *intrans.* To suffer wreck or ruin. [Rare.]

Rocks, whereon greatest men have oft *wreck'd*.
Milton, P. R., ii. 228.

wreck² (rek), *v.* and *n.* An obsolete form of *wreck*.

wreckage (rek'āj), *n.* [*<* *wreck* + *-age*.] 1. The act of wrecking, or the state of being wrecked.

Wreckage and dissolution are the appointed issue.
Carlyle, French Rev., II. v. 2.

2. That which remains of or from a wreck of any kind; wrecked material in general.

Only a few years ago, the procession of the fat ox remained . . . a real piece of *wreckage* from vanished civilizations.
Pop. Sci. Mo., XXII. 247.

Littered above the pavement with the *wreckage* and refuse of the market. *W. Besant*, Fifty Years Ago, p. 61.

wreck-chart (rek'chärt), *n.* A chart showing the location and date of wrecks on any coast, as an aid in avoiding them or as a guide in searching for them.

wrecker (rek'ēr), *n.* [*<* *wreck* + *-er*.] 1. A person who purposely causes a wreck or wreck-

age of any kind, or a person who commits depredation upon such wreckage. Specifically—(a) One who lures a ship to destruction on a dangerous coast by false lights or signals, or otherwise, for the purpose of plunder, or one who makes a business of watching for and plundering wrecked vessels. Such wreckers formerly abounded in many parts of the world, sometimes including whole communities in favorable localities.

Those mad days of the Buccaneers and their nominally more respectable descendants, the *Wreckers*, are gone.

Amer. Jour. Psychol., 11, 522.

(b) One who causes the wreck or ruin of anything; one who lays snares or uses artful or dishonest means to cause physical, financial, or moral wreckage; as, a train-wrecker (on a railroad); a bank wrecker; the wrecker of another's character.

2. A person employed in recovering wrecked or disabled vessels, or cargo and other property from such vessels, on account of the owners, underwriters, or other persons legitimately concerned; also, a vessel employed in this service.

wreck-fish (rek'fish), *n.* The stone-bass, cernier, cherna, or cherne, *Polyprion cernium*. See *Polyprion*, and cut under *stone-bass*.

wreck-free (rek'frē), *a.* Exempted from the forfeiture of shipwrecked goods and vessels. This privilege was granted to the Cinque Ports by a charter of Edward I.

wreckful (rek'fūl), *a.* [*< wreck* + *-ful*. Cf. *wrackful*.] Causing wreck; producing or involving destruction or ruin. [Archaic and poetical.]

The southern wind with brackish breath
Dispersed them [the ships] all amongst the *wreckful* rocks.
Marlowe and Nashe, Tragedy of Dido, i. 2.

O, how shall summer's honey breath hold out
Against the *wreckful* siege of battering days?
Shak., *Sonnets*, lxx.

A summer mere with sudden *wreckful* gusts
From a side-gorge, *Tennyson*, *Harold*, iii. 1.

wrecking-car (rek'ing-kär), *n.* A car provided with means and appliances for clearing wreckage or other obstructions from a railroad-track. Sometimes it is a long platform-car fitted with a small derrick and a house at one end. [U. S.]

wrecking-instrument (rek'ing-in'strūmēt), *n.* Same as *pocket-relay*.

wrecking-pump (rek'ing-pūmp), *n.* A special steam-pump of great capacity, used in freeing sunken or damaged vessels from water.

wreck-master (rek'mās'tēr), *n.* 1. A person appointed by law to take charge of goods, etc., cast ashore from a wreck. See under *wreck*, *n.*—2. A person appointed by owners or salvors to take charge of a wrecked ship or cargo.

wreck-wood (rek'wūd), *n.* Wood or timber from wrecked vessels.

There stood upon it, in these days, a single rude house
of uncemented stones, approached by a pier of *wreckwood*.
R. L. Stevenson, *Memoirs of an Islet*.

Wredin's test. Absence of a certain gelatinous matter from the middle ear of the fetus, taken as evidence that a child has breathed and therefore had been born alive.

wren (ren), *n.* [Also dial. *uran*; *< ME. uranne, uranne*, a wren, *< AS. urenna, urenna*, a wren.] A very small migratory and insectivorous singing-bird of Great Britain and other European countries, with a slender bill and extremely short tail, and of dark reddish-brown coloration varied with black, inhabiting shrubbery, and belonging to the family *Troglodytidae*; hence, any member of this family, and, with a qualifying term, one of various other small birds of different families, as certain warblers, kinglets, etc. See the phrases below. *Wren* originally specified the bird technically known as *Sylvia troglodytes*, *Troglodytes parvulus*, *T. vulgaris*, *T. europaeus*, *Anthus troglodytes*, *A. communis*, etc., the only member of its genus and family found in Europe. It is only about four inches long, very active and sprightly, with a pleasing song at times, and a characteristic habit of carrying the short tail cocked up. This little bird figures extensively in English folklore, and has a host of local, provincial, or familiar names with *wren* expressed or implied, as *bobby*, *catty*, *kitty*, *jenny*, *sally*, *scatty*, *tiddy*, *tidley*, *titty*, *also our Lady of Heaven's hen*, etc. This wren is a northerly type, and one of several species of the restricted genus *Troglodytes* (or *Anthus*), as *T. frontatus* of Japan, *T. alascensis* of Alaska, and the well-known winter wren of North America, *T. hiemalis*, which is so near the English wren as to be by some naturalists regarded as only a variety. (See cut under *Troglodytes*.) In the United States the commonest wren, and the one which plays the part taken by the English wren in Europe, is the house-wren, *T. aedon* or *T. domesticus*, which abounds in most parts of North America, from the Atlantic to the Pacific, runs into several geographical races, and is represented in Mexico and warmer parts of America by several other varieties or congeneric species. The common house-wren in settled districts attaches itself closely to man, and nests by preference in nooks and crannies of outhouses, though it is more retired and wood-loving in other regions. It trills a hearty and voluble song, and lays numerous (from 6 to 10) pinkish-

white eggs very heavily spotted with brown, in the large mass of rubbish which it carries into its hole for a nest. This wren is migratory, and in many parts of the United States its presence is complementary to that of the winter wren. Certain wrens of North America, of the genus *Catantopus* (and its section *Telmatopteryx*), inhabit marshes and low wet shrubbery, and are known as *marsh-wrens*. (See the generic names, *marsh-wren*, and *tule-wren*.) Various others, chiefly of southern regions of the United States, and thence southward, as the great Carolina and Bewick's, are of the genus *Thryothorus* (which see, with cut). Others are the rock-wrens, canyon-wrens, and cactus-wrens, of the genera *Salpinctes*, *Catherpes*, and *Campylorhynchus*. (See the compound and technical names, with cuts.) All these belong to essentially Neotropical types, which have but few outlying forms in the United States, though richly represented by very numerous species of various genera in the warmer parts of America (as those above named, *Thryophilus*, *Uropelia*, *Hemicorhina*, *Cyporhynchus*, and *Microceredus*). The wrens above noted are all properly so called *Troglodytidae*; with the exceptions named, they are all American. The qualified application of *wren* to various small birds of both hemispheres, including some of other families than *Troglodytidae*, is given in the phrases following.

The poor *wren*,
The most diminutive of birds, will fight,
Her young ones in her nest, against the owl.
Shak., *Macbeth*, iv. 2. n.

(b) *Crotopala leucogaster*, of Oaxaca and Tamaulipas in Mexico, originally described by J. Gould in 1836 as *Troglodytes leucogaster*, a name subsequently misused to denote the white-bellied wren (a).—**White-breasted wren**, *Hemicorhina protholena*, of Central America.—**White wren**, the willow-warbler, *Phylloscopus trochilus*. [Eng.]—**Winter wren**. See def., and cut under *Troglodytes*.—**Yellow wren**, the willow-warbler, *Phylloscopus trochilus*, and the wood-warbler, *P. sibilatrix*. See cut under *wood-wren*. [Eng.] (See also *cactus-wren*, *canyon wren*, *marsh-wren*, *reed-wren*, *tule-wren*, *willow-wren*, *wood-wren*.)

wren-babbler (ren'bab'ler), *n.* A babbler of small size or otherwise resembling a wren; indiscriminately applied to various such timeline birds. See *Aleippe*, 2, *babbler*, 2, *hill tit* (under *tit*), *hill-wrens* (under *wren*), *tit-babbler*, and *Timelia*, with various cuts.

wrench (rench), *n.* [Also dial. *urinch*; *< ME. wrench, wrenche*, also unassimilated *wrenk, wrenke, wrink*, *< AS. wrenc, wrenec*, guile, fraud, deceit (the orig. physical sense being preserved in mod. E., but not recorded in ME. and AS.), = MHG. *raue*, quick movement, motion, G. *runk*, trick, artifice, intrigue, G. dial. also crookedness; from the root of *wring*; cf. mod. E. *wrong*, *u.* and *n.*, in the metaphorical senses, ult. from the root of *wring*.] 1. A crooked or tortuous action; a fraudulent device; a trick; a deceit; a stratagem.

His wily *wrenches* thou ne mayst nat flee.

Chaucer, *Canon's Yeoman's Tale*, l. 70.

For it lodes a man with *wrenches* and wyles,

And at the last it hym begyles.
Hampole, *Prick of Conscience*, l. 1390, quoted in *Religious Pieces* (L. E. T. S. 4, p. 105).

2. A violent twist or turn given to something; a pulling away; a sudden twisting out of shape, place, or relation; used of both material and immaterial things; as, to sprain one's foot by a *wrench*; the change was a great *wrench* to his feelings.

If one straine make them not confess, let them be stretched but one *wrench* higher, and they cannot be silent.
Sp. Hall, *The Ark and Dagon*.

There are certain animals to whom tenacity of position is a law of life—they can never flourish again after a single *wrench*.
George Elsd, *Mill on the Floss*, iii. 1.

I might chance give his meaning a *wrench*,
He talking his patois and I English-French.
Lowell, *Black Preacher*.

3. A sharp turn; specifically, in *courseing*, the turning of a hare at less than a right angle. *Eucyde*, *Brit.*, VI, 515.—4. In *mathematical physics*, a force, or variation of force, tending to give a body a twist about an imaginary or real screw.—5. A tool consisting essentially of a bar of metal having jaws at one end

Wrenches.

a, machinists' wrench; *b*, wagon-wrench; *c*, socket wrench for bit-stock; *d*, socket-wrench with cross handle, also called *key* wrench; *e*, pipe-wrench; *f*, combination wrench; *g*, monkey wrench.

adapted to catch upon the head of a bolt or a nut, or to hold a metal pipe or rod, so as to turn it. Some wrenches have a variety of jaws to suit different sizes and shapes of nuts and bolts, and others, as the monkey-wrench, have an adjustable inner jaw.

6†. Means of compulsion. [Rare.]

He . . . resolved to make his profit of this business . . . of Naples as a *wrench* and means for peace.
Bacon, *Hist. Hen.* VII, p. 90.

wrench (rench), *v.* [*< ME. wrenchen*, *wrench*, twist, turn, *< AS. wrencan*, deceive, = MHG. *renken*, G. *(ver)renken*, dislocate, twist, sprain; from the noun.] I. *trans.* 1. To twist or turn about with effort or violence; give a sudden twist to; hence, to distort; pervert; turn awry.

Now there can not be in a maker a fowler fault then . . . to *wrench* his words to help his time.
Puttenham, *Arte of Eng. Poetrie*, p. 67.

I am well acquainted with your manner of *wrenching* the true cause the false way. *Shak.*, 2 *Hen. IV.*, n. l. 129.

2. To injure or pain by a twisting action; produce a distorting effect in or upon; distort; sprain; as, to *wrench* one's ankle.

Through the space
of twelve ensuing days his frame was *wrenched*,
Till nature rested from her work in death.
Wordsworth.

3. To pull or draw with torsion; extract by twisting or tortuous action; hence, to wrest forcibly or violently.

Wrench his sword from him. *Shak.*, *Othello*, v. 2, 288.
To *wrench* it [a fixed opinion] out of their minds is hardly less difficult than pulling up an oak.
Hamlet, *Seven Gables*, xvi.

II. *intrans.* To have or undergo a wrenching motion; turn twistingly. [Rare.]

Let not thy venturesome Steps approach too nigh
Where, gaping wide, low steep Cellars lie;
Shouldst thy Shoe *wrench* aside, down, down you fall,
And overturn the scolding Hucker's Stall.
Gay, *Trivia*, iii. 123.

wrench-hammer (rench'ham'ēr), *n.* A hammer fitted with a movable jaw so that it can also serve as a spanner.

wrench-handle (rench'ham-dl), *n.* A double-armed wrench for use with dies in cutting threads and similar work. *E. H. Knight*.

wrenning (ren'ing), *n.* [*< wren* + *-ing*.] The act or sport of stoning a wren to death on St.

Stephen's day, in the north of England, in commemoration of the martyrdom of the saint.

wrenning-day (ren'ing-dā), *n.* St. Stephen's day, on which wrenning is practised in the north of England.

wren-tit (ren'tit), *n.* A bird, *Chamaea fasciata*, peculiar to California, of uncertain relations, usually made the type and sole member of a family *Chamaetidae*; so called from its uniting, to some extent, the habits of a wren and of a titmouse. It is about 6 inches long, with very short rounded wings, a long tail, the back somewhat like that of a titmouse, the plumage remarkably soft and loose, of a dark-brown color, paler below, and the eye white. See *Chamaea* (with cut). Also called *ground tit*.

wrest (rest), *v.* [*< ME. wrecsten, wrasten, wrasten, < AS. wræstan, twist forcibly (cf. AS. wræst, firm, strong, = Icel. vrista, wrest; cf. Dan. vrists, wrest); prob., with formative -t (-tht > -st), < writhan (pret. wrāth), writhe, twist; see wrathe, and cf. wrath.* Cf. also *wrist, wrestle.*] **I. trans.** 1. To twist or turn; especially, to deflect, as from the existing or normal state, character, course, or significance: now used chiefly of immaterial things.

And finally he gan his herte *wrest*
To trusten hire, and tok it for the beste.
Chaucer, Troilus, iv. 1427.

Wrest once the law to your authority:
To do a great right do a little wrong.

More than your enemies.
Shak., As you Like it, i. 2. 266.

Each one may here a choosir be,
For room ye need not *wrestle*.
Dragon, Nymphidia.

Hence—3. To contend in any way, as in a struggle for mastery; maintain opposition or resistance, especially against a moral foe or force; strive.

I persuaded them, if they loved Benedick,
To wish him *wrestle* with affection,
And never to let Beatrice know it.
Shak., Much Ado, iii. 1. 42.

Put on the whole armour of God that ye may be able to stand against the wiles of the devil, for we *wrestle* not against flesh and blood but against spiritual wickedness.
Eph. vi. 12.

'Twill be some pleasure then to take his Breath,
When he shall strive, and *wrestle* with his Death.
Cowley, Davideis, i.

4. To deal, as with a troublesome duty; apply one's self vigorously; grapple; as, to *wrestle* with a knotty problem; to *wrestle* with a distasteful task. [*Colloq.*]—5. Hence, to devote one's self earnestly to prayer; pray. [*Cant.*]

My reverend Clergy, look ye say
The best of thanksgiving ye ha'e,
And *wrestle* for a sunny day.
Scott, Carle, now the King's Come, ii.

II. trans. 1. To contend with in wrestling; as, I will *wrestle* you for so much. [*Colloq.*]—2. On a cattle-range, to throw for the purpose of branding, as an animal. [*Slang, western U. S.*]

T. Roosevelt, The Century, XXXV. 861.

wrestle (res'li), *n.* [*Also dial. wrastle; < wrestle, v.*] A bout at wrestling; a wrestling-match.

Corinens, . . . whom in a *wrestle* the giant catching aloft, with a terrible hugg broke three of his ribs.
Milton, Hist. Eng., i.

If he had gone out for a few days with his sinewy cousins in the country, and tried a *wrestle* with one of them, he would have quickly found that his body was a pretty slim affair.
Tribune Book of Sports, p. 5.

wrestler (res'ler), *n.* [*< ME. wrastlar, wrestler; < wrestle + -er.*] 1. One who wrestles; specifically, one who makes a practice of wrestling, as a professed athlete.

Was not Charles, the duke's *wrestler*, here to speak with me?
Shak., As you Like it, i. 1. 94.

2. One who wrestles cattle on a range. [*Slang, western U. S.*]

The calf-wrestlers, grimy with blood, dust, and sweat, work like beavers. *T. Roosevelt, The Century, XXXV. 861.*

wrestling (res'ling), *n.* [*Verbal n. of wrestle, v.*] The act of trying to throw another person to the ground; the act of two persons contending which shall throw the other to the ground and overpower him. Wrestling, as a game subject to special rules, is of great antiquity. It was held in high esteem by the Greeks, and their youth were taught it by special masters as part of the public education. In its highest and simplest form it was the fifth of the five tests of the pentathlon. In this contest the wrestlers wrestled standing and naked, any hold being allowed, and three falls constituting victory. Wrestling, in combination with boxing, formed the arduous and dangerous contest known as the *pancratium*—a contest much more resembling a fight to a finish than an athletic contest. A third form of wrestling, which does not seem to have come down to modern times, consisted in interlocking the fingers, pushing the palms of the hands together, and twisting the joints and wrists, without the assistance of any other member or of any hold of the body. The highest and purest form of Greek wrestling does not appear to have been transplanted to Rome, although the more contentious and cruel *pancratium*—a sport more nearly allied to the Roman gladiatorial spirit—was introduced there by Caligula, and became very popular.

Go not to the *wrestling*, ne to scholyngs at cok.
Babees Book (E. E. T. S.), p. 40.

wrest-pin (rest'pin), *n.* In the pianoforte and harp, a steel pin driven into the wrest-block or frame, around which one end of a string is wound, and by turning which the string may

be tuned; a tuning-pin. The upper part of the pin is square in section, so as to be turned by a tuning-hammer or key. See cut under *harp*.—**Wrest-pin piece**, in the pianoforte, a metal plate through which the wrest-pins are screwed into the wrest-block.

wrest-plank (rest'plangk), *n.* Same as *wrest-block*.

wretch (rech), *n.* and *a.* [*< ME. wrecche, wrecche, wrecche, < AS. wrecca, wrecca, wrecca, outcast, exile (= OS. wrekka, an adventurer, warrior, = OHG. wreccho, reccho, a banished man, exile, stranger, adventurer, MHG. Fly, ye *wretches*, fly, and get away, for your King is slain.
Baker, Chronicles, p. 15.

The poor *wretch*, half dead with fear, expected every moment to fall by the bloody hands of the Djawi.
Bruce, Source of the Nile, II. 590.

2. A sorry or contemptible creature; a despicable person; a term of opprobrium applied to one who has incurred condemnation by misconduct, and often used on slight occasion and with little intended force.

Pie on thee, *wretch*! 'tis pity that thou livest
To walk where any honest men resort.
Shak., C. of E., v. 1. 27.

Does not every dowager in London point to George Fitz-Boodle as to a dissolute *wretch* whom young and old should avoid?
Thackeray, Fitz-Boodle's Confessions.

3. Body; creature; thing; used (in some manner that indicates the intention) of a person regarded with some degree of kindly or ironical commiseration, or when genuine words of endearment seem inadequate, with tender sympathy or passion, or even with admiration.

Excellent *wretch*! Perdition catch my soul,
But I do love thee!
Shak., Othello, iii. 3. 90.

Poor *wretch* was never frightened so.
Dragon, Nymphidia, st. 27.

Come forth,
Fond *wretch*, and know thyself and him aright.

wrist (rist), *n.* [Early mod. E. also *wreast*, *wrest*; *< ME. wrist, wiste*, also *wiste*, *wyrste*, *< AS. wrist* (usually in comp. *hand-wrist*) = *OFries. wrist, riust*, *wrist*, *werst* (*hand-wrist*, 'hand-wrist,' *ful-wrist*, 'foot-wrist,' instep) = *LG. wrist* = *MHG. rist, riste*, *G. rist* (*G. dial. frist*), *hand-* or *foot-joint*; cf. *G. wider-rist*, withers of a horse (see *withers*) = *leel, rist* = *Sw. Dan. rist*, instep; with formative *-t* (*-tht*) *> -st*, *< withan*, twist, writhe: see *writhe*, and *cf. wrest*.] 1. That part of the fore limb or arm which comes between the forearm and the hand, and by which the latter is joined or jointed to the former; the wrist-joint; technically, the carpus, or the carpal articulation. The wrist is the first segment of the manus, and its skeleton consists in man of seven carpal bones, together with a sesamoid bone (the pisiform) on the ulnar side, these eight bones being disposed in two rows of four each, proximal and distal. The whole set of bones, their articulations with one another and with the radius, ulna, and the several metacarpals, together with the ligaments and other associated soft parts, are included in the term *wrist*. The motions of the wrist as a whole upon the forearm include all the movements of flexion, extension, adduction, abduction, and circumduction, together with the movements of pronation and supination impressed upon the wrist by the rocking of the radius about the ulna; but the motion of the individual carpal bones upon one another is slight, and that between the distal carpal and the metacarpals is still less. In most other animals than man, the movements of the wrist are more restricted. The term is extended to the corresponding joint of the fore limb of other mammals, birds, and reptiles. Thus the so-called knee of the horse's fore leg is anatomically the carpus or wrist. See *carpus*, and *cuts under hand, pisiform*, and *scapholunar*.

Little Preston was found there with both his hands cut off by the *wrists*.

W. Patten, *Ex. into Scotland* (Arber's Eng. Garner, III. 128).

2†. The ankle or the instep.

Then he put on the old man's hose,

Were patch'd from knee to *wrist*.

3. In *mach.*, a stud or pin projecting from the side of a crank, wheel, or other moving part, and forming a means of attachment to a connecting-rod leading to some other part of the mechanism. Also called *wrist-pin*.—**Bridge wrist**, in the *manège*, the wrist of the horseman's left hand. Compare *bridge-hand*.—**Twist of the wrist**. See *twist*.—**Wrist touch**, in *piano-forte*-playing, a stroke or touch which proceeds from the wrist rather than from the fingers alone or from the whole forearm.

wristband (rist'band, colloq. riz'band), *n.* That band or part of a sleeve, especially of a shirt-sleeve, which covers the wrist. The wristbands sewed on to shirt-sleeves were formerly confined with a flare over the upper part of the hand, serving the purpose of the separate stiff cuffs buttoned to the narrow wristbands now in use. In the times of more elaborate dressing such wristbands were often very long, and adorned with rich lace or fine embroidery.

With that the hands to pocket went,

Full *wristband* deep. *Fanbrugh*, *Æsop*, ii. 1.

He . . . wore very stiff collars, and prodigiously long *wrist bands*.

Dickens, *A Rogue's Life*, i. (*Household Words*).

wrist-bone (rist'hôn), *n.* Any bone of the wrist or carpus; a carpal bone. See *carpus*, *wrist*, and *cuts under hand, pisiform*, and *scapholunar*.

wrist-clonus (rist'klô'nus), *n.* A series of jerky movements of the hand produced in certain nervous diseases by a sudden forcible bending back of the wrist.

wrist-drop (rist'drop), *n.* Inability to extend the hand, owing to paralysis of the extensor muscles in the forearm. It is commonly associated with lead-poisoning. Also called *drop-wrist*.

wrist-pin (rist'pin), *n.* 1. In *mach.*, any pin forming a means of connecting a pitman to a cross-head or crank; more particularly, the pin of the crank to which a pitman is connected. The pin in the cross-head is in the United States more generally called *cross-head pin*.

2. A pin in a wrist-plate of a steam-engine, whether connected with an eccentric-rod or with a valve-rod.

wrist-plate (rist'plát), *n.* 1. A plate which oscillates on a central pivot, and from the face of which project one or more crank-pins or -wrist for the connection of rods or pitmans.—2. Specifically, a plate used in some kinds of automatic cut-off engines. It has a reciprocating rotary motion on a central pivot, and is actuated through a limited arc by the rod of an eccentric on the crank-shaft of the engine. From its face project four crank-wrist, which give it its name. Two of these wrists are respectively connected with rods that actuate the rocker-arms of two separate oscillating plug-valves, for introducing steam into the cylinder on opposite sides of the piston alternately. The other two wrists are similarly connected to independently operating exhaust-valves.

writ¹ (rit), *n.* [*< ME. writ, wryt, wrytt, writ*, *< AS. ge-writ, writ*, a writ, writing, or scripture (= *OHG. riz*, a letter, *MHG. riz*, *G. riss*, a rent, a tear, *ritze*, a wound, a scratch, = *leel. rit*, a writ, writing, penmanship, = *Goth. writa*, a stroke, a point), *< writum*, etc., write: see *write*.] 1. 2. In *law*, a precept under seal, in the name of the people, or the sovereign, or other competent legal authority, commanding the officer or other person to whom it is addressed or issued to do or refrain from doing some specified act. In early times, when the pleadings and proceedings generally in actions were oral, writs were, as the name implies, the written parts of an action (besides judgments in courts of record), it being for obvious reasons required that the warrant by which a person or his property might be seized, or his conduct controlled under penalty of contempt, should be expressed in writing and attested by the name and seal of the government.

3. A formal instrument or writing of any kind.

1. . . .

Folded the *writ* up in form of the other.

Shak., *Hamlet*, v. 2. 51.

Barons by writ. See *baron*, l.—**Close writs**. See *close*.—**Indorsed writ**. See *indorse*.—**Judicial writ**, a writ issued by the court, as distinguished from an *original writ*.—**Optional writ**. See *optional*.—**Original writ**. (a) The writ formerly required to be issued from Chancery, under the seal of the sovereign, before the commencement of an action in a court of common law: so called to distinguish it from judicial writs, or writs issued by the court in which the action was thus brought, in the course of prosecuting the action. (b) In the United States, a mandatory precept issuing out of the clerk's office in any of the courts of law, by the authority and in the name of the State or commonwealth, under the seal of the court from which it issues, bearing teste of the chief justice of the court, if he is not a party, and signed by the clerk of the court. (*Heard*.) Its object is to compel the appearance of the defendant, or at least to give him due notice that he is sued. In most of the States it has been superseded by a summons, issued by the plaintiff's attorney, giving such notice and requiring the defendant to plead. See also *original writ*, under *original*.—**Peremptory**, **Præmunientes**, **pre-**

rogative writ. See the qualifying words. — **Service of a writ.** See *service*. — **Ship writ.** In *Eng. hist.*, a writ issued in the name of the crown imposing the tax known as *ship-money* (which see); notably one of such writs issued under Charles I. which led to Hampden's opposition. They were declared illegal by 16 Car. I., c. 14 (1640). — **The writ runs.** (a) The writ is expressed in terms of including: as, *the writ runs in the name of the people*. (b) The writ is legally capable of enforcement: as, *the writ of subpoena runs throughout the state*. (c) The writ is practically capable of enforcement: as, "When lawlessness has yielded to order; when the Queen's writ runs; when the edicts of the civil courts are obeyed; . . . and when sedition is trampled under foot — then, and then only, is there some chance for the development of remedial measures." (*Edinburgh Rev.*, CLXV, 587.) — **To serve a writ.** See *to serve a process*, under *serve*. — **To serve a writ of attachment.** See *to serve an attachment*, under *serve*. — **Twelve-day writ.** In *Eng. law*, a writ allowed by 18 and 19 Vict., c. 67, in actions on bills and notes if brought within six months after maturity, warning defendant to appear within twelve days, otherwise judgment would go against him. — **Vicentiel writ.** See *vicentiel*. — **Writ of account.** See *action of account*, under *account*. — **Writ of assistance, besayel, capias, certiorari, consultation, dower, error, estrepement.** See *assistance*, etc. — **Writ of execution.** See *execution*, 3 (b). — **Writ of habeas corpus, inquiry, mandamus, possession, privilege, prohibition, protection, reCAPTION, restitution, right, spoliation, subpoena, etc.** See *habeas corpus, inquiry*, etc. — **Writs of extent.** See *extent*, 3 (b).

Ship's writer. See *ship*. — **The writer**, the author of this writing; the writer hereof — used elliptically by a writer with reference to himself, to avoid saying *I*. — **Writer of the tallies.** See *tally*, 1. — **Writers' cramp**, an occupation-neurosis occurring in those who write much, especially in a contracted hand. It affects at first usually only those muscles which are directly concerned in the production of writing movements, but, if the act is persisted in, the neighboring muscles may also share in the disturbance. The affection may manifest itself under one of four forms or a combination of them — namely, *paralytic*, in which weakness in the fingers or even absolute inability to hold the pen is experienced; *spastic*, in which the attempt to write excites clonic or tonic contractions of the fingers; *tremulous*, in which the hand shakes so while writing that the letters formed are indistinguishable; and *sensory*, in which the effort to write causes severe pain, tingling, or other abnormal sensations in the hand and at times in the forearm also. The symptoms vary greatly in different individuals, usually, however, increasing in severity as long as the attempt to use a pen is persisted in. The use of steel pens and metal penholders is supposed to increase the liability to the affection. Also called *scribblers' cramp* or *palsy*, *writers' palsy* or *paralysis*, and *graphospatism*.

Writers to the signet. See *signet*, 1.

writeress (ri'tēr-ēs), *n.* [*< writer + -ess*.] A female writer or author. [Humorous.]

To make a *wry* face or mouth, to manifest disgust, displeasure, pain, or the like, by distorting or puckering up the face or mouth.

You seem resolved to do credit to our mystery, and die like a man, without making *wry* mouths.
Scott, Quentin Durward, xxxiv.

II. *n.* A twisting about, or out of shape or course; distortion; a distorting effect. [Rare or prov. Eng.]

He [the coach] looks so innocent, you make full sure to pug him well, in spite of the *wry* of the water.
R. D. Blackmore, Lorna Doone, vii.

wry (rí), *v. t.* [*< ME. wryen, wrien, wron, < AS. wrian, *wrihan, ONorth. wria* (pp. *wrygan*), cover, clothe. Cf. *wry*.] To cover; clothe; cover up; cloak; hide.

Wry (var. *wrie*) the gleed, and hotter is the fry.
Chaucer, Good Women, I. 735.

But of his hand-erck wode he gete
Clothes to *wrye* hym, and his mete.
Rom. of the Rose, I. 6684.

With floods gravel let diligence hem *wrie*.
And XXX dayes under that hem kepte.
Palladius, Husbondrie (E. E. T. S.), p. 216.

wrybill (rí'bil), *n.* A kind of plover, *Anarhynchus frontalis*, of New Zealand, having the bill bent sidewise. See second cut under *plover*.

wry-billed (rí'bil-d), *a.* Having the bill awry or bent sidewise; as, the *wry-billed* plover. See second cut under *plover*.

wryly (rí'li), *adv.* [*< wry + -ly*.] In a wry, distorted, or awkward manner.

Most of them have tried their fortune at some little literary office of literature, and, receiving a blank, have chewed upon it harshly and wryly.

Laurel, Imag. Conv., Southey and Porson, l.

wrymouth (rī'mouth), *n.* In *ichth.*: (a) Any fish of the family *Cryptacanthodidae* (which see). The common wrymouth is *Cryptacanthodes maculatus*, a spotted variety of which is the ghost-fish, specified as *C. maculatus*. It is a blennioid of slender eel-like form, normally profusely spotted, found not very commonly on the Atlantic coast of North America.

The eel-fish, the cunner, the sea-raven, the rock-eel, and the *wry-mouth*, which inhabit these brilliant groves, are all colored to match their surroundings.

Science, XV, 212.

(b) The electric ray, torpedo, or numb-fish. See cuts under *Torpedinidae* and *torpedo*.

wry-mouthed (rī'moutht), *a.* 1. Having a crooked mouth; hence, unflattering.

A shaggy tapestry: . . .

Instructive work! whose *wry-mouth'd* portraiture

Display'd the fates her confessors endure.

Pope, Dunciad, ii, 145.

2. In *conch.*, having an irregular or distorted aperture of the shell. *P. P. Carpenter.*

wryneck (rī'nek), *n.* 1. A twisted or distorted neck; a deformity in which the neck is drawn to one side and rotated. See *torticollis*.—2. A spasmodic disease of sheep, in which the head is drawn to one side.—3. A scansorial picarian bird of the genus *Ignis* (*Junc.*, or *Funx*), allied to the woodpeckers, and belonging to the same family or a closely related one: so called from the singular manner in which it can twist the neck, and so turn it awry. The common wryneck of Europe is *I. (J. or F.) torquilla*; there are several other similar species. These birds have the toes in pairs, the bill straight and hard, the tongue extremely

Common Wryneck (*Fringilla torquilla*)

long, slender, and extensible, and most other characters of the true *Picidae* or woodpeckers; but the tail-feathers are soft, broad, and rounded at the ends, and not used in climbing. The wryneck is migratory and insectivorous, and its general habits are similar to those of woodpeckers. It has a variety of names pointing to its arrival in the British Islands at the same time as the cuckoo, as *cuckoo's fool*, *foolstun*, *kaure*, *leander*, *emaid*, *emate*, *emsewger*, *unur*, *raur*, *schit*, etc. It is also called *witheneck* and *snak-bird*, from the twisting of its neck; *long-tongue* and *longue-bird*, from its long tongue; *cunnet hunter*, from feeding on ants; *pea-bird*, *weat-bird*, from its cry; *turkey-bird*, *nile-bird*, and *slab*, for some unexplained reasons.

Even while I write I hear the quaint queak, queak, queak of the wryneck.

Mortimer Collins, Thoughts in my Garden, I, 62.

The wryneck will tap the tree, to stimulate the insect to run out to be eaten entire.

P. Robinson, Under the Sun, p. 36.

wry-necked (rī'nekt), *a.* Having a wry or distorted neck.

When you hear the drum,

And the vile squeaking of the wry-neck'd life,

Shak., M. of V., ii, 5, 30.

[By some this is understood as an allusion to the bend of the fife's neck while playing upon his instrument; by others (less probably) to an old form of the flute, called the *fute-niche*, having a curved mouthpiece like the beak of a bird at one side.]

A fife is a wry-neck musician, for he always looks away from his instrument.

Baronby Kich, Irish Hubbub (1616). (*Furness*.)

wryness (rī'nes), *n.* The state of being wry or distorted.

wryt, **wryter**, **wryther**. Obsolete spellings of *writ*, *writ*, *writhe*.

W. S. An abbreviation of *writer to the signet*. See *signet*.

W. S. W. An abbreviation of *west-southwest*.

wt. A contraction of *weight*.

wucht. An obsolete form of *which*1.

wud (wud), *a.* A Scotch form of *wood*2.

wudder (wud'ér), *r. i.* See *wuther*.

wudet, *n.* A Middle English form of *wood*1.

wulfenite (wul'fen-it), *n.* [Named after Baron von Wülffen or Wülffen (1728-1805), an Austrian scientist.] Native lead molybdate, a mineral of a bright-yellow to orange, red, green, or brown color and resinous to adamantine luster. It occurs in tetragonal crystals, often in very thin tabular form, also granular massive. Also called *yellow lead ore*.

wull. An obsolete or dialectal form of *will*1, *will*2.

wummel, **wummle**, *n.* Scotch forms of *wimble*1, *wunt*, *r. i.* See *wont*1.

wungee (wun'jē), *n.* [E. Ind.] A variety in India of the muskmelon, *Cucumis Melo*, sometimes regarded as a species, *C. cucurbitatus*. It is of an ovate form, about 6 inches long.

wurali, **wurari**, *n.* Same as *ewari*.

wurdt, *n.* An old spelling of *word*1.

wurmalt (wér'mal), *n.* Same as *wormal*.

wurru (wur'us), *n.* [*< Ar. wars*, a dyestuff similar to kamila.] A brick-red dye-powder, somewhat like dragon's-blood, collected from the seeds of *Rottlera tinctoria*.

wurset, **wurst**. Old spellings of *worse*, *worst*. **Württemberg** (wér'tem-bér-ér; G. pron. vür'tem-ber-gér), *n.* [*< Württemberg* (G. *Württemberg*) (see def.) + -er1.] An inhabitant of Württemberg, a kingdom of southern Germany.

Württemberg siphon. See *siphon*.

wurth. An old spelling of *worth*1, *worth*2.

wurtzilite (wér'sil-it), *n.* [Named after Dr. Henry Wurtz, of New York (b. 1828).] A kind of solid bitumen found in the Uintah Mountains, Utah. It has a deep-black color and brilliant luster, and breaks with a conchoidal fracture. It is elastic when slightly warmed, and in boiling water becomes soft and plastic.

wurtzite (wér'sit), *n.* [After C. A. Wurtz (1817-1884), a French chemist.] Sulphid of zinc occurring in hexagonal crystals, isomorphous with greenockite. Sulphid of zinc is accordingly dimorphic, the common form, sphalerite or zinc-blende, being isometric. Also called *späuterite*.

Würzburger (wérts'bér-ér; G. pron. vürts'bür-gér), *n.* Wine made in the neighborhood of the city of Würzburg, in Bavaria. This name is often given to the wines more properly called *Leisten-wein* and *Stein-wein*, and to the famous "wine of the Holy Ghost."

wus't, *r. i.* See *wis*3.

wus't, *n.* A Middle English form of *wouse*, *ooze*.

Hee wringes out the wet wus and went on his gate.

Alsaunders of Mucedaine (E. E. T. S.), I, 712.

wuther (wuth'ér), *r. i.* [Also *wudder*; perhaps ult. *< AS. woth*, a noise, cry, sound.] To make a sullen roar, as the wind. [North, Eng.]

The air was now dark with snow; an Iceland blast was driving it wildly. This pair neither heard the long *wuther* rush, nor saw the white burden it drifted.

Charlotte Brontë, Shirley, xxxiii.

From time to time the wind *wathered* in the chimney at his back.

K. L. Stevenson and L. Osbourne, The Wrong Box, vi.

There was also a *wethering* wind sobbing through the narrow wet streets. *A. E. Barr*, Friend Olivia, iv.

wuther (wuth'ér), *n.* [Also *wudder*; *< wuther*, *r.*] A low roaring or rustling, as of the wind. [North, Eng.]

I felt sure . . . by the *wuther* of wind amongst trees, denoting a garden outside. *Charlotte Brontë*, Villette, xvi.

wuzzent (wuz'ent), *a.* A dialectal (Scotch) form of *wizen*ed.

An I had ye among the Frigate-Whins, wadna I set my ten talents in your *wuzzent* face for that very word!

Scott, Heart of Mid-Lothian, xviii.

wuzzle (wuz'1), *r. t.*; pret. and pp. *wuzzled*, pp. *wuzzling*. [Origin obscure.] To mingle; mix; jumble; muddle. [New Eng.]

He *wuzzled* things up in the most singular way.

H. B. Stowe, Oldtown, p. 63.

wyandotte (wī'and-dot), *n.* [From the American Indian tribal name *Wyandotte*.] An American variety of the domestic hen, of medium size and compact form, hardy, and valuable for eggs and for the table. The silver wyandotte, the

typical variety, has every feather white in the middle and heavily margined with black, except the black tail-feathers and primaries, the hackle (and in males the saddle), which is white striped with black, and the white wing-bows of the males. The golden wyandotte replaces the white of the silver variety by orange or deep-lust; and the white wyandotte is pure-white. The combs are rose, legs yellow, and ear-lobes red.

wych (wich), *n.* See *wick*4.

wych-elm, **wych-hazel**, *n.* See *witch-elm*, *witch-hazel*.

Wyclifite, **Wycliffite** (wik'lif-it), *a. and n.* [Also *Wichliffe*, *Wickliffite*; *< Wyclif*, etc. (see def.), + -ite2.] *I. a.* Of or pertaining to John Wyclif or de Wyclif (a name also written *Wielif*, *Wickliffe*, *Wycliffe*, and in various other ways reflecting the varying orthography of his time, properly in modern spelling *Wickliff*), an English theologian, reformer, and translator of the Bible from the Vulgate (died 1384).

II. n. One of the followers of Wyclif, commonly called *Lollards*. Wyclif's doctrines, propagated in his lifetime and later by open-air preachers called "poor priests," largely coincided with the later teachings of Luther.

wydet, *a.* An old spelling of *wide*.

wydewhert, *adv.* See *widewhere*.

wye1, *n.* See *wie*.

wye2 (wi), *n.* The letter Y, or something resembling it.

wyert, *n.* In *her.*, same as *rinre*.

wyft, *n.* An old spelling of *wife*.

Wykehamist (wik'am-ist), *n.* [*< Wykeham* (see def.) + -ist.] A student, or one who has been a student, of Winchester College in England, founded by William of Wykeham (1324-1404), Bishop of Winchester and Chancellor of England, as a preparatory school for New College at Oxford, also founded by him. Also used attributively.

It may reasonably be hoped that this is not *Wykehamist* Greek.

Athenaeum, No. 3303, p. 212.

We notice a complaint that *Wykehamists* obtained an undue proportion of the university prizes.

The Academy, No. 873, p. 56.

wylet, *n.* An old spelling of *wile*1.

wylie-coat (wī'li-kōt), *n.* [Sc.; also spelled *wyle-coat*, *wile-coat*; first element uncertain.] A flannel garment worn under the outer clothes; an under-vest or under-petticoat.

wyloi, *n.* An old spelling of *willow*1.

wynt, *n.* An old spelling of *wine*.

wynd1 (wind), *n.* [Another spelling and use of *wind*1, *n.*] An alley; a lane; especially, a narrow alley used as a street in a town. [Scotch.]

The *wynds* of Glasgow, where there was little more than a chink of daylight to show the hatred in women's faces.

George Eliot, Felix Holt, xxvii.

wynd2, *n.* A Middle English spelling of *wind*2.

wyndast, *n.* An obsolete spelling of *windast*.

wyndewet, **wyndowet**, **wyndwet**, **wynewet**, *r.* Middle English forms of *winnor*.

wyndret, *r.* An unexplained verb, probably meaning 'to attire' or 'to adorn,' found in the following passage:

It nedede naught

To *wyndre* hir or to peynte hir ough.

Rom. of the Rose, I, 1020.

wynkt, *n.* A Middle English spelling of *wink*1.

wynn (win), *n.* [Origin obscure.] A kind of timber truck or carriage. *Simmonds*.

wyntt. A contraction of *windleth*, third person singular indicative present of *wind*1.

wypet, *n.* [*< ME. wipre*, *wype*, a bird, *< Sw. Norw. ripa* = Dan. *ribe*, lapwing; perhaps so called from its habit of fluttering its wings (cf. *Fanellus*), from the verb represented by Sw. *rippa*, rock, see-saw, tilt: see *whip*1. Otherwise imitative: cf. *weep*2.] A lapwing.

Wype, bryde or lapwyng. *Upupa*. *Prompt. Par.*, p. 530.

wyperi, *n.* Same as *wiper*.

wyppyl-tret, *n.* A Middle English form of *whippel-tree*.

wyst, **wyset**, *a.* Old spellings of *wise*1. *Chaucer*.

wyter, *r. and n.* Another spelling of *wite*2.

wythe, *r.* See *with*.

wyvet, *r.* An old spelling of *wire*.

wyveri, *n.* See *wiver*.

wyvernt, *n.* See *wivern*.

1. The twenty-fourth letter and nineteenth consonant-sign in the English alphabet. In the Latin alphabet, from which it comes to ours, it followed next after *U* or *V* (which were then only one letter; see *U*), and was till a late date the last letter in that alphabet, till *Y* and *Z* (see those letters) were finally added from the Greek to represent peculiar Greek sounds. The sign *X* was a Greek addition to the Phœnician alphabet; it had in early Greek use a divided value; in the eastern alphabets, that of *kh* (besides the signs for *ph* and *th*); in the western, that of *ks* (besides the signs for *p* and *t* or *d*). But usage does not follow the rule with exactness, and many cultivated speakers disregard the distinction altogether, pronouncing everywhere alike *ks* (or *kz*). In any case, the sign *X* is superfluous in English, as it was in Latin and in Greek; it denotes no sound which is not fully provided for otherwise. In Old English it was sometimes used for *sh*, as in *xal* = *shall*.

2. As a numeral, *X* stands for ten. When laid horizontally (\times), it stands for a thousand, and with a dash over it ($\bar{\times}$), it stands for ten thousand.

3. As an abbreviation, *X* stands for *Christ*, as in *Xn.* (Christian), *Xmas.* (Christmas).—4. As a symbol: (a) In *ornith.*, in myological formulas, the symbol of the semitendinosus muscle. *A. H. Garrod.* (b) In *math.*: (1) [*i. e.*] In algebra, the first of the unknown quantities or variables. (2) [*i. e.*] In analytical geometry, an abscissa or other rectilinear point-coördinate. (3) In mechanics, the component of a force in the direction of the axis of *x*.—5. Originally, a mark on brewers' casks; hence, a name given to ale of a certain quality. Compare *XX*, *XXX*.—**Xn function.** See *function*.

xanoraphica (zan-nór-fi-kü), *n.* A musical instrument, resembling the harmonichord and the tetrachordon, invented by Röllig in 1801, the strings of which were sounded by means of little bows.

Xantharpyia (zan-thär-pi-i-ä), *n.* [*NL.* (J. E. Gray), < Gr. *ξανθός*, yellow, + *NL.* *Harpyia*, q. v.] A genus of *Pteropodidae*. *X. amplexicauda* is a fruit-bat of the Australasian sub-region.

xantharsenite (zan-thär-se-nüt), *n.* [< Gr. *ξανθός*, yellow, + *E.* *arsenite*.] A hydrated arsenate of manganese, occurring in sulphur-yellow massive forms. It is found in Sweden, and is related to chondrsenite.

xanthate (zan'thät), *n.* [< *xanth(ie)* + *-ate*.] A salt of xanthic acid.

xanthin (zan'thē-in), *n.* [< Gr. *ξανθός*, yellow, + *-in*.] That part of the yellow coloring matter in flowers which is soluble in water, as distinguished from *xanthin*, which is the insoluble part.

xanthelasma (zan-thē-las'mü), *n.* [*NL.* < Gr. *ξανθός*, yellow, + *ἐλασμα*, a plate.] Same as *xanthoma*.

Xanthia (zan'thi-ä), *n.* [*NL.* (Ochsenheimer, 1816), < Gr. *ξανθός*, yellow.] A genus of moths, of the family *Orthosiidae*, having slender porrect palpi, and mostly yellow or orange fore wings undulating along their exterior border. It comprises about 30 species, and is represented in Europe, Asia, North and South America, and the West Indies. *X. fulvago* is the swallow-moth of Europe. Its larva feeds when young on catkins of willow, later on bramble and plantain.

Xanthian (zan'thi-an), *a.* [< Gr. *Ξάνθος*, Xanthus (see def.).] Of or belonging to Xanthus, an ancient town of Lycia in Asia Minor.—**Xanthian sculptures**, a large collection of sculptures, chiefly sepulchral, from Xanthus and the neighboring region, preserved in the British Museum. The collection includes

the reliefs from the so-called Harpy tomb. See *Harpy monument*, under *harpy*.

xanthic (zan'thik), *a.* [< Gr. *ξανθός*, yellow, + *-ic*.] Tending toward a yellow color; of or relating to xanthin; yellow, referring to the color of the urine.—**Xanthic acid**, the general name of the esters or ether-acids of thiosulphocarbonic acid, as ethyl xanthic acid, $C_2H_5CS_2$, a heavy, oily liquid with a penetrating smell and a sharp, astringent taste, many of whose salts have a yellow color.—**Xanthic calculus**, a urinary calculus composed in great part of xanthin.—**Xanthic flowers**, flowers which have yellow for their type, and are capable of passing into red or white, but never into blue. Those flowers of which blue is the type, and which are capable of passing into red or white, but never into yellow, have been termed *cyanic flowers*.—**Xanthic oxid**, xanthin.—**Xanthic-oxid calculus**. Same as *xanthic calculus*.

xanthid (zan'thid), *n.* [< Gr. *ξανθός*, yellow, + *-id*.] A compound of xanthogen.

xanthin, **xanthine** (zan'thin), *n.* [Also *zanthin*; < Gr. *ξανθός*, yellow, + *-in*, *-ine*.] One of several substances, so named with reference to their color. Especially—(a) That part of the yellow coloring matter of flowers which is insoluble in water. (b) The yellow coloring matter contained in madder. (c) A gaseous product of the decomposition of xanthates. (d) A complex body, $C_5H_4N_4O_2$, related to uric acid, occurring normally in small quantity in the blood, urine, and liver, and occasionally in urinary calculi. It is a white dimorphous body, and combines with both acids and bases.—**Xanthin calculus**. Same as *xanthic calculus*. See *xanthic*.

xanthinuria (zan-thi-nü-ri-ä), *n.* [< *xanthin* + Gr. *οὐρον*, urine.] The excretion of xanthin in abnormal quantity in the urine. Also *xanthuria*.

Xanthispa (zan-this'pä), *n.* [*NL.* (Baly, 1858), < Gr. *ξανθός*, yellow, + *NL.* *Hispa*, q. v.] A genus of leaf-beetles, of the family *Chrysomelidae*, erected for the single species *X. cinnabadioides* from Cayenne.

xanthitane (zan'thi-tän), *n.* [< Gr. *ξανθός*, yellow, + (*tit*) *an(ie)*.] An alteration-product of the sphene (titanite) from Henderson county, North Carolina. In composition it is analogous to the clays, but contains chiefly titanite acid instead of silica.

xanthite (zan'thit), *n.* [< Gr. *ξανθός*, yellow, + *-ite*.] A variety of vesuvianite found in limestone near Amity, New York.

Xanthium (zan'thi-um), *n.* [*NL.* (Tournefort, 1700; earlier by Lobel, 1576), < Gr. *ξανθός*, a plant, said to be *X. strumarium*, and to have been so named because its infusion turned the hair yellow; < *ξανθός*, yellow.] A genus of composite plants, of the tribe *Helianthoidae* and subtribe *Ambrosieae*. It is characterized by unisexual flower-heads, the male with a single row of separate bracts,

Upper Part of the Stem with the Flower-heads and 4 leaves of Cockle-bur, *Xanthium strumarium*.
a, staminate flower; b, pistillate flower; c, involucre enclosing two pistillate flowers.

the female armed with numerous hooked prickles. Twenty-one species have been described, but are to be reduced to four; they are mostly of uncertain, perhaps of American, origin, but are now widely naturalized throughout warm regions. They are coarse weedy annuals with alternate

leaves which are lobed and closely tomentose, or are coarsely toothed and greenish. The small numerous flower-heads are solitary or clustered in the axils, in the fertile heads the fruit forms a large spiny bur containing the achenes. The species are known as *cockle-bur*, or as *clot-bur*; 3 occur in the United States, only 1 of which is a native, *X. canadense*, which varies near the coast and the Great Lakes to a dwarf variety, *echinatum*, known as *clot-bur*; of the others, *X. spinosum*, the spiny clot-bur, thought to be a native of Chili, is armed with slender yellowish trifid spines in the axils; and *X. strumarium* is the common species of Europe. In England it is known as *ditch-bur*, *burweed*, *louse-bur*, and *small burdock*.

xanthiuria (zan-thi-ü-ri-ä), *n.* Same as *xanthinuria*.

Xantho (zan'thō), *a.* [*NL.* (Leach, 1815), < Gr. *ξανθός*, yellow.] A genus of brachyurous crustaceans, of the family *Cancerida*, with numerous species. Also *Xanthus*.

xanthocarpous (zan-thō-kär'pus), *a.* [< Gr. *ξανθός*, yellow, + *καρπός*, fruit.] In bot., having yellow fruit.

Xanthocephalus (zan-thō-sef'ä-lus), *n.* [*NL.* (Bonaparte, 1850), < Gr. *ξανθός*, yellow, + *κεφαλή*, head.] A genus of *Icteridae*, or American blackbirds, having as type the common yellow-headed blackbird of the United States, first described by Bonaparte in 1825 as *Icterus icterocephalus*, and now known as *X. icterocephalus*. This large blackbird, of striking aspect, abounds in North America

Yellow-headed Blackbird, *Xanthocephalus icterocephalus*, male.

from Illinois, Iowa, and Wisconsin westward, extending north into the British possessions, and south into Mexico. The male is jet-black, with the whole head and neck bright-yellow, except the black lores and a black space about the base of the bill; there is a large white wing-patch, and usually there are a few yellow feathers on the thighs and vent. The length is from 10 to 11 inches, the extent 16 to 17. The female is smaller and chiefly brownish. This blackbird nests in marshy places, and lays from three to six eggs of a grayish-green color spotted with reddish brown. Also called *Xanthosomus*.

Xanthochelus (zan-thō-kē'lus), *n.* [*NL.* (Chevrolat, 1873), < Gr. *ξανθός*, yellow, + *χελή*, a claw.] A genus of snout-beetles, of the family *Curculionidae* and subfamily *Chonurini*, having wings and somewhat pruinose elytra. It contains less than a dozen species, distributed from Egypt to Siberia.

Xanthochlorus (zan-thō-klō'rus), *n.* [*NL.* (Loew, 1857), < Gr. *ξανθός*, yellow, + *χλωρός*, greenish-yellow.] A genus of dipterous insects, of the family *Bolichopodidae*, comprising 4 small rust-colored species with yellow wings, of which 3 are European and 1 is North American. *Leptopus* is a synonym.

Xanthochroa (zan-thōk'rō-ä), *n.* [*NL.* (Schmidt, 1846), < Gr. *ξανθός*, yellow, with yellow skin, < *ξανθός*, yellow, + *χρῶμα*, the skin.] A genus of beetles, of the family *Edmestidae*, comprising 7 species, of which 3 are European, 1 is South American, and 3 are North American. They are small slender beetles with contiguous middle coxae, unspurred front tibiae, and deeply emarginate eyes.

Xanthochroi (zan-thōk'rō-i), *n. pl.* [*NL.*, pl. of *xanthochrous*; see *xanthochrous*.] In *ethnol.*, one of the five groups into which some

anthropologists classify man, comprising the blond type, or fair whites.

The *Xanthochroi* or fair whites—tall, with almost colorless skin, blue or grey eyes, hair from straw colour to chestnut, and skulls varying as to proportionate width—are the prevalent inhabitants of Northern Europe, and the type may be traced into North Africa and eastward as far as Hindostan. On the south and west it mixes with that of the Melanchroï, or dark whites, and on the north and east with that of the Mongoloids.

E. B. Tylor, *Encyc. Brit.*, II. 113.

xanthochroia (zan-thō-kroï'ā), *n.* [NL., < Gr. *ξανθός*, yellow, + *χρῶμα* (khrō-ma), the skin.] A yellow discoloration of the skin resulting from pigmentary changes. Also *xanthopathia*, *xanthopathy*.

xanthochroic (zan-thō-kroï'ik), *a.* [*xanthochroous* + *-ic*.] Same as *xanthochroous*.

That distinction of light- and dark-haired populations and individuals which anthropologists have designated *xanthochroic* and *melanchroic*.

A. Winchell, N. A. Rev., CXXXIX. 254.

xanthochroous (zan-thōk'rō-us), *a.* [*xanthochroous*, < Gr. *ξανθός*, yellow, + *χρῶμα* (khrō-ma), skin, color.] Yellow-skinned; of or pertaining to the *Xanthochroi*.

xanthocon, **xanthocone** (zan-thō-kon, -kōn), *n.* [*xanthocon*, < Gr. *ξανθός*, yellow, + *κόκκος* (kōk-kos), dust.] An arsenio-sulphid of silver, of a dull-red or clove-brown color, occurring in hexagonal tabular crystals, but commonly in crystalline reniform masses. When reduced to powder it becomes yellow (whence the name). Also *xanthoconite*.

xanthocreatine (zan-thō-kre'ā-tin), *n.* [*xanthocreatine*, < Gr. *ξανθός*, yellow, + *κρέας* (kre-as), flesh, + *-ine*2.] A basic nitrogenous substance found in muscular tissue and occasionally in urine, occurring in the form of yellow crystalline plates.

xanthocreatinine (zan-thō-kre'at'i-nin), *n.* Same as *xanthocreatine*.

xanthocyanopsy (zan-thō-si-an'op-si), *n.* [*xanthocyanopsy*, < Gr. *ξανθός*, yellow, + *κυανός* (kyan-ōs), dark-blue, + *ὄψις* (ōps-is), appearance.] Color-blindness in which the ability to distinguish yellow and blue only is present, vision for red being wanting.

Xanthocyela (zan-thō-sik'ī-lā), *n.* [NL. (Baly, 1875), < Gr. *ξανθός*, yellow, + *κύκλος* (kyk-klos), a ring, circle.] A genus of beetles, of the family *Chrysomelidae*, agreeing somewhat with *Euphitra* in sternal structure, but with punctate-striate elytra, and different hind thighs. The type is *X. chapuisi* from India. The genus is supposed to be synonymous with *Amphimela* (Chapuis, 1875).

xanthoderma (zan-thō-dēr'mā), *n.* [NL., < Gr. *ξανθός*, yellow, + *δέρμα* (dēr-ma), the skin.] Yellowness of the skin from any cause; xanthochroism.

Xanthodes (zan-thō-dēs), *n.* [NL. (Guenée, 1852), < Gr. *ξανθός*, yellow, + *ὄδω* (ō-dō), form.] A genus of noctuid moths, of Guenée's family *Acontidae*, comprising a few species inhabiting southern Europe, Asia, and Africa, whose metamorphoses are unknown. The fore wings are entire, usually rounded, and pale-yellow in color, with red or violet-brown markings.

xanthodont (zan-thō-dont), *a.* [*xanthodont*, < Gr. *ξανθός*, yellow, + *ὄδων* (ō-dōn) = *E. tooth*.] Having yellow teeth, as a rodent. The enamel of the front surface of the incisors in rodents is, as a rule, of some bright color into which yellow enters, mostly orange or of a still more reddened tint, furnishing a notable exception to the white teeth of most mammals, the piecous or reddish-black teeth of most shrews being another exception to the rule.

xanthodontous (zan-thō-dont'us), *a.* [*xanthodont* + *-ous*.] Same as *xanthodont*.

xanthogen (zan-thō-jen), *n.* [*xanthogen*, < Gr. *ξανθός*, yellow, + *γενέω* (gen-ēō), producing; see *-gen*.] A hypothetical radical formerly supposed to exist in xanthic acid and its compounds.

Xanthogramma (zan-thō-gram'ā), *n.* [NL. (Schiner, 1860), < Gr. *ξανθός*, yellow, + *γραμμή* (gram-mē), mark, letter.] A genus of dipterous insects, of the family *Syrphidae*, closely allied to the genus *Syrphus*, and comprising 3 European and 5 North American species. They are large, almost naked flies of a metallic black color broken with yellow spots and bands. The larvae probably feed on plant-life.

Xantholestes (zan-thō-les'tēs), *n.* [NL. (R. B. Sharpe, 1877), < Gr. *ξανθός*, yellow, + *λεστέω* (lest-ēō), a robber; see *Lesotes*.] In ornith., a genus of Philippine flycatchers, inhabiting the island of Panay. *X. panayensis* is the only species, 1½ inches long, olive-yellow above and bright-yellow below.

Xantholinus (zan-thō-lin'us), *n.* [NL. (Serville, 1825), < Gr. *ξανθός*, yellow, + NL. (*Staphylinus*).] A genus of rove-beetles or *Staphylinidae*, of universal distribution, and comprising about 100 species, distinguished chiefly by the long terminal joint of the maxillary palpi.

They are found under dead leaves, stones, and moss; but a few European species are myrmecophilous, living in the nests of *Formica rufa* and *F. fuliginosa*.

Xantholites (zan-thō-lit'ēs), *n.* [NL. (Etheridge), < Gr. *ξανθός*, yellow, + *λίθος* (lith-ōs), stone.] A genus of fossil crustaceans from the London clay.

xanthoma (zan-thō-mā), *n.* [NL., < Gr. *ξανθός*, yellow, + *-oma*.] A connective-tissue new growth in the skin, forming soft yellow patches, either flat (*xanthoma planum*) or tuberculated (*xanthoma tuberosum*). The former is especially apt to occur on the eyelids, being then called *xanthoma palpebrarum*. Also called *xanthoides* and *xanthelasma*.

xanthomatous (zan-thom'a-tus), *a.* [*xanthoma* (t-) + *-ous*.] In pathol., of or pertaining to xanthoma; as, the *xanthomatous* diathesis.

xanthomelanous (zan-thō-mel'a-nus), *a.* [*xanthomelanous*, < Gr. *ξανθός*, yellow, + *μέλας* (mel-as), black.] Noting a type or race of men. See the quotation.

The *Xanthomelanous*, with black hair and yellow, brown, or olive skins. Hazley, *Critiques and Addresses*, p. 153.

Xanthonia (zan-thō-ni'ā), *n.* [NL. (Baly, 1863), < Gr. *ξανθός*, yellow.] A genus of chrysomelid beetles, comprising 4 species, all North American. *X. stercoris* and *X. villosula* feed on the leaves of the black walnut.

xanthopathy (zan-thop'a-thi), *n.* [*xanthopathy*, < Gr. *ξανθός*, yellow, + *πάθος* (pat-hos), disease.] Same as *xanthochroia*.

Xanthophaea (zan-thō-fē'ā), *n.* [NL. (Chaudoir, 1848), < Gr. *ξανθός*, yellow, + *φαῖος* (phaios), dusky.] A genus of beetles, of the family *Carabidae*, comprising 2 species, one from Australia and the other from Oceania.

xanthophane (zan-thō-fān), *n.* [*xanthophane*, < Gr. *ξανθός*, yellow, + *φαῖος* (phaios), dusky, appear.] A yellow coloring matter derived from the retina.

xanthophyl, **xanthophyll** (zan-thō-fil), *n.* [*xanthophyl*, < Gr. *ξανθός*, yellow, + *φυλλον* (phylon), leaf.] In bot., the peculiar yellow coloring matter of autumn leaves, due to the decomposition of chlorophyll. Its chemical composition and the processes of its formation are not well known. See *chlorophyll*, *chrysophyll*. Also called *phylloranthin*.

xanthophylline (zan-thō-fil'in), *n.* [*xanthophyll* + *-ine*2.] Same as *xanthophyll*.

xanthophyllite (zan-thō-fil'it), *n.* [*xanthophyll* + *-ite*2.] A mineral allied to the micas, occurring in crusts or implanted globules in talcose schist; found in Zlatoust in the Ural. Wadsworth is a variety of distinct tabular crystals. Xanthophyllite is closely allied to sepyherite (clintonite), and these species, with chloritoid, otterite, etc., constitute the clintonite group, or the brittle micas.

xanthopierin (zan-thō-pik'in), *n.* [*xanthopierin*, < Gr. *ξανθός*, yellow, + *πικράς* (pik-ras), bitter, + *-ine*2.] In chem., a name given by Chevallier and Pelletan to a yellow coloring matter from the bark of *Xanthoxylum Caribæum*, afterward shown to be identical with berberine.

xanthopierite (zan-thō-pik'rit), *n.* [*xanthopierin*, < Gr. *ξανθός*, yellow, + *πικράς* (pik-ras), bitter, + *-ite*2.] Same as *xanthopierin*.

xanthopous (zan-thō-pūs), *a.* [*xanthopous*, < Gr. *ξανθός*, yellow, + *πούς* (pōs) = *E. foot*.] In bot., having a yellow stem.

xanthoproteic (zan-thō-prō'tē-ik), *a.* [*xanthoproteic* (in) + *-ic*.] Related to or derived from xanthoprotein.—**Xanthoproteic acid**, a non-crystallizable acid substance resulting from the decomposition of albuminoids by nitric acid.

xanthoprotein (zan-thō-prō'tē-in), *n.* [*xanthoprotein*, < Gr. *ξανθός*, yellow, + *E. protein*.] The characteristic yellow substance formed by the action of hot nitric acid on proteid matters.

xanthoproteinic (zan-thō-prō'tē-in'ik), *a.* [*xanthoprotein* + *-ic*.] Related to xanthoprotein.

xanthopsin (zan-thop'sin), *n.* [As *xanthopsin* + *-in*2.] Yellow pigment of the retina.

xanthopsy (zan-thop-si), *n.* [*xanthopsia*, < Gr. *ξανθός*, yellow, + *ὄψις* (ōps-is), appearance.] Color-blindness in which all objects seem to have a yellow tinge; yellow vision.

xanthopsydriac (zan-thop-si-drā'si-ā), *n.* [NL., < Gr. *ξανθός*, yellow, + *ψώρα* (psōra), a blister.] The presence of pustules on the skin.

Xanthoptera (zan-thop'te-rā), *n.* [NL. (Sodoffsky, 1837), < Gr. *ξανθός*, yellow, + *πτερόν* (ptērōn), wing.] A genus of noctuid moths, of Guenée's family *Anthophilidae*, comprising a few American species, distinguished by the presence of a subcellular areole on the fore wings. *X. semicraea* feeds in the larval state on the leaves of

the pitcher-plant (*Sarracenia*). The larva is a semi-looper, and is beautifully banded with white and purple or lake-red.

xanthopucine (zan-thō-puk'sin), *n.* [*xanthopucine*, < Gr. *ξανθός*, yellow, + *πυκνός* (pyk-nos), thick, + *-ine*2.] An alkaloid found in *Hydrastis Canadensis*.

Xanthopygia (zan-thō-pij'i-ā), *n.* [NL. (Blyth, 1849), and *Zanthopygia*, Blyth, 1847], < Gr. *ξανθός*, yellow, + *πυγή* (pygē), rump.] A genus of Old World flycatchers or *Muscicapidae*, ranging from Japan and China to the Malay peninsula and the Philippines. There are 4 species, 2 of which the males have the rump yellow (whence the name), the throat and breast yellow, and the tail black. These are *X. tricolor* and *X. nareissina*. *X. cyanometana* is chiefly blue and black in the male. *X. fuliginosa* (see water-

Xanthoptera semicraea. a, egg, natural size indicated at side; b, larva, dorsal view; c, one of its appendages, enlarged; d, larva, side view; e, pupa within cocoon; f, moth with closed wings; g, moth with expanded wings.

robin, under robin, 3) is different again, and is the type of two other genera (*Idyornis* and *Nymphæus*). *X. nareissina* has given rise to the generic name *Charidrylus*; and *X. cyanometana* to that of *Cyanoptila*.

Xanthopygus (zan-thō-pi'gus), *n.* [NL. (Kraatz, 1857), < Gr. *ξανθός*, yellow, + *πυγή* (pygē), rump.] A genus of American rove-beetles, comprising 1 North American species, *X. cacti*, and about 15 species from South America, characterized by having the marginal lines of the thorax distinct in front, the inner well defined.

xanthorhamnine (zan-thō-ram'nin), *n.* [*xanthorhamnine*, < Gr. *ξανθός*, yellow, + *ῥάμνος* (ram-nos), buckthorn (see *Rhamnus*), + *-ine*2.] A yellow coloring matter contained in the ripe Persian or Turkish berries and in Avignon grains. See *Persian berries*, under *Persian*.

Xanthornus (zan-thōr'nus), *n.* [NL. (P. S. Pallas, 1769; Scopoli, 1777; generally misread to Cuvier), prop. *Xanthornus*, < Gr. *ξανθός*, yellow, + *ὄρνις* (ōrnis), bird.] A large genus of *Icteridae*; strictly synonymous with *Icterus* of Brisson (1760). Most of the American carouges, orioles, hangnests, or trochilids have at some time been placed in this genus. Also called *Pendulinus*. See *cut under trochilid*.

Xanthorrhiza (zan-thō-rhī-zā), *n.* [NL. (Marshall, 1789), < Gr. *ξανθός*, yellow, + *ρίζα* (rhiza), root.] A genus of polypetalous plants, of the order *Ranunculaceae*, tribe *Helleboraceae*, and subtribe *Cimicifugæ*. It is characterized by regular racemose flowers with five or ten stamens, and five or ten carpels which become follicles in fruit. The only species, *X. apiculata*, is a native of the United States, growing on shaded mountain-banks from Pennsylvania and western New York to Kentucky and southward. It is a dwarf shrub with its stem yellowish within, bearing pinnately compound leaves and pendulous compound racemes of brownish-purple flowers with petaloid sepals and small gland-like petals. Its yellow rootstock secures it the name of *shrubby yellowroot* (which see); and the bark are intensely bitter, and afford a simple tonic of minor importance.

Xanthorrhœa (zan-thō-rhē'ā), *n.* [NL. (Smith, 1798), so called from the red resin of some species; < Gr. *ξανθός*, yellow, + *ῥοία* (rhoia), a flow, < *ῥέω* (rheō), flow.] A genus of liliaceous plants of the tribe *Lomandree*. It is characterized by bisexual flowers with distinct and partly glumaceous perianth-segments, and a three-celled ovary with few or several ovules in each cell. The 11 species are all Australian; they produce a thick rhizome commonly growing up into an arborescent woody trunk, covered or terminated by long linear rigid crowded brittle leaves. The numerous small flowers are densely compacted in a long cylindrical terminal spike.

Xanthoptera vidua.

xenia, *n.* Plural of *xenium*.

xenial (zē-ni-āl), *a.* [*< Gr. ξείνα, hospitality, < ξείνος, Ionic ξείνος, a guest, also a host, in Homer a friendly stranger.*] Pertaining to hospitality, or to the rights, privileges, standing, or treatment of a guest, or to the relations between a guest and his host; specifically, noting such relations, etc., in Greek antiquity.

Again, it is curious to observe that the *xenial* relation was not less vivacious than that of blood. The tie of blood subsists in the second generation from the common ancestor; and Diomed and Glaucus similarly own one another as ξείνοι because two generations before (Enes had entertained Bellerophon).

Gladstone, Studies on Homer, II. 460.

Xenichthyinae (zē-nik-thi-ī-nē), *n. pl.* [*NL. < Xenichthys + -inae.*] A subfamily of *Sparidae*, typified by the genus *Xenichthys*, having the dorsal fin deeply emarginate, the vomer toothed, and all the teeth villiform in narrow bands.

Xenichthys (zē-nik-this), *n.* [*NL. (Gill, 1863). < Gr. ξείνος, strange, + ιχθυή, a fish.*] A genus of sparoid fishes, typical of the *Xenichthyinae*, as *X. californiensis*. This queer fish is of a silvery color with continuous dusky stripes along the several rows of scales on the upper part of the body, and is found from San Diego southward.

Xenicidae (zē-nis-i-dē), *n. pl.* [*NL. < Xenicus + -idae.*] A family of non-oscine (clamorous) or mesomyodan passerine birds, typified by the genus *Xenicus*, and confined to New Zealand. Also called *Acanthisittidae*. They were formerly supposed to be creepers, warblers, nuthatches, or wrens, and classed accordingly, but are now placed in the vicinity of the Old World ant-thrushes and related forms (*Pittidae*, etc.). There is only one intrinsic synonymy; the sternum is single-notched on each side behind; the nasal bones are holothirial, the maxillopalatines are slender, and the vomer is broad, with anterior emargination; the tarsi are not laminiplanar; the primaries are ten, with the first about as long as the second, and the rectrices are ten. *Acanthisitta chloris* (the citrine warbler of Latham, 1783) is a short-tailed creeper, quite like a nuthatch in appearance and habits; the species of *Xenicus* resemble wrens. See *Xenicus*.

Xenicus (zē-ni-kus), *n.* [*NL. (G. R. Gray, 1855). < Gr. ξένος, of a stranger, < ξείνος, a stranger.*] The name-giving genus of *Xenicidae*. It contains two species. *X. longipes* is the long-legged warbler of Latham (1783), remarkably like a wren in appearance and habits; the other species is *X. gilchristi* of Julius Haast.

Xenisma (zē-nis-mā), *n.* [*NL. (Jordan, 1876). < Gr. ξένισμα, amazement, < ξένος, surprise, make strange, < ξείνος, strange.*] A genus of cyprinodonts, or a subgenus of *Fundulus*, whose dorsal fin is high and begins opposite or slightly behind the anal. Two species inhabit tributaries of the Lower Mississippi. See cut under *stutfish*.

xenium (zē-ni-ni), *n.*; *pl. xenia* (-ā). [*NL. < Gr. ξένιον, usually in pl. ξείνα, a gift to a guest from his host, neut. of ξείνος, of a guest, < ξείνος, a guest, stranger.*] In *classical antiq.*, a present given to a guest or stranger, or to a foreign ambassador.

Xenocichla (zen-ō-sik-lā), *n.* [*NL. (Hartlaub, 1851). < Gr. ξείνος, strange, + κίχλη, a thrush.*] An extensive genus of Ethiopian birds, conventionally referred to the *Troglodytidae*, and also called *Blida*, *Pyrrhurus*, *Baropogon*, and *Trichites*. Fifteen species are described; they differ much from one another. Some have often been put in such genera as *Pycnonotus*, *Cinnyris*, or *Trichophorus*, and all are called by the name *bulbul*, in common with other birds more or less nearly related. *X. iheria* is the yellow-browed bulbul; *X. baricollis*, the yellow-throated; *X. tephroleuca*, the ash-throated; *X. simplex*, Marche's; *X. davisiana*, Bartratt's; *X. s. rufus*, the red-billed; *X. s. rubra* (the type of the genus, from Senegambia to Gaboon), the chestnut-tailed; *X. secalensis*, the pale; *X. albicollis*, Cassin's; *X. indicata*, the honey-guide; *X. leucophaea*, the white-bellied; *X. notata*, the yellow-marked; *X. eteipallia*, the gray-headed.

Xenocratean (zē-nok-rā-tē-an), *a.* [*< Xenocrates (see def.).*] Pertaining to the doctrine of Xenocrates, a Greek philosopher, who was the head of the Academy, the second after Plato. He is known to have been a voluminous and methodical writer, adhering pretty closely to his master's teachings, but inclined to the doctrines of the Pythagoreans. He held that the ideas were numbers, and that all numbers were produced from 1 and 2.

Xenocratic (zen-ō-kra-tik), *a.* Same as *Xenocratean*.

Xenocrepis (zen-ō-kre-pis), *n.* [*NL. (Förster, 1856). < Gr. ξείνος, strange, + κρηπίς, a half-boot.*] A genus of hymenopterous parasites, of the chalcid subfamily *Pteromalinae*, having thirteen-jointed antennae with two ring-joints, the stigmal club small, and the marginal vein thickened. The species are European.

Xenodacnis (zen-ō-dak-nis), *n.* [*NL. (Cabanis, 1873). < Gr. ξείνος, strange, + NL. Dacnis, q. v.*] A genus of guilts or *Corvidae*. The type is *X. parva* of Peru, 4½ inches long, the male of a nearly uni-

form dull purplish-blue, the wings and tail blackish edged with blue. The form is peculiar among the guilts, the bill having a parine shape, though no nasal bristles.

xenoderm (zē-nō-dēr-m), *n.* [*< NL. Xenoderma.*] A wart-snake of the subfamily *Xenodermatinae*.

Xenoderma (zen-ō-dēr-mā), *n.* [*NL. (Reinhardt), < Gr. ξείνος, strange, + δέρμα, skin.*] The typical genus of *Xenodermatinae*, with granular scales, simple urostegs, and no frontal nor parietal plates. The genus has also been placed in *Nothopsidae*. Also *Xenodermus*.

Xenodermatinae (zen-ō-dēr-ma-ti-nē), *n. pl.* [*NL. < Xenoderma (-t-) + -inae.*] A subfamily of *Acrochordidae* or wart-snakes, represented by the genus *Xenoderma*. Also *Xenodermata*.

xenodermine (zen-ō-dēr-min), *a.* [*< Xenoderma + -ine.*] Of or pertaining to the *Xenodermatinae*.

Xenodermus (zen-ō-dēr-mus), *n.* [*NL.*] Same as *Xenoderma*.

xenodocheum, xenodochium (zen-ō-dō-kē-um, -kī-um), *n.*; *pl. xenodochea, xenodochia* (-ā). [*LL. xenodochium, < Gr. ξενόδοχος, a place for strangers to lodge in, a hotel, < ξείνος, a stranger, + δόχος, a receptacle, < δέχομαι, receive.*] 1. In *classical antiq.*, a building for the reception of strangers.—2. In modern Greek lands, a hotel; an inn; also, a guest-house in a monastery.

xenodochy (zē-nōd-ō-kī), *n.* [*< Gr. ξενόδοχος, the entertainment of a stranger, < ξείνος, a stranger, + δόχῃ, a receiving, < δέχομαι, receive.*] 1. Reception of strangers; hospitality.—2. Same as *xenodocheum*.

xenogamy (zē-nōg-ā-mī), *n.* [*< Gr. ξείνος, strange, + γάμος, marriage.*] In *bot.*, cross-fertilization—that is, the impregnation or fecundation of the ovules of a flower with pollen from another flower of the same species, either on the same or (usually) on a different plant.

xenogenesis (zen-ō-jen-ē-sis), *n.* [*NL. < Gr. ξείνος, stranger, + γένεσις, birth.*] The generation of offspring which pass through an entirely different life-cycle from that of the parents, and never exhibit the characters of the latter: a mode of biogenesis supposed by Milne-Edwards to occur, but not proved to have any existence in fact.

The term *Heterogenesis* . . . has unfortunately been used in a different sense (than that of the offspring being altogether and permanently unlike the parent), and M. Milne-Edwards has therefore substituted for it *Xenogenesis*, which means the generation of something foreign.

Huxley, Lay Sermons, p. 353.

xenogenetic (zen-ō-jē-net-ik), *a.* [*< xenogenesis (-t-) + -ic.*] Of the nature of or pertaining to xenogenesis.

I have dwelt upon the analogy of pathological modification, which is in favour of the *xenogenetic* origin of microzymes.

Huxley, Lay Sermons (ed. 1871), p. 370.

xenogenic (zen-ō-jen-ik), *a.* [*< xenogen-y + -ic.*] Same as *xenogenetic*.

xenogeny (zē-nōj-ē-nī), *n.* [*< Gr. ξείνος, strange, + γένεσις, -born.*] Same as *xenogenesis*.

xenolite (zē-nō-lit), *n.* A silicate of aluminium, related to fibrolite, found at Petershof, Finland.

xenomenia (zen-ō-mē-ni-ā), *n.* [*NL. < Gr. ξείνος, strange, + μηνιαία, menses.*] A loss of blood occurring at the time of the menstrual flow elsewhere than from the uterus, and taking the place of the regular flow; vicarious menstruation. Compare *stigmatal*, 4.

Xenomi (zē-nō-mī), *n. pl.* [*NL. < Gr. ξείνος, strange, + ὤμος, shoulder.*] A suborder of fishes, resembling the *Haplomi*, but distinguished by peculiarities of the pectoral arch (whence the name). It consists of the family *Dallidae* alone. See cut under *Dallia*.

xenomorphic (zen-ō-mōr-ik), *a.* [*< Gr. ξείνος, strange, + μορφή, form.*] In *lithol.*, noting the mineral constituents of a rock when they are bounded by planes not formed as the result of their own molecular structure, but the result of their contact with other minerals also forming constituents of the same rock, which having crystallized first have impressed their form on those adjacent to them: the counterpart of *idiomorphic*. Also called *allotriomorphic*.

xenomous (zē-nō-mus), *a.* [*< NL. Xenomi.*] Peculiar in the structure of the pectorals, as the Alaskan blackfish; of or pertaining to the *Xenomi*.

Xenopeltidae (zen-ō-pel-ti-dē), *n. pl.* [*NL. < Xenopeltis + -idae.*] A family of colubridiform *Ophidia*, represented by the genus *Xenopeltis*. They have no supraorbital or postorbital bone, have a coronoid bone, premaxillary teeth, and gastrosteges, and have no rudiments of hind limbs.

Xenopeltis (zen-ō-pel-tis), *n.* [*NL. (Reinhardt, 1827). < Gr. ξείνος, strange, + πέλτη, a shield.*] The typical genus of *Xenopeltidae*, having the lower jaw produced, the teeth very fine, and no anal spurs. *X. unicolor*, formerly *Tortrix xenopeltis*, is a singular snake of nocturnal and carnivorous habits, found in Malaysia and some other regions.

Xenophanean (zē-nōf-a-nē-an), *a.* [*< Xenophanes (see def.).*] Pertaining to the doctrines of Xenophanes of Colophon, the founder of the Eleatic school of philosophy. He seems to have been the first of the Greeks to propound a monotheistic doctrine, probably of a pantheistic character; but he did not go to the length of denying the reality of the manifold, as Parmenides and his followers did.

Xenophora (zē-nōf-ō-rā), *n.* [*NL. (Fischer von Waldheim, 1807), also Xenophorus (Philippi, 1847). < Gr. ξείνος, strange, + φορέω, < φέρω = E. bear.*] The typical genus of *Xenophoridae*, so

Xenophora pallidula, side view, reduced.

Xenophora pallidula, lower view, reduced.

called from their carrying foreign objects attached to the shell. Formerly also called *Phorus* (a name too near the prior *Phora* in entomology). See also cut under *carrier-shell*.

Xenophoridae (zen-ō-for-i-dē), *n. pl.* [*NL. < Xenophora + -idae.*] A family of tanioglossate gastropods, typified by the genus *Xenophora*; formerly called *Phoridae* (a name preoccupied in entomology). They are known as *carrier-shells*, *conchologists*, and *mineralogists*. See cuts under *carrier-shell* and *Xenophora*.

xenophoroid (zē-nōf-ō-roid), *a. and n.* I. *a.* Of or relating to the *Xenophoridae*.

II. *n.* Any member of this family.

xenophthalmia (zen-ōf-thal-mi-ā), *n.* [*NL. < Gr. ξείνος, strange, + ὀφθαλμία, ophthalmia.*] Conjunctivitis excited by the presence of a foreign body.

Xenopicus (zen-ō-pi-kus), *n.* [*NL. (S. F. Baird, 1858). < Gr. ξείνος, strange, + L. picus, a woodpecker.*] An isolated genus of North American woodpeckers, based on the *Picus albolarvatus* of Cassin, and characterized by the structure

White-headed Woodpecker (*Xenopicus albolarvatus*).

of the tongue and hyoid bone, in which is seen an approach to that of *Sphyrapicus*. The body is black, without spots or stripes; the head is white, with a scarlet nuchal crescent in the male; the wings are blotched with white; the length is about 9 inches, the extent 16. This remarkable woodpecker inhabits the mountains of Cali-

fornia, Oregon, and Washington, where it is common in pine woods.

Xenopodidae (zen-ō-pod'i-dē), *n. pl.* [NL., < *Xenopus* (-pod-) + *-idae*.] A family of African aglossal or tongueless toads, typified by the genus *Xenopus*; same as *Dactylethridae*. They are related to the American *Pipidae*, but have upper teeth and some long tentacular processes on the head.

Xenops (zē'nops), *n.* [NL. (Illiger, 1814), < Gr. *Ξενος*, strange, + *ὤψ*, face, appearance.] A genus of *Dendrocolaptidae*, or South American tree-creeper, characterized by the short, com-

Xenops gombertzii.

pressed, and upturned bill, and ranging from Mexico to southern Brazil. There are 2 distinct species. *X. gombertzii* has the back olivaceous and the belly streaked; in *X. rufilans* the back is rufous and the belly is not streaked. They are very small birds, 4 or 5 inches long, both with a white cheek-stripe.

Xenopterius (zē-nop'te-ris), *n.* [NL., < Gr. *Ξενος*, strange, + *πτερον*, wing, fin.] A genus of plectognath fishes, of the family *Tetodontidae*,

Xenopterius natus.

characterized by the infundibuliform nostrils and the peculiarity of the dermal ossifications. They inhabit the Indian archipelago. *X. natus* is a typical example.

xenopterygian (zē-nop-te-rj'i-an), *a. and n.* *I. a.* Having the characters of or pertaining to the *Xenopterygii*.

II. n. A fish of this suborder.

Xenopterygii (zē-nop-te-rj'i-i), *n. pl.* [< Gr. *Ξενος*, strange, + *πτερον*, wing (fin).] A suborder of teleostcephalus fishes, represented by the family *Gobiesocidae*, and characterized by the development of a complicated suctorial organ in the pectoral region. The xenopterygians had usually been placed with the lump-fishes and snail-fishes, in consequence of their common possession of a sucking-disk, which, however, is formed differently in the present suborder, being chiefly developed from the skin of the breast, in connection with the ventral fins. They are mostly fishes of oblong or lengthened coniform shape, with scaleless skin and spineless fins, one posterior dorsal fin, more or less nearly opposite the anal, and the sucker either entire or divided. They are small fishes, most common in tropical and warm temperate seas between tide-marks, adherent to rocks. There are 10 genera and 25 or 30 species, as *Gobiesox reticulatus*, abundant in tide-pools on the Pacific coast of the United States.

Xenopus (zen-ō-pus), *n.* [NL. (Wagler, about 1830), < Gr. *Ξενος*, strange, + *πους* (pod-) = *foot*.] The typical genus of *Xenopodidae*. There are several species, all of tropical Africa, as *X. laevis*. They are called *clawed toads*.

Xenorhina (zen-ō-rī'nā), *n.* [NL. (Peters, 1863), < Gr. *Ξενος*, strange, + *ῥίς* (rh-) = *nose, snout*.] A genus of batrachians, peculiar to New Guinea, typical of the family *Xenorhinidae*. The species is *X. orycephala*.

Xenorhinidae (zen-ō-rī'n-i-dē), *n. pl.* [NL., < *Xenorhina* + *-idae*.] A family of Papuan batrachians, represented by the genus *Xenorhina*.

Xenorhipis (zen-ō-rī'pīs), *n.* [NL. (Le Conte, 1866), < Gr. *Ξενος*, strange, + *ῥίς*, also *ῥίς*, wickerwork.] A genus of buprestid beetles,

containing the single species *X. brendeli*, from Illinois, remarkable in that the male antennae are flabellate, a unique structure in the family *Buprestidae*.

Xenorhynchus (zen-ō-ring'kus), *n.* [NL. (Bonaparte, 1855), < Gr. *Ξενος*, strange, + *ῥις* (rh-) = *beak*.] A genus of storks or *Ciconiinae*, representing the Indian and Australian type of *jabirus*. *X. australis* is the black-necked stork (which see, under *stork*).

Xenos (zē'nos), *n.* [NL. (Rossi, 1792), < Gr. *Ξενος*, strange.] A genus of parasitic coleopters, of the family *Stylopidae*, having four-jointed antennae and four-jointed tarsi. The species are found in middle and southern Europe and in North and South America. They are among the most remarkable of insects, and the genus is historically notable as containing the earliest known strepsipters. Also, and preferably, *Xenos*.

Xenosauridae (zen-ō-sā'ri-dē), *n. pl.* [NL., < *Xenosaurus* + *-idae*.] A family of American eriglossate lacertilians, related to the *Iguanidae*, based on the genus *Xenosaurus*.

Xenosaurus (zen-ō-sā'rus), *n.* [NL. (Peters, 1861), < Gr. *Ξενος*, strange, + *σαυρος*, a lizard.] The typical genus of *Xenosauridae*, based on *X. grandis*, a Mexican lizard about 10 inches long.

xenotime (zen-ō-tim), *n.* [< Gr. *Ξενος*, favoring strangers, < *Ξενος*, strange, + *τιμή*, honor.] A native phosphate of yttrium, having a yellowish-brown color, and crystallizing in squares, octahedrons, and prisms. It resembles zircon in form, but is inferior in hardness.

Xenotis (zē-nō'tis), *n.* [NL. (Jordan, 1877), also *Xenotes*, < Gr. *Ξενος*, strange, + *ὄψ* (ōr-), ear.] A genus of centrarchoid fishes, very near *Lepomis*, in which it is sometimes merged, but having very short, weak, and flexible gill-rakers, and no palatine teeth. Species are *X. megalotis*, *X. marginatus*, and *X. bombifrons*, of the United States, the first-named known as the *long-eared sunfish*. This is 6 inches long, highly colored, and abounds in many parts of the United States.

xenurine (zē-nū'rin), *n. and a.* [< *Xenurus* + *-ine*.] *I. n.* An armadillo of the genus *Xenurus*; a kabasson. In these forms of *Dasyproctinae* the backbone is more coniferous than in the true *Dasyproctinae*, and the tail is nearly naked; the feet are also somewhat peculiar in the proportions of the metacarpals and phalanges.

II. a. Of or pertaining to the genus *Xenurus*. **Xenurus** (zē-nū'rus), *n.* [NL., < Gr. *Ξενος*, strange, + *ουρα*, tail.] *1.* In *ornith.*, same as *Alcedinurus*. *Bow*, 1826. — *2.* In *mammal.*, a genus of armadillos, named by Wagler in 1830; the xenurines or kabassons. There are 2 species,

Jointed Xenurus (*Xenurus armadillo*).

X. uiciniatus and *X. hispidus*, which inhabit tropical America, and burrow with great ease underground.

Xenus (zē'nus), *n.* [NL.; see *Xenos*.] *1.* In *entom.*, same as *Xenos*. — *2.* In *ornith.*, same as *Terekia* (where see *ent*). *J. J. Kaup*, 1829.

Xeocephus (zē-ōs'ē-fus), *n.* [NL. (Bonaparte, 1854), and *Xeocephalus* (G. R. Gray, 1869), and *Xeocephus* (R. B. Sharpe, 1879); formation uncertain.] A genus of *Muscicapidae*, confined to the Philippines. *X. rufus* of Lazon is 7 inches long, and mostly of a cinnamon color. *X. cinnamonensis* of Basilan is similar, with a white belly. *X. cyanescens* is mostly of a grayish cobalt blue, 8½ inches long, and found in Palawan.

xerafin (zer'a-fin), *n.* [Also *xeraphim*, *xeraphen*, *xeraphin*, also, as Pg., *xerafin*; < Pg. *xerafin*, *xerafin*, < Ar. *ashrafi* (cf. *sharafi*, noble), applied prop. to the gold dinar, but also to the gold mohur; < *sharīf*, noble; see *sharīf*.] An Indo-Portuguese silver coin formerly current in Goa. About 1835 it was worth 75 United States cents.

xeransia (zē-ran'sis), *n.* [NL., < Gr. *Ξηρανεια*, a drying up, parching, < *Ξηρανεω*, dry up; see *xerasia*.] In *pathol.*, siccation; a drying up.

Xeranthemum (zē-ran'thē-mum), *n.* [NL. (Tournefort, 1700), so called from the scarious involucre; < Gr. *Ξηρος*, dry, + *ανθος*, flower.] A genus of composite plants, of the tribe *Cynaroidae* and subtribe *Carlinae*. It is characterized by

long-stalked solitary flower-heads with the outer flowers small, two-lipped, and neutral, the inner ones bisexual and slightly five-lobed, and by free filaments and a latly aristate pappus. There are 4 or 5 species, natives of the Mediterranean region. They are hoary erect branching annuals, without spines, bearing alternate leaves which are narrow and entire. The scarious inner bracts of the showy flower-heads are rose-colored or whitish; from their permanence, *X. annuum*, the most frequently cultivated species, is known as *annual everlasting* or *immortelle*.

xerantic (zē-ran'tik), *a.* [< Gr. *Ξηραντικός*, < *Ξηρανεω*, dry up; see *xerasia*.] Having drying properties; esiccant.

xerasia (zē-rā'si-j), *n.* [NL., < Gr. *Ξηρασία*, a drying, a disease of the hair so called, < *Ξηρανεω*, dry, < *Ξηρος*, dry.] A disease of the hair, characterized by excessive dryness and cessation of growth.

Xerobates (zē-rob'ā-tēz), *n.* [NL. (Agassiz), < Gr. *Ξηρος*, dry, + *βατος*, one that treads, < *βασις*, go.] A genus of tortoises, so called from inhabiting the dry pine-barrens of the southern United States; now often merged in *Testudo*. *X. or T. carolina* is the common gopher. See *gopher*, 3.

xerocollyrium (zē-ro-kol'ir-i-um), *n.* [NL., < Gr. *Ξηροκόλλιον*, a dry or thick eye-salve, < *Ξηρος*, dry, + *κόλλιον*, eye-salve; see *collyrium*.] A dry collyrium or eye-salve.

xeroderma (zē-rō-dēr'mi), *n.* [NL., < Gr. *Ξηροδερμα*, dry, + *δέρμα*, skin.] A mild form of ichthyosis, in which the skin is dry and harsh in consequence of diminished activity of the sudorific and sebaceous glands. Also called *dermatoplasia* and *dryskin*. — **Xeroderma pigmentosum**, a disease of the skin, beginning usually in childhood, characterized by areas of capillary dilatation and pigment deposit, followed by localized atrophy of the skin alternating with small patches of hypertrophied epithelium.

xerodermia (zē-rō-dēr'mi-j), *n.* [NL.] Same as *xeroderma*.

xerodes (zē-rō'dēz), *n.* [NL., < Gr. *Ξηροδερμα*, dryish, dry-looking, < *Ξηρος*, dry, + *δερμα*, form.] Any tumor attended with dryness.

xeroma (zē-rō'mā), *n.* [< Gr. *Ξηρος*, dry, + *-ωμα*.] Same as *xerophthalmia*.

xeromyrum (zē-ro-mi'rum), *n.* [NL., < Gr. *Ξηρομυρον*, a dry perfume, < *Ξηρος*, dry, + *μυρον*, perfume, ointment.] A dry ointment.

xerophagy (zē-rof'ā-jī), *n.* [< LL. *xerophagia*, < Gr. *Ξηροφαγία*, the eating of dry food, abstinence, < *Ξηρος*, dry, + *φαγειν*, eat.] The habit of living on dry food, especially a form of abstinence, as in the early church, in which only bread, herbs, salt, and water were consumed.

xerophil (zē-rō-fil), *n.* [< Gr. *Ξηρος*, dry, + *φιλος*, love.] In *bot.*, a plant of Alphonse de Candolle's second "physiological group" in his natural system of geographical distribution. The plants of this group, like those of the first group, the megatherms, require a hot climate, but, unlike the latter, are adapted to one of great dryness only. They are chiefly found between latitudes 20 and 35° south and north of the equator, and embrace among the most characteristic families the *Zygophyllaceae*, *Cactaceae*, *Artocarpaceae*, *Proteaceae*, and *Cycadaceae*. Compare *megatherm*, *mesotherm*, *microtherm*, and *heliostatherm*.

xerophilous (zē-rof'i-lus), *a.* [NL., < Gr. *Ξηρος*, dry, + *φιλος*, love.] Loving dryness; in botany noting plants which are in various ways peculiarly adapted to dry, especially to hot and dry climates, as by possessing coriaceous leaves, succulent stems, etc.; specifically, belonging to the group of xerophiles. See *xerophil*.

xerophthalmia (zē-rof-thal'mi-j), *n.* [NL., < LL. *xerophthalmia*, < Gr. *Ξηροφθαλμία*, dryness of the eyes, < *Ξηρος*, dry, + *ὀφθαλμος*, eye.] A dry form of conjunctivitis, resulting in a thickening and skin-like condition of the conjunctiva. Also *xeroma*, and *xerosis of the conjunctiva*.

Xerophyllum (zē-rō-fil'um), *n.* [NL. (Richard, 1803), so called from the harsh dry leaves; < Gr. *Ξηρος*, dry, + *φυλλον*, leaf.] *1.* A genus of liliaceous plants, of the tribe *Northciaceae*. It is characterized by crowded linear radical leaves, flowers with three styles, and a loculicidal capsule. The 3 species are natives of the United States, and are known as *turkeybeard*. They are perennials, with a short thick woody rhizome, tall erect unbranched stem, and a great number of harsh rigid elongated leaves, usually forming a conspicuous basal tuft, and also numerous along the stem, but much smaller and thinner, finally diminished into bristles. The flowers are white and very showy, forming a long terminal raceme which is at first densely pyramidal or oblong and becomes afterward greatly elongated. *X. setifolium*, the eastern species, is a native of pine-barrens from New Jersey to Georgia; the western, *X. Douglasii*, with a smaller raceme, occurs from the Columbia river to Montana; the raceme of *X. tenax*, of California, is fragrant and dense, becoming over a foot in length.

2. [*l. c.*] A plant of this genus.

xerosis (zē-rō'sis), *n.* [NL., < Gr. *Ξηροσία*, a drying up, < *Ξηρος*, dry; see *xerasia*.] Same as *xeranthemum*. — **Xerosis of the conjunctiva**. Same as *xerophthalmia*.

xerostomia (zê-rô-stô-mi-ä), *n.* [NL., < Gr. ξηρὸς, dry, + στήναι, mouth.] Abnormal dryness of the mouth.

xerotes (zê-rô-têz), *n.* [NL., < Gr. ξηρότης, dryness, < ξηρὸς, dry.] In med., a dry habit or disposition of the body.

xerotic (zê-rô-tik), *a.* [*xerotes* + *-ic*.] Characterized by dryness; of the nature of or pertaining to xerotes or xerosis.

xerotribia (zê-rô-trib'i-ä), *n.* [NL., < Gr. ξηρότριβη, dry rubbing, < ξηρὸς, dry, + τρίβειν, rub.] Dry friction.

xerotripsis (zê-rô-trip'sis), *n.* [NL., < Gr. ξηρότριψις, dry, + τριβή, rubbing, < τρίβειν, rub.] Same as *xerotribia*.

Xerus (zê-rus), *n.* [NL. (Hemprich and Ehrenberg), so called from the character of the fur; < Gr. ξηρὸς, dry.] A genus of African ground-squirrels, having dry, harsh fur, which in some cases is bristly and even spiny. They are of more or less terrestrial and fossorial habits, like spermophiles. The species are few. The best-known is *X. rutilus*, 11 inches long, the tail 9 more, and of a reddish-yellow color above, paler or whitish below. The red-footed is *X. erythropus*.

Xestia (zê-s'ti-ä), *n.* [NL. (Hübner, 1816), < Gr. ξέστης, smooth, smoothed by scraping, < ξένω, scrape.] 1. A genus of noctuid moths, of the family *Orthosiidæ*. Three species are known, two from Europe and one from North America.

—2. A genus of coleopterous insects, of the family *Cerambycidae*, named by Serville in 1834. About a dozen species are known, all South American.

Xestobium (zê-s'tô-bi-um), *n.* [NL. (Motschulsky, 1845), < Gr. ξέστος, smooth, dry, + βίω, live.] A genus of bark-boring beetles, of the family *Ptychidae*, having the prosternum very short and the tarsi broad. Three species are described from Europe, and three from North America. *X. affine* breeds in dead maple-stumps in the United States.

xi (zî), *n.* The Greek letter ξ, ε, corresponding to the English *x* and *z*.

Ximenia (zî-mê-ni-ä), *n.* [NL. (Plumier, 1703), named after Francisco Ximenes, a Spanish naturalist, who wrote in 1615 on medicinal plants.] A genus of polypetalous plants, of the order *Oleaceæ* and tribe *Olacæ*. It is characterized by flowers with the calyx persistent unchanged, the petals inwardly bearded, the stamens in number more than double the petals and each bearing an oblong or linear anther. There are 5 species, natives chiefly of the tropics, one widely dispersed through both the Old and New Worlds, one Polynesian, and one South African. They are shrubs or trees, smooth or tomentose, often armed with spinous branches. They bear alternate entire leaves, often in clusters. The flowers are whitish, larger than in most of the order, and arranged in short axillary cymes. *X. americana*, a native of the West Indies, Florida, and Mexico, is known as *tallow nut* (which see), in Florida as *hog-plum* and *red plum*, and in the West Indies as *mountain-plum*, *seaside plum*, and *false sandalwood*.

Xiphiadidæ (zî-fî-ad'i-dê), *n. pl.* See *Xiphiidæ* 2.

Xiphianæ (zî-fî-a-nê), *n. pl.* See *Xiphiidæ* 2.

Xiphias (zî-fî-as), *n.* [NL. (Linnaeus, 1748), < L. xiphias, < Gr. ξίφος, a swordfish, a sort of comet, < ξίφα, sword.] 1. The typical genus of *Xiphiidæ*, now restricted to swordfishes without teeth or ventral fins, and thus exclusive of the sailfishes and spear-fishes (*Isistiopharus* and *Tetrapturus*). The dorsal fins are two, the first high and falcate, and the second very small and situated on the tail, opposite the small second anal. In younger individuals, however, teeth are present, and the two dorsals are connected, so that the banner is more like that of a sailfish. The first anal resembles the first dorsal, but is smaller and less falcate; the pectorals are moderate and falcate. The caudal keel is single; the skin is rough and naked, or in the young has rudimentary scales. *X. gladius* is the common swordfish, widely dispersed in both Atlantic and Pacific Oceans, attaining a weight of 300 or 400 pounds, with the sword a yard long. It is dark bluish above, dusky below, with the sword blackish on top.

2. In astron.: (a) A constellation made by Ptolemy Theodori in the fifteenth century, in the south pole of the ecliptic, and now named *Dorado*. (b) [*i. e.*] In older authors, a sword-shaped comet.

Xiphidion (zî-fîd'i-on), *n.* [NL. (Serville, 1831), also *Xiphidium* (Agassiz, 1846), erroneously *Xiphidium* (Fischer, 1854); < Gr. ξιφίδιον, dim. of ξίφος, sword.] 1. In entom., a genus of orthopterous insects, of the family *Locustidæ*, synonymous in part with *Orchelimum*. They are slender long-horned grasshoppers which lay their eggs in the pith of plants, thus sometimes damaging cereals, especially maize.

2. In ichth., a genus of blennioid fishes: so called by Girard in 1859. Being preoccupied in entomology, the name has been changed to *Xiphister* (which see).

Xiphidiontidae (zî-fîd-i-on'ti-dê), *n. pl.* [NL., irreg. < *Xiphidion* + *-ida*.] A family of fishes, the gunnels or gunnel-fishes: same as *Muraenoididæ*. See *rock-eel*.

Xiphidopter (zî-fîd-i-op'te-rus), *n.* [NL. (Reichenbach, 1853), < Gr. ξιφίδιον, dim. of ξίφος, sword, + πτερόν, wing.] A genus of sparrow-winged plovers, of which the West African *X. albiceps* is the type. It is a remarkable bird, being the only one of these plovers presenting the combination of wattles and spurs and only three toes (see *spur-winged*); in consequence, it has been placed in five different genera.

Xiphidopterus (zî-fîd-i-op'te-rus), *n.* [NL. (Reichenbach, 1853), < Gr. ξιφίδιον, dim. of ξίφος, sword, + πτερόν, wing.] A genus of sparrow-winged plovers, of which the West African *X. albiceps* is the type. It is a remarkable bird, being the only one of these plovers presenting the combination of wattles and spurs and only three toes (see *spur-winged*); in consequence, it has been placed in five different genera.

Xiphidopterus (zî-fîd-i-op'te-rus), *n.* [NL. (Reichenbach, 1853), < Gr. ξιφίδιον, dim. of ξίφος, sword, + πτερόν, wing.] A genus of sparrow-winged plovers, of which the West African *X. albiceps* is the type. It is a remarkable bird, being the only one of these plovers presenting the combination of wattles and spurs and only three toes (see *spur-winged*); in consequence, it has been placed in five different genera.

Xiphidopterus (zî-fîd-i-op'te-rus), *n.* [NL. (Reichenbach, 1853), < Gr. ξιφίδιον, dim. of ξίφος, sword, + πτερόν, wing.] A genus of sparrow-winged plovers, of which the West African *X. albiceps* is the type. It is a remarkable bird, being the only one of these plovers presenting the combination of wattles and spurs and only three toes (see *spur-winged*); in consequence, it has been placed in five different genera.

Xiphidopterus (zî-fîd-i-op'te-rus), *n.* [NL. (Reichenbach, 1853), < Gr. ξιφίδιον, dim. of ξίφος, sword, + πτερόν, wing.] A genus of sparrow-winged plovers, of which the West African *X. albiceps* is the type. It is a remarkable bird, being the only one of these plovers presenting the combination of wattles and spurs and only three toes (see *spur-winged*); in consequence, it has been placed in five different genera.

Xiphidopterus (zî-fîd-i-op'te-rus), *n.* [NL. (Reichenbach, 1853), < Gr. ξιφίδιον, dim. of ξίφος, sword, + πτερόν, wing.] A genus of sparrow-winged plovers, of which the West African *X. albiceps* is the type. It is a remarkable bird, being the only one of these plovers presenting the combination of wattles and spurs and only three toes (see *spur-winged*); in consequence, it has been placed in five different genera.

Xiphidopterus (zî-fîd-i-op'te-rus), *n.* [NL. (Reichenbach, 1853), < Gr. ξιφίδιον, dim. of ξίφος, sword, + πτερόν, wing.] A genus of sparrow-winged plovers, of which the West African *X. albiceps* is the type. It is a remarkable bird, being the only one of these plovers presenting the combination of wattles and spurs and only three toes (see *spur-winged*); in consequence, it has been placed in five different genera.

Xiphidopterus (zî-fîd-i-op'te-rus), *n.* [NL. (Reichenbach, 1853), < Gr. ξιφίδιον, dim. of ξίφος, sword, + πτερόν, wing.] A genus of sparrow-winged plovers, of which the West African *X. albiceps* is the type. It is a remarkable bird, being the only one of these plovers presenting the combination of wattles and spurs and only three toes (see *spur-winged*); in consequence, it has been placed in five different genera.

Xiphidopterus (zî-fîd-i-op'te-rus), *n.* [NL. (Reichenbach, 1853), < Gr. ξιφίδιον, dim. of ξίφος, sword, + πτερόν, wing.] A genus of sparrow-winged plovers, of which the West African *X. albiceps* is the type. It is a remarkable bird, being the only one of these plovers presenting the combination of wattles and spurs and only three toes (see *spur-winged*); in consequence, it has been placed in five different genera.

Xiphidopterus (zî-fîd-i-op'te-rus), *n.* [NL. (Reichenbach, 1853), < Gr. ξιφίδιον, dim. of ξίφος, sword, + πτερόν, wing.] A genus of sparrow-winged plovers, of which the West African *X. albiceps* is the type. It is a remarkable bird, being the only one of these plovers presenting the combination of wattles and spurs and only three toes (see *spur-winged*); in consequence, it has been placed in five different genera.

Xiphidopterus (zî-fîd-i-op'te-rus), *n.* [NL. (Reichenbach, 1853), < Gr. ξιφίδιον, dim. of ξίφος, sword, + πτερόν, wing.] A genus of sparrow-winged plovers, of which the West African *X. albiceps* is the type. It is a remarkable bird, being the only one of these plovers presenting the combination of wattles and spurs and only three toes (see *spur-winged*); in consequence, it has been placed in five different genera.

Xiphidopterus (zî-fîd-i-op'te-rus), *n.* [NL. (Reichenbach, 1853), < Gr. ξιφίδιον, dim. of ξίφος, sword, + πτερόν, wing.] A genus of sparrow-winged plovers, of which the West African *X. albiceps* is the type. It is a remarkable bird, being the only one of these plovers presenting the combination of wattles and spurs and only three toes (see *spur-winged*); in consequence, it has been placed in five different genera.

Xiphidopterus (zî-fîd-i-op'te-rus), *n.* [NL. (Reichenbach, 1853), < Gr. ξιφίδιον, dim. of ξίφος, sword, + πτερόν, wing.] A genus of sparrow-winged plovers, of which the West African *X. albiceps* is the type. It is a remarkable bird, being the only one of these plovers presenting the combination of wattles and spurs and only three toes (see *spur-winged*); in consequence, it has been placed in five different genera.

Xiphidopterus (zî-fîd-i-op'te-rus), *n.* [NL. (Reichenbach, 1853), < Gr. ξιφίδιον, dim. of ξίφος, sword, + πτερόν, wing.] A genus of sparrow-winged plovers, of which the West African *X. albiceps* is the type. It is a remarkable bird, being the only one of these plovers presenting the combination of wattles and spurs and only three toes (see *spur-winged*); in consequence, it has been placed in five different genera.

Xiphidopterus (zî-fîd-i-op'te-rus), *n.* [NL. (Reichenbach, 1853), < Gr. ξιφίδιον, dim. of ξίφος, sword, + πτερόν, wing.] A genus of sparrow-winged plovers, of which the West African *X. albiceps* is the type. It is a remarkable bird, being the only one of these plovers presenting the combination of wattles and spurs and only three toes (see *spur-winged*); in consequence, it has been placed in five different genera.

Xiphidopterus (zî-fîd-i-op'te-rus), *n.* [NL. (Reichenbach, 1853), < Gr. ξιφίδιον, dim. of ξίφος, sword, + πτερόν, wing.] A genus of sparrow-winged plovers, of which the West African *X. albiceps* is the type. It is a remarkable bird, being the only one of these plovers presenting the combination of wattles and spurs and only three toes (see *spur-winged*); in consequence, it has been placed in five different genera.

Xiphicera (zî-fis'e-rî), *n.* [NL. (Latreille, 1825), < Gr. ξίφος, sword, + κέρα, horn.] A genus of orthopterous insects, of the family *Aceridiidæ*, or forming a family *Xiphicridæ*. They are very large strong grasshoppers with crested pronotum and ensiform antennae. About 25 species have been described, mainly from South America. Others are found in Mexico, the West Indies, Australia, Java, China, and Corea. Also *Xiphocera* (Burmeister, 1838).

Xiphicridæ (zî-fî-ser'i-dê), *n. pl.* [NL. (S. H. Scudder, as *Xiphocridæ*), < *Xiphicera* + *-idæ*.] A family of short-horned grasshoppers, founded on the genus *Xiphicera*, and containing some half-dozen genera of large tropical and sub-tropical forms.

Xiphidion (zî-fîd'i-on), *n.* [NL. (Serville, 1831), also *Xiphidium* (Agassiz, 1846), erroneously *Xiphidium* (Fischer, 1854); < Gr. ξιφίδιον, dim. of ξίφος, sword.] 1. In entom., a genus of orthopterous insects, of the family *Locustidæ*, synonymous in part with *Orchelimum*. They are slender long-horned grasshoppers which lay their eggs in the pith of plants, thus sometimes damaging cereals, especially maize.

2. In ichth., a genus of blennioid fishes: so called by Girard in 1859. Being preoccupied in entomology, the name has been changed to *Xiphister* (which see).

Xiphidiontidae (zî-fîd-i-on'ti-dê), *n. pl.* [NL., irreg. < *Xiphidion* + *-ida*.] A family of fishes, the gunnels or gunnel-fishes: same as *Muraenoididæ*. See *rock-eel*.

Xiphidopter (zî-fîd-i-op'te-rus), *n.* [NL. (Reichenbach, 1853), < Gr. ξιφίδιον, dim. of ξίφος, sword, + πτερόν, wing.] A genus of sparrow-winged plovers, of which the West African *X. albiceps* is the type. It is a remarkable bird, being the only one of these plovers presenting the combination of wattles and spurs and only three toes (see *spur-winged*); in consequence, it has been placed in five different genera.

Xiphidopterus (zî-fîd-i-op'te-rus), *n.* [NL. (Reichenbach, 1853), < Gr. ξιφίδιον, dim. of ξίφος, sword, + πτερόν, wing.] A genus of sparrow-winged plovers, of which the West African *X. albiceps* is the type. It is a remarkable bird, being the only one of these plovers presenting the combination of wattles and spurs and only three toes (see *spur-winged*); in consequence, it has been placed in five different genera.

Xiphidopterus (zî-fîd-i-op'te-rus), *n.* [NL. (Reichenbach, 1853), < Gr. ξιφίδιον, dim. of ξίφος, sword, + πτερόν, wing.] A genus of sparrow-winged plovers, of which the West African *X. albiceps* is the type. It is a remarkable bird, being the only one of these plovers presenting the combination of wattles and spurs and only three toes (see *spur-winged*); in consequence, it has been placed in five different genera.

Xiphidopterus (zî-fîd-i-op'te-rus), *n.* [NL. (Reichenbach, 1853), < Gr. ξιφίδιον, dim. of ξίφος, sword, + πτερόν, wing.] A genus of sparrow-winged plovers, of which the West African *X. albiceps* is the type. It is a remarkable bird, being the only one of these plovers presenting the combination of wattles and spurs and only three toes (see *spur-winged*); in consequence, it has been placed in five different genera.

Xiphidopterus (zî-fîd-i-op'te-rus), *n.* [NL. (Reichenbach, 1853), < Gr. ξιφίδιον, dim. of ξίφος, sword, + πτερόν, wing.] A genus of sparrow-winged plovers, of which the West African *X. albiceps* is the type. It is a remarkable bird, being the only one of these plovers presenting the combination of wattles and spurs and only three toes (see *spur-winged*); in consequence, it has been placed in five different genera.

Xiphidopterus (zî-fîd-i-op'te-rus), *n.* [NL. (Reichenbach, 1853), < Gr. ξιφίδιον, dim. of ξίφος, sword, + πτερόν, wing.] A genus of sparrow-winged plovers, of which the West African *X. albiceps* is the type. It is a remarkable bird, being the only one of these plovers presenting the combination of wattles and spurs and only three toes (see *spur-winged*); in consequence, it has been placed in five different genera.

Xiphidopterus (zî-fîd-i-op'te-rus), *n.* [NL. (Reichenbach, 1853), < Gr. ξιφίδιον, dim. of ξίφος, sword, + πτερόν, wing.] A genus of sparrow-winged plovers, of which the West African *X. albiceps* is the type. It is a remarkable bird, being the only one of these plovers presenting the combination of wattles and spurs and only three toes (see *spur-winged*); in consequence, it has been placed in five different genera.

Xiphidopterus (zî-fîd-i-op'te-rus), *n.* [NL. (Reichenbach, 1853), < Gr. ξιφίδιον, dim. of ξίφος, sword, + πτερόν, wing.] A genus of sparrow-winged plovers, of which the West African *X. albiceps* is the type. It is a remarkable bird, being the only one of these plovers presenting the combination of wattles and spurs and only three toes (see *spur-winged*); in consequence, it has been placed in five different genera.

Xiphidopterus (zî-fîd-i-op'te-rus), *n.* [NL. (Reichenbach, 1853), < Gr. ξιφίδιον, dim. of ξίφος, sword, + πτερόν, wing.] A genus of sparrow-winged plovers, of which the West African *X. albiceps* is the type. It is a remarkable bird, being the only one of these plovers presenting the combination of wattles and spurs and only three toes (see *spur-winged*); in consequence, it has been placed in five different genera.

Xiphidopterus (zî-fîd-i-op'te-rus), *n.* [NL. (Reichenbach, 1853), < Gr. ξιφίδιον, dim. of ξίφος, sword, + πτερόν, wing.] A genus of sparrow-winged plovers, of which the West African *X. albiceps* is the type. It is a remarkable bird, being the only one of these plovers presenting the combination of wattles and spurs and only three toes (see *spur-winged*); in consequence, it has been placed in five different genera.

Xiphidopterus (zî-fîd-i-op'te-rus), *n.* [NL. (Reichenbach, 1853), < Gr. ξιφίδιον, dim. of ξίφος, sword, + πτερόν, wing.] A genus of sparrow-winged plovers, of which the West African *X. albiceps* is the type. It is a remarkable bird, being the only one of these plovers presenting the combination of wattles and spurs and only three toes (see *spur-winged*); in consequence, it has been placed in five different genera.

Xiphidopterus (zî-fîd-i-op'te-rus), *n.* [NL. (Reichenbach, 1853), < Gr. ξιφίδιον, dim. of ξίφος, sword, + πτερόν, wing.] A genus of sparrow-winged plovers, of which the West African *X. albiceps* is the type. It is a remarkable bird, being the only one of these plovers presenting the combination of wattles and spurs and only three toes (see *spur-winged*); in consequence, it has been placed in five different genera.

Xiphidopterus (zî-fîd-i-op'te-rus), *n.* [NL. (Reichenbach, 1853), < Gr. ξιφίδιον, dim. of ξίφος, sword, + πτερόν, wing.] A genus of sparrow-winged plovers, of which the West African *X. albiceps* is the type. It is a remarkable bird, being the only one of these plovers presenting the combination of wattles and spurs and only three toes (see *spur-winged*); in consequence, it has been placed in five different genera.

Xiphidopterus (zî-fîd-i-op'te-rus), *n.* [NL. (Reichenbach, 1853), < Gr. ξιφίδιον, dim. of ξίφος, sword, + πτερόν, wing.] A genus of sparrow-winged plovers, of which the West African *X. albiceps* is the type. It is a remarkable bird, being the only one of these plovers presenting the combination of wattles and spurs and only three toes (see *spur-winged*); in consequence, it has been placed in five different genera.

Xiphidopterus (zî-fîd-i-op'te-rus), *n.* [NL. (Reichenbach, 1853), < Gr. ξιφίδιον, dim. of ξίφος, sword, + πτερόν, wing.] A genus of sparrow-winged plovers, of which the West African *X. albiceps* is the type. It is a remarkable bird, being the only one of these plovers presenting the combination of wattles and spurs and only three toes (see *spur-winged*); in consequence, it has been placed in five different genera.

Xiphidopterus (zî-fîd-i-op'te-rus), *n.* [NL. (Reichenbach, 1853), < Gr. ξιφίδιον, dim. of ξίφος, sword, + πτερόν, wing.] A genus of sparrow-winged plovers, of which the West African *X. albiceps* is the type. It is a remarkable bird, being the only one of these plovers presenting the combination of wattles and spurs and only three toes (see *spur-winged*); in consequence, it has been placed in five different genera.

Xiphidopterus (zî-fîd-i-op'te-rus), *n.* [NL. (Reichenbach, 1853), < Gr. ξιφίδιον, dim. of ξίφος, sword, + πτερόν, wing.] A genus of sparrow-winged plovers, of which the West African *X. albiceps* is the type. It is a remarkable bird, being the only one of these plovers presenting the combination of wattles and spurs and only three toes (see *spur-winged*); in consequence, it has been placed in five different genera.

Xiphidopterus (zî-fîd-i-op'te-rus), *n.* [NL. (Reichenbach, 1853), < Gr. ξιφίδιον, dim. of ξίφος, sword, + πτερόν, wing.] A genus of sparrow-winged plovers, of which the West African *X. albiceps* is the type. It is a remarkable bird, being the only one of these plovers presenting the combination of wattles and spurs and only three toes (see *spur-winged*); in consequence, it has been placed in five different genera.

Xiphidopterus (zî-fîd-i-op'te-rus), *n.* [NL. (Reichenbach, 1853), < Gr. ξιφίδιον, dim. of ξίφος, sword, + πτερόν, wing.] A genus of sparrow-winged plovers, of which the West African *X. albiceps* is the type. It is a remarkable bird, being the only one of these plovers presenting the combination of wattles and spurs and only three toes (see *spur-winged*); in consequence, it has been placed in five different genera.

Xiphidopterus (zî-fîd-i-op'te-rus), *n.* [NL. (Reichenbach, 1853), < Gr. ξιφίδιον, dim. of ξίφος, sword, + πτερόν, wing.] A genus of sparrow-winged plovers, of which the West African *X. albiceps* is the type. It is a remarkable bird, being the only one of these plovers presenting the combination of wattles and spurs and only three toes (see *spur-winged*); in consequence, it has been placed in five different genera.

Xiphidopterus (zî-fîd-i-op'te-rus), *n.* [NL. (Reichenbach, 1853), < Gr. ξιφίδιον, dim. of ξίφος, sword, + πτερόν, wing.] A genus of sparrow-winged plovers, of which the West African *X. albiceps* is the type. It is a remarkable bird, being the only one of these plovers presenting the combination of wattles and spurs and only three toes (see *spur-winged*); in consequence, it has been placed in five different genera.

Xiphidopterus (zî-fîd-i-op'te-rus), *n.* [NL. (Reichenbach, 1853), < Gr. ξιφίδιον, dim. of ξίφος, sword, + πτερόν, wing.] A genus of sparrow-winged plovers, of which the West African *X. albiceps* is the type. It is a remarkable bird, being the only one of these plovers presenting the combination of wattles and spurs and only three toes (see *spur-winged*); in consequence, it has been placed in five different genera.

xiphiplastral (zî-fî-plas'tral), *a.* [*xiphiplastron* + *-al*.] Of the nature of, or pertaining to, the chelonian xiphiplastron. Also used substantively.

The imperfect left *xiphiplastral*.
Quart. Jour. Geol. Soc., XLV, 511.

xiphiplastron (zî-fî-plas'tron), *n.*: pl. *xiphiplastron* (-trâ). [NL., < Gr. ξίφος, a sword, + E. plastron.] The fourth lateral piece of the plastron of a turtle; one of the pair of terminal pieces of the plastron in *Chelonina*, called *xiphiosternum* by some. See cuts under *plastron* and *Chelonina*.

Xiphister (zî-fis'têr), *n.* [NL. (Jordan, 1879), < Gr. ξιφίστηρ, a sword-belt, < ξίφος, sword.] A genus of blennioid fishes, the type of which is the species called *Xiphidion mucosum* by Girard. This is found along the coast from Monterey to Alaska, reaching the length of 18 inches, and is abundant about tide-rocks, where it feeds on seaweeds. *X. rupestris* is a smaller but similar fish, found with the preceding; and a third member of the genus, of the same habitat and still smaller, is *X. chirus*.

Xiphisterinae (zî-fis-tê-rî-nê), *n. pl.* [NL., < *Xiphister* + *-inae*.] In Jordan and Gilbert's classification, a subfamily of *Blenniidae*, typified by the genus *Xiphister*.

xiphisternal (zî-fî-stêr'nal), *a.* [*xiphisternum* + *-al*.] 1. In anat., of the nature of the xiphisternum, or last sternebra of the sternum; pertaining to the xiphisternum; ensiform or xiphoid, as a cartilage or bone of the breast-bone.

Dissect out the *xiphisternal* cartilage of a recently-killed frog, and remove its membranous investment (perichondrium). *Huxley and Martin, Elementary Biology*, p. 128.

2. In *Chelonina*, xiphiplastral. See cuts under *Chelonina* and *plastron*.

xiphisternum (zî-fî-stêr'num), *n.*: pl. *xiphisterna* (-nâ). [NL., prop. *xiphosternum*, < Gr. ξίφος, sword, + στήνιον, breast-bone.] 1. The hindmost segment or division of the sternum, corresponding to the xiphoid appendage or ensiform cartilage of man. It is of various shapes in different animals, sometimes forked or double, there being a right and a left xiphisternum, as in some lizards. It succeeds the segment or segments called the *mesosternum*. See cuts under *mesosternum* and *sternum*.

2. The xiphiplastron of a turtle. See second cut under *Chelonina*.

Xiphisura (zî-fî-sû'râ), *n. pl.* [NL. (orig. erroneously *Xyphosura* (Latreille), later *Xyphisura*, *Xiphisura*, *Xiphosura* (which see), and prop. *Xiphura*), noting the dagger-like telson of the king-crab; < Gr. ξίφος, sword, + στήνιον, tail.] In Latreille's classification, the first family of his *Pacilopoda*, contrasted with his *Siphonostoma*, and containing only the genus *Limulus*. Compare *Synxiphosura*. See cuts under *horseshoe-crab* and *Limulus*.

Xiphura (zî-fî-sû'râ), *n. pl.* See *Xiphisura*.

Xiphus (zî-fî-us), *n.* In mammal. See *Ziphius*.

Xiphocera, **Xiphoceridæ**. See *Xiphicera*, *Xiphicridæ*.

Xiphocolaptes (zî-fî-kô-lap'têz), *n.* [NL. (Lesson, 1840), < Gr. ξίφος, sword, + *κολαπτής, taken for κολαπτήρ, a chisel: see *Dendrocolaptes*.] A genus of *Dendrocolaptidæ*, including some of the largest piculines, having the bill much compressed and moderately long (not half as long again as the tarsus). It includes about a dozen species of tropical America, averaging a foot long, which is large for this family, as *X. albicollis*, etc.

xiphodidymus (zî-fî-dîd'i-mus), *n.* [*xiphodius*, < Gr. ξίφος, sword, + δίδυμος, twin.] Same

Yarrell designated the "occipital style" of Shufeldt as the *xiphoid bone*. *Science*, III, 404.

Xiphoid ligament, a small ligament connecting the ensiform cartilage or xiphisternum with the cartilage of the seventh rib on either side. **Xiphoid process**, (a) In anat., the ensiform appendage of the sternum; the xiphisternum. See cuts under *mesosternum* and *sternum*. (b) The telson of a crustacean, as the king-crab. See cut under *horseshoe-crab*.

II, *n.* The ensiform or xiphoid cartilage in man, or its representative in other animals. See *xiphisternum*, 1.

xiphoides (zi-fōi'dēz), *n.* [NL.] In anat., same as *xiphoid*.

xiphoidian (zi-fōi'di-an), *n.* [*xiphoid* + *-ian*.] In anat., same as *xiphoid*.

xiphopagus (zi-fop'ā-gus), *n.*; pl. *xiphopagi* (-jī). [NL., < Gr. *ξίφος*, sword, + *πάσσω*, that which is fixed or firmly set.] In *kratol.*, a double monster connected by a band extending from the ensiform cartilage to the umbilicus. The Siamese twins constituted a xiphopagus. Also *xiphodidymus*.

Xiphophorus (zi-fōf'ō-rus), *n.* [NL. (Haeckel, 1848), < Gr. *ξίφορρος*, also *ξίφορρος*, bearing a sword, < *ξίφος*, sword, + *φέρω* = E. *bear*.] In *ichth.*, a genus of cyprinoids, having in the male the lower rays of the caudal fin prolonged into a sword-shaped appendage, sometimes as long as all the rest of the fish. The anal fin of the male is also modified into an intronitoid organ, having one or two enlarged rays with hook-like processes. A curious fish of this genus is *X. helleri* of Mexico.

xiphophyllous (zi-fō-fil'us), *n.* [*xiphos*, sword, + *φύλλον*, leaf.] In bot., having ensiform leaves.

Xiphorhamphus (zi-fō-ram'fus), *n.* [NL. (Blyth, 1843), < Gr. *ξίφος*, sword, + *ῥαμφος*, beak.] 1. A genus of timeline birds of the eastern Himalayas. *X. superciliosus*, the only species, is 7½ inches long. The general color above is olivaceous-brown; over the eye is a white streak, but most of the plumage is of sober shades of ashy and rufous. See *Xiphorhynchus*, 2.

2. A genus of fishes. Müller and Troschel, 1844.

Xiphorhynchus (zi-fō-rin'kus), *n.* [NL. (Swainson, 1827, also *Xiphorhynchus*, 1837), < Gr. *ξίφος*, sword, + *ῥινχος*, snout.] 1. A genus of South American dendrocolapline birds, named from the long, thin, and much-curved bill; the sabelhills, as *X. procureus*. This tree-creeper is 10 inches long, and mainly of a fulvous color, the head blackish with pale shaft-spots. The genus ranges from Costa Rica to southern Brazil and Bolivia, and contains 4 other species—*X. trochiloides*, *X. infrenatopus*, *X. pusillus*, and *X. pucheran*. In the last-named the bill is shorter and less curved, and there is no such white spot under the eye as all the rest have. See cut under *sabel-bill*.

2. A different genus of birds, named by Blyth in 1842 in the form *Xiphirhynchus*, and changed by him in 1843 to *Xiphorhamphus*.—3. A genus of *Dryophila*, or wood-snakes: so called from the acute appendage of the snout. *X. tanaka* is the langaha of Madagascar. (See cut under *langaha*.) This genus was named by Wagler in 1830, but the name is pre-occupied in ornithology.

4. A genus of fishes. Agassiz, 1829.

Xiphosoma (zi-fō-sō'mā), *n.* [NL. (Spix), < Gr. *ξίφος*, a sword, + *σώμα*, body.] A genus of large serpents, of the family *Boidae*, or boas. *X. cavinum* is the dog-headed boa of South America.

xiphosternum (zi-fō-stēr'num), *n.* Same as *xiphisternum*. [Rare.]

Xiphosura (zi-fō-sū'ri), *n.*, pl. [NL., irreg. < Gr. *ξίφος*, sword, + *οὐρα*, tail.] Same as *Xiphisura*: in this form, in Lankester's classification, brought under *Trachida* as one of three orders (the other two being *Euryptera* and *Trilobita*) brigaded under the name *Delobanchia*.

xiphosuran (zi-fō-sū'ran), *n.* and *n.* [*xiphosura* + *-an*.] 1. *n.* Of or pertaining to the *Xiphosura*, as a horseshoe-crab.

II, *n.* A member of the group *Xiphosura*; a xiphosure.

xiphosure (zi-fō-sūr), *n.* One of the *Xiphosura*, as a horseshoe-crab.

xiphosurous (zi-fō-sū'rus), *n.* [*xiphosura* + *-ous*.] Same as *xiphosuran*.

Xiphoteuthis (zi-fō-tū'this), *n.* [NL., < Gr. *ξίφος*, sword, + *τεuthis*, squid.] A genus of belemnites, characterized by a very long, narrow, deeply chambered phragmacone. Only a single species is known, from the Lias. See *Belemnite*.

Xiphotrygon (zi-fō-tri'gon), *n.* [NL. (Cope, 1879), < Gr. *ξίφος*, sword, + *τρυγών*, a sting-ray.] In *ichth.*, a genus of elasmobranchiate fishes, of the family *Trygonidae*.

Xiphura (zi-fū'ri), *n.*, pl. The more proper form of *Xiphisura*.

xiphurous (zi-fū'rus), *n.* [*xiphos*, sword, + *οὐρα*, tail.] Having a long sharp telson like a dagger, as the king-crab; of or pertaining to the *Xiphosura* or *Xiphura*; xiphosuran. See cut under *horseshoe-crab*.

Xiphyridia (zi-fī'ri-jī), *n.* [NL. (Latreille, 1802), < Gr. *ξίφιδιον*, a kind of shell-fish, < *ξίφος*, sword.] In *entom.*, a notable genus of hymenopterous insects, of the family *Uroceridae*, or typical of a family *Xiphyridiidae*, having the ovipositor con-

White-horned Cane-wasp (*Xiphyridia albicornis*), female, twice natural size.

siderably exerted, the neck elongate, and certain peculiar venational characters. Ten North American and three European species are known. *X. camelus* and *X. dromedarius* are British species, known as *cane-wasps* from their long neck. The white-horned cane-wasp is *X. albicornis*. They are found commonly in willows and hedges. Also *Xiphyridia*, *Xiphyridia*.

Xiphyridiidae (zi-fī-dī'i-dē), *n.*, pl. [NL., also *Xiphyridiidae* (Leach, 1819), *Xiphyridia*, *Xiphyridiidae*, etc.; < *Xiphyridia* + *-idae*.] A family of hymenopterous insects, named from the genus *Xiphyridia*, now merged in *Uroceridae*.

Xirichthys (zi-rik'this), *n.* Same as *Xyrichtys*. *De Kay*, 1842.

X-leg (eks'leg), *n.* Knock-knee. [Rare.]

xoanon (zō'ā-non), *n.*; pl. *zoana* (-nā). [*xoanon*, a carved image, < *ξένον*, scrape, carve, especially in wood.] In *anc. gr. art.*, a work of sculpture of the most ancient and primitive class, rudely formed in wood, the eyes being generally represented closed, and the limbs, when indicated at all, extended stiffly. The examples of these statues, representing deities, which were preserved in Greek historic times, were looked upon with much veneration as divine gifts fallen from heaven; they were usually cloaked with precious stuffs and rich embroideries. No specimen survives, but representations of these old works are found on painted vases. The term is sometimes applied attributively to primitive statues in stone advanced but little beyond the wooden prototypes, as the *xoanon* statue discovered by the French in Delos. See cut under *palladium*.

Xolmis (zōl'mis), *n.* [NL. (Boie, 1828), also *Xolmus* (Swainson).] A genus of South American tyrant-flycatchers: a synonym both of *Tentoptera* and of *Fluricola*.

xonaltite (zō-nal'tit), *n.* [*Xonalt* (see def.) + *-ite*.] In *mineral.*, a hydrous silicate of calcium, occurring in massive form of a white or bluish-gray color. It is found at Tetela de Xonaltla in Mexico.

Xorides (zōr'i-dēz), *n.* [NL. (Latreille, 1809).] A genus of hymenopterous parasites, of the ichneumonid subfamily *Pimplinae*, or giving name to an unused family *Xoridiidae*, having the face narrowed, the cheeks tuberculate behind the eyes, and the tibiae and tarsi long and slender. The species are peculiar to northern regions, 14 having been described from northern Europe, including 1 from Lapland, and 4 from British America.

Xorididae (zō-rid'i-dē), *n.*, pl. [NL., < *Xorides* + *-idae*.] A family of hymenopterous insects, named by Shuckard in 1840 from the genus *Xorides*, but now included in *Ichneumonidae*. It has not even subfamily rank, its characters being shared by a number of genera of *Pimplinae*.

XX, XXX. Symbols or designations noting ale of certain qualities or degrees of strength, derived originally from marks on the brewers' casks. Compare *X*, 5.

Xya (zi'ā), *n.* [NL. (Latreille, 1809), < Gr. *ξύα*, scrape, smooth, polish.] A genus of mole-cricket, of the orthopterous family *Gryllidae*, having filiform ten-jointed antennae and fossorial front legs. The species are mainly tropical; but one is European and one (*X. apicalis*) is North American. Also called *Tridactylus* and *Rhipipteryx*.

Xyela (zi-e'ā), *n.* [NL. (Dalman, 1819), < Gr. *ξύλην*, a plane or rasp, < *ξύω*, scrape.] A genus of saw-flies, of the hymenopterous family *Tenthredinidae*, giving name to the subfamily *Xyelinae*, and having the fourth and following joints of the antennae long, slender, and filiform. The species are small and have a remarkably long ovipositor. One North American and three European species are

known. The generic name has recently been ascertained to be a synonym of *Pinicola* (Brébisson, 1818).

Xyelinae (zi-e-lī'nē), *n.*, pl. [NL., < *Xyela* + *-inae*.] A subfamily of the hymenopterous family *Tenthredinidae*, founded on the genus *Xyela*, and having the antennae nine- to thirteen-jointed, irregular, third joint very long, anterior wings with three marginal and four submarginal cells, and ovipositor long. Also *Xyelidae*, *Xyelides*, *Xyelites*.

xylanthrax (zi-lan'thraks), *n.* [NL., < Gr. *ξύλον*, wood, + *άνθραξ*, coal.] Woodcoal: in distinction from *lithanthrax*.

Xyleborus (zi-leb'ō-rus), *n.* [NL. (Eichhoff, 1861), < Gr. *ξύλον*, wood, < *ξύω*, wood, + *βορέω*, devouring.] A notable genus of bark-boring beetles, of the family *Scolytidae*, having the antennal funicle five-jointed, the club subglobose and subannulate, the tarsi with the first three joints subequal and simple, and the tibiae with the outer edge curved and finely serrate. About 75 species are known, of which 14 inhabit North America. *X. dispar* is common to Europe and North America. It is known in the United States and Canada as the *pin-borer*, *shot-borer*, and *pear-blight beetle*. See these words, and cuts under *pin-borer* and *wood-grater*.

xylem (zi'lem), *n.* [Irreg. < Gr. *ξύλον*, wood.] In bot., that part of a fibrovascular bundle which contains ducts or tracheids—that is, the woody part, as distinguished from the phloem, or bast part. Compare *phloem*. See *protoxylem*, *leptoxylem*.

xylenes (zi'lēn), *n.* [*xyl*, wood, + *-ene*.] Any one of the three metameric dimethyl benzenes C₆H₄(CH₃)₂. They are volatile, inflammable liquids obtained from wood-spirit and from coal-tar. Also *xylo*, *xylole*.

Xylesthia (zi-les'thi-ā), *n.* [NL. (Clemens, 1859), < Gr. *ξύλον*, wood, + *ισθία*, cat.] A peculiar genus of North American timid moths, allied to *Orsenheimeria* and *Hapsifera* of the European fauna. *X. prunariella*, the type, feeds as a larva upon the black-knot of the plum (*Sphaeria morbosae*), and the larva of *X. clemensella* feeds upon dead locust-timber.

Xyletinus (zil-e-tī'nus), *n.* [NL. (Latreille, 1829), irreg. < Gr. *ξύλον*, wood, + NL. *Pinus*, q. v.] A genus of coleopterous insects, of the family *Ptinidae*, comprising about 30 species, and very widely distributed. The elytra are striate and the antennae serrate with joints nine to eleven, not elongate. Seven species occur in North America, as *X. pubescens*.

Xyletus (zi-lū'tēz), *n.* [NL. (Hübner, 1816), < Gr. *ξύλος*, a wood-cutter, < *ξύω*, wood.] A

Common Locust-borer (*Xyletus crassicornis*), female, natural size.

genus of moths, of the family *Cossidae*. *X. rubicunda* is the common locust-borer of the United States. See also cut under *carpenter-moth*.

xylharmonica (zil-hār-mon'i-kā), *n.* [*xyl*, wood, + *E. harmonica*.] An enlarged and improved form of the xylostron (which see).

Xylia (zil'i-ā), *n.* [NL. (Benthams, 1852), so called from the woody pod; < Gr. *ξύλον*, wood.] A genus of leguminous trees, of the tribe *Eumimosae*. It is characterized by a broadly falcate compressed two-valved pod with transverse obovate seeds. The only species, *X. dolabriformis* (formerly *Inga xylocarpa*), is a tall tree of tropical Asia, producing a hard wood and bearing bipinnate leaves of only two pinnae, these with four or five pairs of large leaflets and an odd one. The small pale-green flowers are condensed into globose heads which form terminal racemes or axillary clusters. It is known as the *ironwood* of *Pegu*, or by its Burmese name, *pyengadu* (which see).

xylidine (zil'i-din), *n.* Same as *xyloidine*.

Xylina (zil'i-nā), *n.* [NL. (Treitschke, 1826), < Gr. *ξύλον*, of wood, < *ξύω*, wood.] A genus of noctuid moths, giving name to the *Xyloinae*, and having the male antennae simple, the proboscis short, the body robust, and the fore wings rounded at the apex. The larvae usually live on trees, and the pupae are subterranean. The genus is represented in all parts of the world, and the species number about 50.

of which 8 are European and about 20 North American. *X. cembra*, of the United States, is called the *ash-gray pin-borer*, and its larva bores into green apples and peaches, and

feeds upon the foliage of various trees. Three of the British species are fancifully named respectively the conformist, *X. incertum* (*X. conformis*), the nonconformist, *X. lamb-oid*, and the gray shoulder-knot, *X. ornithopus*.

Xyliniidae (zī-līn'ī-dē), *n. pl.* [NL. (Gueneé, 1852), < *Xylina* + *-idae*.] A family of noctuids, named from the genus *Xylina*, many of which are known as *shark-moths*. They have the antennae almost always simple, well-developed palpi, thorax robust, wings oblong, with longitudinal markings, and somewhat plicated when at rest, giving the insect an elongated appearance. The family includes about 20 genera.

xylobalsamum (zī-lō-bal'sa-mum), *n.* [< L. *xylobalsamum*, < Gr. *ξύλον*, wood, + *βάλσαμον*, the wood of the balsam-tree, < *ξύλον*, wood, + *βάλσαμον*, balsam.] 1. The wood, or particularly the dried twigs, of the balm-of-Gilead tree, *Commiphora Opobalsamum*. The wood is heavy, pinkish, and fragrant. A decoction of it, as also of the fruit (*carobalsamum*), is given in the East as a carminative, etc. 2. The balsam obtained by decoction from this wood.

Xylobius (zī-lō'bī-us), *n.* [NL. < Gr. *ξύλον*, wood, + *βίος*, life.] 1. A genus of beetles, of the family *Eucnemidae*, named by Latreille in 1834, and containing two European species. Also called *Xylophilus*.—2. A genus of fossil chilognath myriapods. *Dawson*, 1859.

xylocarp (zī'lō-kārp), *n.* [< Gr. *ξύλον*, wood, + *καρπός*, fruit.] In bot., a hard and woolly fruit.

xylocarpous (zī-lō-kār'pus), *a.* [As *xylocarp* + *-ous*.] Having fruit which becomes hard or woolly.

xylochlor (zī'lō-klōr), *n.* [< Gr. *ξύλον*, wood, + *χλωρός*, greenish-yellow.] An olive-green crystalline mineral, closely resembling apophyllite, if not a variety of it.

Xylocopa (zī-lōk'ō-pā), *n.* [NL. (Latreille, 1802), < Gr. *ξύλον*, wood, + *κοπή*, < *κόπτειν*, cut.] An extensive genus of solitary bees, containing many of those large species known as *carpenter-bees*. They resemble bumblebees, from which they differ in having the abdomen usually naked, and in important venational characters. Their burrows

American carpenter-bee, *Xylocopa virginica*.

are formed in solid wood, and their cells are separated by partitions usually made of agglutinated sawdust, and provisioned with pollen. Six species occur in Europe and nine in North America. *X. rufipes* is the common European species, and *X. virginica* the common one in the United States. See also *carpenter bee* (with cut).

Xylocopus (zī-lōk'ō-pus), *n.* [NL. (Cabanis, 1833), < Gr. *ξύλον*, wood, + *κοπή*, < *κόπτειν*, cut.] A genus of woodpeckers, such as *Picus minor* and *P. major*, respectively the lesser and greater spotted woodpeckers of Europe; generally considered a synonym of *Picus* proper. See *Dendrocopos*, 2, and cut under *Picus*.

xylogen (zī'lō-jen), *n.* [< Gr. *ξύλον*, wood, + *γενέω*, producing.] 1. Same as *lignum*.—2. Wood or xylem in a formative state.

xylograph (zī'lō-grāf), *n.* [< Gr. *ξύλον*, wood, + *γραφω*, engrave, write.] 1. (a) An engraving on wood. (b) An impression or print from a wood-block. In both senses the term is most commonly applied to old work, especially to that of the very earliest period.—2. A mechanical copy of the grain of wood, executed by a method of nature-printing, and used as a

surface-decoration. The wood to be copied is treated chemically so that the grain remains in relief and serves to give an impression in a suitable pigment.

xylographer (zī-lō-grā-fēr), *n.* [< *xylography* + *-er*.] An engraver on wood, especially one of the earliest wood-engravers, as of the fifteenth century.

xylographic (zī-lō-grāf'ik), *a.* [< *xylography* + *-ic*.] Of or pertaining to xylography; cut in or on wood.

Some of these changes of form, otherwise inexplicable, since they are from simpler and easier forms to others more complicated and seemingly more difficult, can be readily accounted for by the fact that the runes were essentially a *xylographic* script.

Isaac Taylor, *The Alphabet*, II. 221.

xylographical (zī-lō-grāf'ī-kal), *a.* [< *xylographic* + *-al*.] Same as *xylographic*.

Xylographus (zī-lō-grā-fus), *n.* [NL. (Dejean, 1834); see *xylography*.] A genus of coleopterous insects of the family *Cinidae*, distinguished mainly by the structure of the legs. About a dozen species are known, most of which are South American. Two, however, are from southern Europe, one is from Algeria, and one from Madagascar.

xylography (zī-lō-grā-fī), *n.* [= F. *xylographie*; < Gr. *ξύλον*, wood, + *γραφω*, < *γραφω*, engrave, write. Cf. *ξύλογραφία*, write on wood.] 1. Engraving on wood; a word used only by bibliographers, and chiefly for the woodcut work of the fifteenth century.—2. A process of decorative painting on wood. A selected pattern or design is drawn on wood and is then engraved, or the design is reproduced on zinc by the ordinary method. An electrolyte cast is taken from the woodcut or zinc plate, and smooth surfaces of wood are printed from the electrolyte, under a regulated pressure, with pigments prepared for the purpose. The color penetrates the wood, leaving no outside film, and after being French polished, or covered with a fluid enamel, the wood may be washed, scrubbed, or even sandpapered without destroying the pattern.

xyloid (zī'lōid), *a.* [< Gr. *ξύλοειδής*, like wood, < *ξύλον*, wood, + *ειδής*, form.] Woody; of the nature of, resembling, or pertaining to xylem or wood; ligneous.

xyloidine (zī-lō'idin), *n.* [As *xyloid* + *-ine*.] An explosive compound (C₆H₉N₃O₇) produced by the action of strong nitric acid upon starch or woody fiber. It somewhat resembles gun-cotton in its nature. Also called *xylinine*.

xylol, **xylene** (zī'lōl, zī'lōl), *n.* [< Gr. *ξύλον*, wood, + L. *oleum*, oil.] Same as *xylene*.

xyloma (zī-lō'mā), *n.* [< Gr. *ξύλον*, wood, + *-oma*.] In bot., a sclerotoid body in certain fungi which produces sporogenous structures in its interior.

Xylomelum (zī-lō-mē'lum), *n.* [NL. (Smith, 1798), so called from the woody apple-like fruit; < Gr. *ξύλον*, wood, + *μήλον*, apple.] A genus of apetalous plants, of the order *Proteaceae* and tribe *Grevilleae*. It is characterized by opposite leaves, densely spicate flowers, an ovary with two ovules laterally adfixed, and a hard, nearly indehiscent, somewhat ovoid fruit. The 5 species are all Australian. They are trees or tall shrubs, with opposite entire or spiny-toothed leaves. The flowers are of medium size, sessile in pairs under the bracts of a dense spike, which is commonly perfect below, but in the upper part sterile. The spikes are opposite or axillary, or crowded into a terminal cluster which finally becomes lateral. *X. pariforme*, the wooden-pear tree of New South Wales, is remarkable for its fruit, which is exactly like a common pear in size and shape, but attached by the broad end and composed of a hard woody substance difficult to cut; when ripe it splits lengthwise, discharging a flat winged seed. The tree grows from 20 to 40 feet high, 6 to 8 inches in diameter, producing a dark reddish wood, used in cabinet-work.

Xylomiges (zī-lōm'ī-jēs), *n.* [NL. (Gueneé, 1852, as *Xylomyges*), < Gr. *ξύλον*, wood, + *μιγνύμι*, mix.] A genus of noctuid moths, of the family *Apimidae*, comprising species of moderate size, robust body, short proboscis, and palpi hardly reaching above the head. The genus is wide-spread, but contains only about a dozen species, of which 9 inhabit the United States. See *silver-cloud*.

xylonite (zī'lō-nit), *n.* [Irreg. < Gr. *ξύλον*, wood, + *-ite*.] Same as *celluloid*.

Xylonomus (zī-lō-nō-mus), *n.* [NL. (Gravenhorst, 1820), < Gr. *ξύλον*, wood, + *νομός*, graze, feed.] An important genus of hymenopterous parasites, of the ichneumonid subfamily *Pimplinae*, having very long legs and antennae, and the marginal cell of the fore wing extending nearly to the apex of the wing. The species are rather large, are wide-spread, and are parasitic upon the larvae of the larger wood-boring beetles, such as the *Cerambycidae*; 15 are known in Europe, and 9 have been described from the United States.

xylopal (zī-lō-pal), *n.* [< Gr. *ξύλον*, wood, + *πάλλω*, opal.] Same as *wood-opal*.

Xylophaga (zī-lō-fā-gā), *n.* [NL. (Turton, 1822), < Gr. *ξύλον*, wood-eating, < *ξύλον*, wood, + *φαγέω*, eat.] 1. A genus of boring bivalves,

of the family *Pholadidae*, as *X. dorsalis*.—2. [L. c.] A member of this genus.

Xylophaga looks like a very short ship-worm, making burrows in floating wood, against the grain, about an inch long. P. P. Carpenter, *Lectures on Mollusca* (1861), p. 99.

Xylophaga² (zī-lōf'ā-gā), *n. pl.* [NL.; see *Xylophaga*¹.] 1. A series of *Hymenoptera ditrocha*, in Hartig's classification (1837), containing only the family *Triclistidae*; distinguished from the *Phyllophaga* on the one hand and the *Parasitica* on the other. Compare these two words.—2. A group of rhynephorophorous insects. *Motschulsky*, 1845.

xylophagan (zī-lōf'ā-gan), *a. and n.* [< *Xylophaga* + *-an*.] 1. *a.* In entom., of or pertaining to the *Xylophaga*, in either sense.

II. *n.* A member of the *Xylophaga*, in either sense.

xylophage (zī'lō-fāj), *n.* [< *Xylophagus*.] A xylophagous insect. [Rare.]

Wood yellowish, . . . of a somewhat unequal coarse fiber, soon attacked by *xylophages*.

Kurz, *Flora Brit. Burmah*.

Xylophagi (zī-lōf'ā-jī), *n. pl.* [NL., pl. of *Xylophagus*, q. v.] 1. In Latreille's system of classification, the second family of his tetramerous *Coleoptera*, containing many forms now distributed among the *Bostrichidae*, *Mycetophagidae*, *Cinidae*, *Lathridiidae*, *Cucujidae*, *Colydiidae*, and *Trogositidae*.—2. In Meigen's classification, same as *Xylophagidae*.

Xylophagidae (zī-lō-fāj'ī-dē), *n. pl.* [NL. (Stephens, 1829), < *Xylophagus* + *-idae*.] A family of brachycerous dipterous insects, typified by the genus *Xylophagus*. They have the costal vein encompassing the entire wing, and the tibiae spurred. Their larvae live in dead and decaying wood, and the adults are found most commonly on tree-trunks in high places in the woods. About 60 species are known. Compare *Beridae*.

xylophagous (zī-lōf'ā-gus), *a.* [< Gr. *ξύλοφαγος*, wood-eating, < *ξύλον*, wood, + *φαγέω*, eat.] 1. Wood-eating; habitually feeding upon wood; lignivorous, as an insect. See *Cis* (with cut).—2. Perforating and destroying as if eating timber, as a mollusk or a crustacean.

Xylophagus (zī-lōf'ā-gus), *n.* [NL. (Meigen, 1803); see *xylophagous*.] The typical genus of *Xylophagidae*. The larvae live in garden-mold or under the bark of decaying trees, and the adult flies are remarkable for their resemblance to certain hymenopterous insects. They are rather large, almost naked, blue or black in color, often with a broad brownish band on the abdomen. A dozen or more species are known, of which eight are North American. Also incorrectly *Xylophagus* (Latreille, 1829).

Xylophasia (zī-lō-fā'sī-jī), *n.* [NL. (Stephens, 1829), < Gr. *ξύλον*, wood, + *φασία*, an appearance.] A genus of noctuid moths, of the family *Apantidae*, allied to *Xylomyges*, but having the palpi reaching above the head. *X. hepatica* is the clouded brindell-moth. *X. polyodon* is the dark arches, expanding about 2 inches. Many of the species formerly included in this genus are now placed in *Hadena* and *Mamestra*.

xylophilan (zī-lōf'ī-lan), *n.* [< *Xylophilus* + *-an*.] Any member of the *Xylophilus*.

Xylophil (zī-lōf'ī-lī), *n. pl.* [NL. (Latreille, 1825), pl. of *Xylophilus*; see *xylophilous*.] A group of scarabaeid beetles, including several genera of the modern family *Scarabaeidae*; corresponding to the families *Dynastidae* and *Rutelidae* of Macleay.

xylophilous (zī-lōf'ī-lus), *a.* [< NL. *Xylophilus*, < Gr. *ξύλον*, wood, + *φιλέω*, love.] Fond of wood, as an insect; living or feeding upon wood.

Xylophilus (zī-lōf'ī-lus), *n.* [NL. (Latreille, 1825); see *xylophilous*.] 1. A genus of small beetles, of the family *Athicidae*. It is represented in many parts of the world, and comprises more than 40 species, of which 16 are found in the United States, as *X. melobromeri*, remarkable in that the males have flabellate antennae.

2. Same as *Xylobius*, 1. *Mannerheim*.

xylophone (zī'lō-fōn), *n.* [< Gr. *ξύλον*, wood, + *φωνή*, voice.] A musical instrument consisting of a graduated series of wooden bars, often supported on bands of straw, and sounded by means

Xylophone.

of small wooden hammers or by rubbing with rosined gloves. The tone is often agreeable and effective. Also *gigirita*, *sticcadu*, and *straw-fiddle*.

Xylophia (zī-lō'pī-ä), *n.* [NL. (Linnaeus, 1763), for **Xylophieros*, so called from the bitter wood; < Gr. ξύλον, wood, + πικρός, bitter.] A genus of plants, of the order *Anonaceae*, type of the tribe *Xylopieae*. It is characterized by flowers with a conical receptacle bearing externally numerous stamens with truncate anthers, in the center excavated and containing from one to five carpels, each with two to six ovules. There are from 30 to 40 species, natives of the tropics, chiefly in America, but with several in India and Africa. They are trees or shrubs with coriaceous and commonly two-ranked leaves. The flowers are solitary or clustered in the axils, and are nearly or quite sessile, each with six petals, the outer elongated, thick, boat-shaped, curving, erect, and almost meeting at the summit, surpassing the three inner petals. The fruit consists of oblong or elongated berries produced on a convex receptacle. *X. Ethiopea*, of western tropical Africa, is the source of African, negro, or Guinea pepper; it is a tree with pointed ovate leaves, and a fruit consisting of several dry black quill-like aromatic carpels about 2 inches long. These are sold in native markets as a stimulant and condiment, and were formerly imported into Europe, forming the *piper* *Ethiopicum* of old writers. For *X. polycarpa*, of tropical Africa, see *yellow-dye-tree* (under *yellow*). From the pervasive flavor of their wood various American species are called *bitter-wood*, especially *X. glabra* in the West Indies and *X. frutescens* in Guiana. The fruit of *X. sericea* in Brazil serves as a spice, and its bark torn from the tree in ribbon-like strips is twisted into coarse cordage, and would be available for matting. *X. frutescens*, known in Brazil as *embara*, has similar uses. Several species have formerly been classed under the genera *Urena*, *Uvaria*, and *Habzelia*.

Xylopieae (zī-lō-pī'ē-ē), *n. pl.* [NL. (Endlicher, 1836), < *Xylopin* + *-ae*.] A tribe of polypetalous plants, of the order *Anonaceae*. It is characterized by densely crowded stamens, and thick exterior petals which are convoluted or scarcely open; the inner ones are included and smaller, and are sometimes minute or absent. It includes 8 genera, chiefly of tropical trees, of which the chief are *Anona*, *Habzelia*, and *Xylophia* (the type).

Xylopinus (zī-lō-pī'mus), *n.* [NL. (Le Conte, 1862), < Gr. ξύλον, wood, + πεινῶν, be hungry.] A genus of tenebrionid beetles, peculiar to North America, having the antennae slender with the distal joints triangular, the anterior tarsi of the male little dilated, and the anterior margin of the front not reflexed. Three species are known. They live under the bark of dead trees.

xylopyrography (zī-lō-pī-rōg'ra-fī), *n.* [NL., < Gr. ξύλον, wood, + πῦρ, fire, + γραφία, < γράφειν, write.] Same as *poker-painting*.

xyloretine (zī-lō-rē'tin), *n.* [For **xyloretine*; < Gr. ξύλον, wood, + ρητίνη, resin; see *resin*.] A subfossil resinous substance, found in connection with the pine-trunks of the peat-marshes of Holtegaard in Denmark.

Xyloryctes (zī-lō-rik'tēz), *n.* [NL. (Hope, 1837), < Gr. ξύλον, wood, + ὀρύκτης, a digger.] A peculiar genus of scarabaeid beetles, having the head of the male armed with a long horn, and the female head tuberculate. The genus corresponds in the western hemisphere to the eastern *Oryctes*. *X. satyrus* is rather common in the eastern United States. Its larva is said to injure the roots of ash-trees.

xylosistrum (zī-lō-sis'tron), *n.* [< Gr. ξύλον, wood, + σίστρον, sistrum; see *sistrum*.] A musical instrument, invented by Uthe in 1807, resembling Chladni's euphonium, but having wooden instead of glass rods. Compare *xylharmonic*.

xylostein (zī-lōs'tē-in), *n.* [< NL. *Xylosteum* (see def.) (< Gr. ξύλον, wood, + ὀστὴν, bone) + *-in*.] An active poisonous principle which has been

isolated from the seeds of *Lonicera Xylosteum*, a species of honeysuckle.

Xylostroma (zī-lō-strō'mā), *n.* [NL., < Gr. ξύλον, wood, + στρομα, anything spread or laid out.] A genus or form-genus of polyporoid fungi, which continues indefinitely, without fruiting, as a thick dense leathery sheet covering the wood upon which it lives.

xylostromatoid (zī-lō-strō'ma-toid), *a.* [< NL. *Xylostroma* (-t) + *-oid*.] In bot., resembling the genus or form-genus *Xylostroma*—that is, having a tough woody or leathery appearance—as the matted mycelium of certain polyporoid fungi.

Distinguished by its distinct *xylostromatoid* sub-stratum. M. C. Cooke, Handbook of British Fungi, 1. 282.

Xylota (zī-lō'tā), *n.* [NL. (Meigen, 1822), < Gr. ξύλον, wood.] A large genus of syrphid flies, comprising medium-sized or large species, slender, with the abdomen more or less red, yellow, or metallic. More than 40 species are found in North America, and about 15 in Europe. The larvae are found in decaying wood, and the adults frequent the foliage of bushes in blossom.

Xyloteles (zī-lō'tē-lēz), *n.* [NL. (Newman, 1840), < Gr. ξύλον, wood, + τέλος, end.] A genus of Polynesian cerambycid beetles, comprising about a dozen species from New Zealand and the Philippines. They are rather large pubescent beetles, with the intercoxal prominence of the abdomen in the form of an acute triangle.

Xyloterus (zī-lō'tē-rus), *n.* [NL. (Erichson, 1836), < Gr. ξύλον, wood, + τρύβη, bore.] 1. A genus of bark-boring beetles, containing several very destructive species, as *X. bivitatus*, which seriously injures the spruce in North America. They have the antennal club large, oval, solid, pubescent on both sides, the eyes completely divided, and the tibiae serrate. Five species occur in the United States. By European authors the genus is considered a synonym of *Trypodendron* (Stephens, 1830).

2. A genus of horn-tails, comprising two European species. Hartig, 1837.

xyloile (zī-lō'til), *n.* [< Gr. ξύλον, wood, + τέλος, down.] A mineral of fibrous structure and wood-brown color, probably an altered form of asbestos.

xylotomus (zī-lō'tō-mus), *a.* [< Gr. ξύλον, wood, + τομή, < τέμνω, τμήν, cut.] Wood-cutting, as an insect.

Xylotrogi (zī-lō-trō'jī), *n. pl.* [NL., < Gr. ξύλον, wood, + τρώγω, gnaw.] In Latreille's classification, a group of serricorn beetles, distinguished among serricornes from *Malacodermi* and from *Sternari*.

Xylotrypes (zī-lō-trī'pēz), *n.* [NL. (Dejean, 1834, as *Xylotrupes*), < Gr. ξύλον, wood, + τρύπω, bore.] A genus of very large lamellicorn beetles, related to *Dynastes*, as *X. gidcon* of Malacca, which attacks the cocoanut. The cephalic horn of the males is always forked, and the thoracic horn sometimes bifid. About a dozen species are known, belonging mainly to the Australasian fauna.

Xyrichthys (zī-rik'this), *n.* [NL. (Cuvier and Valenciennes, 1839), also *Xyrichthys*, *Zyrichthys*; < Gr. ξυρίς, a razor, + ἰχθυς, a fish.] In ichth., a genus of brilliantly colored labroid fishes, of tropical seas, known as *razor-fishes*. *X. verniculatus* is West Indian, and differs little from the European type of the genus. *X. lineatus* of the West Indies, and occasional on the southern coast of the United States, is roseated with a large blotch on each side below the pectorals.

Xyridaceae (zī-rī-dā'sē-ē), *n. pl.* [NL., < *Xyris* (-id-) + *-aceae*.] Same as *Xyridae*.

xyridaceous (zī-rī-dā'shius), *a.* Characterized like *Xyris*: belonging to the *Xyridae* (*Xyridaceae*).

Xyridae (zī-rīd'ē-ē), *n. pl.* [NL. (Kunth, 1815), < *Xyris* (*Xyrid-*) + *-ae*.] An order of monocotyledonous plants, of the series *Coranariceae*. It is characterized by slightly irregular bisexual flowers, ses-

tile and solitary under imbricated bracts in a terminal head. The perianth consists of three equal broad-spreading delicate corolla-lobes, and a single large petaloid caducous sepal which wraps around the corolla, or is in the tropical American genus *Abolboda* absent. There are perhaps 48 species, belonging mostly to the genus *Xyris* (the type), the others to *Abolboda*. They are usually perennials, growing in tufts in wet places, chiefly in warm countries. They resemble the sedges and rushes in habit, the *festinacea* in the structure of their seeds, and the spider-works in that of their ovules.

Xyris (zī'ris), *n.* [NL. (Linnaeus, 1737; earlier in Lobel, 1581), so called from the sharp-edged leaves; < Gr. ξυρίς, a species of *Iris*, perhaps *I. fatidissima*, < ξυρίς, a razor, < ξίς, scrape.] A genus of plants, type of the order *Xyridae*. It is characterized by flowers with a broad petaloid sepal which is very caducous, and a style without any appendage. About 40 species have been described, but not all are now thought distinct. They are tufted herbs, the stems usually flattish and two-edged, with linear rigid or grass-like leaves, and small globose or ovoid flower-heads with very closely imbricated rigid bracts. They are known as *yellow-eyed grass*, from the yellow petals; 17 species occur in the southern United States, mostly in sands and pine-barrens; 4 extend northward, of which *X. flexuosa*, with a twisted, and *X. Caroliniana*, with a flattish scape, occur from Massachusetts to Florida; *X. frabriata* and *X. torta* occur in pine-barrens from New Jersey southward. The leaves and roots of *X. Indica* are used as a remedy against leprosy and the itch in India, as are also those of *X. Americana* in Guiana and of *X. caginata* in Brazil.

xyst (zist), *n.* [< L. *xystus*, also *xystum*, < Gr. ξυστός, a covered portico (so called from its polished floor), < ξυστός, scraped, smoothed, polished, < ξίω, scrape, plane, smooth, polish.] In arch., a covered portico or open court, of great length in proportion to its width, in which athletes performed their exercises; or, in Roman villas, sometimes, a garden walk planted with trees. Also *xystos*, *xystus*.

Xysta (zist'ā), *n.* [NL. (Meigen, 1824), < Gr. ξυστός; see *xyst*.] 1. A genus of dipterous insects, belonging to the *Muscidae calyptrata* and subfamily *Phasiinae*. They are medium sized or small somewhat hairy flies of black or gray color, whose metamorphoses are not known. Few species have been described, of which but one is North American.

2. A genus of tenebrionid beetles, synonymous with *Elzeutes* (Eschscholtz, 1829).

xystarch (zist'ärk), *n.* [< L. *xystarchus*, < Gr. ξυστάρχης, the director of a xyst, < ξυστός, a covered portico, xyst, < ἀρχω, rule.] An Athenian officer who presided over the gymnastic exercises of the xyst.

xyster (zist'ēr), *n.* [< Gr. ξυστήρ, a scraping-tool, < ξίω, scrape; see *xyst*.] 1. A surgeons' instrument for scraping bones.—2. [cap.] [NL.] A genus of fishes. *Lacépède*.

Xysticus (zist'ti-kus), *n.* [NL. (Koeh, 1835), < Gr. ξυστικός, of or for scraping, < ξυστός, scraped; see *xyst*.] A large genus of labrigrade spiders, of the family *Thomisidae*. About 30 species are described from North America.

xystos (zist'tos), *n.* [NL. or L.; see *xyst*.] Same as *xyst*.

Xystrocera (zist-tros'ē-rā), *n.* [NL. (Serville, 1834), < Gr. ξυστρα, a scraper, < ξίω, horn.] In entom., a genus of tropical longicorn beetles of large size, and usually of a reddish-yellow color variegated with metallic green. About 30 species are known, nearly all from African and Australasian faunas.

Xystroplites (zist-trop-lī'tēz), *n.* [NL. (Jordan MSS., Cope, 1877), < Gr. ξυστρα, a scraper (< ξίω, scrape), < ὄπλις, armed.] A genus of centrarchoid fishes, distinguished from *Lepomis* by the blunt pharyngeal teeth. A species is found in Texas, usually called *Lepomis horas*.

xystus (zist'tus), *n.* 1. Same as *xyst*.—2. [cap.] [NL.] A generic name variously applied to certain hymenopterous, coleopterous, and lepidopterous insects.

Xyloryctes satyrus, female, natural size.

1. The twenty-fifth letter in the English alphabet. It has both a vowel and a consonant value. The character (as was pointed out under *U*) is the finally established Greek form of the sign added by the Greeks next after *T* (which had been the last Phœnician letter) to express the *oo(o)* sound; *U* and *V* are other forms of it, which have kept more

nearly their original place and value. As a Greek vowel, *Y* underwent a phonetic change which made of it the equivalent of the present French *u*, German *u*, a rounded *i*, or a blending of the *i*- and *u* sounds; and in the first century B. C. it was added by the Romans to their alphabet (which had till then ended with *x*) to express this sound in the Greek words borrowed into their language. With the same value it passed also into Anglo-Saxon use; but its sound gradually changed to that of a pure or unrounded *i*; and then its further development into a sign for both vowel and consonant is analogous with the partial differentiation of *U* or *V* and *W* (see *W*). It differs from *u*, the other character having the double value of vowel and consonant, in being not only exchanged with *i* in diphthongs and vowel-digraphs—as at *ay*, *ei*, *ey*, *oi*, *ou*—but also commonly used by itself as the vowel of a syllable, as in *by*, *demy*, *elyph*, *hying*, taking the place of *i* both at the end of a word (since no proper English word except the pronoun *is* is allowed to end with *i*) and elsewhere, and constantly exchanging with *i* and *ie* in the different inflectional forms of the same words: as, *pony*, *ponies*; *pretty*, *prettier*; *demy*, *denies*, *denial*, *denier*; and soon. In Anglo-Saxon *y* properly expressed the mixed sound *u*; but it early began to interchange with *i*, and in Middle English the two became convertible, *y* being often substituted for *i* as being more legible, and as affording, especially at the end of a word, an opportunity for a calligraphic flourish. Hence its present prevalence at the end of words, while in the inflected forms the older *i* is retained, *families*, the plural of *famille*, remaining beside *family*, the flourished spelling, without the original final *e* of *famille*. As a vowel-sign, *y* is a superfluous in our alphabet, signifying nothing which would not be just as well signified by *i*. The consonant *y* is really a different letter, representing the Middle English *ȝ*, the Anglo-Saxon *ȝ*. The value is that of a semivowel, related to the *i*-sounds (*i* and *ɨ*) precisely as *u* is related to the *u*-sounds (*u* and *oo* or *o*); if at all dwell on or prolonged, it becomes an *or*. As in *you*, *ye*, *yield*, *yon*, *Yule*. In very many words it is a matter of comparative indifference, and subject to constant variation in practice, whether an *i* before a vowel shall be pronounced as a vowel, making a separate syllable, or as *y*, combining into one syllable with its successor. In the respellings for pronunciation in this dictionary, such cases are often written with an *i* in the same syllable with the following vowel: examples are *cor-dial*, *fol-io*, *fa-shion*, *cras-tian*. The semivowel *y*-sound is not only thus written with *y* and with *i* (sometimes also with *e*, as in the ending *-eones*), but it is sounded without being written in a large class of words as the first element of what is called "long *u*" (that is, *you*: see *U*) as in *use*, *union*; and then, even when the *oo(o)* part of the combination is reduced by slighting even to the neutral vowel sound (*u* or *u* or *ɨ*), the *y* remains: hence, *fig-ur*, not *fig-er*, for *fig-ur* (*fig-ur*). In all these varieties of designation, the semivowel *y*-sound is a much rarer element than the *u*-sound in the latter, while the *u* is 2½ per cent. The character *y* in the archaic forms or abbreviations *ye*, *yaf*, *ye*, *y*, etc., is neither the Greek *u* nor the Anglo-Saxon *ȝ*, but a form of the Anglo-Saxon and Middle English *th*, now written *th*, and is to be pronounced, of course, as *th*.

2. As a symbol: (a) In *chem.*, the symbol of *yttrium*. (b) In *ornith.*, in myological formulas, the symbol of the accessory semitendinosus. A. H. Garrod. (c) In *math.*: (1) [*i. e.*] In algebra, the second of the variables or unknown quantities. (2) [*i. e.*] In analytical geometry, the symbol of the ordinate or other rectilinear point-coordinate. (3) In mechanics, the component of a force in the direction of the axis of *y*. (d) As a medieval Roman numeral, the symbol for 150, and with a line drawn above it (Y), 150,000.—3. [*i. e.*] An abbreviation of *year*. **Yn function.** See *function*.

Y² (w), *n.* [From the letter *Y*.] Something resembling the letter *Y* in shape. Specifically—(a) A forked clamp for holding drills or other tools. (b) One of the forked supports in the angle of which is placed either a telescope or one of the extremities of the axis about which a telescope or other instrument or apparatus turns. (c) Same as *Y track*. (d) A two-way pipe or coupling used to unite a hot- and cold-water pipe in one discharge, as in a bath tub, a Y-pipe or Y-cross. (e) In *autom.*, a Y-moth.

Y³. An old mode of writing the pronoun *I*.
For the hy sory night and day,
Y may say, hay way away!
I huf the mar than mi huf. *Rel. Antiq.*, I. 145.

y-. See *i-1*. For Middle English words with this prefix, see *i-*, or the form without the prefix.

-y¹. [Early mod. E. also *-ie*, *-ye*; < ME. *-y*, *-ie*, *-ye*, *-i*, *-ig*; < AS. *-ig* = D. *-ig* = OHG. *-ig*, *-ie*, MHG. *-ie*, *-re*, G. *-ig* = Icel. *-igr*, *-ugr* = Sw. Dan. *-ig* = Goth. *-ugs* (cf. L. *-icus* = Gr. *-us*), an adj. suffix, as in AS. *stānig*, stony, *isig*, icy, *dēwig*, dewy, etc. This suffix is often spelled *-ey*, especially when attached to a word ending in *-y*, as in *clayey*, *skyeey*.] A very common suffix used to form adjectives from nouns, and sometimes from verbs, such adjectives denoting 'having,' 'covered with,' 'full of,' etc., the thing expressed by the noun, as in *stony*, *rocky*, *icy*, *watery*, *rainy*, *dewy*, *meaty*, *juicy*, *mealy*, *salty*, *peppery*, *powdery*, *flowery*, *spotty*, *speckly*, etc. It may be used with almost any noun, but is found chiefly with monosyllables, while examples of its use with trisyllables are rare.

-y². [Also *-ie* (rarely *-er*); < ME. *-ye*, *-ie* (rare); a dim. suffix, prob. due to a merging of the familiar adj. suffix *-yl*, *-iel*, with the orig. fem. suffix *-ie³*, *-y³*, and perhaps in some cases with the D. dim. suffix *-je*, which is short for *-jen*, a later var. of *-ken* (see *-kin*).] A diminutive suffix, appearing chiefly in childish names of animals, etc., as *Kitty*, *doggy*, *piggy*, *birdy*, *froggy*, *mousy*, and similar names, or familiar forms of personal names, as *Katy* or *Kitty* (diminutive of *Kate*), *Jenny*, *Hetty*, *Fanny*, *Willy*, *Johanny*, *Tommy*, etc., such names being often spelled with *-ie*, as *Willie*, *Darrie*, etc., a spelling common in Scotch use, and also in general use in names of girls, as *Katie*, *Jennie*, *Hettie*, *Carrie*, *Lizzie*, *Nellie*, *Annie*, etc. Such names coincide in terminal form with some feminine names not actually diminutive, as *Mary*, *Lucy*, *Lily*, formerly and sometimes still written *Marie*, *Lucie*, *Lillie*, etc. The diminutive termination is not used, except as above, in English literary speech, but it is common in Scotch, as in *beastie*, *mannie*, *lassie*, sometimes with a second diminutive suffix, as in *lassie-ickie*, etc.

-y³. [Early mod. E. also *-ye*, *-ie*; < ME. *-ie*, *-ye*, < OF. *-ie*, *F. -ie* = Sp. *-ia*, in some words of Gr. origin *-ia* = Pg. It. *-ia*, < L. *-ia* = Gr. *-ia*, a common term. of fem. abstract (and concrete) nouns, as in L. *familia*, family, *mania* (< Gr. *mania*), madness, etc. See def. Cf. *-ey*, *-ency*, *-ce*, *-ence*, etc.] A termination of nouns from the Latin or Greek, or of modern formation on the Latin or Greek model. Such nouns are or were originally abstract, but many are now concrete. Examples are *family*, *innocency*, *humility*, *theory*, *geography*, *philosophy*, *philology*, etc.; the list is innumerable. Besides words from the Latin and Greek, many other words have the termination *-y*, either after the analogy of the Latin and Greek termination, or from some other source. As the termination in such cases usually has no significance, and is therefore not used as formative within the meaning assigned to that word, such words, which are very numerous and intractable to classification, are here ignored.

ya¹. An old spelling of *yea*.

ya² (yā), *pron.* A dialectal form of *you*.

yacare (yak'a-re), *n.* [Braz.] Same as *jacare*.

yacca (yak'ä), *n.* [W. Ind.] Either of two West Indian evergreens, *Podocarpus Purdieana* and *P. coriacea*, trees becoming respectively 100 feet and 50 feet high, and affording timber suitable for cabinet and plain purposes.

yacca-tree (yak'ä-trē), *n.* Same as *yacca*.

yacca-wood (yak'ä-wüd), *n.* The wood of the yacca-tree.

yacht (yot), *n.* [Formerly also *yachte*, *yatch* (cf. F. *yacht*, < E.); = G. *yacht*, < MD. *yacht*, D. *yagt*, a yacht, lit. a chase, hunting (= OHG. *yagot*, MHG. *yagot*, G. *yagt*, chase, hunting), < *yagen* = OHG. *yagōn*, MHG. G. *yagen*, hunt.] A vessel propelled either by sails or by steam, most often light or comparatively small, but sometimes of large size, used for pleasure-trips or for racing, or as a vessel of state to convey persons of distinction by water. There are two distinct types of sailing yacht: the racer with large spars and sails and fine lines, but sacrificing comfort to speed; and the commodious well-proportioned cruising-yacht. Sailing yachts are seldom or never of a more elaborate rig than that of the schooner; but steam-vessels of every class from launches up are common as yachts.

I sailed this morning with his Majesty in one of his yachts (or pleasure-boats), vessels not known among us till the Dutch East India Company presented that curious piece to the king. *Evelyn*, Diary, Oct. 1, 1661.

Yachte, a Dutch Vessel or Pleasure boat about the bigness of our Barge. *Blount*, Glossographia (1670).

Yacht, a small sort of a Ship, built rather for Swiftness and Pleasure than for Merchandize or Warlike Service. *E. Phillips*, 1706.

yacht (yot), *v. i.* [*< yacht, n.*] To sail or cruise in a yacht.

The young English . . . seek for travels as dangerous as war, diving into Maelstroms, . . . *yachting* among the icebergs of Lancaster Sound. *Emerson*, Power.

yacht-built (yot'bilt), *a.* Constructed on the model of a yacht.

On the coast of Florida, there are the skimming-dish, the pumpkin-seed, and the flat-iron models, all half-round *yacht-built* boats, broad and beamy, cat-rigged or sloop-rigged; they all pound and spank in a sea-way, and are very wet. *J. A. Henshall*, Forest and Stream, XIII. 683.

yacht-club (yot'klub), *n.* A club or union of yacht-owners for racing purposes, the promotion of yachting, etc., usually presided over by a commodore.

yachter (yot'èr), *n.* [*< yacht + -er¹*.] One who commands a yacht; also, one who sails in a yacht; a yachtsman.

yachting (yot'ing), *n.* [Verbal *n.* of *yacht*, *v.*] The art of navigating a yacht; the sport of sailing or traveling in a yacht. Also used attributively: as, a *yachting* voyage; a *yachting* suit.

yachtsman (yots'man), *n.*; pl. *yachtsmen* (-men). One who keeps or sails a yacht.

The men . . . were hauling up the mainsail, claud and Freddy lending superfluous aid, and making themselves very hot over it, as the manner of *yachtsmen* is. *W. E. Norris*, Matrimony, v.

yachtsmanship (yots'man-ship), *n.* [*< yachtsman + -ship*.] The art or science of sailing or managing a yacht. Also *yachtmanship*.

The partisans of English *yachtsmanship* need not be disconcerted. *St. James's Gazette*, Sept. 8, 1886. (*Encyc. Dict.*)

yaft. A Middle English form of *gave*, preterit of *give¹*.

yaff (yaf), *v. i.* [Imitative; cf. *yap¹* and *waff²*.] To bark like an angry dog; yelp; hence, to talk pertly. [Prov. Eng. and Scotch.]

This said, up came a *yaffing* cur. *A. Scott*, The Hare's Complaint. (*Jamieson*.)

yafil (yaf'il), *n.* Same as *yaffle¹*.

yaffingale (yaf'ing-gal), *n.* [Appar. altered from *yaffle¹*, with term. conformed to that of *nightingale*.] Same as *yaffle¹*. Also *yappingale*. [Prov. Eng.]

I am woodman of the woods,
And hear the garnet-headed *yaffingale*
Mock them. *Tennyson*, Last Tournament.

yaffle¹ (yaf'l), *n.* [Imitative; cf. *yaff*.] The green woodpecker, *Geococcyx viridis*: from its loud laughing notes. Also *yafil*, *yaffler*, *yaffingale*. See *ent* under *popinjay*. [Prov. Eng.]

The Green Woodpecker, *Geococcyx* or *Picus viridis*, though almost unknown in Scotland or Ireland, is the commonest; frequenting wooded districts, and more often heard than seen, its laughing cry (whence the name "Yaffil" or "Yaffle," by which it is in many parts known) and undulating flight afford equally good means of recognition. *Encyc. Brit.*, XXIV. 651.

yaffle² (yaf'l), *n.* [Also *yafful*; origin obscure.] 1. An armful. [Prov. Eng.]—2. A pile of cod-fish to be carried from the flakes to the store-house. [Local, Massachusetts.]

yaffle³ (yaf'l), *v. i.*; pret. and pp. *yaffled*, ppr. *yaffling*. [*< yaffle², n.*] To transport yaffles of fish: as, "now, boys, go to *yaffling*." [Provincetown, Massachusetts.]

yaffler (yaf'lèr), *n.* Same as *yaffle¹*. [Prov. Eng.]

yager (yā'gèr), *n.* [*< G. jäger* (= D. *jäger*), a huntsman, < *yagen*, hunt; see *yacht*. Cf. *jäger*.] 1. Formerly, a member of various bodies of light infantry in the armies of different German

states, recruited largely from foresters, etc.; now, a member of certain special battalions or corps of infantry or cavalry, generally organized as riflemen.—2. Same as *yäger*.

yagger (yag'ér), *n.* [*< D. jäger, a huntsman, < jagen, hunt; see yacht.*] A ranger about the country; a traveling peddler. [Shetland Islands.]

I would take the lad for a *yagger*, but he has rather over good havings, and he has no pack. *Scott, Pirate, v.*

yaguarundi (yag-wa-run'di), *n.* [Also *yaguarundi*, *yaguarundi*; *S. Amer.: see jaguar.*] A wild cat of Mexico and Central and South America, *Felis yaguarundi*. This cat is nearly as large as the ocelot, but entirely without spots, in which respect, as well as in its slender form, it resembles the *cyra*, and has thus a musteline rather than a feline aspect. The tail is as long as the body exclusive of the head and neck. The general color is a uniform grizzled brownish-gray, the individual hairs being annulated and tipped with blackish; kittens are more rufous brown. The *yaguarundi* ranges northward nearly or quite through Mexico, and of late years has generally been included among the mammals of the United States.

yah (yä), *interj.* An interjection of disgust.
Yahoo (yä-hö'), *n.* [A made name, prob. meant to suggest disgust; cf. *yah*, an interj. of disgust.] 1. A name given by Swift, in "Gulliver's Travels," to a feigned race of brutes having the form of man and all his degrading passions. They are placed in contrast with the Houyhnhnms, or horses endowed with reason, the whole being designed as a satire on the human race.

He [the Houyhnhnm] was extremely curious to know "from what part of the country I came, and how I was taught to imitate a rational creature; because the *Yahoos* (whom he saw I exactly resembled in my head, hands, and face, that were only visible), with some appearance of cunning, and the strongest disposition to mischief, were observed to be the most unteachable of all brutes."

Swift, Gulliver's Travels, iv. 3.

Hence—2. [*l. c.*] A rough, brutal, uncouth character.

A *yahon* of a stable-boy.

Graces, Spiritual Quixote, iv. 10. (Davies.)

"What sort of fellow is he? . . . A *Yahoo*, I suppose."

"Not at all. He is a capital fellow, a perfect gentleman."

H. Kingsley, Ravenshoe, iv.

3. [*l. c.*] A greenhorn; a back-country lout. *Bartlett.* [Southwestern U. S.]

Yahveh (yä-vä'), *n.* Same as *Jehovah*.

Yahvist (yä'vist), *n.* Same as *Jehovist*.

Yahvistic (yä-vis'tik), *n.* Same as *Jehovistic*.

yaip, *v. i.* Same as *yamp*².

yak (yak), *n.* [*< Tibetan gyak.*] The wild ox of Tibet, *Poephagus grunniens*, or any of its domesticated varieties; the grunting ox. The yak is a remarkable instance of the development of the pelage under climatic influences. The modification is like that seen in the musk-ox of arctic regions, *Oribos moschatus*, though altitude has done for the yak what has resulted from latitude in the case of the musk-ox. The body is covered with very long hair hanging from the shoulders, sides, and hips nearly to the ground, and the tail bears a heavy brush of long hairs. The wild animal, which inhabits the mountains of Tibet about the snow-line and descends into the valleys in winter, is of a blackish color; the back is humped; and the general form is not unlike that of the bison, though the long hair gives the animal a different appearance. The actual relationships of the yak are with the humped Asiatic cattle of which the zebu is the best-known domesticated stock. The yak is of great economic importance to the Tibetans, and has been domesticated. In this state it sports in many color-varieties, like other cattle. It is used as a beast of burden, makes excellent beef, and yields rich milk and butter; the long silky hair is spun and woven for many fabrics; the tails when mounted furnish the fly-snappers or chowries much used in India, and they are also dyed in various

ranges. The relationships of the yak are with the rupicaprine and nemorheline antelopes, as the European chamois, the Asiatic gorals, and the American Rocky Mountain goat.

yakopu (yak'ô-pö), *n.* A weapon like the kutar, used by the people of Java and Sumatra.

yaksha (yak'shä), *n.* [*Skt.*] In *Hindu myth.*, one of a class of demigods who attend Kavera, the god of riches, and guard his treasures.

Yakut (ya-küt'), *n.* A member of a people of Turkish or mixed Turkish origin, dwelling in Siberia in the neighborhood of the Lena.

yald (yald), *n.* Same as *yeld*¹.

yald², yauld (yald), *n.* [*Prob. var. of 'yeld, < leel, gldr = Sw. Dan. gild, stout, brawny, of full size.*] Supple; active; athletic. [*Scotch.*]

Bein' yald and stout, he wheelt about,

And kluve his heid in twaine.

Hogg, Mountain Bard, p. 43. (Jamieson.)

Yale lock. See *lock*¹.

yellow (yal'ô), *n.* A dialectal variant of *yellow*. *George Eliot, Silas Marner, xi.*

yam (yam), *n.* [= *F. igname, < Sp. iguama, igname, ñame, ñame = Pg. inhame (NL. inhame), < African (in Pg. rendering) inhame, yam.* The Malay name is *ubi*, Javanese *ubi*, E. Ind. *ochis* (Müller), whence *G. äbis-wurzel, yam.*] 1. A tuberous root of a plant of the genus *Dioscorea*, particularly if belonging to one of numerous species cultivated for their esculent roots; also, such a plant itself. The plant is commonly a slender twining high-climbing vine, in some species prickly; the root is fleshy, often very large, sometimes a shapeless mass, sometimes long and cylindraceous, varying in color from white through purple to nearly black. The yam is propagated by cuttings from the root, or also in some species by axillary bulbils. The root contains a large amount of starch, sometimes 25 per cent., is hence highly nutritious, and in tropical lands largely takes the place of the potato of temperate climates. It lacks, however, the dry meanness of the potato, and is on the whole rather coarse, and not as a rule highly esteemed by people of European races. It is cooked by baking or boiling, and is in the West Indies sometimes converted into a meal used for making cakes and puddings. *D. sativa* is an ordinary species (the *hö* of the Hawaiians) with unarised stem and an aerial root which requires soaking before boiling; it is a profitable source of starch. *D. alata*, the red or white yam, the *ari* of the Fiji Islands, has a winged, not prickly stem, supported in culture by reeds; its tubers attain sometimes a length of 8 feet and a weight of 100 pounds. *D. aculeata*, the *kawai* of the Fijis, has prickly stems not requiring support. *D. Batatas*, the Chinese or Japanese yam, is hardy in temperate climates, and excited considerable interest in Europe and America, at the time of the potato-rot, as a possible substitute for that crop. The tuber is pure-white within, of a flaky consistency, and of a taste agreeable to many. It grows 3 feet deep, however, enlarging somewhat toward the bottom, hence is very difficult to gather. *D. sativa* also is hardy in the southern United States, but the true yam is there little cultivated. (See def. 2.) These species present many varieties, and various other species are more or less cultivated.

The negro yams are a yearly crop, but the white yams will last in the ground for several years.
T. Roughley, Jamaica Planter's Guide (1823), p. 317.
2. By transference, a variety of the sweet-potato. [*South U. S.*]
He yam will grow, de cotton blow,
We'll hab de rice an' corn.
Whittier, Song of the Negro Boatmen.
3. Any plant of the order *Dioscoreaceae*. *Lindley.* Chinese yam. See def. 1. Common or cultivated yam, *Dioscorea sativa*. Japanese yam. See def. 1, and cut under *Dioscorea*. Kawai yam. See def. 1. Ooyala yam, *Dioscorea homophylla* of the East Indies. Port Moniz yam. See *Tamus*. Red yam. See def. 1. Tiwoli yam, *Dioscorea nummularia*, of India and the Malay and Pacific islands. Uvi yam. See def. 1. White yam. See def. 1. Wild yam, any native species of yam. Specifically—(a) The wild yam-root, *Dioscorea villosa*, of North America, a delicate and pretty twining vine, extending north to Canada. The root is esteemed by eclectics as a cure for bilious colic, and is used by the southern negroes against rheumatism; hence called *colic-root* and *rheumatism-root*. (b) See *Rapanea*. Winged yam, *Dioscorea alata*. Yam family, the plant-order *Dioscoreaceae*.

Yama (yam'ä), *n.* [*Skt. Yama, prob. lit. 'the twin.'*] In *early Hindu myth.*, the first mortal, son of the sun (*Vivasvat*) and progenitor of the human race, who went first to the other world,

and ruled as king of those who followed him thither; later, the god of departed spirits and the appointed judge and punisher of the dead. He is in modern Hindu art generally represented as crowned and seated on a buffalo, which he guides by the horns. He is four-armed, and of austere countenance. In one hand he holds a mace, in another a noose which is used to draw out of the bodies of men the souls which are doomed to appear before his judgment-seat. His garments are of the color of fire; his skin is of a bluish green.

yamadou (yam'ä-dö), *n.* An oil obtained from the tallow-nutmeg, *Myristica schifera*. See *nutmeg*, 2.

yama-mai (yam'ä-mi'), *n.* [*NL. (Guérin-Ménéville, 1861), < Jap. yama-mai, lit. 'worm of the mountains.'*] A large bombycid moth, whose larva feeds on the oak *Quercus serrata* in Japan, and furnishes silk of excellent quality which has long been utilized in the manufacture of the heavier native silk fabrics. The worm has been reared in Europe and in the United States, but has not been commercially successful in those countries. See *silkworm*, 1.

yam-bean (yam'bén), *n.* A leguminous plant, *Pachyrhizus tuberosus* and *P. angulatus*, widely cultivated in the tropics for its pods, which are used as a vegetable, and for its tubers, which are edible cooked when young, and furnish in large quantity a starch said to be fully equal to arrowroot. The tubers are borne at intervals along the cord-like roots. *P. tuberosus* has often been included in *P. angulatus*, but is for cultural purposes at least distinct, having a much larger pod free from irritating hairs. In the Fiji Islands *P. angulatus* is called *yaka* or *va yaka*; in English it has been distinguished from *P. tuberosus* as the short-podded *yam-bean*.

yammer (yam'er), *v. i.* [Also *yammer, yamer*; *< ME. zamuren, zomeren, zomeren, < AS. geómorian (= OHG. jamarôn, MHG. jâmeren, G. jamern), lament, groan, < geómor, sad, mournful (= OS. jamar = OHG. jamar, sad, > OHG. jamar, MHG. jâmer, G. jammer, lamentation, misery).*] 1. To lament; wail; shriek; yell; cry aloud; whimper loudly; whine. [*Prov. Eng. and Scotch.*]

As for the White Maiden of Avenel, she is seen to *yammer* and wail before any o' 'em dies. *Scott, Monastery, iv.*

"The child is doing as well as possible," said Miss Grizzy; "To be sure it does *yammer* constantly—that can't be denied."

Miss Ferrier, Marriage, xviii.

2. To yearn; desire. [*Prov. Eng.*]

I *yammer* to hear how things turned awat.
Tim Bobbin, in Mackay's Lost Beauties of the Eng. Lang.

yammering (yam'er-ing), *n.* [Also *yammering*; verbal *n.* of *yammer, v.*] A crying, whining, or grumbling. [*Prov. Eng. and Scotch.*]

They ill-thrawn folk . . . would tear the congregation to pieces wi' their bickerings and *yammerings*.

W. Black, in Far Lochaber, ix.

yammerly (yam'er-li), *adv.* [*< ME. zamerly, zomerly, < AS. 'geómorlic, < geómorlic, lamentable, < geómor, sad; see yammer, v.*] Piteously. *Gawayne.*

yamp (yamp), *n.* [*N. Amer. Ind.*] An umbelliferous plant, *Carrum Gairdneri*, found from California to Wyoming and Washington; doubtless, also, *C. Kelloggii*, of central California. These plants have fasciated tuberous roots, which are an important food of the Indians.

yamph (yamf), *v. i.* [*Cf. yaff, yap!.*] To bark continuously. *Hallucell.* [*Prov. Eng.*]

yamun (yä'mun), *n.* [*Chinese, < ya, the marquise of a general, + mun, a two-leaved door, a gate.*] The official and private residence of a Chinese mandarin who holds a seal; the place where a mandarin transacts the business of the region or department under his care, and where he lives; a mandarin's office, court, residence, etc.

The three *yamuns* at our feet, with their quaint towers, grand old trees, flags, and the broad Pearl River on the other side of the city, are the only elements of positive beauty in the landscape.

Lady Brassey, Voyage of Sunbeam, II. xlii.

Tsung li yamun, the bureau or department of the Chinese government which attends to foreign affairs; the Chinese "Foreign Office." It was established in 1860, is composed of eleven members, and forms the channel of communication between the foreign ministers and the throne. *Giles.*

yang (yang), *r. i.* [*Imitative.*] To cry as the wild goose; honk.

yang (yang), *n.* [*< yang, r.*] The cry of the wild goose; a honk.

yang-kin (yang'ken'), *n.* [*Chinese.*] A Chinese duplemer.

yank¹ (yank), *v. s.* [Perhaps a nasalized form of *yack*, found in sense of 'talk fast', prob. orig. move quickly, < Sw. dial. *jakta*, rove about, a secondary form of *leel, jaga*, move about, = Sw. *jaga* = Dan. *jage*, hunt, chase, hurry, = D.

colors as decorations and ceremonial insignia. The elephant-headed god Ganesa is usually represented as flourishing the chowry with his trunk over the heads of various personages of the Hindu pantheon. Yaks have often been taken to Europe, where they are kept in menageries, and have repeatedly been bred in confinement. The yak crosses easily with some other cattle, producing various mixed breeds. See also cut under *Artiodactyla*.—**Yak lace**, a heavy and rather coarse lace made from the silky hair of the yak; at one time much used for trimming outer garments.

yakin (yä'kin), *n.* A large Himalayan antelope, *Budoreus taxicolor*, inhabiting high mountain-

jagen = G. *jagen*, hunt; see *yacht*. The Sw. Dan. sense 'hunt' appears to be due to G., and the word does not seem to be old in Scand., or to exist in AS., etc. *Fank* has prob. been confused in part, as to meaning, with *yark*, *yerk*; and the whole series to which it belongs is dialectal, and without early record.] **I. intrans.** 1. To be in active motion; move or work quickly; bustle. *Imp. Dict.*—2. To talk fast or constantly; scold; nag. *Imp. Dict.*

II. trans. To move, carry, bring, take, etc., with a sudden jerk or jerking motion: usually with *along*, *over*, or *out*: as, to *yank* a fish out of the water. [Colloq.]

I don't see the fun of being *yanked* all over the United States in the middle of August.

C. D. Warner, Their Pilgrimage, p. 201.

When the butt of a room goes on the drink, or takes to moping by himself, measures are necessary to *yank* him out of himself.

R. Kipling, Only a Subaltern.

I guess th' best thing we can do is t' *yank* our traps out of that cave an' get started again.

T. A. Janvier, Aztec Treasure-house, x.

yank¹ (yangk), *n.* [*< yank¹, v.*] 1. A quick, sharp stroke; a buffet. [Scotch.]

I took up my nife an' gae him a *yank* on the haflat tell I gart his bit brass cap rattle against the wa'.

Hogg, Brownie of Bodsbeck, xiv.

2. A jerk or twitch. [Colloq., U. S.]—3. *pl.* Leggings or long gaiters worn in England by agricultural laborers. *Halliwel.*

Yank² (yangk), *n.* [An abbr. of *Yankee*.] A Yankee. [Colloq. or vulgar.]

"The *Yank*" or the equally grovelling "nigger," one or the other, which we do not know, has corrupted "Pollard of Richmond."

The Nation, IV, 286.

[The word acquired during the war of the rebellion wide currency as a nickname or contemptuous epithet among the Confederates for a Union soldier, the Confederates themselves being in like spirit dubbed *Johnnies* or *Rebs* by the Union soldiers.]

yankee¹ (yang'kē), *a.* [A dubious word, in spelling prob. conformed to *Yankee²*, being, if a genuine word, prob. for **yankie* or **yanki*, smart, active (as a noun, see *yankie*, a sharp, clever, forward woman), *< yank¹ + -ie* or *-y*, equiv. to *yanking*, active; see *yanking*. Cf. *Yankee²*.] Spanking; excellent. Also used adverbially.

You may wish to know the origin of the term Yankee. Take the best account of it which your friend can procure. It was a cant, favorite word with farmer Jonathan Hastings, of Cambridge, about 1713. Two aged ministers, who were at the college in that town, have told me they remembered it to have been then in use among the students, but had no recollection of it before that period. The inventor used it to express excellency. A *Yankee* good horse, or *Yankee* cider and the like, were an excellent good horse and excellent cider.

Dr. W. Gordon, Hist. Amer. War (ed. 1789), I, 324.

Yankee² (yang'kē), *n.* and *a.* [Formerly also *Yankey* and **Yanky* (in *pl.* *Yankies*); origin uncertain. (a) According to a common statement, *Yankee*, as used in the plural *Yankies*, is a var. of *Yankees* or *Yengres* or *Yannghees*, a name said to have been given by the Massachusetts Indians to the English colonists, being, it is supposed, an Indian corruption of the E. word *English*, or, as some think, of the E. *Anglais*, English (in the latter case the statement must refer to the Indians of Canada, the only ones in contact with the French). The word is said to have been adopted by the Dutch on the Hudson, who applied it to the people of New England (it is said, "in contempt," but prob. not more in contempt than any other designation of them). (b) In another view, the name *Yankee* was derived from the adj. *yankie* as given under *yankie¹*. Some connect *yankee¹* with the preceding theory by assuming it to be a corruption of the Indian *Yengres* or *Yankees* or *Yankies* as applied to the English, as if 'English' articles meant necessarily 'excellent' articles. Others identify *Yankee²* with *yankie¹*, 'excellent, smart'; but this sense does not seem to have been common, if existent, in New England use; and the theory is otherwise untenable.] **I. n.** 1. A citizen of New England.

From meanness first this Portsmouth *Yankey* rose,
And still to meanness all his conduct flows.

Opposition, A Poem by an American (Boston, 1765).
(W. Chater.)

When *Yankees*, skill'd in martial rule,
First put the British troops to school.

Trumbull, McFingal, I.

Fankies—a term formerly of derision, but now merely of distinction, given to the people of the four eastern States. *Trumbull's McFingal* (4th Eng. ed.), Editor's note.

For ourselves, now, we do not entertain a doubt that the sobriquet of *Yankies*, which is in every man's mouth, and of which the derivation appears to puzzle all our philologists, is nothing but a slight corruption of the word 'Yengrese,' the term applied to the "English" by the tribes to whom they first became known. We have no other authority for this derivation than conjecture, and conjectures

that are purely our own; but it is so very plausible as almost to carry conviction of itself.

J. F. Cooper, Oak Openings, p. 28.

Yankee, in the American use, does not mean a citizen of the United States as opposed to a foreigner, but a citizen of the Northern New England States (Massachusetts, Connecticut, &c.), opposed to a Virginian, a Kentuckian, &c.

De Quincy, Style, Note 1.

We have the present *Yankee*, full of expedients, half-master of all trades, inventive in all but the beautiful, full of shifts, not yet capable of comfort.

Lowell, Biglow Papers, 1st ser., Int.

2. By extension, a native of the United States. ['Chiefly a European use.].—3. A soldier of the Federal armies: so called by the Confederates during the war of secession. See *Yank²*.—4. A glass of whisky sweetened with molasses. *Bartlett*. [New Eng.] [Colloq. in all uses.]

II. a. Of, pertaining to, or characteristic of the Yankees: as, *Yankee* smartness or invention; *Yankee* notions.

Yankeeedom (yang'kē-dūm), *n.* [*< Yankee² + -dom*.] 1. The region inhabited by Yankees, in any sense of that word.

Located as it is on the confines of Egypt and of *Yankeeedom* in this State (Illinois), it has done a good work in both sections.

The Independent, quoted in Bartlett's [Americanisms, p. 768.]

2. Yankees collectively considered.

Up the turning via Galileo they climb, to the Basilica at the top, . . . hackneyed as only *Yankeeedom* and Cockneydom, rushing hand in hand through all earth's sacrednesses, can hackney.

Rhoda Broughton, Alas, viii.

Yankee-Doodle¹ (yang'kē-dō'dl), *n.* A Yankee: a humorous use, from a popular air so named. [Rare.]

I might have withheld these political noodles
From knocking their heads against hot *Yankee Doodles*.

Moore, Parody of a Celebrated Letter.

Yankeeified (yang'kē-fid), *a.* [*< Yankee² + -fy + -ed*.] Having the appearance or manner of a Yankee; characteristic of a Yankee. [Colloq.]

The Colonel whittled away at a bit of stick in the most *Yankeeified* way possible.

A Stray Yankee in Texas, p. 113. (Bartlett.)

Yankee-gang (yang'kē-gang), *n.* An arrangement in a sawmill (in Canada) adapted for logs of 21 inches or less in diameter. It consists of two sets of gang-saws, having parallel ways in the immediate vicinity of each other. One is the slabbing-gang, which reduces the log to a balk and slab boards. The balk is then shifted to the stock-gang, which rips it into lumber. *E. H. Knight*.

Yankeeism (yang'kē-izm), *n.* [*< Yankee² + -ism*.] 1. Yankee ways or characteristics.

"I confess I had feared that Lily's impetuous ways—her—her—" "Flamboyant *Yankeeism*," Mr. Gore-Thompson called it," suggested Mrs. Clay. "We are from the South-west originally," rather stily answered Mrs. Floyd-Curtis, who took *Yankeeism* to cover the reproach of a New England birthplace.

Mrs. Burton Harrison, The Anglomaniacs, i.

2. A locution or a practice characteristic of Yankees, specifically of the inhabitants of New England.

Cussedness . . . and cuss, . . . in such phrases as "He done it out o' pure cussedness," and "He is a natural cuss," have been commonly thought *Yankeeisms*. . . . But neither is our own. *Lowell*, Biglow Papers, 2d ser., Int.

yanker (yang'kēr), *n.* [*< yank¹ + -er*.] In def. 3 cf. *D. janker*, a bawler, brawler, lit. yelper, *< janken*, yelp, bark.] 1. A smart blow.—2. A great falsehood; a plumper. [Scotch.]

"Ay, billy, that is a *yanker*!" said Tam aside. "When ane is gaim to tell a lie, there's naething like telling a plumper at aince."

Hogg, Three Perils of Man, I, 336. (Jamieson.)

3. Same as *yankie*, 2. *Imp. Dict.*

yankie (yang'ki), *n.* [*< yank¹ + -ie*, *-y*.] Cf. *yankee¹*.] 1. A sharp, forward, clever woman. [Scotch.]—2. One who speaks or scolds incessantly. *Imp. Dict.*

yanking (yang'king), *p. a.* [*Ppr. of yank¹, v.*] 1. Active; pushing; thoroughgoing. [Scotch.]

"Ye'll be nae lagman, then, after a'?" "No," said the traveller. . . . "Weel, I canna say but I am glad o' that I canna bidle their *yanking* way of knapping English at every word."

Scott, St. Roman's Well, ii.

2. Jerking; pulling. [U. S.]

That poor Emory Ann had had a *yanking* old horse, and a wretchedly uncomfortable saddle; . . . the wonder was that she had stayed on at all.

Mrs. Whitney, Sights and Insights, xxix.

yanky¹ (yang'ki), *n.*; *pl.* *yankies* (-kiz). A Dutch craft of a kind not definitely known.

Proceed with thy story in a direct course, without yawing like a Dutch *yanky*.

Smollett, Sir L. Greaves, iii. (Davies.)

yanolite (yan'ō-lit), *n.* Same as *arinite*.

yao-pien (yāo'pyen), *n.* [Chinese, lit. 'changed in the kiln'; *< yao*, kiln, furnace, + *pien*, change, transform.] In *ceram.*, a Chinese vessel which, from accident, intentional over-firing, or the like, has lost the appearance it would have had under ordinary circumstances, the colors being changed, fused together, etc., by too great heat, or unequally fused on the different faces. Many of the most esteemed pieces of porcelain owe their unusual color, or their clouding, mottling, or the like, to accidents or irregularities of manufacture of this nature.

yaurt (yaurt), *n.* [*< Turk. yoghurt*.] A kind of thickened fermented liquor made by the Turks of milk curdled in a special way.

yap¹ (yap), *v. i.*; *pret.* and *pp.* *yapped*, *ppr.* *yapping*. [Prob. imitative. Cf. *yaff*, *waff²*, and *gaup¹*.] To yelp or bark. [Prov. Eng.]

Mr. Transome appeared with a face of feeble delight, playing horse to little Harry, who roared and flogged behind him, while Moro *yapped* in a puppy voice at their heels.

George Eliot, Felix Holt, xlii.

Presently he [the dog] *yapped*, as if in hot chase of a rabbit.

R. D. Blackmore, Kit and Kitty, xxiv.

yap¹ (yap), *n.* [*< yap¹, v.*] 1. A yelp, as of a dog.—2. A cur. [Prov. Eng.]

3. A measuring-rod or -stick of the exact length of 3 feet or 36 imperial inches; a yardstick.

You would not, sir: had I the *yard* in hand,

Ide measure your pate for this delusion.

Heywood, Fair Maid of the Exchange (Works, ed. 1874, II. 40).

4. The fundamental unit of English long measure. The prototype of the British imperial yard (to which the United States Office of Weights and Measures conforms, though without express authority) was legalized in 1855. It is a bar made of a kind of bronze or gun-metal known as *Baily's metal*. It has a square section of 1 inch on the sides, and is 38 inches long. But at 1 inch from each end a well is drilled into one of its surfaces so that the bottom is in the central plane of the bar, and into the bottom of the well is sunk a gold plug, upon whose flat surface is engraved one of the two defining lines. The yard is defined as the distance between these lines at 62° F., with the understanding that the bar is to be supported in a particular manner, and that the thermometers are to be constructed according to certain rules. The lines are designed to be looked at with the microscope of a comparator; but they are not so free from blur that their middles can be determined more nearly than to a millionth part of the distance between them. This standard was made after the practical destruction of the previous legal prototype, that of 1760, in the burning of the Houses of Parliament, October 16th, 1834, and was legalized as a new prototype because its length agreed with what had been recognized in 1819 by the Standards Commission as the scientific standard yard—namely, with a certain scale, or rather with Captain Kater's measures of that scale, known as *Shuckburgh's scale*, having been made in 1794 by Troughton for Sir George Shuckburgh, who in his comparisons of it first introduced the comparator with micrometer microscopes. This scale was a copy of another which had been made for the Royal Society in 1742, from which the standard of 1760 was copied. This was a bar having upon one side two gold studs, each with a dot pricked upon it; and it was used by bringing the points of a beam-compass into these dots, which had thus soon become badly worn. Older standards still extant are those of Queen Elizabeth and of Henry VII. The latter is shorter than the present yard by one thousandth part of its length, or about $\frac{1}{8}$ of an inch. It is said that the yard was made to be of the length of Henry I.'s arm—doubtless a fable, even if believed by that monarch himself. Customary units are not changed so easily. Yet it is true that there appear to be no traces in the measures of buildings earlier than the twelfth century of the use of a yard equal to ours, nor of its subdivisions; while in the later Norman and Gothic structures a foot equal to the third of our yard has often clearly been used. But the

Gothic architects of England more usually employed a foot of 13 $\frac{1}{2}$ modern inches, a unit probably derived from France; and the oldest works show a foot of 12 $\frac{1}{2}$ modern inches, no doubt the old Saxon foot, agreeing very nearly with the Rhineland foot of modern Germany. Some British remains, as Stonehenge, were evidently constructed with Roman measures. The Standards Commission of 1819 reported that 37 inches of cloth were frequently given for each yard, which is almost precisely Rhinish measure. They also found local yards of 38 and 40 inches. As a cloth measure, the yard is divided into 4 quarters = 16 nails. (See *cloth-measure*, under *measure*.) A square yard contains 9 square feet, and a cubic yard 27 cubic feet. Contracted *yd*.

A good oke staffe, a *yard* and a halfe,

Each one had in his hande.

Robin Hood and the Peddlers (Child's Ballads, V. 244).

That there might be no Abuse in Measures, he [Henry I.] ordained a Measure made by the Length of his own Arm, which is called a *Yard*. *Baker*, Chronicles, p. 38.

5. *Naut.*, a long cylindrical spar having a rounded taper toward each end, slung crosswise to a mast and used for suspending certain of the sails called either *square* or *latten sails* according as the yard is suspended at right angles or obliquely. Yards have sheave-holes near their extremities for the sheets reeving through. Either end of a yard, or rather that part of it which is outside the sheave-hole, is called the *yard-arm*; the *quarter* of a yard is about half-way between the sheave-hole and the slings. Going upward from the deck, the yards are known as the *lower yards*, *topsail*, *topgallant*, and *royal yards*, except where double topsails are used, when the topsail-yard is replaced by the lower and upper topsail-yards. Lower yards and topsail-yards are sometimes made of iron, and hollow. See cuts at *abax*, *a-cockbill*, *cockcabin*, and *ship*.

I boarded the king's ship: . . . on the topmast,

The *yards*, and bowsprit would I flame.

Shak., Tempest, l. 2, 260.

yaw (yā), *v.* [Cf. Norw. *yagu*, bend backward, < *yagr* (= leel, *yagr*, bent back); G. dial. *yagen*, rock, move unsteadily.] I. *intrans.* To go unsteadily; bend or deviate from a straight course: chiefly nautical.

To divide him inventorially would dizzy the arithmetic of memory, and yet but *yaw* neither, in respect of his quick sail. Shak., *Hamlet*, v. 2, 129.

She steered wild, *yawed*, and decreased in her rate of sailing. Marryat, Frank Millmay, xx. (*Darvies*.)

The language [German] has such a fatal genius for going stern foremost, for *yaving*, and for not minding the helm without some ten minutes' notice in advance, that he must be a great sailor indeed who can safely make it the vehicle for anything but imperishable commodities.

Lowell, *Among my Books*, 1st ser., p. 293.

The sun dashed on her streaming ebony black sides as she *yawed* to the great ocean swell that chased her.

W. C. Russell, *Sailor's Sweetheart*, v.

II. *trans.* To move aside; move from one side to the other. [Rare.]

My eyes! how she [a mare] did pitch! . . .
And *yaw'd* her head about all sorts of ways.

Hood, *Sailor's Apology for Bow-legs*.

yaw (yā), *n.* [Cf. *yaw*, *v.*] Naut., a temporary deviation of a ship or vessel from the direct line of her course.

O, the *yaws* that she will make!
Pletcher and Massinger, *A Very Woman*, lii. 5.

He did not see a light just before us, which had been hid by the studding-sails from the man at the helm, but by an accidental *yaw* of the ship was discovered.

B. Franklin, *Autobiography*, p. 264.

A very red-faced, thick-lipped countryman, . . . as soon as the Prince bailed him, jovially, if somewhat thickly, answered. At the same time he gave a beery *yaw* in the saddle.

K. L. Stevenson, *Prince Otto*, l. 4.

yaw (yā), *n.* [Said to be from African *yaw*, a raspberry.] 1. One of the tubercles characteristic of the disease known as *yaws*.

In some cases a few *yaws* will show themselves long after the primary attack is over; these are called "memoria *yaws*" (from "remember").

Encyc. Brit., XXIV, 732.

2. A thin or defective place in cloth.

yaw (yā), *v. i.* [Cf. *yaw*, *n.*] To rise in blisters, breaking in white froth, as cane-juice in the sugar-works.

yawd (yād), *n.* A Scotch form of *yawl*.

yawey (yā'i), *a.* [Cf. *yaw* + *-ey*.] Pertaining to or characteristic of the *yaws*.

That *yaws* is a communicable disease is beyond question; but that it has always arisen by conveyance of *yawey* matter from a previous case is neither proved nor probable.

Encyc. Brit., XXIV, 732.

yawl (yāl), *v. i.* [Also *yowl*; formerly also *yole* and *yowl*; < ME. *goulen*, < leel, *gula* = LG. *gauln* = G. *gaulen*, howl, yell; an imitative word, like *howl*; it may be regarded as a more sonorous form of *yell*.] To cry out; howl; yell.

He hürtez of the homdez, & thay
Ful zomery *yauld* & zelle.

Sir Gawayne and the Green Knight (E. E. T. S.), l. 1451.

My little legs still crossing
His: either kicking this way, that way sprawling,
Or, if bee bot remov'd me, straitwaies *yawling*.

Heywood, *Dialogues* (Works), ed. Pearson, 1874, VI, 201.

Then yelp'd the cur, and *yawl'd* the cat.

Tennyson, *The Goose*.

yawl (yāl), *n.* [Sometimes also *yaul*; < MD. **jolle* (in dim. *jolleken*), D. *jol*, a yawl, skiff, = Dan. *jolle* = Sw. *julle*, a yawl, jolly-boat. Cf. *jolly-boat*.] 1. A ship's small boat, usually rowed by four or six oars; a jolly-boat.—2. The smallest boat used by fishermen. See cut under *rowlock*.—3. A sail-boat or small yacht of the cutter class, with a jigger and short main-boom.

yawn (yàn), *v.* [Early mod. E. *yane*, dial. *gawn*, *gawn*; < ME. *zawnen*, *zonen*, *gawen*, *gouwen*, < AS. *gānian* = LG. *gānen* = OHG. *gānion*, MHG. *gānen*, *yawn*; a secondary form, parallel to AS. *gānian* = OHG. *gānen*, MHG. *gānen*, *gānen*, G. *gähnen*, *yawn*; both being derived from a strong verb, AS. *gānan* (pret. **gān*), in comp. *tā-gānen*, gape apart, = leel. *ginn*, gape: see further under *begin*. The form *yawn*, < AS. *gānian*, instead of **yawn* (yōn), is irreg., but is parallel with *broul* (bröl), < AS. *brād*. The initial *y* for *g* is also irregular: it is prob. due to an AS. var. **gānian*, or to conformation with *yave* for *gare*, etc.] I. *intrans.* 1. To gape; open; stand wide.

Then from the *yawning* wound with fury tore
The spear, pursu'd by gushing streams of gore.

Pope, *Ilad*, xli. 479.

Crowds that stream from *yawning* doors.

Tennyson, *In Memoriam*, lxx.

The cracks and rents that had fissured their [the kilns'] walls, from the fierce heat that once blazed within, were *yawning* hideously.

Grieve, *Geol. Sketches*, i.

Specifically — 2. To open the mouth wide. (a)

Voluntarily. The crocodiles not only know the voice of the priests when they call unto them, and endure to be handled and stroked by them, but also *yawn* and offer their teeth unto them to be picked and cleansed with their hands.

Holland, tr. of Plutarch, p. 794.

(b) Involuntarily, as through drowsiness or dullness; gape; oscillate. Compare *yawning*.

When a man *yawneth* he cannot hear so well.

Bacon, *Nat. Hist.*, § 283.

At every line they stretch, they *yawn*, they doze.

Pope, *Dunciad*, li. 380.

And, leaning back, he *yawned* and fell asleep,

Lulled by the chant monotonous and deep.

Longfellow, *Wayside Inn*, The Sicilian's Tale.

3. To gape, as in hunger or thirst for something; hence, to be eager; long.

The chiefest thing which lay-reformers *yawn* for is that the clergy may through conformity in state and condition be apostolical, poor as the Apostles of Christ were poor.

Hooker, *Eccles. Polity*, Pref., iv, § 2.

4. To be open-mouthed with surprise, bewilderment, etc.; be agape.

To *yawn*, be still, and wonder,

When one but of my ordinance stood up

To speak of peace or war. Shak., *Cor.*, iii. 2, 11.

II. *trans.* 1. To open; form by opening. [Rare.]

The groaning Earth began to reel and shake,

A horrid Thunder in her bowels rumbled, . . .

Tearing her Rocks, Until she *yawn'd* a way

To let it out, and to let in the Day.

Sylvester, tr. of Du Bartas's Weeks, ii, The Lawe.

2. To express or utter with a yawn.

"Heigho," *yawned* one day King Francis,

"Distance all value enhances!"

Browning, *The Glove*.

yawn (yàn), *n.* [Cf. *yawn*, *v.*] 1. The act of gaping or opening wide.

Sometimes with a mighty *yawn*, 'tis said,

Opens a dismal passage to the dead.

Addison, tr. from Silius Italicus's *Puniorum*, ii.

2. An involuntary opening of the mouth from drowsiness; oscillation. See *yawning*.

From every side they hurried in,

Rubbing their sleepy eyes with lazy wrists,

And doubling overhead their little lists

In backward *yawns*. Keats, *Endymion*, ii.

The family is astir; and member after member appears with the morning *yawn*.

C. D. Warner, *Backlog Studies*, p. 20.

3. An opening; a chasm. Marston.

But June is full of invitations sweet,

Forth from the chimney's *yawn* and thrice-read tomes.

Lowell, *Under the Willows*.

Through the *yawns* of the back-door, and sundry rents in the logs of the house, filter in, unweariedly, fine particles of snow.

S. Judd, *Margaret*, i. 17.

yawner (yā'nēr), *n.* One who yawns.

yawning (yā'ning), *n.* [Verbal *n.* of *yawn*, *v.*] Gaping; oscillation: the taking of a deep inspiration, followed by a slight pause, and then a prolonged expiration, the mouth being more or less widely open. The act is reflex and involuntary in character, though it can often be partially repressed by a strong effort of the will. It is the physiological expression of fatigue and of a desire to sleep, but is also excited by insufficient oxygenation of the blood, and occurs therefore in conditions of lowered vitality, in the prodromal stage of many diseases, and after profuse losses of blood. The sight of another person yawning is also provocative of the act.

yawningly (yā'ning-li), *adv.* In a yawning manner; with yawns or gapes.

Ye . . . that leaning upon your idle elbow *yawningly* patter on those prayers.

Bp. Hall, *The Hypocrite*, Sermon on 2 Tim. lii. 5.

Many were merely attracted by a new face, and, having stared me full in the title-page, walked off without saying a word; while others lingered *yawningly* through the preface, and, having gratified their short-lived curiosity, soon dropped off one by one.

Loring, *Kniekerbocker*, p. 358.

yawp (yāp), *v. and n.* A dialectal form of *yelp*.

yaws (yāz), *n. pl.* [Pl. of *yaw*.] A contagious disease of the skin, endemic in many tropical regions: same as *frambesia*.

yaw-weed (yā'wēd), *n.* A shrubby West Indian plant, *Morinda Royce*, used as a remedy for the yaws or frambesia.

Yb. In *chem.*, the symbol for *ytterbium*.

Y. B. An abbreviation of *year-book*.

Y-branch (wī'branch), *n.* See *branch*, 2 (c).

Y-cartilage (wī'kār'ti-lāj), *n.* The ypsiliform cartilage uniting the ilium, ischium, and pubis at the acetabulum, ossified about the age of puberty.

Her words *yclad* with wisdom's majesty.

Shak., 2 Hen. VI., i. 1. 33.

yclept, ycleped. Forms of the preterit and past participle of *clepe*.

Y-cross (wī'krōs), *n.* 1. A Y-shaped cross, suggesting the position of Christ as crucified with the arms raised; often an ornament on chasubles.—2. A Y-branch or Y; a three-way joint or connection.

yd. A contraction of *yard*†.

ydlet, a. An obsolete spelling of *idle*.

ydradt. A form of *drad*, obsolete past participle of *dread*.

Yet nothing did he dread, but ever was *ydradt*.

Spenser, F. Q., i. 2.

ye¹, you (yē, yō), *pron. pl.* (used also instead of *sing.*); poss. *your* or *yours*, obj. *you*, sometimes *ye*. [Two forms of the same word, representing historically the nom. and obj. respectively of the personal pronoun used as the plural of *thou* (see *thou*): (a) Nom. (and voc.) *ye*, early mod. E. also *ye*, < ME. *ye*, < AS. *gē*, < OS. *gi*, < OFries. *gi*, < MD. *ghy*, < D. *gi* = LG. *ji* = OHG. MHG. *ir*, G. *ih* = Icel. *er*, *ier* = Sw. Dan. *i* = Goth. *jus*, *ye*, = (with additional suffix) Gr. *hysic*, *tyque* = Skt. *yāyam*, *ye*; a pron. used as the pl. of *thou*, with which it is not etymologically related. (b) Nom. *you*, orig. obj. (dat. and acc.), taking the place of the nom. *ye*, because of the much greater frequency of the dat. and acc., and the tendency to make the three cases *ye*, *your*, *you*, conform to one base, a tendency assisted also by the fact that *ye* and *you* are usually unaccented, and therefore have the vowel more or less obscurely pronounced; < ME. *you*, *gou*, *yow*, < AS. *cōc*, dat., *cōc* (poet. *cōric*), acc., = OS. *iu* = OFries. *iucc*, *iucc* = D. *iu* = OHG. *iu* = Sw. Dan. *i* (prop. nom.) = Goth. *izwis*, *you*; cf. Gr. *hūir*, dat., *hūic*, acc. The confusion of the two forms, and the use of *you* as nom., began in early mod. E., and is conspicuous in the Elizabethan dramas. In the authorized version of the Bible (1611), in which many usages already regarded as archaisms were purposely retained, the distinction between *ye*, nom., and *you*, obj., is carefully preserved. *Ye* still survives in religions and poetical use, while in ordinary colloquial and literary use *you* has superseded it. In provincial use, as in Irish, *ye* occurs for *you* both in nom. and obj., but in the obj. it is to be regarded rather as a shortening of the enclitic *you*: thus, *I tell you, I tell ye*. The *ye* may be further reduced, as in *thank you* > *thank ye* > *thankee* or *thanky*; *how do you do* > *how do ye do* > *how d'ye do* > *howdy* (do > *howdy*, etc.) The personal pronoun of the second person, in the plural number: now commonly applied also (originally with some notion of distinction or compliment, as in the case of the royal *we*) to a single individual, in place of the singular forms *thou* and *thee*—a use resulting in the partial degradation of *thou* to a term of familiarity or of contempt. *Ye* is archaic, and little used except in exalted address and poetry. (a) As carefully discriminated, especially in the older English, the nominative and vocative being *ye* and the dative and accusative *you*.

He swor fornest [first]

That *ye* schuld have no harm, but hendely for gode

He praid *you* can speke with him.

William of Palerne (E. E. T. S.), i. 269.

He gane *you* fyue wittes

For to worshopen hym ther-with while *ye* liven here.

Piers Plowman (C), ii. 15.

And he said unto the elders, Tarry *ye* here for us, until we come again unto *you*.

Ex. xxiv. 14.

Wherefore, brethren, look *ye* out among *you* seven men of honest report.

Acts vi. 3.

Ye Mannians, arme your selves, for feare of afterclaps.

Hakluyt's Voyages, i. 16.

Speed, Pegasus!—*ye* strains of great and small,

Ode, epic, elegy, have at *you* all!

Bacon, Eng. Dram. and Scotch Reviewers.

(b) As used without discrimination of case-form between nominative and objective.

Ye a great master are in your degree.

Spenser, Mother Hub. Tale, i. 546.

You lie, *ye* rogue.

Shak., 1 Hen. IV., ii. 2. 59.

The more shame for *ye*, holy men I thought *ye*.

Shak., 1 Hen. VIII., iii. 1. 102.

You meaner beauties of the night, . . .

What are *you* when the moon shall rise?

Sir H. Wotton, To the Queen of Bohemia.

They have, like good sumpters, laid *ye* down their hors

load of citations and fathers at *your* door.

Milton, Church-Government, ii. Int.

(c) As used for a single subject.

Thou *ye* count me still the child,

Sweet mother, do *ye* love the child?

Tennyson, Garth and Lynette.

To *you*. See *fol.*—**You're another**, a familiar form of the tru quoque argument. See *tru quoque*.

I find little to interest and less to edify me in these international bandings of "*You're another*."

Lowell, Democracy.

You-uns (literally, you ones), *you*. Compare *vee-uns*, under *vee*. [Dialectal, southern U. S.]

"Mirandy Jane," the old woman interrupted, . . . "years like I hev hed the trouble o' raisin' a idjit in *you-uns*!"

M. N. Marfice, Prophet of the Great Smoky Mountains, i.

But I'll tell the yarn to *youans*.

John Hay, Mystery of Gilgal.

ye², adr. A Middle English form of *yea*.

ye³, n. An obsolete variant of *eye*†.

yea (yā), *adv.* [*<* ME. *ye*, *ge*, *yā*, *yo*, < AS. *gea* = OS. *ja* = OFries. *iē*, *gē* = D. *ja* = LG. *ja* = OHG. MHG. *jā*, G. *ja* = Icel. *jā* = Dan. Sw. *ja* = Goth. *ja*, *yes*, *jai*, truly, verily; perhaps = Lith. *ja* in *ja sakyti*, say yes, and Gr. *ἴ*, truly. Connection with AS. *ge* = Goth. *jah*, also, and, and with L. *jam*, now, Skt. *ya*, who, is uncertain. Hence ult. *yes*.] 1. Yes; ay: a word that expresses affirmation or assent: the opposite of *nay*: as, Will you go? *Yea*.

Swear not at all; . . . but let your communication be *Yea*, *yea*; *Nay*, *nay*.

Mat. v. 37.

You promise to bear Faith and Loyalty to him: Say *Yea*. And King Edward said *Yea*, and kissed the King of France on the Mouth, as Lord of the Fee.

Baker, Chronicles, p. 117.

2. Indeed; verily; truly; it is so, or is it so? used to introduce a subject.

Yea, hath God said, Ye shall not eat of every tree of the garden?

Gen. iii. 1.

Yea, mistress, are you so peremptory?

Shak., Pericles, ii. 5. 73.

Him I loved not. Why?

I deem'd him fool? *yea*, so?

Tennyson, Pellas and Ettarre.

3. Used to intimate that something is to be added by way of intensiveness or amplification: Not this alone; not only so but also; what is more. Compare the similar use of *nay*.

Confess Christ and his truth, not only in heart, but also in tongue, *yea*, in very deed, which few gospellers do.

J. Bradford, Letters (Parker Soc., 1853), II. 202.

I therein do rejoice; *yea*, and will rejoice. Phil. i. 18.

One that composed your beauties, *yea*, and one

To whom you are but as a form in wax.

Shak., M. N. D., i. 1. 48.

Many of you, *yea* most,

Return no more. *Tennyson*, Holy Grail.

4. In the authorized version of the Bible, so; thus; true; real; consistent.

All the promises of God in him are *yea*, and in him Amen.

2 Cor. i. 20.

Yea is now used only in the sacred, solemn, or formal style. *Yea*, being mainly a word of assent, was formerly used chiefly in answer to questions framed affirmatively; *yes*, a stronger term, was chiefly used in answer to questions containing a negative or otherwise implying a doubt. But the distinction does not appear to have been rigidly maintained; and the assertions of the following quotations about *yea* and *yes*, like those about *nay* and *no* (see *no*), must be taken with some allowance.

I would not here note by the way that Tyndall here translath *no* for *nay*, for it is but a trifle and mistaking of the english word, saying that *ye* should see that he, which in two so plain english wordes, and so common as is *nay* and *no*, cannot tell when he should take the tone, and when the tother, is not, for translating into english, a man very mete. For the use of those two wordes in answering to a question is this. *No* [read *nay*] answereth the question framed by the affirmative. As, for example, if a manne should aske Tindall hymselfe: "ys an heretike mete to translate holy scripture into english?" Lo, to this question, if he will answer trew english, he muste answer *nay*, and not *no*. But and if the question be asked hym thus, lo: "is not an heretique mete to translate holy scripture into english?" To this question, lo, if he will answer true english, he must answer *no*, & not *nay*. And a lyke difference is there betwene these two adverbs, *ye* and *yes*. For if the question be framed vnto Tindall by thaffirmative in this fashion: "If an heretike falsely translate the newe testament into english, to make his false heresyes seme the worde of Golde, he hys booke worthy to be burned?" To this question asked in this wyse, wy he wyl answer true english, he must answer *ye*, and not *yes*. But now if the question be asked hym thus, lo, by the negative: "If an heretike falsely translate the newe testament into english, to make his false heresyes seme the word of God, he not his booke well worthy to be burned?" To this question in this fashion framed, if he wyl answer trew english, he maye not answer *ye*, but he must answer *yes*, and say "yes, mary, be they, bothe the translation and the translator, and al that wyl holde wyth them." And this thing, lo, though it be no great matter, yet I haue thought it good to give Tindall warning of, because I would haue him write true one way or other, that though I can not make him by no meane to write true matter, I would haue him yet at the best wise write true english.

Sir T. More, The Confutation of Tyndales Answer, made [Anno 1532, book iii., Workes, p. 448.

There is an example of the rejection of a needless subtlety in the case of our affirmative particles, *yea* and *yes*, *nay* and *no*, which were formerly distinguished in use, as the two affirmatives still are in our sister-tongues, the Danish and Swedish. The distinction was that *yea* and *nay* were answers to questions framed in the affirmative; as, Will he go? *Yea* or *Nay*. But if the question was framed in the negative, Will he not go? the answer was *Yes* or *No*.

E. *hour*, which is thus a doublet of *year*: see *hour*. Hence ult. *yore*.] 1. A full round of the seasons; the period of the earth's revolution round the sun; more accurately, the interval between one vernal equinox and the next, or one complete mean apparent circuit of the ecliptic by the sun, or mean motion through 360° of longitude. This is specifically the tropical year, which determines the sequence of the seasons (sometimes also called the *astronomical* or *solar* year). Its length is about 365 days, 5 hours, 48 minutes, 46 seconds. Owing to the precession of the equinoxes, this is less than the length of the sidereal year, the true period of the sun's revolution, or his return to the same place in relation to the fixed stars, which is 365 days, 6 hours, 9 minutes, 9.3 seconds. See also *style*†, *n.*, 9. Abbreviated *y.*, *yr*.

Hence—2. The time in which any planet completes a revolution round the sun: as, the *year* of Jupiter or of Saturn.—3. A space of about 365 days, used in the civil or religious reckoning of time; especially, the usual period of 365 or 366 days, divided into twelve calendar months, now reckoned as beginning with the 1st of January and ending with the 31st of December: as, the *year* 1891 (see *legal year*, below); also, a period of approximately the same length in other calendars. Compare *calendar*.—4. A space of twelve calendar months without regard to the point from which they are reckoned: as, he sailed on June 1st, and was absent just one *year*.

usual between January 1st and March 25th to date the
year both ways, as February 19th, 1745–6 (that is, 1746 ac-
cording to present reckoning).—**Lunar year**, a period con-
sisting of 12 lunar months. The *lunar astronomical year*
consists of 12 lunar synodical months, or 354 days, 8 hours,
48 minutes, 36 seconds. The *common lunar year* consists
of 12 lunar civil months, or 354 days.—**Lunisolar year.**
See *lunisolar*.—**Mohammedan year**, a purely lunar year
of 12 months, having alternately 30 and 29 days, except
that in certain years the last month has 30 days instead
of 29. These years are the 2d, 5th, 7th, 10th, 13th, 16th,
18th, 21st, 24th, 26th, and 29th of each cycle of thirty years.
The years are counted from the *hejira*, A. D. 622, July 15th.

yearning (yér'ning), *n.* [Var. of *earnings*.] Kennet. [Scotch.]

yearningly (yér'ning-li), *adv.* In a yearning manner; with yearning.

yeast (yést), *n.* [Formerly also *gest*; also dial. *east*; < ME. *geest*, < AS. *gist*, *gyst* = D. *gest*, *gist* = MHG. *gest*, *jest*, G. *gäsch*, *gisch* = leel. *just*, *jastr* = Sw. Dan. *gjær*, yeast; from a verb seen in OHG. *jesan*, MHG. *jesen*, *gesen*, *gera*, G. *gähren*, ferment, = Sw. *jäsa*, ferment, froth; akin to Gr. *ζῆμα*, boil, seethe, (> *ζεστος*, boiled, boiling); Skt. *√ yas*, boil, froth.] 1. A yellowish substance, having an acid reaction, produced during the alcoholic fermentation of saccharine fluids, rising partly to the surface in the form of a frothy, flocculent, viscid matter (*top* or *surface yeast*), and partly falling to the bottom (*bottom* or *sediment yeast*). Yeast consists of aggregations of minute cells, each cell constituting a distinct plant, *Saccharomyces cerevisiae*. The yeast-plant is a saprophytic fungus of uncertain systematic position, being regarded by some as a degenerate ascomycete, by others as representing a distinct class. It exists under two conditions. In the first it is in the form of transparent round or oval cells, averaging .08 mm. (0.003 inch) in diameter, which increase in countless numbers by budding—that is, by the formation of a small daughter-cell by the side of the mother-cell, from which it sooner or later separates. The other form consists of larger cells, which, by a division of their protoplasm, form four new cells within the parent-cell. These endogenously formed cells have been likened to the ascospores of the *Ascomycetes*, with which, as stated above, they are frequently classed. The former notion that the yeast-plant was only the immature condition of a mold has been effectually exploded by Brefeld's elaborate researches. Fermentation takes place sooner and goes on more rapidly when yeast is added than when the fluid is merely exposed to the atmosphere, beer-yeast possessing the property of setting up fermentation in the highest degree. Surface yeast is formed at from 65° to 77° F., and its action is rapid and irregular, whereas sediment yeast is formed at from 32° to 45°, and its action is slow and quiet. Sediment yeast is reproduced by spores, and not by buds. In their chemical relations the two do not appear to differ. Yeast varies in quality according to the nature of the liquid in which it is generated, and yeast-merchants distinguish several varieties, which are employed for different purposes according to their energy and activity. Yeast is employed to induce fermentation in the manufacture of beer and ale, and of distilled spirits, and is also the agent in producing the panary fermentation, whereby bread is rendered light, porous, and spongy. Beer yeast is employed medicinally as a stimulant in low fevers, and is of great service in cases where, from inflammatory symptoms, wine is inadmissible. See *barm*², *Saccharomyces*, *fermentation*.

a, yeast-plant (*Saccharomyces cerevisiae*), showing increase by budding; *b*, a cell, showing the formation of the spores; *c*, a cell, containing four mature spores; *d*, the spores; *e*, germinating spores.

with which, as stated above, they are frequently classed. The former notion that the yeast-plant was only the immature condition of a mold has been effectually exploded by Brefeld's elaborate researches. Fermentation takes place sooner and goes on more rapidly when yeast is added than when the fluid is merely exposed to the atmosphere, beer-yeast possessing the property of setting up fermentation in the highest degree. Surface yeast is formed at from 65° to 77° F., and its action is rapid and irregular, whereas sediment yeast is formed at from 32° to 45°, and its action is slow and quiet. Sediment yeast is reproduced by spores, and not by buds. In their chemical relations the two do not appear to differ. Yeast varies in quality according to the nature of the liquid in which it is generated, and yeast-merchants distinguish several varieties, which are employed for different purposes according to their energy and activity. Yeast is employed to induce fermentation in the manufacture of beer and ale, and of distilled spirits, and is also the agent in producing the panary fermentation, whereby bread is rendered light, porous, and spongy. Beer yeast is employed medicinally as a stimulant in low fevers, and is of great service in cases where, from inflammatory symptoms, wine is inadmissible. See *barm*², *Saccharomyces*, *fermentation*.

She consented that the village maiden should manufacture yeast, both liquid and in cakes.

II. n. 1. The color of gold, butter, the neutral chromates of lead, potassa, etc., and of light of wave-length about 0.581 micron. It has some remarkable properties, which are due to the fact that by far the greater part of the visible spectrum consists of two regions, in either of which any three colors being taken a suitable mixture of the extreme ones will match the middle one, and that the yellow is about the middle of one of these regions which contains four fifths of all the visible light of the solar spectrum. This region is bounded by the scarlet and the emerald green, the other by the emerald-green and the violet-blue. These three colors are thus the only ones which cannot be matched by mixtures of others. They are also more chromatic or high-colored than those which fall between them in the spectrum; for which reasons physicists regard these three colors as the elementary ones. (See *color*.) A remarkable property of yellow is that an increase of light merely intensifies the sensation with a slight heightening of the color, without changing the hue; while blue, on the other hand, is rendered pale by increased illumination, and all other colors are rendered yellowish. The name *yellow* is restricted to highly chromatic and luminous colors. When reduced in chroma, it becomes buff; when reduced in luminosity, a cool brown. Mixed with red, yellow goes over into orange; mixed with green, into yellow-green. Lemon-yellow and canary yellow may be taken as pure yellows, the latter being a little greener. Sulphur-yellow is a little greenish; primrose is a little greenish and pale; gamboge is a very slightly orange yellow. By chrome-yellow is usually meant a little more orange and most intensely chromatic color. Indian, cadmium, and saffron yellows are orange-yellows; Naples yellow and maize-yellow are pale orange-yellows. Ocher-yellow, clay-yellow, and wax-yellow are of somewhat diminished chroma, the first a little orange, and the last a little green. It is impossible to describe the yellows more precisely, as the slightest causes—for example, a little thicker layer of paint, or illumination from another part of the sky—change their hues decidedly.

2. The yolk of an egg; the vitellus; opposed to the *white*, or the surrounding albumen.—3. *pl.* Jaundice, especially jaundice in cattle (see *jaundice*); hence, figuratively, jealousy.

His horse, . . . sped with spavins, rayed with the *yellow*.

Shak., T. of the S., iii. 2. 54.

Thy blood is yet uncorrupted, *yellows* has not tainted it.

Two Lancashire Lovers (1640), p. 27. (Halliwell.)

4. *pl.* Dyer's-wood. *Halliwell.* [*Prov. Eng.*]

— 5. Same as *peach-yellows*.

The *yellows* is its [the peach's] most fatal disease.

New Amer. Farm Book, p. 232.

6. One of certain geometrid moths: an English collectors' name; as, the *speckled yellow*.—7. Any one of the group of small yellow butterflies; a sulphur. See *sulphur*, *n.*, 3.—**Antimony yellow**, yellow antimony. See *antimony*. — **Cassel yellow**. Same as *mineral yellow*. — **Chinese yellow**. Same as *king's yellow*. — **Cobalt yellow**, a pigment used by artists, composed of the double nitrite of potassium and cobalt. It is permanent, and more closely resembles the yellow of the spectrum than any other pigment. — **Fast yellow**. Same as *acid yellow*. — **Fol's yellow**, a color formerly used in dyeing, made by heating carbolic acid and arsenic in a pot. It dyes wool and silk yellow, and gives red shades with lime. — **Imperial yellow**, in *ceram.*, a variety of Chinese porcelain having a uniform yellow glaze, said to be reserved for the use of the imperial family or court; also, by extension, porcelain of any make supposed to resemble this in color. — **Indian yellow**, a bright yellow pigment obtained in India. It is supposed to be the earth dug up from the stables where cows have been housed during the winter and fed on mango leaves. In its crude form it comes in commerce in balls of from 3 to 5 inches, having an offensive urinous odor. It is an impure magnesium salt of euxanthic acid. For artistic purposes it is washed and levigated, the foreign material being carefully separated. Thus purified it gives an orange-yellow of great depth and beauty. It is quite permanent, and is used both as an oil and as a water color.

— **King's yellow**, a pigment formed by subliming a mixture of arsenious acid and sulphur. It consists of arsenious acid and arsenic trisulphid, or orpiment. Also *Chinese yellow*. — **Madder yellow**, a lake prepared from madder-root. It is bright in tone, somewhat similar to Indian yellow, but more transparent. — **Manchester yellow**, a coal-tar color used in dyeing, being the sodium or calcium salt of dimethyloxy-naphthol. It is applicable to silk and wool, producing shades from pale lemon to deep orange. It is not fast to light. It is also known as *Martin's yellow*, *naphthol yellow*, *golden yellow*, *saffron yellow*, *naphthalene yellow*. — **Mare yellow**, an artificially prepared oxid of iron, resembling the natural yellow ocher. It is used by artists as a pigment. — **Martius's yellow**. Same as *Manchester yellow*. — **Mineral yellow**. See *mineral*. — **Montpellier yellow**. Same as *mineral yellow*. — **Naples yellow**, a light-yellow pigment of various shades and of varying composition. The true pigment is a basic antimonate of lead, but it is imitated by mixtures, as of cadmium-yellow and zinc-white, or of white lead and chrome-yellow. It has a good body, and is quite permanent. — **Paris yellow**. Same as *chrome-yellow*. — **Patent yellow**. Same as *mineral yellow*. — **Perfect yellow**, chromate of zinc, used as a pigment by artists. It is a light, bright yellow, and is quite permanent. — **Resorcinal yellow**. Same as *trypsin*. — **Speckled yellow**. See *speckled*. — **Strontian yellow**. See *strontian*. — **Turner's yellow**, an oxychlorid of lead employed as a yellow pigment; same as *mineral yellow*.

yellow (yel'ō), *v.* [*< yellow, a.*] **I. trans.** To render yellow.

So should my papers, yellow'd with their age,
Be scorn'd. *Shak., Sonnets, xvii.*

While the morning light
Was yellowing the hill tops.
Wordsworth, Prelude, v.

II. intrans. To become yellow; grow yellow.

The noisy flock of thievish birds at work
Among the yellowing vineyards.
Browning, Sordello, i.

yellowhammer (yel'ô-am'êr), *n.* Same as *yellow-bellied*. 1.

yellow-backed (yel'ô-bakt), *a.* Having the back yellow, or having yellow on the back; specific in some phrase-names of animals: as, the blue *yellow-backed* warbler, *Parula americana* (which see, under *Parula*).

yellow-barred (yel'ô-bârd), *a.* Barred with yellow: as, the *yellow-barred* brindle, *Lobophora cinctata*, a British geometrid moth whose larva feeds on privet.

yellow-bellied (yel'ô-bel'id), *a.* Having the belly yellow, or having yellow on the abdomen: specific in phrase-names of many different animals: as, the *yellow-bellied* flycatcher, *Empidonax flaviventris*; the *yellow-bellied* woodpecker, *Sphyrapicus varius*. See cut under *sapsucker*.

yellowbelly (yel'ô-bel'i), *n.* A sole-like flounder, *Rhombosolen leporina*. *Science, XV, 141.*

yellowbill (yel'ô-bil), *n.* The American black scoter, *Edemna americana*: from the yellow hump on the bill. Also called, for the same reason, *butter-bill*, *butter-nose*, *copper-nose*, and *pumpkin-blossom* coot. [New Eng.]

yellow-billed (yel'ô-bild), *a.* Having the bill or beak more or less yellow: specific in phrase-names of various birds.—**Yellow-billed cuckoo**, *Coccyzus americanus*, the common rain-crow of the United States. See cut under *Coccyzus*.—**Yellow-billed loon**, *Columbus (or Uria) adamsi*, a very large loon of arctic North America, having the bill mostly dull horn-yellow, and of a different shape from the black bill of the common loon.—**Yellow-billed magpie**, *Pica nuttalli*, or Nuttall's magpie, the common magpie of California, whose bill is bright-yellow, instead of black as in most other magpies.—**Yellow-billed tropic-bird**, *Phaethon flavirostris*.

yellowbird (yel'ô-bêrd), *n.* One of several different birds of a yellow or golden color. (a) In Great Britain, the golden oriole, *Oriolus galbula*. *Montagu*. See first cut under *oriole*. (b) In the United States, the summer warbler, or summer yellowbird, *Dendroica aestiva*, a small dendroica insectivorous bird of the family *Mniotiltidae*, of a bright-yellow color, obscured on the back, the male streaked on the under parts with reddish. It is one of the most abundant and familiar birds of the country, inhabiting nearly the entire continent in summer, and much of Central America in winter. See cut under *warbler*. (c) In the United States, the American goldfinch or thistle-bird, *Chrysomitris*, *Astragalinus*, or *Spinus tristis*, a conirostral granivorous bird of the family *Fringillidae*. The male in summer is clear-yellow, with black on the head, wings, and tail; in winter the yellow is exchanged for pale flaxen-brown. It is very abundant in the eastern United States and Canada. See cut under *goldfinch*.

yellow-breasted (yel'ô-bres'ted), *a.* Having the breast wholly or partly yellow: specific in phrase-names of various animals, especially birds: as, the *yellow-breasted* chat (see cut under *chat*).

yellow-browed (yel'ô-broud), *a.* In *ornith.*, having a yellow superciliary line: as, the *yellow-browed* warbler, *Phylloscopus superciliosus*. See cut under *Phylloscopus*.—**Yellow-browed shrike**. See *shrike*.

yellow-covered (yel'ô-kuv'êrd), *a.* Covered with yellow; especially, covered or bound in yellow paper.—**Yellow-covered literature**, trashy or sensational fiction, periodicals, etc.: in allusion to the form in which such matter was formerly commonly issued. [Colloq.]

yellowcrown (yel'ô-krown), *n.* The yellow-rump or myrtle-bird, *Dendroica coronata*.

yellow-crowned (yel'ô-kround), *a.* Having the top of the head yellow, or yellow on the crown, as various birds; yellow-poll: as, the *yellow-crowned* night-heron. See *night-heron*.—**Yellow-crowned thrush**. See *Trachospiza*.—**Yellow-crowned warbler**. See *warbler*.—**Yellow-crowned weaver**. See *weaver-bird*.

yellow-duckwing (yel'ô-duk'wing), *a.* Noting a variety of duckwing game-fowls whose distinguishing color-mark on the wing of the cock is golden or yellow. The back of the cock is orange or crimson. Compare *silver-duckwing*.

yellow-eyed (yel'ô-id), *a.* Having yellow eyes, or a yellow eye, in any sense; also, yellow around the eyes.—**Yellow-eyed grass**. See *Ayris*.
yellowfin (yel'ô-fin), *n.* Same as *redfin*, 2.

yellowfish (yel'ô-fish), *n.* A chiroid fish of the coast of Alaska, *Herogrammus (Phurogrammus) monopterygius*. This is one of the rock-trouts, and a food-fish of some importance, locally known as *Atha mackerel*. It is dark-olive above and yellowish below, cross-banded on the sides with the color of the back; the fins are nearly plain dusky, the pectorals with blackish margin, and the dorsal fin is continuous or but slightly emarginate.

yellow-footed (yel'ô-füt'ed), *a.* Having yellow feet: as, the *yellow-footed* armadillo, the poyou; the *yellow-footed* rock-kangaroo, *Petrogale xanthopus*; specific in phrase-names of various animals.

yellow-fronted (yel'ô-frum'ted), *a.* In *ornith.*, having the front (of the head) yellow, or having yellow there: as, the *yellow-fronted* warbler.—**Yellow-fronted warbler**. See *warbler*.

yellow-golds (yel'ô-gôldz), *n.* A golden-flowered plant, probably the marigold, *Calendula officinalis*. See *gold*, 6.

yellow-gum (yel'ô-gum), *n.* 1. The jaundice of infants (*icterus infantum*).—2. Same as *black-gum*.

yellowham (yel'ô-ham), *n.* The European yellowhammer.

Yellow hammer, with its abbreviation *yellow Ham*. *Farrell, Brit. Birds (4th ed.), II, 43, note. (Encyc. Dict.)*

yellowhammer (yel'ô-ham'êr), *n.* [Cf. dial. *yellowhomer*, *yellowcomber*; < *yellow* + *hammer*], prop. *hammer*; see *hammer*. 1. The yellow bunting, *Emberiza citrinella*, one of the commonest birds of the western Palearctic region. It is about 7 inches long; the head, cheeks, front of the neck, belly, and lower tail-coverts are of a bright yellow; the upper surface is partly yellow, but chiefly brown, the feathers on the top of the back being blackish in the middle, and the tail-feathers also blackish. The yellowhammer is a resident in Great Britain, and generally throughout Europe. In summer the well-known notes of the male are almost incessantly heard from the roadside hedge. Also called *goldhammer*, *yellowammer*, *yellowham*, *yellow-*

Yellowhammer (*Emberiza citrinella*).

comber, *yellow yeldring*, *yellow yorling*, *yellow yorley* (and with variants *yeldring*, *yeldrocky*); also *scribbling lark* and *writing lark* (from the scratchy markings of its eggs); and by various other local or provincial names, as *yite*.

2. In the United States, a local misnomer of the flicker, or golden-winged woodpecker, *Colaptes auratus* (see cut under *flicker*). No bird much like or congeneric with the true yellowhammer exists in North America; but popular ignorance would have it otherwise, and pitched upon this woodpecker as a subject for the name, or perhaps the name was given because the bird is extensively yellow and "hammers" trees. The European yellowhammer resembles and is congeneric with the ortolan of that country, *Emberiza hortulana*; and the United States bird which really looks something like the yellowhammer is the bobolink in the fall, when it is called *reed-bird*, *rice-bird*, and *ortolan*.

3†. A gold coin; a yellow boy. [Old slang.]

Is that he that has gold enough? would I had some of his yellow-hammers! *Shirley, Bird in a Cage, II, 1.*

yellow-headed (yel'ô-hed'ed), *a.* Having the head yellow, or yellow on the head: as, the *yellow-headed* blackbird. See cut under *Xanthocephalus*.—**Yellow-headed tit** or *titmouse*, the gold tit, *Aviparus flaviceps*.

yellow-horned (yel'ô-hôrd), *a.* Having yellow antenna: as, the *yellow-horned* moth, *Cyrtophora flavicornis*, a British noctuid.

yellowing (yel'ô-ing), *n.* [Verbal *n.* of *yellow*, *v.*] In *pin-mauing*, the operation of boiling the pins in an acid solution preparatory to murling or tinning.

yellowish (yel'ô-ish), *a.* [< *yellow* + *-ish*.] Tending to be yellow; somewhat yellow; yellowy: as, the *yellowish* monitor, *Varanus flavescens*.

In his youth he was unhealthy, and of an ill complexion (*yellowish*). *Aubrey, Lives (Thomas Hobbes).*

yellowishness (yel'ô-ish-nes), *n.* The state or property of being yellowish. *Boyle.*

yellow-jack (yel'ô-jak), *n.* See *yellow Jack*, under *jack*, 1.

yellow-jacket (yel'ô-jak'et), *n.* Any one of several species of true social wasps or hornets of the genus *Vespa*, which have the body more or less marked with yellow; any hornet, as *V. crabro*. See cut under *hornet*. *Vespa vulgaris*, an importation from Europe, is the common yellow-jacket of the United States.

The mellow, perfumed apples dropped heavily on the grass, and the busy *yellow-jackets* rioted among them. *The Atlantic, LXVI, 775.*

yellowleg, yellowlegs (yel'ô-leg, -legz), *n.* A tattler of the family *Scolopacidae* and genus *Totanus* (section *Gambetta*); the *T.* or *G. flavipes*: so called from the color of its legs. The form *yellowlegs* is the more common. It inhabits the greater part of North America, migrating in winter

Greater Yellowlegs (*Totanus melanoleucus*).

into Central and South America, and is an abundant and well-known game-bird, especially during the autumnal migration, when it is found in flocks about the marshes, feeding upon fish-fry, mollusks, crustaceans, etc., and becoming fat and highly prized for the table. It is about 11 inches long, the bill 1½ inches, the tarsus about 2 inches. The name extends to a similar but larger species, the *T.* or *G. melanoleucus*, the two being distinguished as the *lesser* and *greater yellowlegs*. The latter is decidedly larger, beyond dimensions ever reached by the former, as length 13 to 14 inches, bill 2 or more, tarsus 2½, etc. These birds are also called *lesser* and *greater yellowshanks* and by various other names. See *tattler* and *Totanus*.

yellow-legged (yel'ô-leg'ed or -legd), *a.* Having yellow legs: as, the *yellow-legged* clearwing, a British hawk-moth, *Sesia cymipiformis* or *Trochilium cymipiforme*. The yellow-legged herring-gull is *Larus cachinnans* of Pallas. The so-called yellow-legged plover of the United States is the lesser yellowlegs, *Totanus flavipes*.—**Yellow-legged goose**. See *goose*.—**Yellow-legged sandpiper**. See *sandpiper*, and cut under *ruff*.

yellow-legger (yel'ô-leg'êr), *n.* 1. The yellow-legs.—2. A fisherman from Eastham. [Provincetown, Massachusetts.]

yellow-line (yel'ô-lin), *a.* Having yellow lines or streaks: as, the *yellow-line* quaker, *Orthosia maculenta*, a British noctuid moth.

yellowly (yel'ô-li), *adv.* [< *yellow* + *-ly*.] In a yellow manner; with an appearance of yellowness.

The town of Asterabad, with its picturesque towers and ramparts gleaming *yellowly* in the noonday sun. *O'Donovan, Merv, v.*

yellow-necked (yel'ô-nekt), *a.* Having the neck yellow: as, the *yellow-necked* caterpillar, the larva of a common North American bombycid moth, *Datana ministra*, which feeds in communities on the foliage of apple, hickory, and walnut in the United States.

yellowness (yel'ô-nes), *n.* 1. The state or property of being yellow.

The Purifying Pills, which kept you alive, if they did not remove the *yellowness*. *George Eliot, Middlemarch, xlv.*

2†. Jealousy. See *yellow*, *a.*

I will incense Page to deal with poison; I will possess him with *yellowness*. *Shak., M. W. of W., I, 3, 111.*

yellowmober (yel'ô-om'bêr), *n.* Same as *yellowhammer*, 1.

yellowpoll (yel'ô-pôl), *n.* The male widgeon or goldenhead, *Marca penelope*. [Ireland].—**Yellowpoll warbler**. Same as *yellow-poll warbler*.

yellow-poll (yel'ô-pôld), *a.* In *ornith.*, yellow-crowned: as, the *yellow-poll* warbler. See *warbler*.

yellow-ringed (yel'ô-ringd), *a.* Ringed with yellow: as, the *yellow-ringed* carpet, *Larentia flavicinctata*, a British geometrid moth.

yellow-rocket (yel'ô-rok'et), *n.* The common winter-ress, *Barbarea vulgaris*. Also called *bitter winter-ress* and *winter rocket*.

yellowroot (yel'ô-rôt), *n.* 1. Same as *shrub-yellowroot*.—2. An American herb, *Hydrastis Canadensis*, named also *orange-root*, *yellow puccoon*, *Indian paint*, *turmeric-root*, and especially (in medicine) *goldenseal*. Its rootstock contains hydrastine and berberine, and is an official remedy of an unquestioned tonic property and with various powers less settled, applied in dyspepsia, in jaundice and other disorders of the liver, as a laxative, alterative, etc. See *Hydrastis* and *hydrastine*.—**Shrub yellowroot**. See *Xanthorrhiza* and *shrub-yellowroot*.

yellowrump (yel'ô-rump), *n.* The yellow-rumped warbler, *Dendroica coronata*, the yellow-crowned warbler, or myrtle-bird. See *warbler* and *myrtle-bird*.—**Western yellowrump**, Audubon's warbler, *Dendroica auduboni*. See *warbler*.

yellow-rumped (yel'ô-rump), *a.* Having the rump (or upper tail-coverts in some cases) yellow, as various birds. (See *yellowrump*.) The yellow-rumped seed-eater is a certain finch, *Crithagra chrysopyga*.

yellow-sally (yel'ô-sal'i), *n.* See *yellow sally*, under *sally*, 2.

yellowseed (yel'ô-séd), *n.* A species of peppergrass, *Lepidium campestre*, native in the Old World, introduced in North America; mithridate pepperwort.

yellow-shafted (yel'ô-sháf'ted), *a.* Having the shafts of certain feathers yellow: as, the *yellow-shafted flicker*, or golden-winged woodpecker, *Colaptes auratus*. See cut under *flicker*, 2, and compare *red-shafted*.

yellowshank, yellowshanks (yel'ô-shangk, -shangk), *n.* Same as *yellowlegs*. Compare *greenshank, redshank*.

yellowshell (yel'ô-shel), *n.* A British geometrid moth, *Camptogramma bilineata*, whose yellow wings are marked with white lines.

yellowshins (yel'ô-shinz), *n.* Same as *yellowlegs*.

yellow-shouldered (yel'ô-shôl'dèrd), *a.* In ornith., having the bend of the wing yellow, or having yellow on the carpal angle of the wing: as, the *yellow-shouldered amazon*, a South American parakeet, *Chrysotis ochroptera*.

yellow-spotted (yel'ô-spot'ed), *a.* Spotted with yellow: as, the *yellow-spotted tortoise* of the Ganges.—**Yellow-spotted willow-slug**. See *willow-slug*.

Yellowstone trout. See *trout*, 1.

yellowtail (yel'ô-täl), *n.* and *a.* 1. *n.* 1. An earthworm yellow about the tail. *Topsell, Serpents*, p. 307. (*Hallirell*.)—2. One of various fishes. (a) A carangoid fish of the genus *Seriola*, as *S. dorsalis*. See cut under *amber-fish*. [U. S.] (b) A carangoid fish, *Elaeatis pinnulatus*. [Florida.] (c) A carangoid fish, *Caranx georgianus*. [Auckland, New Zealand.] (d) A sciænid fish, *Bairdiella chrysura*, the silver-perch. [U. S.] (e) A sparoid fish, *Lagodon rhomboides*, the pinfish. See cut under *Lagodon*. [U. S.] (f) A scorpenoid fish, *Sebastes flavidus*, one of the rockfishes. [California.] (g) A clupeoid fish, *Brevoortia tyrannus*, the menhaden. See cut under *Brevoortia*. [U. S.] (h) A cirrid fish, *Loatis hecateia*, the trumpeter. (i) A gadoid fish, *Lutella bachei*. [New Zealand.]

II. *a.* Yellow-tailed.—**Yellowtail moth**, *Liparis auriflua*, a British species.—**Yellowtail warbler**. See *warbler*.

yellow-tailed (yel'ô-täld), *a.* Having the tail more or less yellow: specific in many phrase-names of animals.

yellowthroat (yel'ô-thrôt), *n.* Any bird of the old genus *Trichas* (of Swainson), now *Geothlypis*: as, the Maryland yellowthroat. See cut under *Geothlypis*.

yellow-throated (yel'ô-thrô'ted), *a.* Having the throat more or less yellow: specific in many phrase-names of animals: as, the *yellow-throated finch*, warbler, etc.—**Yellow-throated greenlet** or *vireo*, *Vireo flavifrons*, a common greenlet of eastern North America, of rather large size and stout-billed, having the whole throat and breast bright-yellow, the other under parts white, the upper parts yellowish-green.

yellow-top (yel'ô-top), *n.* A variety of turnip: so called from the color of the skin on the upper part of the bulb.

yellow-vented (yel'ô-ven'ted), *a.* Having the vent-feathers yellow, or being yellow on the crissum: as, the *yellow-vented bulbul*, *Pycnonotus crocorrhous*.

yellow-weed (yel'ô-wéd), *n.* 1. Same as *reld*.—2. A common name of coarse species of goldenrod. See *Solidago*.

yellow-winged (yel'ô-wingd), *a.* Marked with yellow on the wing, as various birds, etc.—**Blue yellow-winged warbler**, *Helminthophaga chrysoptra*. See cut under *Helminthophaga*.—**Yellow-winged locust**, a North American locust, or short-horned grasshopper, *Tomonotus sulphureus*: so called from its yellow hind wings. T. W. Harris.—**Yellow-winged sparrow**, a grasshopper-sparrow, *Coturniculus passerinus*. See cut under *Coturniculus*.—**Yellow-winged sugar-bird**, a common gquituit, *Cereba cyanea*. ed flicker, or golden-winged woodpecker. See cut under *flicker*, 2.

yellow-wood (yel'ô-wüd), *n.* 1. Same as *fustic*.—2. *Cladrastis tinctoria*, the American or Kentucky yellow-wood, in cultivation commonly known as *Virgilia lutea*, also called *gopher-wood* and *yellow ash*. In the wild state it is a rare tree, found locally in Kentucky, Tennessee, and

Yellow-wood (*Cladrastis tinctoria*). a, pod.

North Carolina. It grows from 30 to 45 feet high, and bears pinnate leaves with seven to ten leaflets, and ample racemes of white pea-like flowers drooping from the ends of the branches. It is highly ornamental for both flowers and foliage. It has a hard yellow wood, which is used for fuel and to some extent for gun-stocks, and yields a clear yellow dye. For another American yellow-wood, see *Sekakeeria*. The Osage orange, *Machra aurantiaca*, of the same genus as the fustic, is sometimes so named, as is also the shrub-yellowroot, *Xanthorrhiza apifolia*.

3. Same as *white oak*. See *oak*.—**Australian yellow-wood**. See *light yellow-wood* and *Queensland yellow-wood*.

Acronychia lavis, of the Rutaceae, found at Moreton Bay, is also called *yellow-wood*, as are *Hovea longipes*, a tall leguminous shrub, and *Xanthostemon pichysperma*, of the Myrtaceae.—**Cape yellow-wood**, *Podocarpus Thunbergii*, a small tree with bright-yellow flue-grained wood, very handsome when polished. Compare *Natal yellow-wood*.—**East Indian yellow-wood**, the satin-wood, *Chloroxylon Swietenia*; also, *Podocarpus latifolia*, an evergreen 80 feet high, with aromatic wood.—**Light yellow-wood**, a tree, *Rhus rhodantha*, of New South Wales, growing 70 or 80 feet high, peculiar in its genus in bearing large red flowers. The wood is of a light-yellow color, sound and durable, close-grained, and taking a fine polish; it is one of the best cabinet-woods of its locality. The Queensland yellow-wood has also been called by this name.—**Natal yellow-wood**, *Podocarpus elongata*, a tree from 30 to 70 feet high, with a close-grained wood extensively used in building and for furniture, though not bearing exposure. The bastard yellow-wood of the Natal region is *P. pruinosa*, with the wood pale-yellow, tough, and durable, extensively used for building.—**Prickly yellow-wood**, the West Indian *Xanthoxylum Caribbeum* (*A. Clara-Herensis* of some authors), a tree from 20 to 50 feet high; the wood is used for making furniture and inlaying; the prickly young stems are made into walking-sticks. Also called *prickly yellow-wood*. Other West Indian xanthoxylums are also called *yellow-wood*.—**Queensland yellow-wood**, *Flindersia Ozleyana* (*Ozleya xanthoxyla*), also called *white teak* (which see, under *teak*) and *light yellow-wood*. P. Scottiana, of the same region, is a valuable shade-tree of the same name.

yellow-wort (yel'ô-wört), *n.* A European annual plant, *Chlora perfoliata*, of the gentian family. It is a very glaucous plant, about a foot high, the stem-leaves in pairs and connate-perfoliate, the flowers bright yellow in loose terminal cymes. Also called *yellow centaury*.

yellow-wrack (yel'ô-rak), *n.* A seaweed, *Isocophyllum nodosum* (*Fucus nodosus* of Linnaeus). **yellowy** (yel'ô-y), *a.* [*< yellow + y*.] Somewhat yellow; yellowish; flavescens.

A little kerchief of cobweb muslin and ancient yellowy lace . . . is "over her decent shoulders drawn." R. Broughton, *Joan*, ii. 2.

yelm (yelm), *n.* [*< ME. *yelm, < AS. yelm, yilm, a handful. Cf. gleam*.] A handful; a sheaf of straw or grain. [Prov. Eng.]

yelm (yelm), *v. t.* and *i.* [*< yelm, n.*] To lay straw in order fit for use by a thatcher. *Hallirell*. [Prov. Eng.]

A woman yelming 14 days, 1s. 9d. H. Hall, *Society in Elizabethan Age*, App. II.

yelp (yelp), *v. i.* [*< Also dial. yaup, yawp; < ME. yelpen, yelpen, boast; < AS. gylpan, gylpan, gylpan (pret. gelp) (MHG. gelfen), boast, exult, = leel, gälp, yelp; perhaps ult. akin to yell. The mod. sense 'yelp' as a dog is prob. due to Scand. Cf. yawp.*] 1. To boast; cry up a thing; exult; brag.

This zenne is yboudie linc than [the one] that he his agene mothe him yelpth other of his wytte, other of his keune, other of his workes. *Agynbite of Inwyrt*, p. 22.

I kepe noight of armes for to yelp. *Chaucer, Knight's Tale*, I. 1380.

2. To give a sharp, shrill, quick cry, resembling a bark; bark sharply and shrilly; yawp; said of dogs, and also of some other creatures, especially a wild turkey-hen.

The moment Wolf entered the house his crest fell . . . and at the least flourish of a broom-stick or ladle he would fly to the door with yelping precipitation. *Irving, Sketch-Book*, p. 49.

Let the wild Lean-headed Eagles yelp alone, *Tennyson, Princess*, vii.

Now a hen yelps on the other side, and he [a turkey-cock] pauses between the two calls, then struts and gobbles again. *Sport with Rod and Gun*, II. 762.

yelp (yelp), *n.* [*< ME. yelp, yelp, < AS. gylp, gylp, boast; from the verb.*] 1. A boast; boasting.—2. An eager bark or cry; a sharp, quick bark or cry caused by fear or pain.

The dog With inward yelp and restless forefoot ples His function of the woodland. *Tennyson, Lucretius*.

He put the dog's nose in and patted him, and Spike gave a yelp, as if a rat were in prospect.

R. D. Blackmore, *Kit and Kitty*, xiv.

yelper (yel'pér), *n.* [*< ME. yelpere; < yelp + -er*.] 1. One who boasts; a boaster.

The yelper is the cockon, that he kan nagt zinge bote of him-zelue. *Agynbite of Inwyrt*, p. 22.

2. One who or that which yelps. Specifically—(a) A young dog; a whelp. *Hallirell*. (b) In ornith.: (1) The avocet, *Recurvirostra americana*; so called from its cry. (Local, Eng.) (2) The greater yellowlegs, *Totanus melanoleucus*. *Shore Birds*, p. 37. (c) A whistle or call used by sportsmen to imitate the cry of the wild turkey-hen.

We now take our yelper, and give a few sharp yelps; he [a wild turkey] hears the call.

yeoman (yō'-man), *n.*; pl. *yeomen* (-men).
[Early mod. E. *yoman*; < ME. *yoman*, *yomom*, *ghoman*, *gheman*, *gheman*, *gheman*; not found in AS., but prob. existent as **gāman*, **gēman*, *gēman* (= OFries. *gāman*, *gāmon*, a villager (cf. *gāfolk*, people of a village), = MD. *goymanen*, arbitrators, = leel. *gāmadhr*, a franklin—rare, and prob. < AS.); < AS. *gā*, **gē*, **gē*, a district or village, as in comp. *āl-gē*, 'province of eels,' *Ohlga-gā*, *Norga-gā* (= OFries. *gā*, *gō* (pl. *gār*), a district village, = MD. *gouwe* (in comp. *gou-, gōy-, gō-*), a village, field, D. *gouwe*, *gouwe*, a province, = MLG. *gō*, LG. *gōē*, *gōhe*, in comp. *gō-*, a district, = OHG. *gōwi*, *gōwi*, *gōwi*, MLG. *gōu*, *gōu*, G. *gāu*, a province, G. dial. *gāu*, the country, = Goth. *gōwi*, a district), + *man*, man. The word has been erroneously explained otherwise: (a) A contraction of a supposed ME. **grom-man*, 'a person in charge,' < *grom*, care, + *man*. (b) < AS. *ūman*, a forefather, ancient, < *in*, of yore, + *man*. (c) < AS. *ūng man*, *grom man*, young man. (d) < AS. *gūma*, nan. (e) < AS. *gēnēne*, common. These attempts are all wrong. That which refers to AS. *ūng man*, *grom man*, finds some color in the use of *ūng* as a quasi-technical name for a body-guard; but while the sense might seem to suit, it is impossible to derive ME. *gō-* or *gē-* from AS. *grom*, *ūng*. The proper modern spelling is *yoman*, the *o* being appar. due to an attempt to represent in one spelling the two variants *yeman* and *yoman*; the *o* has no etymological justification, as it has to some extent in *people*.] It. A retainer; a guard.

Dekker and Webster, Westward Ho, iii. 2.

The reason for calling the journeymen of the craft *yeomen* and bachelors, was probably that they were at that time in England, as was the case in Germany, not allowed to marry before they were masters.

English Gilds (E. E. T. S.), p. cxlvi., note.

4. In *old Eng. law*, one having free land of forty shillings by the year (previously five nobles), who was thereby qualified to serve on juries, vote for knights of the shire, and do any other act for which the law required one who was "probus et legalis homo" (*Blackstone*, Com., I. xii.); hence, in recent English use, one owning (and usually himself cultivating) a small landed property; a freeholder.

I press me none but good householders, *yeomen's* sons.
Shak., 1 Hen. IV., iv. 2. 16.

Now do I smell th'astrologer's trick: he'll steep me
In soldiers blood, or boil me in a caldron
Of barbarous law French; or anoint me over
With supple oil of great men's services;
For these three means raise *yeomen* to the gentry.
Tomkis (?), Albumazar, ii. 2.

The *yeomen* or Common People, . . . who have some
lands of their own to live upon; For a Carn of Land, or
a Plough Land, was in ancient Time of the yearly Value
of five Nobles, and this was the Living of a Stokenan or
Yeoman; And in our Law they are called Legales Homi-
nes, a Word familiar in Writs and Inquests.
Gullim, Display of Heraldry (ed. 1724), II. 274.

After the economical changes which marked the early
years of the fifteenth century, the *yeoman* class was
strengthened by the addition of the body of tenant farm-
ers, whose interests were very much the same as those
of the smaller freeholders, and who shared with them the
common name of *yeoman*. Stubbs, Const. Hist., § 480.

5. In the United States navy, an appointed
petty officer who has charge of the stores in
his department. The ship's *yeoman* has charge of the
boatswain's, carpenters', sailmakers' stores, etc., and the
engineer's *yeoman* has charge of all stores in the en-
gineer's department, while the paymaster's *yeoman* takes
care of provisions, clothing, and small stores, and issues
them as directed.

—*Yeoman of the guard*, in England, a member of the
body-guard of the sovereign. See *beef-eater*, 2.

There came a country gentleman (a sufficient yeoman)
up to towne, who had several sonnes, but one an extra-
ordinary proper handsome fellowe, whom he did hope to
have preferred to be a *yeoman of the guard*.

Aubrey, Lives (Walter Raleigh).

Yeoman's service, powerful or efficient aid, support, or
help: in allusion to the strength and bravery of the *yeo-*
men in the English armies of early times.

I once did hold it, as our statists do,
A baseness to write fair, and labour'd much
How to forget that learning, but, sir, now
It did me *yeoman's service*.

4. A volunteer cavalry force originally em-
bodied in Great Britain during the wars of the
French revolution, and consisting to a great

extent of gentlemen or wealthy farmers. They
undergo six days of training, and must attend a certain
number of drills yearly, for which they receive a money
allowance. They must furnish their own horses, but have
a small allowance for clothing—the government also sup-
plying arms and ammunition. Unlike the ordinary volun-
teer force, the yeomanry cavalry may be called out to aid
the civil power, in addition to being liable for service on
invasion of the country by a foreign enemy.—**Yeomanry**
Act, an English statute of 1804 (44 Geo. III., c. 54) consoli-
dating and amending the laws relating to the corps of *yeo-*
manry and volunteers and regulating them.

A tree of the genus *Taxus*, the common yew being

Yew (*Taxus baccata*).

T. baccata of temperate Europe and Asia. This is a slow-growing and long-lived evergreen of moderate height and spreading habit, with a thick irregular trunk and dark thick foliage. In Europe the yew has long been planted in graveyards. There are several dwarf, weeping, and variegated varieties. The golden yew has the edge of the leaves in spring of a bright-golden yellow. The Irish yew (var. *fastigiata*) has erect branches, and is more hardy than the typical form, which will not endure the winter in the northern United States.

The wood of the yew is heavy, fine-grained, and elastic, and was formerly much used for bows, the supply being protected by government. It is considered a very choice cabinet-wood, the heart being of a fine orange-red or deep brown, and the sap-wood white. The leaves of the tree are poisonous.

The sheter ewe, the asp for shaftes pleyne.

Chaucer, *Parliament of Fowls*, l. 180.

Its branches spread over the whole world and reach above the heavens. Its roots run in three directions: one to the Asa gods in heaven, one to the Frost-giants, and the third to the underworld. Under each root is a fountain of wonderful virtues. In the tree, which drops honey, sit an eagle, a squirrel, and four stags. At the root lies the serpent Nithhogr gnawing it, while the squirrel Ratatoskr runs up and down to sow strife between the eagle at the top and the serpent at the root. Also called *Tree of the Universe*.

Y-level (wî'lev'el), *n.* The common engineers' spirit-level; so called formerly from the fact that the telescope rests on "Y's." In the Y's the telescope can be rotated at pleasure. The Y-level has been to a certain extent superseded by the so-called "dumpy-level," or Gravatt level, and by other improved instruments combining more or less completely the peculiarities of the Y-level and the dumpy-level. Also written *wye-level*.

The dumpy level differs from the *wye level* in being attached to the level bar by immovable upright pieces; in having the level tube firmly secured to the uprights of the level bar; in being provided with an inverting eye-piece (unless ordered otherwise); and in the absence of the tangent and slow-motion screws.

Buff and Berger, Hand-Book and Ill. Catalogue, 1891.

The most perfect form [of level] now in use being the improved Dumpy Level, resting on Y's, and named the improved dumpy Y Level. It appears to unite in itself all the good qualities of the others, retaining few of their imperfections.

3. An emblem, token, or mark of servitude, slavery, and sometimes of suffering generally. As a mark of humiliation and entire submission, the Romans caused their prisoners of war to pass under a yoke. This yoke was sometimes an actual ox-yoke, and was sometimes symbolized by a spear resting across two others fixed upright in the ground.

Take my yoke upon you, and learn of me. . . . For my yoke is easy and my burden is light. Mat. xi. 29, 30.

Like fools, they do submit their necks
Vnto the slavish yoke & proudest checke
Of Romes insulting tyrant.

Times' Whistle (E. E. T. S.), p. 52.

4. Something which couples, connects, or binds together; a bond of connection; a link; a tie.

Companions . . .
Whose souls do bear an equal yoke of love.

Shak., M. of V., iii. 4. 13.

You see I am tied a little to my yoke;
Pray pardon me; would ye had both such loving wives!

Fletcher, Rule a Wife, ii. 2.

5. A chain or ridge of hills; also, a single hill in a chain; obsolete, but still retained in some place-names; as, Trontbeck Yoke. [Lake District, Eng.]—6. A pair; couple; brace; said of things united by some link, especially of draft-animals; very rarely of persons, in contempt.

And simple faith; the yolden ghost his mercy doth require.

Surrey, Paraphrase of part of Eccl. iv.

Yoldia (yōl'di-ä), n. [NL. (Möller, 1842), named after Count Yoldi of Sweden.] A genus of bivalves, of the family *Nuculida* (or *Lecidæ*), related to the ark-shells. The several species are of boreal distribution; they resemble the members of the genus *Leda*, but have long slender siphons, a compressed long oval shell, beaked and slightly gaping behind, and covered with shining epidermis. Y. *arctica*, Y. *lunatula*, and Y. *thraciiformis* are examples; the latter is found in deep water off the New England coast.

yielding (yōl'ding), n. Same as *goldring*.—Yellow yielding. Same as *yellowhammer*, 1.

yieldring, yoldrin (yōl'dring, -drin), n. Same as *yeldring*, *yowley*. [Prov. Eng.]

But you heed me no more than a goss-hawk minds a yellow yielding.

Scott, Abbot, xvii.

yolet, v. i. An obsolete variant of *yawt*.

yolk¹ (yōk'), n. [Also *yolk*; < ME. *yolke*, *yolke*, < AS. *geolca*, *yolk*, lit. 'the yellow part,' < *geoh*, yellow; see *yellow*.] 1. The yellow and principal substance of an egg, as distinguished from the white; that protoplasmic content of the ovum of any animal which forms the embryo in germination, with or without some additional substance which serves to nourish the embryo during its formation, as distinguished from a mass of albumen which may surround it, and from the egg-pod or shell which incloses the whole; the vitellus, whether formative wholly or in part. In holoblastic ova, which are usually of minute or microscopic size, the whole content of the cell-wall is yolk which undergoes complete segmentation, and is therefore formative or germinal vitellus, or morphocellus. In large meroblastic eggs, however, such as those we eat of various birds and reptiles, the true germ-yolk forms only the nucleus and a relatively small part of the whole yolk-ball, which then consists mainly of food-yolk or trophocellus. This is the yolk of ordinary language, forming a relatively large ball of usually yellow and minutely granular substance which floats in a mass of white or colorless albumen, inclosed in a delicate pellicle, or vitelline membrane, and is steadied or stayed in position by certain strands of stringy albumen forming the chalazæ. The quantity of germ- and of food-yolk relatively to each other and also to the amount of white varies much in different eggs, as does also the relative position of the two kinds of yolk. (See *reticulat*, *centrocyth*.) In the largest eggs, as of birds, the great bulk results from the copiousness of the white and of the food-yolk, and the germ-yolk appears only at a point on the surface of the latter, where it forms the so-called tread or ciaticula. Some eggs contain more than one yolk, but this is rare and anomalous. See *egg*, *ovum*, and *vitellus*; also *segmentation of the vitellus* (under *segmentation*), and *cut* under *gastrulation*.

The tother [man] was zalower there the *zölke* of a naye [an egg]. *Morte Arthure* (E. E. T. S.), I, 3284.

2. The vitellus, a part of the seed of plants, so named from its supposed analogy with the yolk of an egg.—3. The greasy sebaceous secretion or unctuous substance from the skin of the sheep, which renders the fleece soft and pliable; wool-oil.

Is not the yoke, or natural oiliness of the wool in the animal, more efficacious?

Agric. Surv. of Galloway, p. 283. (*Jamieson*.)

Food yolk. See *fool-yolk*, *meiblastic*, and *tripholecithus*.—**Formative yolk**, germinal yolk, which enters into the formation of the embryo, as distinguished from the food-yolk, which does not undergo segmentation; morpholecithus; vitellus germinativus. See *holoblastic*.—**Glycerite of yolk of egg**, a mixture of yolk of egg (45 parts) with glycerin (55 parts), used as a vehicle for medicinal oils and resins.

yolk², r. See *yok²*, *Hallivall*.

yolk-bag (yôk'bag), *n.* Same as *yolk-sac*.

yolk-cleavage (yôk'klê'vāj), *n.* In *embryol.*, segmentation of the vitellus (which see, under *segmentation*). See *cut* under *gastrulation*.

yolk-duct (yôk'dukt), *n.* In *embryol.*, the ductus vitellinus, or vitelline duct, which conducts from the cavity of the umbilical vesicle to that of the intestine through a constriction, at and near the navel, of the original globular cavity of the yolk-sac. See *cut* under *embryo*.

yolked (yôkt), *a.* [*< yolk + -ed²*.] Furnished with a yolk or vitellus; frequently used in composition; as, a double-yolked egg.

The effect of the loss of a large food-yolk . . . was shown to resemble a similar loss of food-yolk in the eggs of Micrometrus as compared with other large-yolked oviparous fish eggs. *Amer. Nat.*, XXIII, 923.

yolk-gland (yôk'glând), *n.* Same as *vitellarian*.

yolk-sac (yôk'sak), *n.* The umbilical vesicle (which see, under *vesicle*). Also called *yolk-bag*. See *cuts* under *embryo* and *uterus*.

While the yolk in the latter is minute as compared with that of the former, the *yolksack* is just as large. *Amer. Nat.*, XXIII, 926.

yolk-segmentation (yôk'seg-men-tā'shōn), *n.* Same as *yolk-cleavage*. See *segmentation* of the *vitellus* (under *segmentation*), and *cut* under *gastrulation*.

yolk-skin (yôk'skin), *n.* The vitelline membrane; the delicate pellicle which incloses the yolk of an egg, especially when it is large.

yolky (yô'ki), *a.* [*< yolk + -y¹*.] 1. Resembling or consisting of yolk; having the nature of yolk.

In addition to the minute yolk-spherules scattered through the protoplasm, there are a few larger bodies, . . . probably of a yolkly nature. *Micros. Sci.*, XXX, 5.

2. Greasy or sticky, as unwashed wool. *Hallivell*. [*Prov. Eng.*]

Because of the yolkly fleece.

New York Semi-weekly Tribune, Aug. 16, 1887.

yollt, r. An obsolete variant of *yell¹*.

yolling (yôl'ing), *n.* See *yowley*.

yonder (yon'dér), *adv.* [*Also dial. yunder; < ME. yunder, yonder, yunder, yender, yender* = *MD. ghender, ghinder* = Goth. *jaindre*, there; a compar. form of *yon*, with suffix -*der* as in *hither*, *AS. hider, under*, *AS. under*, etc.] At or in that (more or less distant) place; at or in that place there.

The felishpe is yozere that yender ye see.

Geuegryles (E. E. T. S.), I, 2869.

Hold, yonder is some fellow skulking.

Sheridan, The Duenna, I, 4.

Chaucer uses the adverb frequently before the noun, and preceded by *that* or *the*: a use indicating the transition to the adjective use:

In that yonder place

My lady first me took unto her grace.

Chaucer, Troilus, v, 580.

yonder (yon'dér), *a.* [*< yunder, adv. Cf. yon*.] Being at a distance within view, or as conceived within view; that or those, referring to persons or things at a distance.

Our pleasant labour to reform

Yon flowery arbours, yonder alleys green.

Milton, P. L., iv, 626.

Sweet Emma Moreland of yonder town

Met me walking on yonder way.

In fact, there's nothing that keeps its *youth*,
So far as I know, but a tree and truth. *O. W. Holmes, The Deacon's Masterpiece.*

2. The age from puberty up to the attainment of full growth. In a general sense, youth denotes the whole early part of life, from infancy to maturity; but it is not unusual to divide the stages of life into infancy, childhood, youth, and manhood. Thus limited, youth includes that early period of manhood or womanhood upon which one enters at puberty, with the establishment of the sexual functions, and in which one continues until the skeleton is completely ossified by the consolidation of the epiphyses of the long bones, so that there is no further increase in stature, and all the teeth are in permanent functional position.

Therefore take hede bothe nygt & day

How fast yourowe youthe dooth assuage.

Hymns to Virgin, etc. (L. E. T. S.), p. 79.

3. A young person; especially, a young man. In this sense it has a plural.

I gave it to a youth,

A kind of boy. *Shak.*, *M.* of *V.*, v. 1. 161.

Seven youths from Athens yearly sent.

Dryden, *Æneid*, vi. 27.

For what in nature's dawn the child admired,

The youth endeavored, and the man acquired.

Dryden, *To Sir Godfrey Kneller*, l. 144.

Just at the age 'twixt boy and youth,

When thought is speech, and speech is truth.

Scott, *Marmion*, ii., l. 10.

I had hardly ever seen a handsome youth; never in my life spoken to one.

Charlotte Brontë, *Jane Eyre*, xii.

4. Young persons collectively.

Forget the present flame, indulge a new,

Single the loveliest of the amorous youth.

Prior, *Henry and Emma*.

Even when our youth, leaving schools and universities, enter that most important period of life.

ypocrite†, *n.* An old spelling of *hypocrite*.

ypointing (i-point'ing), *a.* [*< y-, i-, + pointing.* Like *Shakespeare's yrish*, an infelicitous attempt at archaism, the prefix *y-* being confined to ME. use and there to words of AS. origin (or to verbs from early OF., some of which, in the pp., have *y-*); there may have been a ME. *ypointed, but there could be no ME. *ypointing.

Milton herein, like Thomson later, was imitating Spenser, who archaized on principle but without knowledge.] *Pointing*. [Poetical.]

What needs my Shakspeare, for his honour'd bones, The labour of an age in piled stones?

Or that his hollow'd reliques should be hid Under a star-pointing pyramid?

Milton, *Epitaph on William Shakspeare*.

Yponomeuta (i-pon-ö-mü'tä), *n.* [NL. (Latreille, 1796), prop. *Hyponomeuta*, < Gr. *ὑπονομή* -er, undermine, < *ὑπονομα*, going underground; underground, as a noun an underground passage, < *ὑπο*, under, + *νομα*, drive.] A notable genus of tineid moths, typical of the family *Yponomeutidae*, comprising a number of rather large slender-bodied species, usually white or gray, and often with many small black spots. The larvae live gregariously in a light web, and feed upon the foliage of different plants. About a dozen species are found in Europe and 7 in North America. *Y. cagnatella* is exceedingly destructive to apple-trees, depriving them of their leaves.

Yponomeutidae (i-pon-ö-mü'ti-dë), *n. pl.* [NL. (Stephens, 1829), < *Yponomeuta* + *-idae*.] A family of tineid moths, based chiefly upon venational characters, but having a recognizable facies. The larvae have 16 legs, and in general feed like those of the type genus. Those of *Attenuata*, however, bore into buds and young twigs. Some 14 genera have been placed in this family by Standinger, but the important genus *Argyrotaenia* and its allies are removed to a distinct family, *Argyrotaenidae*, by Heinemann and others. Also *Yponomeutidae*.

ypreised†, *a.* An obsolete form of the past participle of *praise*.

For the more a man may do by so that he do hit, The more is he worth and worthi of wysse and goodde ypreised.

Piers Plowman (C), xl. 319.

Ypres lace. See *lace*.

ypsiliform (ip'si-li-form), *a.* [*< Gr. ὑψίλιος* (see *hypsilioid*) + *L. forma*, form.] Shaped like the Greek capital letter Y; Y-shaped. The figure is also called *arctiform*, the symbol of the zodiacal sign *Aries* being the same.

The Y-shaped [germanial spot] gradually passes into the *ypsiliform* figure, so called from its resemblance to the Greek Y. *Encyc. Brit.*, XX. 417.

ythe†, *n.* Same as *ithe*.

ythe†, *adv.* Same as *ath*.

Y-track (wi'trak), *n.* A short track laid at right angles (or approximately so) to a line of railway, with which it is connected by two switches — the whole resembling the letter Y. It is used instead of a turn-table for reversing engines or cars. In

operating it, an engine or car advancing toward A (heading as shown by the arrow) is switched at A to the track B, and then backed up over the switch C to the main track again, heading now in the reverse direction.

ytterbite (it'ér-bít), *n.* [*< Ytterby*, in Sweden, + *-ite*.] Same as *gadolinite*.

ytterbium (i-ter'bi-um), *n.* [NL., *< Ytterby*, in Sweden.] Chemical symbol, Yb; atomic weight, 173 (?). An element discovered by Marignac in gadolinite, in regard to which little is known. The spectrum of this metal is believed to be peculiar, and to justify its claim to be recognized as a distinct element.

yttria (it'ri-ä), *n.* [NL., *< Ytterby*, in Sweden.] A metallic oxide or earth, having the appearance of a white powder, which is insipid, insoluble in water, and infusible. It dissolves in acids, forming sweetish salts, which have often an amethyst color. It has no action on vegetable colors. Yttria is the sesquioxide of yttrium, Y_2O_3 . It occurs in certain rare minerals, and was first detected in gadolinite found at Ytterby, in Sweden.

yttrianite (it'ri-ä-lit), *n.* [*< yttria* + *-lite*.] A silicate of thorium and the yttrium earths, occurring in massive forms of a dark olive-green color. It is found with gadolinite and other rare species in Llano county, Texas.

yttric (it'rik), *a.* [*< yttrium* + *-ic*.] Related to or containing yttrium.

yttriferous (it-rif'ér-us), *a.* [*< NL. yttrium*, *q. v.*, + *L. ferre* = *E. bear*.] Containing or yielding yttrium.

yttrious (it'ri-us), *a.* [*< yttria* + *-ous*.] Pertaining to yttria; containing yttria: as, the yttrious oxide of columbium.

yttrium (it'ri-um), *n.* [NL., *< Ytterby*, in Sweden.] Chemical symbol, Y; atomic weight, 89 (?). A metal, the base of the earth yttria. But little is known of this metal, and its atomic weight has never been satisfactorily determined. As obtained by Leve, yttrium is a dark-gray powder exhibiting a metallic luster under the burnisher. It belongs with various other rare metals, to the cerium group, in regard to most of which, from their scarcity and their resemblance to one another, but little has been definitely made out.

yttrium-garnet (it'ri-um-gär'net), *n.* A variety of garnet containing a small amount of the yttrium earths.

yttricerite (it-rö-sér'it), *n.* [*< yttrium* + *cerium* + *-ite*.] A mineral occurring very sparingly at Finbo and Broddbo, near Falun, in Sweden, embedded in quartz. Its color is violet-blue, inclining to gray and white. It occurs crystallized and massive, and is a fluoride of yttrium, cerium, and calcium.

yttrrocolumbite (it-rö-kö-lum'bít), *n.* [*< yttrium* + *columbite* + *-ite*.] Same as *yttrrotantalite*.

ytrogummite (it-rö-gum'it), *n.* [*< yttrium* + *gummite*.] A mineral formed by the alteration of cleveite, and related to it as is ordinary gummito to uraninite.

yttrrotantalite (it-rö-tan'ta-lít), *n.* [*< yttrium* + *tantalite*.] A rare mineral found at Ytterby, Sweden, of a black or brown color. It is a tantalate of yttrium, uranium, and iron, with calcium.

yttrrotitanite (it-rö-tí-tan'it), *n.* [*< yttrium* + *titanite*.] Same as *keilhaute*.

Experiments for its discovery are to be undertaken on rutiles, *yttrrotitanites*, wöhlerites, etc.

Jour. Franklin Inst., CXXV, 338.

yu, yuh (yö), *n.* The Chinese name for nephrite or jade.

Yucatecan (yü-ká-tek'an), *a.* [*< Sp. Yucateco* (*< Yucatan*, Yucatan) + *-an*.] Pertaining or belonging to Yucatan, a region in southeastern Mexico.

A fair sample of Yucatecan agriculture.

U. S. Cons. Rep., 1886, No. 1xvii, p. 495.

yucca (yuk'ä), *n.* [*< Sp. yucca*, now *yuca* (NL. *yucca*); from the Amer. Ind. name.] 1. A plant of the genus *Yucca*.—2. [*cap.*] [NL. (Dillenius, 1719).] A genus of liliaceous plants, of the tribe *Draceaceae*. It is characterized by a distinct woody stem, numerous panicle roundish or bell-shaped flowers with nearly or quite separate perianth-segments, small anthers sessile on a club-shaped filament, and an ovary with numerous ovules. There are about 20 species, natives of the United States, Mexico, and Central America. They are low upright perennials, sometimes trees, often with numerous branches. Their leaves are linear-lanceolate and thick, usually rigid and spiny tipped, and crowded at the apex of the stem or branch. The handsome pendulous flowers are large and usually white or cream-colored, attaining a length of 3 inches in *Y. baccata*, and form a showy terminal inflorescence often several feet long, seated among clustered leaves or raised on a bracted peduncle. The fruit is either a dry leucocarpic capsule or a pendulous berry which is fleshy or pulpy, sometimes cylindrical and elongated; in *Y. baccifolia* it becomes dry and spongy. The rootstock is succulent, and in *Y. treculeana* and other species is much used by the Mexicans for soap—being included with various similar products under the name *auale*. The leaves yield a coarse fiber; the taller species also produce a fibrous wood which is heavy, spongy, and difficult to cut or work; it shows distinct concentric rings, unlike that of most monocotyledonous plants. Some species are said to reach the height of 50 feet and the thickness of 5 feet. The species are most numerous in the southern United States and northern

Mexico; one, *Y. angustifolia*, extends from New Mexico to the Dakotas; three are Californian; three are well-known plants of the Southern States, *Y. filamentosa*, *Y. aloifolia*, *Y. gloriosa* (including *Y. recurvifolia*), all decorative plants, mostly stemless, thriving in poor soil, even in drifting sand of the coast; their flowers are white, tinged sometimes with green, yellow, or purple; they furnish a harsh, brittle, but very strong fiber, called *dagger-fiber*, used for packing and as a rude cordage. From their sharp-pointed leaves with threads hanging from their edges, *Y. filamentosa* and *Y. aloifolia* are known as *Adam's needle* and *thread* and as *Eve's thread*; the former is also called *silk-grass* (which see), and sometimes *bear-grass*, its young pulpy stems being eaten by bears. *Y. aloifolia* is also known in the Southern States and in the West Indies as *Spanish dagger* and *dagger plant*. *Y. gloriosa* is the dwarf palmetto, or mound-lily. The preceding and several others are favorites in cultivation, chiefly under the name *yucca*; 8 species cultivated near Nice now begin to form a characteristic feature of some parts of the Mediterranean coast. Some species yield an edible fruit, as *Y. baccata*, the Spanish bayonet, or Mexican banana, a native of Mexico, extending into western Texas, New Mexico, and southern parts of Colorado and California; a strong coarse fiber, made into rope by the Mexicans, is procured from the leaves by macerating them in water. The name *Spanish bayonet* is also applied to other species, especially to *Y. constricta* (*Y. elata*), which occurs in Mexico and the United States from western Texas to Utah, grows from 9 to 15 feet high, and produces a light brown or yellowish wood; and to *Y. treculeana* (including *Y. canaliculata*), a long-leaved species of Texas and Mexico, sometimes 25 feet high and 2 feet thick, producing a bitter but sweetish fruit which is cooked and eaten by the Mexicans. It has its branches all near the top, produces great numbers of showy white flowers of a porcelain luster, followed by an edible berry. *Y. baccifolia*, known as *Joshua-tree*, native of Arizona and southern parts of Utah, Nevada, and California, a tree sometimes 40 feet high and about 3 feet in diameter, forms in the Mohave desert a straggling open forest; its light soft wood is sometimes made into paper-pulp. *Y. whipplei* of southern California is much admired for its beauty in cultivation. *Y. Yuccatana* of Central America is branched from the base.

yucca-borer (yuk'ä-bör'ér), *n.* 1. A large North American castnioid moth, *Megathymus yuccæ*, whose larva bores into the roots of plants of the genus *Yucca*.—2. A Californian weevil, *Yuccaborus frontalis*.

Yucca gloriosa.

Yuccaborus (yu-kab'ör-us), *n.* [NL. (Leconte, 1876), *< Yucca* + Gr. *borein*, devouring, gluttonous.] A genus of weevils, of the family *Curculionidae*, containing a single species, *Y. frontalis*, of California, the yucca-borer.

yucca-fertilizer (yuk'ä-fér-tí-lí-zér), *n.* A tinoid moth, *Pronuba yuccasella*, which, by means of curious-ly modified mouth-parts, is enabled to pollenize and thus fertilize the ovary of plants of the genus *Yucca*, causing a development of the seed-pod, in which its larva feeds. Also called *yucca-pollenizer*.

yuchten, *n.* Same as *juchten*.

yuck (yuk), *v. i.* [Also *yuka*, *yook*, *yunk*; an unassimilated form (perhaps after *D. jouken*, *joken* = LG. *jucken* = G. *jucken*) of *itch*, ult. AS. *giccan*, *itch*; see *itch*.] To itch. [Prov. Eng. and Scotch.]

yuck (yuk), *n.* [*< yuck*, *v.*] The itch, mange, or scabies. [Prov. Eng.]

yuckel (yuk'el), *n.* Same as *yockel* for *hick-wall*. Also *yukkel*. [Prov. Eng.]

I feels sunnhow as peert as a yuckel.

T. Hughes, *Tom Brown* at Oxford, II, xviii.

yucker (yuk'ér), *n.* [Imitative, but prob. connected with *yuckel*.] The flicker, or golden-

winged woodpecker, of eastern North America, *Colaptes auratus*. See *cut* under *flicker*². [Local, U. S.]

yuft, *n.* Same as *yuft* for *juchten*.

yug, yuga (yüg, yö'gä), *n.* [Hind. *yug*, *< Skt. yuga*, an age, *< √ yug*, join; see *yoker*.] One of the ages into which the Hindus divide the duration or existence of the world.

yuh, *n.* See *yu*.

Yuhina, *n.* [NL. (Hodgson, 1836), from a native name.] A genus of timeline birds, also

Yuhina gularis.

called by Hodgson *Polyodon*, and by Cabanis *Olonterus*. Four species occur in the Himalayan region and western China—*Y. gularis*, *Y. diademata*, *Y. occipitalis*, and *Y. nigrimentum*.

yuke, v. and n. Same as *yuck*.

yukkel, *n.* Another spelling of *yuckel* for *hick-wall*.

yulan (yö'lan), *n.* [Chinese, *< yu*, *yuh*, a gem (jade), + *lan*, plant.] A Chinese magnolia, *Magnolia conspicua*, with abundant large white flowers, appearing in spring before the leaves. It is a fine ornamental tree, in China 30 or 40 feet high, but in Europe and America smaller; in the United States it is only half-hardy at the north. A kindred hardy species, also from China, is *M. obovata* (*M. purpurea*), with flowers pink-purple on the outside and white within, beginning to appear before the leaves.

Yule (yöl), *n.* [Also dial., in comp., *yu-* (*yu-batch*, *yu-block*, etc.); more prop., according to the ME. form, spelled **yool*; early mod. E. sometimes *yule*; *< ME. yol*, *yole*, *zol*, December, *< AS. gēol*, *geholm*, *gehhel* (ML. *Giulus*), December (see *ærra gealla*, December, *sc æftera gealla*, January, the months beginning respectively before and after the winter solstice), = Icel. *jöl* = Sw. Dan. *jöl* (*> MLG. jöl*), Yule, the Christmas feast; = Goth. *jūleis* in *framu jūleis* (appar. 'first Yule'), applied, in a fragment of a calendar, appar. to November. The mod. E. use seems to be due to Scand. rather than to the AS. Origin unknown; according to a common view, the word is identified with Icel. *hjóll*, wheel, with the explanation that it refers to the sun's 'wheeling' or turning at the winter solstice. This notion, absurd with regard to the alleged connection of thought, is also phonetically impossible; the AS. word for *wheel* was *hwēol*, and could have no connection with *geol*. Another explanation connects the word with *yawl*, *yowl*, howl, cry; as if *yule* was orig. the 'noise' of revelry. This is also untenable. The Goth. *jūleis* implies an AS. **iūle*, an unstable form variable to **gēole* or *gēol* (= Icel. *jöl*); the forms *geholm*, *gehhel*, are rare, and may be mere blunders.] The season or feast of Christmas.

I erane in this court a crystenas gomen [sport].

For hit is *gēol* & nwe yer.

Sir Guyanque and the Green Knight (E. E. T. S.), I, 284.

He made me gomanne at *gēol*, and gafe me gret syftes.

Morte Arthure (E. E. T. S.), I, 2629.

At *cyde* we wonten gambole, daunce,

To carrolle, and to singe,

To haue gud spiced sewe, and roste,

And plum-pies for a king.

Warner, *Albion's England*, v, 113.

They bring me sorrow tounch'd with joy,

The merry merry bells of Yule.

Tennyson, *In Memoriam*, xxviii.

Yule block, clog, or log. Same as *Christmas log*. See *Christmas*.

A small portion of the *yule-block* was always preserved till the joyous season came again, when it was used for lighting the new Christmas block.

Hone, *Year Book*, col. 1110.

The burning of the Yule log is an ancient Christmas ceremony, transmitted to us from our Scandinavian ancestors, who, at their feast of Jól, at the winter solstice, used to kindle huge bonfires in honour of their god Thor.

Chambers's Book of Days, 11, 735.

An enormous log glowing and blazing, and sending forth a vast volume of light and heat, . . . was the *Yule log*, which the squire was particular in having brought in and illumined on a Christmas eve, according to ancient custom.

Irving, Sketch-Book, p. 247.

Yule cake. Same as *Yule dough*. *Hone, Every-Day Book*, I, 1638. — **Yule candle**, a large candle used for light during the festivities of Christmas eve. In many places the exhaustion of the candle before the end of the evening was believed to portend ill luck, and any piece remaining was carefully preserved to be burnt out at the owner's like-wake.

As an accompaniment to the Yule log, a candle of monstrous size, called the *Yule candle*, or Christmas candle, shed its light on the festive board during the evening.

Chambers's Book of Days, II, 735.

Yule dough (dialectal *doe, done*), a cake made especially for Christmas time. Also called *baby-cake* (because representing in shape a baby, probably the infant Christ) and *Yule cake*.

The *Yule-Dough* (or *Dore*), a Kind of Baby or little Image of Paste, which our Bakers used formerly to bake at this Season, and present to their Customers, in the same Manner as the Chandlers gave Christmas Candles.

Bourne's Pop. Antiq. (1777), p. 163.

In the north of England the common people still make a sort of little images at Christmas, which they call *Yule Doos*.

The Listener (1836), I, 62 (quoted in S. and Q., [7th ser., XI, 6].

Yule (yöl), *v. i.*; pret. and pp. *Yuled*, ppr. *Yuling*. [*< Yule, n.*] To celebrate Yule or Christmas. *Halliwel; Jamieson*. [Prov. Eng. and Scotch.]

Yule-tide (yöl'tid), *n.* The time or season of Yule or Christmas.

In the old eleg almanacs, a wheel is the device employed for marking the season of *Yule-tide*.

Chambers's Book of Days, II, 746.

Yuncinæ (yun-si'nē), *n. pl.* [NL., prop. *Iyn-ginæ*; *< Yunx*, prop. *Iynx* (*Iynq-*), + *-inæ*.] Same as *Iynginæ*. *G. R. Gray*, 1840.

yungan (yung'gan), *n.* [Native name.] The dugong. *E. P. Wright*.

Yungidæ, Yunginæ, *n. pl.* Same as *Iyngidæ, Iynginæ*.

Yunx (yungks), *n.* [NL. (Linnaeus, 1766 or earlier), also *Iynx* and *Iynx*, *< Gr. iynx*, the wryneck.] 1. Same as *Iynx*. — 2. [*l. c.*] The wryneck, *Iynx torquilla*. See cut under *wry-neck*.

The *Yunx*, a genuine Woodpecker, hath a tail as long in proportion to his body, and marked with cross-bars too. *John Ray*, in Ellis's *Lit. Letters*, p. 200.

yupon (yö'pon), *n.* Same as *yapon*. *Sportsman's Gazetteer*.

yure (yör), *n.* See *ewer*³. [Prov. Eng.]

yurt (yört), *n.* [Siberian.] One of the houses or huts, whether permanent or movable, of the natives of northern and central Asia. Also *yourta, yourt, yurt*.

It [the lake] is ten miles in circumference, and here and there are *yourtes* inhabited by the Mongols.

Hue, Travels (trans. 1852), I, 206.

yutu (yö'tö), *n.* [Peruv.] A species of tinamon, found in Peru.

A partridge called *yuta* frequents the long grass. *Encyc. Brit.*, XVIII, 673.

yuxt, *v.* and *n.* An obsolete variant of *yx*.

yvet, *n.* An old spelling of *ivy*¹.

yvelt, *n.*, *n.*, and *adv.* An old spelling of *evil*¹.

yvoiret, yvoryl. Old spellings of *ivory*¹.

ywist, *adv.* and *n.* See *wis*.

ywaker. An obsolete preterit of *wreak*¹.

ywriet. An obsolete past participle of *wry*².

ywroket. An obsolete preterit of *wreak*¹.

yyet, *n.* A Middle English form of *eye*¹.

1. The twenty-sixth character in the English alphabet, and the last, as in that of the later Romans. In the Phenician system, from which ours comes through the Latin and Greek, it was the seventh sign. The comparison of ancient forms, including the Egyptian as perhaps the original (compare A), is as follows:

The same character has a corresponding place as zeta in the Greek series, and went over in that place to the Italian alphabets; but, about the third century B. C., it was dropped out by the Romans as not needed, and the newly devised G (see G) was put in its place. Then finally, some two centuries later, it was taken back (together with or soon after Y: see Y) to express in borrowed Greek words the peculiar double sound (*ds* or *sd*) which it had won in Greek usage, and so appeared anew in its old company, but with greatly altered position. It was not used in the oldest English, but came gradually in out of the French in the fifteenth century and later. With us, as in French, it has lost its value of a compound consonant, and expresses the sonant or voiced sibilant sound corresponding to *s* as sord or breathed sibilant. The proper *z*-sound is also, and even much oftener, written by *s*, as in *roses*, and in a few words (as *posse*, *dissolve*) by double *s*, and yet more rarely (for example, *sacrifice*) by *c*. The sound is a common one in our English pronunciation—not much less than 3 per cent. (the *surd s* being 4½ per cent.). As initial, the character *z* is written mostly in words of Greek origin, but as final (almost always with silent *e* added) it is found in many Germanic words, as *freeze*, *graze*. It occurs sometimes double, as in *buzz*, *buzzard*. The corresponding sonant to our other sibilant (written in this work with *zh*, after the example of *sh*) is spelled with either *s* or *z*, as in *pleasure*, *azure*. It is the rarest of our consonant sounds, counting for only a fiftieth of 1 per cent. of our utterance. In certain Scotch words and names, as *capercailzie*, *Dalziel*, *z* is written for the *y*-sound. In the United States the character is generally called *zee*; in England, generally *zed* (from *zeta*); *izzard* (which see) is an old name for it. 2. As a symbol, in *math.*: (*a*) [*l. c.*] In algebra, the third variable or unknown quantity. (*b*) [*l. c.*] In analytical geometry, one of the system of point-coordinates in space. (*c*) In mechanics, the component of a force in the direction of the axis of *z*.

zaf (zā), *n.* [An arbitrary syllable.] In *solmi-zation*, a syllable once used for *b*.

za-, [*Gr. za-*, inseparable prefix, intensive and augmentative.] An intensive or augmentative prefix sometimes used in forming modern scientific words to emphasize the character or quality noted by the element to which it is prefixed (like *E. very, a.*), as in *zalambedodont*, having teeth with a very V-shaped ridge, *Zalophus*, *Zamachia*, *Zapus*, etc.

Zabaism, Zabism (zā'bi-izm, zā'bizm), *n.* Same as *Sabaism*.

zabra (zā'brā), *n.* [Sp. and Pg.] A small vessel used on the coasts of Spain.

Portugal furnished and set forth . . . ten Galeons, two *Zabras*, 1300. Mariners. Hakluyt's Voyages, I, 592.

Of the tenders and *zabras* seventeen were lost and eighteen returned. Motley, Hist. Netherlands, II, 507.

Zabridæ (zab'ri-dē), *n. pl.* [NL. (Hope, 1838), < *Zobrus* + *-idæ*.] A family of caraboid beetles, named from the genus *Zabrus*.

Zabrus (zā'brus), *n.* [NL. (Clairville, 1806), < *Gr. za-* *brō*, gluttonous.] An extensive genus of caraboid beetles. They are of medium or large size, black with metallic reflections, and remarkable in that many of them are rather phytophagous than carnivorous, particularly in the larval state. *Z. gibbus* of Europe is a noted enemy to cereal crops, its larva feeding on the stems just above the ground, and the beetle devouring the grain. Over 60 species are known, each occupying a narrowly restricted region in the Mediterranean fauna, except *Z. gibbus*, which extends into northern Europe.

zac (zak), *n.* Same as *zahar*.

zacatilla (zā-kā-tē'lyā), *n.* See *cochineal*, 1.

zaffer, zaffre (zaf'fēr), *n.* [Also *zaffar*, *zaffir*, *zaf-fra*, *zaphara*, and *suphara*; < P. *zafre*, *zafre*, *saffre* = Sp. *zafre* = It. *zaffera*; of Ar. origin; cf. *saffron*.] The residuum of cobalt-producing ores after the sulphur, arsenic, and other vol-

atile matters have been more or less completely expelled by roasting. As the result of this process a grayish oxid of cobalt is left behind, which is mingled with various impurities, and usually with some sand. Zaffer is used in the manufacture of smalt, and in various other ways, as in furnishing the beautiful color known as *cobalt blue*, which is still of importance, although much less so since the discovery of a method of making artificial ultramarine.

zaffer-blue (zaf'fēr-blō), *n.* Same as *cobalt blue* (which see, under *blue*).

Zaglossus (za-glos'sus), *n.* [NL. (Gill, 1877), < Gr. *za-* intensive + *γλῶσσα*, tongue.] The proper name of that genus of prickly ant-eaters which is better known by its synonym *Acanthoglossus* (which see).

Zaitha (zā'thiā), *n.* [NL. (Amyot and Ser-ville, 1843), < Heb. *zaith*.] A genus of water-lilies, of the family *Belostomatidae*, peculiar to America. They somewhat resemble the species of *Belostoma*, but have a prolonged tapering head and long rostrum. *Z. fluminea* is a very common and wide-spread insect, of a yellowish color, found in the mud or among the weeds of ponds and streams from Maine to Texas.

zalambedodont (za-lam'dō-dont), *a.* [*Gr. za-* intensive + *ζάγωδον*, the letter *z*, + *ὀδὴς* (*ōdōs*), = *E. tooth*.] Having short molar teeth with one V-shaped ridge; specifically, noting the *Zalambedontia*: as, a *zalambedodont* dentition; a *zalambedodont* mammal; opposed to *dilambdodont*.

The insectivores with *zalambedont* dentition are the most primitive, or at least are generally so considered.

Stand. Nat. Hist., V, 136.

Zalambedontia (za-lam-dō-don'tiā), *n. pl.* [NL.: see *zalambedont*.] A group or series of insectivorous mammals; a division of the suborder *Bestia*, or *Insectivora vera*, having short molars whose crowns present one V-shaped transverse ridge, a formation characteristic of the insectivores of tropical regions, which are thus contrasted with temperate and northerly forms (*Dilambdodontia*). The Madagascan tenrecs, the African golden moles, and the West Indian solenodons are examples. See cuts under *agouti*, *Chrysochloris*, *sokinah*, and *treec*.

Zalophus (zaf'ō-fus), *n.* [NL. (Gill, 1867), < Gr. *za-* intensive + *λόφος*, crest.] A genus of otaries, or eared seals; so named from the high parietal crest or ridge of the skull. The common

California Sea Lion (*Zalophus californianus*).

sea-lion of California is *Z. californianus* (formerly *Z. gil-lespiei*), and another inhabits Australia and New Zealand.

zamang (za-mang'), *n.* [S. Amer.] Same as *rain-tree*.

zambo, *n.* See *sambo*.

zambomba (Sp. pron. thām-bom'bā), *n.* [Sp.] A rude Spanish musical instrument, consisting of an earthen jar the top of which is covered with parchment, through which a stick is inserted. It is sounded by rubbing the stick with the finger, so as to set the air within the jar into sympathetic vibration.

Zamelodia (zam-e-lō'di-ā), *n.* [NL. (Cones, 1880), < Gr. *za-* intensive + *μελῳδία*, a singing, melody; see *melody*.] A genus of American song-grosbeaks. Two species occurring in the United

States are the rose-breasted and the black-headed, *Z. indoriviana* and *Z. melanocephala*. (See cut under *rose-breasted*.) The latter inhabits the western United States from the plains to the Pacific, where the former is not found, and extends into Mexico. The adult male has the crown and sides of the head, the back, the wings, and the tail black, the wings and tail much varied with white, and the neck all around and the under parts rich orange-brown, inclining to pure yellow on the belly and the lining of the wings. The bill and feet are grayish-blue. The length is about 8½ inches, the extent 12½. The female differs much from the male, but has the same rich yellow under wing-coverts. Also called *Habia*.

Zamia (zā'mi-ā), *n.* [NL. (Linnaeus, 1767), < L. *zamia*, assumed to mean 'a fir-cone'.] 1. A genus of gymnospermous plants, of the order *Cycadaceæ*, type of the tribe *Zamiæ*. It is characterized by a naked trunk partly or wholly above the

Female Plant of *Zamia integrifolia* (the waved line indicates the surface of the ground).
a, scale with one seed; *b*, the young female flower.

soil, pinnate leaves, and naked truncate strobile-scales, both the male and female cones being oblong and cylindrical and their scales similar. There are about 30 species, natives of tropical and subtropical North America. They produce a simple, lobed or branching caudex, sometimes a low trunk, often covered with scars. The stems increase in height by the yearly development of a crown of stiff fern-like leaves with firm rigid segments which are entire or serrate, parallel-nerved, and jointed at the broad base. *Z. integrifolia* (*Z. pumila*), with a short globular or oblong, chiefly subterranean stem, occurs in low grounds in southern Florida, and is the only cycad found within the United States; it yields a starch known as *Florida arrowroot*; the plant is called *crotie* (which see). *Z. furfuracea* and the preceding are known as *old sago* in Jamaica. From these and other dwarf species an excellent arrowroot is made in the Bahamas and elsewhere in the West Indies. Many species cultivated under glass as *zamia* are now classed as *Encephalartos*, and *Z. spiralis* as *Macrozamia*.

2. [*l. c.*] A plant of this genus.

Zamiæ (zā-mi'ē-ē), *n. pl.* [NL. (Miquel, 1842), < *Zamia* + *-æ*.] A tribe of gymnospermous plants, of the order *Cycadaceæ*. It is characterized by a deciduous fertile strobile with peltate uniovulate scales; and by leaf-segments straight in the bud, not circinate as in *Cycas* and in ferns. It includes 68 species, of 9 genera, or all the plants of the order except the genus *Cycas*. They are singular plants, usually with a thick woody trunk and pinnate leaves; the principal genera are *Zamia* (the type), *Macrozamia*, *Ceratophyllum*, *Dioon*, and *Stangeria*. They are chiefly tropical, and occur mostly in North America, South Africa, and Australia.

zamindar (zam'in-dār), *n.* Same as *zemindar*.

zamindari (zam'in-dā-ri), *n.* Same as *zemindary*, 2.

Zamiostrobus (zā-mi-os'trō-bus), *n.* [NL., < L. *zamia*, assumed to mean 'a fir-cone', + Gr. *σπῆρος*, a top, cone; see *strobile*.] The generic name given by Endlicher to certain fossil cones which resemble the fruit of the living genus *Zamia*. They have been found in the Lower Lias, the Coralline limestone, the Wealden, and the Miocene.

Zamites (zam-ī'tēz), *n.* [NL., < L. *zamia*, assumed to mean 'a fir-cone'.] The name given by Brongniart to certain fossil plants belonging

to the cycads, and considered to be more or less closely allied to the living *Zamia*. The genus *Zamites* first appears in the Trias, but is especially well developed in the Jurassic. It continued through the Cretaceous, and finally disappeared in the Miocene. There have been about 30 species described. The cycadaceous flora played an important part in the vegetation of Greenland and Spitzbergen during the Jurassic epoch, giving an almost tropical aspect to the forests of that region and epoch. Various other genera of cycads allied to *Zamites* have been established, chiefly, if not entirely, based on the forms of the leaves and their segments. Among these are *Glosszamites*, a genus with long elliptical leaves, found in the Lower Cretaceous; and *Otozamites*, with small elliptic-lanceolate leaves, divided into several groups in accordance with the very varying form of the segments of the leaf. The latter genus runs through the whole of the Jurassic, as far as the lower division of the Upper or White Jura, when it gives way to the genus *Zamia*. It has not been observed in the Jurassic rocks of the arctic regions. *Phyllocladus*, *Ctenophyllum*, *Pterophyllum*, *Ptilozamites*, *Pterozamites*, *Anozamites*, and *Sphenozamites* are other genera of cycads more or less allied to *Zamites* and to one another.

zamouse (za-mōs'), *n.* [W. African.] A West African buffalo, or bush-ox, found in Sierra Leone, *Bos brachyceros*, the short-horned buffalo, having the ears fringed with hair, short horns depressed at base, and no dewlap.

zampogna (tsām-pō'nyā), *n.* [It.] 1. Same as *bagpipe*.—2. Same as *shawm*.

zanana (za-nā'nyā), *n.* Same as *zenana*.

Zanclodon (zang'klō-don), *n.* [NL. (Plein), < Gr. ζᾶγκλον, sickle, + ὀδών (odon-) = E. tooth.] A genus of dinosaurs, typical of the family *Zanclodontidae*, having both fore and hind feet five-toed, no ascending astragalar process, broad and long pubes, and biconcave vertebrae.

Zanclodontidae (zang-klō-don'ti-dē), *n. pl.* [NL., < *Zanclodon* (t-) + -idae.] A family of carnivorous theropod dinosaurs, typified by the genus *Zanclodon*, from the Trias of Europe.

Zanclognatha (zang-klog'nā-thā), *n.* [NL. (Lederer, 1857), < Gr. ζᾶγκλον, sickle, + γνάθος, jaw.] A genus of small noctuid moths resembling pyralids. Ten European and several North American species are known. *Z. minoralis* feeds in the larval state on the dead leaves of oak and maple in the United States.

Zanclotomus (zang-klos'tō-mus), *n.* [NL. (Swainson, 1837), < Gr. ζᾶγκλον, sickle, + στομα, mouth.] A genus of cuckoos, the type of which is *Z. jamaicensis* of Java, and to which were formerly referred some related African forms. The species named has exposed nostrils, bare orbits, no crest, white-tipped tail-feathers, and the mantle, wings, and tail glossed with bluish-green; the under parts are gray, buff, and chestnut-brown; the orbits are bright blue, the eyes blackish, and the beak coral-red. The length is 18 inches, of which the tail makes more than half. This handsome cuckoo ranges from Tennessee down the Malay peninsula, and also occurs in Sumatra, Borneo, and Java.

Zanclus (zang'klus), *n.* [NL. (Cuvier and Valenciennes, 1831), < Gr. ζᾶγκλον, sickle.] A genus of carangoid fishes based on a Pacific species, *Z. cornutus*, a small fish of striking form and color.

zander (zan'dér), *n.* [G.] The European pike-perch, *Stizostedion lucioperca* (formerly *Lucioperca sandra*). It inhabits fresh waters of central Europe. Also *sander* and *zant*.

zand-mole (zand'mōl), *n.* [*< D. zandmol*; < *zand*, sand, + *mol*, mole.] Same as *sand-mole*. See cuts under *Bathyergus* and *Gorychus*.

zanella (zā-nel'ā), *n.* A twilled fabric used for covering umbrellas. *Draper's Dict.*

Zannichellia (zan-i-kel'i-ā), *n.* [NL. (Micheli, 1729), named after *Zannichelli* (1662-1729), author of a flora of Venice.] A genus of plants, of the order *Naiadaceae*, type of the tribe *Zannichelliæ*. It is characterized by the absence of a perianth, by a single stamen, with slender filament, and slightly curved carpels. The only species (by some considered as forming 9 species), *Z. palustris*, is a native of brackish ditches and salt water throughout the world. It is a submerged slender aquatic with a filiform creeping stem, the capillary branches becoming twisted into matted floating masses. The leaves are chiefly opposite, linear or filiform; the flowers are minute, at first terminal, but becoming axillary. See *horned pondweed*, under *pondweed*.

Zannichelliæ (zan'i-ke-li'ē-ē), *n. pl.* [NL. (Bentham and Hooker, 1883), < *Zannichellia* + -eæ.] A tribe of monocotyledonous plants, of the order *Naiadaceae*. It is characterized by axillary unisexual flowers, the male with a single stamen and globose pollen, the female with its two to nine carpels each

containing a single pendulous orthotropous ovule. It includes 3 genera, of which *Zannichellia* is the type; the others, salt-water plants with a perianth of three hyaline segments, occur in the Mediterranean region (*Ithenia*) and in Australia (*Lepidocarpus*). All are slender submerged aquatics growing from a filiform nodose creeping rootstock, and producing thread-like leaves and minute flowers.

Zanonina (zā-nō'ni-ā), *n.* [NL. (Linnæus, 1757), by transfer from an endogen so named by Plumier (1703) from Giacomo Zanoni (1615-82), author of a flora of Bologna, and director there of the botanic garden.] A genus of plants, of the order *Cucurbitaceae*, type of the tribe *Zanonieæ*. It is characterized by entire leaves, and flowers with three calyx-lobes, five stamens, and three two-cleft styles. The 2 species are natives of India and the Malayan archipelago. They are shrubby climbers with petioled ovate or oblong entire leaves and unbranched tendrils. The small flowers are borne in loose pendulous panicles. The fruit is cylindrical, club-shaped, or hemispherical, with a broadly three-lobed apex, and containing large pendulous broadly winged seeds; that of *Z. indica* is known as *bandeet-fruit* (which see).

Zanonieæ (zan-ō-ni'ē-ē), *n. pl.* [NL. (Blume, 1825), < *Zanonina* + -eæ.] A tribe of polypetalous plants, of the order *Cucurbitaceae*. It is characterized by flowers with five stamens, free filaments, oblong one-celled anthers opening by a longitudinal slit, and an ovary with three thick placenta on which the ovules are irregularly inserted. It includes 17 species, of 3 genera, of which *Zanonina* is the type; the others are also tropical climbing shrubs—one, *Gerrardanthus*, occurring in Africa, the other, *Asmitaria*, including most of the species, extending through Asia, America, and Australia.

Zanora palm. See *palm* 2.

zant (zant), *n.* Same as *zander*.

Zante (zan'te), *n.* A contraction of *Zante-wood*.

Zantedeschia (zan-tē-des'ki-ā), *n.* [NL. (Sprengel, 1826), named from Francesco Zantedeschi, who wrote on the plants of Brescia and Bergamo in 1824.] A plant genus now known by the earlier name *Richardia* (which see).

Zante fustic. Same as *young fustic* (which see, under *fustic*). See also cut under *smoke-tree*.

Zante-wood (zan'te-wūd), *n.* 1. Same as *Zante fustic*.—2. Same as *satinwood*, *Chloroxylon Swietenia*.

zanthin, *n.* An erroneous form of *zanthin*.

zantho. For words so beginning, see *zantho*.

Zantiote (zan'ti-ōt), *n.* [*< Zante* (see def.) + -ote.] A native of Zante (ancient *Zacynthus*), one of the Ionian Islands.

zany (zā'nī), *n.*; *pl.* *zanies* (-niz). [*< F. zani*, < It. *zanni*, *zane*, a zany or clown; abbr. of *Gioranni*, *John*; see *John*, and cf. *E. Jack* in similar use.] 1. A comic performer, originating on the Italian stage, whose function it is to make awkward attempts at mimicking the tricks of the professional clown, or the acts of other performers; hence, an apish buffoon in general; a merry-andrew; an amusing fool.

He's like a zany to a tumbler,
That tries tricks after him to make men laugh.
E. Johnson, Every Man out of his Humour, iv. 1.

He teach thee; thou shalt like my Zany be,
And feign to do my cunning after me.
Heywood, Four Prentises of London (Works, ed. 1874, II. [203].)

The English apes and very zanies he
Of everything that they do hear and see.
Drayton, To Henry Reynolds.
Preacher at once, and zany of thy age!
Pope, Dunciad, iii. 206.

He [Granville] had been wont, in the days of his greatest insolence, to speak of the most eminent nobles as *zanies*, lunatics, and buffoons. Motley, Dutch Republic, I. 102.

2†. An attendant.
Lady, Imperia the courtesan's zany hath brought you this letter from the poor gentleman in the deep dungeon, but would not stay till he had an answer.
Middleton, Blunt, Master-Constable, iii. 1.

Syn. 1. *Clown*, *Fool*, *Buffoon*, *Mimic*, *Zany*. "The zany in Shakespeare's day was not so much a buffoon and mimic as the obscenous follower of a buffoon and the attenuated mime of a mimic. He was the vice, servant, or attendant of the professional clown or fool, who, dressed like his master, accompanied him on the stage or in the ring, following his movements, imitating his tricks, and adding to the general merriment by his ludicrous failures and comic imbecility. . . . The professional clown or fool might be clever and accomplished in his business, a skillful tumbler and mountebank, doing what he undertook to do thoroughly and well, but this was never the case with the zany. He was always slight and thin, well-meaning, but comparatively helpless, full of readiness, grimace, and alacrity, but also of incompetence, eagerly trying to imitate his superior, but ending in failure and absurdity. . . . We have ourselves seen the clown tricks, the zany in the ring together, the clown doing clever tricks, the zany provoking immense laughter by his ludicrous failures in attempting to imitate them. Where there is only a single clown, he often combines both the characters, doing skillful tumbling on his own account, and playing the zany to the riders." (Edinburgh Rev., July, 1869, art. 4.)

zany (zā'nī), *v. t.*; *pret.* and *pp.* *zanied*, *ppr.* *zanying*. [*< zany, n.*] To play the zany to; mimic; imitate apishly.

All excellence
In other madams do but zang hers,
Fletcher (and another?), Queen of Corinth, i. 2.
Laughs them to scorn, as man doth luscious apes
When they will zang men.
Marston, Antonio and Melibda, II., iv. 1.

zanyism (zā'nī-izm), *n.* [*< zany* + -ism.] 1. The act or practice of imitation or mimicry.—2. The condition or habits of a buffoon or a low clown; often used contemptuously.

Zanzalian (zan-zā'li-an), *n.* [*< Zanzibar* (see def.) + -ian.] A Jacobite of the East; so called occasionally from Zanzibar, a surname of Jacobus Baradaeus. See *Jacobite*, 2.

zanze, *n.* [African.] An African musical instrument consisting of a wooden box in which a number of sonorous tongues of wood or metal are fixed. These are sounded by the finger or a stick.

Zanzibari (zan-zi-bā'ri), *a.* and *n.* 1. *a.* Of or pertaining to Zanzibar, a sultanate of eastern Africa. It was in 1890 made a British protectorate, confined chiefly to the island of Zanzibar, while the coast of the neighboring mainland was ceded to Germany.

The country is practically in the hands of Arabs and Zanzibari slavers and traders.
Appleton's Ann. Cyc., 1886, p. 372.

II. *n.* An inhabitant of Zanzibar.

zapateado (Sp. pron. thā-pā-tē-ā'dō), *n.* [Sp.] A Spanish dance in which the rhythm is marked by blows of the foot on the ground.

zaphara (zaf'ā-rā), *n.* Same as *zaffer*.

Zaphrentinæ (zaf-ren'ti-nē), *n. pl.* [NL. (Edwards and Haimé, 1850), < *Zaphrentis* + -inæ.] A subfamily of Paleozoic rugose stone-corals, of the family *Cyathophylloidea*, typified by the genus *Zaphrentis*. They have a free and simple corallum, and a well-developed septal fossula formed by a tubular inflection of the tabula on one side, or replaced by a cristiform process. The tabulae are complete, but the septa are deficient or irregular, and there is usually no columella.

Zaphrentis (zaf-ren'tis), *n.* [NL. (Rafinesque and Clifford, 1820), prob. < Gr. ζα- intensive + φρεν, brain.] 1. The typical genus of *Zaphrentinæ*. The species are deeply cupped, with many septa, and a peculiar pit on one side of the interior. *Z. caseoides* is an example. They lived in the Silurian and Carboniferous periods.

2. [I. c.] A species of this genus. Webster's Dict., 1890.

Zapodidæ (zā-pod'i-dē), *n. pl.* [NL., < *Zapus* (-pod-) + -idæ.] A family of rodent mammals, of the myomorph series of the order *Rodentia*, framed by Cuvier for the reception of the jumping mouse of North America, *Zapus hudsonius*, a small mouse-like quadruped intermediate in some respects between the *Muridæ*, or mice proper, and the *Dipodidæ*, or jerboas of the Old World. By some the family is considered as a subfamily of *Dipodidæ*, under the names *Zapodine* and *Jacodine*. See *Zapus*, and cut under *deer-mouse*.

Zapodinae (zā-pō-dī-nē), *n. pl.* [NL., < *Zapus* (-pod-) + -inæ.] The *Zapodidæ* as a subfamily of *Dipodidæ*.

zapotilla (zap-ō-til'ā), *n.* Same as *sapodilla*.

zaptieh (zāp'ti-ē), *n.* [Turk.] A policeman.

Zapus (zā'pus), *n.* [NL. (Cuvier, 1876), < Gr. ζα- intensive + ποίε = E. foot.] The only genus of *Zapodidæ*. *Z. hudsonius* is the common jumping mouse, or deer-mouse, of North America. See cut under *deer-mouse*.

Zaragoza mangrove. See *mangrove*.

zarape (za-rā'pē), *n.* [Sp. Amer.] Same as *serape*.

Men wearing vermilion zarapes about their shoulders.
The Nation, XLV III. 311.

Zarathustrian (zar-ā-thōs'tri-an), *a.* and *n.* [*< Zarathustra* + -ian.] Same as *Zoroastrian*.

Zarathustrianism (zar-ā-thōs'tri-an-izm), *n.* [*< Zarathustrian* + -ism.] The religion of Zarathustra; Zoroastrianism.

Zarathustrie (zar-ā-thōs'trik), *a.* Same as *Zoroastrie*.

It cannot be denied that the Zarathustrie dogmas are pure old Aryan myths in a new shape.
Encyc. Brit., XX. 361.

Zarathustrism (zar-ā-thōs'trizm), *n.* [*< Zarathustra* (see *Zarathustrian*) + -ism.] Same as *Zarathustrianism*.

Modern Brahmanism, Zarathustrism, and Buddhism.
E. B. Tylor, Prim. Culture, I. 49.

zaratite (zar'ā-tit), *n.* [After Señor Zarate, a Spaniard.] A hydrous carbonate of nickel, occurring as an emerald-green incrustation on chromite. Also called *emerald nickel*.

zareba (zā-rē'hā), *n.* In Sudan and adjoining parts of Africa, an inclosure against enemies or wild animals, as by a thorn-hedge; a forti-

fied camp in general. Also written *zareeba*, *zereba*, *zeriba*, etc.

We employed ourselves until the camels should arrive in cutting their branches and constructing a *zareba* or fenced camp, to protect our animals during the night.

Sir S. W. Baker, Heart of Africa, p. 85.

zarf (zärf), *n.* [Also *zurf*; < Ar. *zurf*, a vessel, a case.] A holder for a coffee-cup: a term used throughout the Levant. These holders are usually of metal and of ornamental design in openwork. Their immediate object is to prevent the hot cup from burning the fingers.

Some *zarfs* are of plain or gilt silver filigree.

E. W. Lane, Mod. Egyptians, I, 163, note.

zarnich (zär'nik), *n.*

[Also *zarnic*, etc.;

< Ar. *zarnikh*, *azzer-nikh*, arsenic, < Gr.

arsenikon, arsenic; see *arsenic*.]

1. In alchemy, orpiment.—2. An old term embracing the native sulphids of arsenic, sandarac (or realgar) and orpiment.

zarzuela (Sp. pron. thär-thü-ä'lä), *n.* [Sp.] A short drama with incidental music, like a vauville. It is said to have been first introduced into Spain at Zarzuela in the seventeenth century.

zastuga (zas-trö'gä), *n.* [Russ.] One of a series of ridges, with corresponding depressions, rising in wave-like succession above the general level of the snow when this has been blown across by a long-continued wind.

zataint, *n.* An old spelling of *satin*.

zati (zä'ti), *n.* [E. Ind.] The capped macaque of India and Ceylon, *Macacus pileolatus*.

Zauschneria (zäsh-nē'ri-ä), *n.* [NL. (Presl), 1836], named for *Zauschner*, a German botanist.] A genus of polypetalous plants, of the order *Onagraceae*. It is characterized by flowers with four petals, eight stamens, and a four-celled ovary with numerous ovules, and, distinguishing it from the similar genus *Epilobium*, by a calyx with the tube suddenly expanding above the ovary into a funnel-shaped limb globose at the base. The only species, *Z. Californica*, a handsome plant of California, is cultivated under the names of *Californian fuchsia* and *humming-bird's trumpet*. It is a low branching shrub with sessile entire or minutely toothed leaves, and bright-crimson flowers which are solitary and sessile in the axils.

zax (zaks), *n.* [Perhaps a var. of *sax* (< AS. *sax*, etc.), a knife.] An instrument used by slaters for cutting and dressing slates; a kind of hatchet with a sharp point on the pole for perforating the slate to receive the nail or pin.

Z-crank (zē'- or zed'krangk), *n.* A peculiarly shaped crank in the cylinder of some marine

steam-engines: so named from its zigzag form. *Simmonds*.

Zea (zē'ä), *n.* [NL. (Linnaeus, 1737; used earlier by Bruinfels, 1530). < Gr. *ζέα*, *ζεια*, a sort of grain used as fodder for horses.] A genus of grasses, type of the tribe *Maydeae*. It is characterized by monocious flowers, the male forming a terminal panicle, the female a large axillary sessile spike wrapped in numerous leaf-like bracts or husks, and consisting of pistillate flowers densely aggregated in many rows upon a thick unjointed rachis. The only species, *Z. Mays*, the well-known Indian corn or maize, long cultivated throughout many warm and temperate regions, is supposed to be a native of America, but is not now known in a wild state. It is a tall plant with unbranched robust stems, large light-green leaves, a handsome long-stalked terminal panicle (known as the *tassel*), and very thick fertile spikes from the husks of which project long green slender styles known as the *silk*. The fruit is a hard roundish caryopsis (known as the *kernel*) partly inclosed by the chaffy remains of the four glumes and broad palea—the kernels and their rachis (the *cob*) forming the spike or ear of corn. The seeds furnish an invaluable food to man and to domestic animals; the stalks and leaves are used for fodder, and the husks are much used for filling mattresses and horse-collars, and for making door-mats; a coarse textile fabric, also, and paper of excellent quality, have been experimentally made from them. The cob, and sometimes the whole ear, is used as fuel. The chief value lies of course in the kernel. See *awize*, cut in preceding column, and cut under *husk*. Compare *corn*!]

zeal (zēl), *n.* [Early mod. E. *zele*; < OF. *zele*, F. *zèle* = Sp. Pg. It. *zelo*, < L. *zelus*, < Gr. *ζῆλος*, *zeal* (for *ζῆλος*), < *ζῆν* (√ *ζῆν*), boil, akin to E. *yeast*: see *yeast*.] Passionate ardor in the pursuit of anything; intense interest or endeavor; eagerness to accomplish or obtain some object.

They have a *zeal* of [for, R. V.] God, but not according to knowledge. Rom. x. 2.

Let not my cold words here accuse my *zeal*.

Shak., Rich. II., i. 1. 47.

Controversial *zeal* soon turns its thoughts on force.

Burke, Rev. in France.

His fervent *zeal* for the interests of the state.

Macaulay, Warren Hastings.

= Syn. *Earnestness*, *Enthusiasm*, etc. (see *eagerness*), warmth, fervor, heartiness, energy.

zeal† (zēl), *v. i.* [*zeal*, *n.*] To entertain zeal; be zealous.

Stiff followers, and such as *zeal* marvellously for those whom they have chosen for their masters.

Bacon, Controversies of Church of Eng.

zealand†, *n.* See *zealand*.

zealed† (zēld), *a.* [*zeal* + -ed.] Filled with zeal; characterized by zeal.

Zealed religion.

Fletcher (and another), Love's Pilgrimage, iv. 2.

zealfull† (zēl'fūl), *a.* [*zeal* + -ful.] Full of zeal; zealous.

These days of Ours may shine

In *Zeal*, full Knowledge of the Truth divine.

Sylvester, tr. of Du Bartas's Weeks, ii., The Decay.

zealless (zēl'les), *a.* [*zeal* + -less.] Lacking zeal. Bp. Hall.

zealot (zēl'ot), *n.* [*zeal*, < LL. *zelotes*, < Gr. *ζῆλος*, a zealot, < *ζῆν*, *zeal*: see *zeal*.] 1. One who is zealous or full of zeal; one carried away by excess of zeal; an immoderate partizan: generally in a disparaging sense.

He was one of those furious *zealots* who blow the bellows of faction until the whole furnace of politics is red-hot with sparks and cinders.

Irring, Knickerbocker, p. 299.

Like all neutrals, he is liable to attack from the *zealots* of both parties.

Whipple, Ess. and Rev., I. 62.

2. [cap.] One of a fanatical sect or party (the *Zelotæ*) among the Jews of Palestine under Roman dominion, who on account of their excesses in behalf of the Mosaic law were also called *Sicarii* or *Assassins*. The *Zealots* gained the ascendancy in a civil war, and withstood the Romans so fiercely as to bring about the total destruction of Jerusalem, A. D. 70. *Zealots* are also mentioned (perhaps by confusion) as a sect of the Essenes, similarly characterized by fanatical zeal for their ascetic practices.

That desperate Faction of the *Zealots*, who, like so many Firebrands scattered up and down among them [the Jews], soon put the whole Nation into Flames.

Stillinger, Sermons, I. viii.

zealotical (zē-lot'i-kal), *a.* [*zealot* + -ical.] Having the character of a zealot; belonging to a body of zealots.

One Leviston, a *zealotical* Scotsman, a tailor, came with a gray suit of apparel [for a disguise] under his cloak.

Court and Times of Charles I., II. 80.

zealotism (zēl'ot-izm), *n.* [*zealot* + -ism.] The character or conduct of a zealot. Gray.

zealotist (zēl'ot-ist), *n.* [*zealot* + -ist.] A zealous partizan; one of a body of zealots. Howell.

zealotry (zēl'ot-ri), *n.* [*zealot* + -ry (see -ry).] Behavior as a zealot; excessive or undue zeal; fanaticism.

Inquisitorial cruelty and party *zealotry*.

Coleridge. (Imp. Dict.)

Herod is outthundered, Sternhold is out-sternholded, with a *zealotry* of extravagance that really seems like wilful burlesque.

De Quincey, Style, i.

zealous (zel'us), *a.* [*zeal*, < L. *zelosus*, full of zeal, < *zelus*, *zeal*: see *zeal*. Cf. *jealous*, an older form of the same word.] 1. Full of or incited by zeal; zealous for the good or the promotion of some person or object; ardent; eager; fervent; devoted.

That man loves not who is not *zealous* too.

Herrick, Zeal Required in Love.

The learned and pious Bishop of Alexandria, Dionysius, wrote to the *zealous* and factious Presbyter Novatus.

Bp. Gauden, Tears of the Church, p. 100. (Davies.)

The clergy of New England were, for the most part, *zealous* promoters of the revolution.

Emerson, Hist. Disc. at Concord.

2. Caused by or manifesting zeal; due to earnest devotion; of an ardent character or quality.

So sweet is *zealous* contemplation.

Shak., Rich. III., iii. 7. 94.

I will study

Service and friendship, with a *zealous* sorrow

For my past incivility towards ye.

Ford, Broken Heart, v. 1.

= Syn. 1. Forward, enthusiastic, fervid, keen. See *zeal*. **zealously** (zel'us-li), *adv.* In a zealous manner; with passionate ardor; fervently; earnestly.

It is good to be *zealously* affected always in a good thing.

Gal. iv. 18.

Sir, I will amply extend myself to your use, and am very *zealously* afflicted, as not one of your least friends, for your crooked fate. Beau and Fl., Honest Man's Fortune, ii. 2.

zealousness (zel'us-nes), *n.* The quality of being zealous; ardor; zeal.

zealous† (zel'us-i), *n.* [Early mod. E. *zealousie*; < *zealous* + -y. Cf. *jealousy*.] 1. Zealousness.

His hand eternally, his arm his force,

His armour *zealousy*, his breast-plate heaven.

Middleton, Solomon Paraphrased, v.

2. An old form of *jealousy*.

The *zealousie* and the eager fierceness of Olympias.

Udall, tr. of Apophthegms of Erasmus, p. 200, note.

zebec, **zebeck**, *n.* Same as *zebec*.

zebra (zē'brä), *n.* and *a.* [= F. *zèbre*, < African *zebra*.] 1. *n.* An African solidungulate mammal, related to the horse and ass, of the genus *Equus* and subgenus *Hippotigris*, having the body more or less completely striped. There are at least 3 well-marked species. One of these is the quagga. The second is the bonte-quagga, or Burchell's zebra. (See cut under *dun*.) The third is the true zebra, *E. (H.) zebra*, of southern Africa, of a whitish color,

Zebra (*Equus* or *Hippotigris zebra*).

very fully and regularly striped with black; it is specifically called the *mountain zebra*. This zebra stands about 4½ feet high at the shoulder; the head is light, the ears are moderately large, the limbs slender; the mane is short, and the tail tufted. The general form is light and symmetrical, like that of most wild asses, and seems to indicate speed rather than bottom. The zebra is one of the most beautiful of animals, as it is also one of the wildest and least tractable. It has often been kept in confinement, and occasionally tamed, but generally retains its indomitable temper. It inhabits in herds the hilly and mountainous countries of South Africa, seeking the most secluded places; so that from the nature of its habits, as well as its watchfulness, swiftness, and the acuteness of its senses, it is difficult to capture. It is, however, much hunted, and seems destined to extermination.

II. *a.* Resembling the stripes of a zebra; having stripes running along the sides; as, the *zebra* markings on certain spiders. Sturdey.

zebra-caterpillar (zē'brä-kat'ēr-pil-är), *n.* The larva of *Mamestra picta*, a North American noctuid moth: so called from the longitudinal black and yellow stripes. It feeds on clover, peas, beans, cabbages, turnips, and various other cultivated plants. See cut on following page.

zebra-opossum (zē'brä-ō-pos'm), *n.* The zebra-wolf. See cut under *thylacine*.

Flowering Plant of Maize (*Zea Mays*).
a, male flower; b, female flower.

Zebra-caterpillar and Moth (*Mamestra picta*).

zebra-parrakeet (zē'brī-par a-kēt), *n.* A kind of grass-parrakeet, *Melopsittacus undulatus*, much of whose plumage is barred. It is a common cage-bird. See cut under *Melopsittacus*.

Zebropicus (zē-brā-pī'kus), *n.* [NL. (Malherbe, 1849), also *Zebropicus* (Bonaparte, 1854), < *zebra*, *q. v.*, + NL. *Picus*.] A genus of woodpeckers: so called from the extensive striping of the plumage. It has covered a number of American forms, but was based on the common red-bellied woodpecker of the United States, and is thus a synonym of *Centurus* (itself often merged in *Melanerpes*). See cut under *Centurus*.

zebra-plant (zē'brī-plant), *n.* A striped-leaved plant, *Maranta zebra*. See *Maranta*.

zebra-poison (zē'brī-poi-zn), *n.* A succulent tree, *Euphorbia arborea*, of South Africa. The milky juice is so poisonous as to kill zebras which drink water in which the branches have been placed and it is sometimes used as an arrow-poison. *J. Smith, Dict. of Economic Plants.*

zebra-shark (zē'brī-shārk), *n.* The tiger-shark.

zebra-spider (zē'brī-spi-der), *n.* A hunting-spider or wolf-spider. See *Lycosidae*, and cuts under *tarantula* and *wolf-spider*.

zebra-swallowtail (zē'brī-swal'ō-tāl), *n.* The ajax, *Papilio* (or *Iphiclidia*) *ajax*, a large swallow-tailed butterfly of North America, having yellowish-white wings barred with black. It is a handsome species, and occurs from Pennsylvania southward. The larva feeds on the papaw.

zebra-wolf (zē'brī-wūlf), *n.* The pouched dog or thylacine dasyurus of Tasmania, *Dasyurus thylacinus* or *Thylacinus cynocephalus*, a large predaceous and carnivorous marsupial quadruped somewhat resembling a wolf, having the back and rump transversely striped (whence the name). See cut under *thylacine*.

zebra-wood (zē'brī-wūd), *n.* 1. The wood of *Connarus Guianensis* (*Omphalobium Lambertii*), of the *Connaraceae*, a tall tree of Guiana; also, the tree itself. The wood is hard and beautifully marked, and is much sought for use in making furniture.—2. The wood of a small evergreen, *Guetarda spinesca*, of the *Rubiaceae*, found on tropical shores in both hemispheres.—3. In the West Indies, a shrub or small tree, *Myrtus* (*Eugenia*) *fragrans*, var. *cuneata*.

zebra-woodpecker (zē'brī-wūd'pek-ēr), *n.* Any one of the striped woodpeckers of Malherbe's genus *Zebropicus*—that is, of *Centurus* in a usual sense. See cut under *Centurus*.

zebrine (zē'brīn), *a.* [*zebra* + *-ine*.] Resembling or related to the zebra; striped like a zebra; pertaining to the subgenus *Hippogriscus*; correlated with *equine* and *asinine*. *Darwin*.

Zebu (*Bos indicus*, var.).

zebu (zē'bū), *n.* [*F. zebu*, a name accepted by Buffon from the exhibitors of the animal at a French fair, and supposed by him to be an African word. If not invented, it is prob. intended to represent the E. Ind. *zobo*, *q. v.*] The Indian bull, ox, or cow; any individual or breed of *Bos indicus*, having a hump on the withers. The zebu has been domesticated from time immemorial, and is now known only in its artificial breeds. These are numerous, and very various in size, shape, and color, the processes of artificial selection having modified the original stock in almost every particular. The characteristic hump is sometimes double. The flesh is considered a delicacy. The size of different breeds of zebus varies much. Some are as large as ordinary cattle, others no larger than a common calf a month or two old. The color is usually light gray, varying to pure white. The bulls of the latter color are consecrated to Siva, and become Brahmin bulls, exempt from labor or molestation. Zebus are bred particularly in India, but also in China, Japan, and some parts of Africa. They are used as beasts of burden and of draft, and as riding-animals, as well as for beef. The stock from which they have descended is by some naturalists supposed to represent only a variety of *Bos taurus*, the original of the ordinary domestic ox. See cut in preceding column.

zebug (zē'būb), *n.* [*Ar. zabūb, dhubūb*, Heb. *zebug*, *cf. Bedzabub*.] A large Abyssinian fly noxious to cattle, like the tsetse and the zimb.

zebu-cattle (zē'bū-kat'ē), *n.* The cattle of the eastern hemisphere which have a hump, like the zebu. *Darwin*.

zebuder, *n.* The Caucasian ibex. Also called *zue*.

zecchino (tsek-kē'nō), *n.* [It.: see *sequin*.] A gold coin of the Venetian republic, worth

Zecchino of Paolo Romano, Doge of Venice 1778-1789.—British Museum. (Size of original.)

rather more than 9s. English, or about \$2.25: same as *sequin*.

zechin, *n.* A variant of *sequin*.

Zechstein (zēk'stīn), *n.* [G.: < *zeche*, a mine, + *stein*, stone.] In *geol.*, the uppermost of the two divisions of the Permian, the lower being the so-called "Rothliegendes." This twofold character of the Permian is a well-marked feature of the system in Germany, especially in the central part of that country; hence it is not infrequently called the *Dinas*, a word coined in imitation of the name *Trias*. At the bottom of the Zechstein is the "Kupferschiefer," a thin bed of dark-colored, bituminous, and cupriferous shale. The Zechstein proper is a calcareous rock, becoming dolomitic in its upper section, and containing, especially in Prussia, masses of rock-salt of extraordinary thickness. The Permian covers an extensive area in Russia, where, however, its dual character is much less distinctly marked than it is in Germany. In the east of England this feature of the Permian is clearly exhibited, and the so-called "Magnesian Limestone group" is the equivalent of the German Zechstein. No separation of the Permian into divisions has been satisfactorily made out in North America, where the break between that formation and the Carboniferous is far less distinct than it is in the regions of its typical development in Germany.

zed (zēd), *n.* [= *F. zede*, < L. *zeta*, < Gr. *ζῆτα*, the name of the letter Z.] 1. The letter Z, also called *zee* and sometimes *izzard*.

Zed, thou unnecessary letter! *Shak.*, *Learn*, ii. 2. 63.

2. A metal bar rolled so as to have a cross-section resembling the letter Z.

Angles, *Zeds*, Channels, Beams, Bars.

The Engineer, LXXI. p. xxxviii. of advts.

Zedland (zēd'land), *n.* [*< zed* + *land*.] A designation of the western part of England, from the dialectal use there of the sound of *z* for that of *s*. *Halliwel*.

zedoary (zēd'ō-ā-ri), *n.* [*< F. zedoaria* = Sp. *Fig. zedoaria* = It. *zettario*; see *swail*.] An East Indian drug, known in two varieties as *long* and *round zedoary*. According to some authorities these are both the product of *Curcuma Zedoaria* (the *C. Zedoaria* of Roxburgh); according to others, only the long zedoary belongs to this species, the round to *C. aromatica* (the *C. Zedoaria* of Roxburgh). Both varieties are aromatic, with a strong camphoraceous flavor and the odor of ginger. In medicine, zedoary acts like ginger, but is less effective. It is used in India in various alterative decoctions and in preparing kinds of incense. The rhizome of *C. aromatica*, like the related turmeric, is used in dyeing—its chief application.

Zeidae (zē'i-dē), *n. pl.* [NL. (Swainson, 1839), < *Zeus* + *-idae*.] A family of acanthopterygian fishes, so named from the genus *Zeus*, but usually called *Zenidae*. See cut under *dory*, 1.

zein (zē'in), *n.* [*< Zea* + *-in*.] A proteid obtained from maize, said to be allied to gluten.

It has a yellowish color, and is soft, insipid, and elastic. It differs essentially from the gluten of wheat. Also *zeim*.

zeitgeist (tsī'gīst), *n.* [G.: < *Zeit*, time (= E. *tide*), + *geist*, spirit (= E. *ghost*).] The spirit or genius of the time; that general drift of thought or feeling which particularly characterizes any period of time; a German word occasionally used in English.

zel (zēl), *n.* [*< Turk. Pers. zil*, a bell, cymbal.] An Oriental form of cymbal.

Where, some hours since, was heard the swell

Of trumpet and the clash of *zel*.

Bidding the bright-eyed sun farewell.

Moore, *Lalla Rookh*, The Fire-Worshippers.

Zelanian (zē-lā'nī-an), *a.* [*< NL. Zelandia* (*Nova Zelandia*, New Zealand) + *-an*.] In *zoogeog.*, of or pertaining to New Zealand: more fully *Nova-Zelandian*. See *New Zealand subregion*, under *subregion*.

zelanti, *n.* [Also *zealand*; < L.L. *zelant* (-s, ppr. of *zelare*, have zeal for; < L. *zelus*, zeal: see *zeal*.] A zealot. Also *zealant*.

To certain *zealand*s all speech of pacification is odious.

zelatori (zēl'ā-tō-ri), *n.* [*< L.L. zelator*, < *zelare*, have zeal for: see *zealand*.] A zealous partizan or promoter; a zealot.

Many *zelators* or favourers of the public weale have hence discouraged. *Sir T. Elyot*, *The Governour*, iii. 27.

Zeke (zē'kē), *n.* [NL. (Curtis, 1831), said to be < Gr. *ζῆλον*, a female rival.] A genus of hymenopterous parasites, of the family *Brachnidae*, distinguished from *Macracanthus* principally by having the abdomen inserted between the posterior coxae. Ten North American and three European species have been described. They are parasitic upon small lepidopterous larvae.

Zelkova (zēl-kō'vā), *n.* [NL. (Spach, 1841), from the Cretan name *zalkora*.] A genus of apetalous trees, of the order *Urticaceae* and tribe *Celtideae*. It is characterized by monocious or polyamous flowers, the male with a short-tubed perianth, the female with an eccentric two-parted style and uniovulate ovary, in fruit somewhat ventricose and drupaceous, smooth or veiny on the surface, and often keeled on the back, containing a compressed concave seed with broad cotyledons. There are 4 species, natives respectively of Crete, the Caucasian and Caspian region, Japan, and China. They are trees bearing alternate serrate or crenate feathery-veined leaves, with narrow slender stipules. The flowers are sessile or short-pedicelled, the male in small clusters, the female solitary in the upper axils. *Z. crenata* (formerly known as *Planera Richardi*), the zelkova, or zelkova-tree of the Caucasus, reaches a considerable size, sometimes 30 feet high and 4 feet in diameter; in its scaly bark it resembles the plane-tree, in its leaves the elm; the small greenish-brown flowers have the odor of the elder, and are followed by roundish fruits of the size of a pea. Its timber is much prized; the sap-wood is light-colored and elastic; the hard heavy reddish heart-wood takes a good polish, and is valued for furniture. For *Z. acuminata*, see *kenaki*.

zeloso (zēlō'sō), *a.* [It.: see *zealous*.] Zealous: in music, marking passages to be rendered with zeal, enthusiasm, or energy.

zelotypia (zēlō-tip'i-ā), *n.* [NL. < Gr. *ζῆλος*, *zeal*, + *τύπος*, strike; see *type*.] The exercise of morbid perseverance and energy in the prosecution of a project, especially one of a political or religious nature; a form of monomania sometimes manifesting itself in over-zeal in attempts to gain supporters to any public cause.

zelotypic (zēlō-tip'ik), *a.* [*< zelotypia* + *-ic*.] Pertaining to, characterized by, or exhibiting zelotypia.

zelousiet, *n.* See *zealousy*.

zemindar (zēm'in-dār), *n.* [Also *zamindar*; < Pers. *zamīndār*, a landholder, < *zemīn*, land, + *-dār*, holding.] Originally, one of a class of farmers of the revenue from land held in common by its cultivators, established by the Mogul government of India, every one in a specially assigned tract or district; now, in many provinces, a native landholder, regarded as a successor of the preceding, and similarly responsible for the land-tax, who under British regulations has become the actual proprietor of the soil under his jurisdiction, often with right of primogeniture.

The *Zemindars* of Lower Bengal, the landed proprietary established by Lord Cornwallis, have the worst reputation as landlords, and appear to have frequently deserved it.

Maine, *Village Communities*, p. 163.

zemindary (zēm'in-dā-ri), *n.* [*< zemindar* + *-y*.] [*< Pers. zemīndārī*, < *zemīndār*, *zemīndar*.] 1. The office or jurisdiction of a zemindar.—2. The tract of territory administered

is controlled by a zemindar; also, the system of landholding and revenue-collection under zemindars. Also written *zamindari*, *zemindari*, *zamindaree*, *zemindary*, etc.

Lord Cornwallis, with the best intentions, stereotyped the *zamindari* system in Bengal by giving to the middlemen or farmers of the revenue permanent rights of possession, subject to a quit rent to the Government.

Contemporary Rev., I. 61.

zemmi, zemni (zēm'i, -ni), *n.* The blind mole-rat, *Spalax typhlus*. See cut under *mole-rat*.

zemstvo (zēms'tvō), *n.* [Russ.] In Russia, a local elective assembly, of recent institution, for the oversight and regulation of affairs within its territory. There are zemstvos for the districts into which the governments are divided, and also for the governments themselves, with nominal jurisdiction of local taxation, schools, roads, public sanitation, etc., but subject to arbitrary interference by the provincial governments.

Zenaida (zē-nā'i-dī), *n.* [NL. (Bonaparte, 1853).] < *Zenaidē*, daughter of Joseph Bonaparte, and wife of Charles Lucien Bonaparte. A genus of American ground-doves, typical of the subfamily *Zenaidinae*, containing such species as the West Indian *Z. amabilis*.

zenaide (zē-nā'id), *n.* A dove of the genus *Zenaida*.

Zenaidinae (zē-nā-i-dī'nē), *n. pl.* [NL. < *Zenaida* + *-inae*.] A subfamily of pigeons or doves, of the family *Columbidae*; the ground-pigeons of America, distinguished from the more arboreal pigeons, or *Columbinae* proper, by the greater size of the feet and the denudation of the scutellate tarsi. Numerous genera and species inhabit the warmer parts of America; 6 are found in the United States, of which the Carolina dove, *Zenaidura carolinensis*, is the best-known and most widely distributed.

Zenaida amabilis is a West Indian species, found also in Florida. The group embraces the smallest birds of the family, as the diminutive ground-dove of the Southern States, *Chamopelia* (or *Columbigallina*) *passerina*. See cuts under dove, ground-dove, *Melopelia*, and *Scardafella*.

zenaidine (zē-nā'i-dīn), *n.* [*Zenaidinae*.] Pertaining to or resembling the genus *Zenaida*. *Cones*.

Zenaidura (zē-nā-i-dū'rā), *n.* [NL. (Bonaparte, 1854).] < *Zenaidura*, *q. v.* + *Gr. oipā*, tail. That genus of *Columbidae* which contains the Carolina dove, or mourning-dove, *Z. carolinensis*; so called from the peculiarity of the tail, which has fourteen instead of twelve feathers. The long cuneate tail gives this genus the aspect of *Ectopistes* (which belongs to a different subfamily). See cut under dove, and compare that under *passenger-pigeon*. Also, incorrectly, *Zenaidura*.

zenana (zē-nā'nā), *n.* [Also *zanana*; < Pers. *zenāna*, belonging to women; < *zen*, a woman, = *Gr. γυνή*, a woman; see *queen*.] In India, that part of the house in which the females of a family are secluded; an East Indian harem.

I wandered through a *zenana* which was full of women's clothes, fans, slippers, musical instruments, flowers, gift chains, and damask curtains.

W. H. Russell, *Diary in India*, I. 338.

Zenana missions, Protestant Christian missions to the women of India, conducted by female missionaries from Great Britain and the United States.

Zend (zēnd), *n.* [See *Zend-Avesta*.] The name commonly given to the language of the Avesta; an ancient form of Iranian or Persian. It was deciphered in the present century, largely by means of its resemblance to Sanskrit. See *Zend-Avesta*.

zendal silk. Same as *sendal*.

Zend-Avesta (zēnd-ā-ves'tā), *n.* [More properly *Avesta*, since *Zendavesta* is literally the Avesta with its Zend or commentary.] The sacred scriptures of the Zoroastrian religion, ascribed to Zoroaster, and consisting of the *Vendidad*, the *Yasna* (including the *Gāthas*), the *Yashts*, and a few other pieces. Compare *Zend*.

zendel (zēnd'el), *n.* Same as *sendal*.

zendik (zēnd'ik), *n.* [Ar. *zendīq*.] A name given in the East not only to disbelievers in revealed religion, but also to such persons as are accused of magical heresy.

zenick, zenik (zē'n'ik), *n.* [African.] The African suricate, *Hyrcina tetradactyla* or *Suricata zenica*. See cut under *suricate*.

Zenidae (zēn'i-dē), *n. pl.* [NL. < *Zeus* (Zen-) + *-idae*.] A family of physoclistous acanthopterygian fishes, typified by the genus *Zeus*; the dories. The body is short, high and deep, and much compressed; the large mouth is terminal, with protractile upper jaw and small teeth in narrow bands or single file; the dorsal fin is emarginate or divided, with strong spines anteriorly; the anal is spined or spineless; the ventrals are thoracic and have one spine and five to eight rays; the caudal is usually not forked; the lateral line is obscure and unnamed; pyloric coeca are extremely numerous, and the vertebrae are about thirty-two. These are fishes of warm seas, of singular appearance, represented by 5 genera and about 10 species. Also called *Cyttidae*,

Zenopsis ocellatus, of the family Zenidae.

and formerly *Cyttina*. The name is also written *Zeida*. See *Zeus*, 2, and cut under *dory*.

Zeninae (zē-nī'nē), *n. pl.* [NL. < *Zeus* (Zen-) + *-inae*.] A subfamily of Zenidae, without palatine teeth, with scales minute if present, and very strong anal spines. See *Zeus*, 2.

zenith (zē'nith), *n.* [ME. *senyth*, < OF. *cenith*, *zenith*, *F. zenith* (> *G. zenith* = *D. Sw. zenit* = *Russ. zenitū*). < Sp. *cenit*, OSP. *zenith* = *Pg. zenith*, *zenit*, a corruption (prob. due to a misreading of *m* as *n*) of **zenit*, < Ar. *senit*, *sumit*, in *senit ur-ras*, *sumit ur-ras*, the zenith, vertical point of the heavens, lit. 'way of the head'; *senit*, *sumit*, way, road, path, tract, quarter; *al. the; ras*, head. Cf. *azimuth*.] 1. The vertical point of the heavens at any place, or the point directly above an observer's head; the upper pole of the celestial horizon. The opposed pole is the nadir.—2. Figuratively, the highest point, or summit, as of one's fortune; the culmination.

By my prescience

I find my zenith doth depend upon

A most auspicious star.

Shak., *Tempest*, i. 2. 181.

Dead! in that crowning grace of time,

That triumph of life's zenith hour!

Whittier, *Rantoul*.

Reflex zenith-tube. See *reflex*.

zenithal (zē'nith'al), *a.* [*zenith* + *-al*.] Of or pertaining to the zenith.

The deep zenithal blue. Tyndall, *Glaciers of the Alps*, v.

Zenithal map-projection. See *projection*.

zenith-collimator (zē'nith-kol'i-mā-tor), *n.* A collimator arranged so that its optical axis is vertical, instead of horizontal as usually is the case. In Kater's vertical collimator the telescope is carried by an annular iron float, floating upon mercury. Other forms are also used in which the adjustment to verticality is made by means of spirit-levels. Also called *vertical collimator*.

zenith-distance (zē'nith-dis'tāns), *n.* The arc intercepted between any body and the zenith, being the same as the co-altitude of the body.

zenith-sector (zē'nith-sek'tor), *n.* An astronomical instrument for measuring with great accuracy the zenith-distances of stars which pass near the zenith. It is specially used for this purpose in English trigonometrical surveys in determining latitudes. It consists essentially, as its name implies, of an arc of a divided circle, with appliances for determining accurately its zenith-reading. See *sector*.

zenith-telescope (zē'nith-tel'e-skōp), *n.* An important geodetical instrument for measuring the difference of zenith-distances of pairs of stars north and south of the zenith. It consists of a somewhat large telescope pointing nearly to the zenith, but having a moderate range of motion in altitude regulated by a fine tangent screw. The instrument also carries a vertical setting-circle with a very delicate level, having its tube perpendicular to the horizontal axis of the telescope. There is at the eyepiece a thread micrometer, working vertically. The telescope, with its horizontal axis, is mounted upon a very long vertical axis arranged with two stops, so that the telescope can be carried round from the north to the south part of the meridian. The difference of zenith-distances of a pair of stars, one north and the other south, having been observed, the latitude of the station is equal to the mean of their declinations added to half the excess of the southern over the northern zenith-distance. The instrument is the invention of Captain A. Talcott, U. S. A.; but it is said the principle is due to the early astronomer Horrocks.

Zenker's degeneration. Same as *wary degeneration* (*b*). See *wary*.

zenoid (zē'noid), *a. and n.* [*Zeus* (Zen-) + *-oid*.] 1. *a.* Of or relating to the *Zenidae*.

II. *n.* One of the *Zenidae*.

Zenonian (zē-nō'ni-an), *a. and n.* [*L. Zeno(n)-*, < *Gr. Ζήνων*, *Zeno* (see *def.*), + *-ian*.] 1. *a.* Of or pertaining to any one of the name of *Zeno*. Specifically—(a) Pertaining to the doctrines and arguments of

Zeno of Elea, a philosopher of the fifth century B. C. *Zeno's* four arguments against motion, which are celebrated, are as follows: First, a body passing over any space must first pass the middle point, and before it can do that it must pass the point midway between that and the starting place, and so on *ad infinitum*. This *repressus ad infinitum* was regarded as in some way absurd. The second argument is called the *Achilles*, or *Achilles and the tortoise*. Achilles cannot overtake the tortoise, because it will take him a certain time to reach the starting-point of the tortoise, and when he has reached it the tortoise will still have the start, and so on *ad infinitum*; and thus he will be the sum of an infinite series of times in reaching the tortoise, which will be an infinite time. The third argument is that a flying arrow at any time occupies a space no larger than itself, and in this space it has no room for motion, and therefore at no time has it any motion. The fourth argument is quite obscure, but it concludes from the consideration of relative motions that the whole of a time is equal to its half. *Zeno* may have come upon the difficulty that half an infinite number is equal to the number itself. Aristotle calls *Zeno* the inventor of dialectic—that is, of abstract logical reasoning reposing upon the principle of contradiction, as opposed to mere inference by vague association with some general experience. The *Zenonian* arguments are in point of fact attempts at such reasoning; but they are gross logical fallacies, arising from the fact that the reasoning is not carried out abstractly, but contents itself with reaching contradictions with ordinary inexact experience. They have been considered wonderful by those students who have come to philosophy by the way of theology or natural history without proper training in mathematics and logic; and fallacies of the same nature are committed every day, even in mathematical works. *Zenonian* minds find some difficulty in reasoning either about discrete or about continuous infinity, because these characters are neither of them directly presented to us in experience, and therefore elude associational reasoning. With finite quantity they find no such difficulty. But in really logical reasoning, since finite quantity is distinguished from infinite quantity in being subject to a certain general and complicated condition to which the latter is not subject, the latter is more simple than the former; and from a similar cause continuous infinity is more easily reasoned about, with logical accuracy, than discrete infinity.

Gorgias's sceptical development of the *Zenonian* logic.

Encyc. Brit., XXIV. 779.

(b) Pertaining to *Zeno* of Citium, the founder of the Stoic school of philosophy, who lived between 350 and 250 B. C. He committed suicide at an advanced age.

II. *n.* A Stoic.

Zenonic (zē-non'ik), *a.* [*Zeno(n)-* + *-ic*.] Same as *Zenonian*.

Heraclitus's system was the polar antithesis to this *Zenonic* position. *The Academy*, April 21, 1888, p. 278.

Zenopsis (zē-nop'sis), *n.* [NL. (Gill, 1862).] < *Zenus* (Zen-) + *Gr. ὄψις*, aspect. A genus of dories, of the subfamily *Zeninae*, differing from *Zeus* mainly in having only three instead of four anal spines. The type is *Z. nebulosus* of Japan; another species is *Z. ocellatus* of the New England coast, of a nearly plain silvery color, but with a black lateral ocellus. See cut under *Zenidae*.

zenu (zē'nō), *n.* The goitered antelope, or yellow goat, *Procapra gutturosa*. See *dieren*.

zeolite (zē'ō-lit), *n.* [So called by Cronstedt from boiling and swelling when heated by the blowpipe; < *Gr. ζέω*, boil, foam, + *λίθος*, stone.] A generic name of a group of hydrated double silicates in which the principal bases are aluminum and calcium or sodium. They are closely allied to the feldspars among anhydrous silicates. They are decomposed by acids, often with gelatinization; and most of them intumescence before the blowpipe. Among them are analcite, chabazite, harmotome, stilbite, etc. They occur most commonly in cavities and veins in basic igneous rocks, as basalt or diabase, as at Bergen Hill, New Jersey; they thus often fill the cavities in amygdaloid.

zeolitic (zē'ō-lit'ik), *a.* [*zeolite* + *-ic*.] Pertaining to zeolite; consisting of zeolite or resembling it.

zeolitifform (zē'ō-lit'i-fōrm), *a.* [*zeolite* + *L. forma*, form.] Having the form of zeolite.

zeolitization (zē'ō-lit-i-zā'shōn), *n.* [*zeolite* + *-ize* + *-ation*.] The process by which a mineral is converted into a zeolite by alteration—for example, nepheline into thomsonite.

zeorine (zē'ō-rin), *a.* [*Zeora*, a genus of lichens, + *-ine*.] In bot., noting, in lichens, an apothecium in which a proper exiple is inclosed in the thalline exiple.

Zephroth (zef'i-roth), *n. pl.* Same as *Sephiroth*.

Zephronia (zef-rō'nī-ā), *n.* [NL. (J. E. Gray, 1842).] Same as *Sphærotherium*.

Zephroniidae (zef-rō-nī-i-dē), *n. pl.* [NL. < *Zephronia* + *-idae*.] Same as *Sphærotheriidae*. J. E. Gray.

zephyr (zef'ēr), *n.* [*F. zéphire* = *Sp. zéfiro* = *Pg. zephyro* = *It. zeffiro, zéfiro*, < *L. zephyrus*, < *Gr. ζέφρος*, the west wind; cf. *ζῶφος*, darkness, gloom, the west.] 1. The west wind; poetically, any soft, mild, gentle breeze.

As gentle

As zephyrs blowing below the violet,

Not wagging his sweet head.

Shak., *Cymbeline*, iv. 2. 172.

2. In entom., a butterfly of the genus *Zephyrus*.

—3. A trade-name for a textile fabric or yarn,

very fine and light of its kind, and for some other things of similar qualities: chiefly in attributive use; as, *zephyr* worsted; *zephyr* crackers (that is, bisuits).

Homespun, Flannels, *Zephyrs*, Challies.

Zephyranthes (zef-i-ran'thēz), *n.* [NL. (Herbert, 1821), so called in allusion to the slender, easily agitated stalks; < Gr. *Ἰσχυρός*, the west wind, + *ἄνθος*, flower.] A genus of monocotyledonous plants, of the order *Amoryllidaceæ* and tribe *Amoryllidæ*. It is characterized by one-flowered scapes, and flowers with a short or rather long perianth-tube, sometimes with small scales around the stamens, slender separate filaments, oblong or linear versatile anthers, and numerous biserial ovules in the three ovary-cells. There are about 30 species, natives of America from Texas to the Argentine Republic, with one in western tropical Africa, the latter formerly known as *Habranthus*. They are bulbous plants with a few linear or tongue-shaped leaves, and an elongated scape bearing a handsome erect or slightly declined solitary flower, either pink, white, purple, or yellowish. They are known in general as *swamp-lily*, *Z. atamasco*, found from Mexico to Pennsylvania, with rose-colored flowers, is cultivated under the name of *fairy-lily* or *atamasco-lily*; and *Z. candida*, of Lima and Buenos Ayres, with white flowers and small rush-like leaves, under the name of *Peruvian swamp-lily*.

Zephyrus (zef'i-rus), *n.* [< L. *Zephyrus*, < Gr. *Ζέφυρος*, a personification of *Ἰσχυρός*, the west wind.] 1. In classical myth., a personification of the west wind, poetically regarded as the mildest and gentlest of all the sylvan deities.

When *Zephyrus* eek with his sweete breath
Inspired hath in every holt and heeth
The tendre croppes.

Chaucer, Gen. Prol. to C. T., l. 5.

2. [NL. (Dalman, 1816).] In entom., a genus of butterflies, of the family *Lycanidæ*, chiefly of Europe and Asia, characterized by peculiarities of the wing-venation; the zephyrus.

zerda (zēr'dā), *n.* A small African fox; a fennec. The name is applied to two very different animals; (a) *Vulpes* or *Fennecus zerda*, a small true fox. See *fox*, and cut under *fennec*. (b) *Otocyon* or *Megalotis talandi*. See *Megalotina*.

zereba, zeriba, *n.* See *zereba*.

Zerene (zē-rē'nē), *n.* [NL. (Hübner, 1816; Treitschke, 1825), prop. *Zerene*, < Gr. *Ζερηνή*, dry up.] A notable genus of geometrid moths, typical of a family *Zereneidæ* or subfamily *Zereneinæ*. They have broad, entire, and slightly hyaline wings; the body is slender, and the male antennæ are plumose, with the branches long, slender, and slightly frizzled. The most noted species is *Z. catinaria* of the northern United States, a white moth, often with blackish dots, whose greenish-yellow black-spotted larva feeds on a variety of forest-plants.

Zereneidæ (zē-ren'i-dē), *n. pl.* [NL. (Guenée, 1844), < *Zerene* + *-idæ*.] A family of geometrid moths, comprising many beautiful forms, usually white or yellow, spotted with black. It includes 20 genera, of which *Abaxas* is the most important. From their maculation they are known as *panther*, *januar*, or *mappie*-moths, and one genus is called *Pantherodes*.

Zereninæ (zēr-rē-ni'nē), *n. pl.* [NL., < *Zerene* + *-inæ*.] The *Zereneidæ* as a subfamily of *Geometridæ*.

zero (zē'rō), *n.* [< F. *zéro*, < It. Sp. *zero*, contr. of *zefro*, *zifro*, < Ar. *ṣifr*, cipher; see *cipher*, of which *zero* is a doublet.] 1. Cipher; the figure 0, which stands for naught in the Arabic notation for numbers.

As to number, they [the teeth of fishes] range from zero to countless quantities. Owen, Anat., § 70.

2. The defect of all quantity considered as quantity; the origin of measurement stated as at a distance from itself; nothing, quantitatively regarded. Upon a thermometer or any similar scale zero is the line from which all the divisions are measured in the positive and negative directions. Upon the centigrade and Réaumur's thermometers, it is the point at which the mercury stands when the thermometer is plunged into a mass of melting ice coarsely pulverized, from which some makers allow the water to drain off, but it is better not to do so. For some years after a thermometer is made the zero is said to rise—that is, the melting-point of ice stands higher and higher upon the scale. Upon the Fahrenheit thermometer the distance on the glass stem between the melting-point of ice and the temperature of steam at one English atmosphere of tension is divided into 180 degrees, and 32 such degrees below the melting-point of ice is marked as zero.

If the directions of all the external forces pass through the origin, their moments are zero, and the angular momentum of the system will remain constant.

Clerk Maxwell, Matter and Motion, art. lxxi.

Hence—3. Figuratively, the bottom of the scale; the lowest point or ebb; a state of nullity or inanition.

The diplomatic circle [in Constantinople] was at zero. Stratford Canning, in Dict. Nat. Biog., VIII. 432.

Absolute zero of temperature. See *absolute*.—**Displacement of zero.** See *displacement*.—**Zero magnet,** a magnet used for adjusting the zero reading of a galvanometer or similar instrument.—**Zero potential,** in elect. See *potential*.

zeroaxial (zē-rō-ak'si-āl), *a.* [< *zero* + *axial*.] Having an axis composed of zeros.—**Zeroaxial determinant.** See *determinant*.

zerumbet (zē-rum'bet), *n.* An East Indian drug—according to some, the same as cassumunar. It has sometimes been confounded with the round zedoary.

zest (zest), *n.* [< OF. *zeste*, one of the partitions which divide the kernel of a walnut, also the peel of an orange or lemon, < L. *schistos*, < Gr. *σχίστος*, divided, cleft; see *schist*.] 1. The dry woody membrane covering or forming the partitions of a walnut or other nut or fruit, as an orange or a lemon. [Obsolete, or only French.]—2. A piece of the outer rind of an orange or lemon used as a flavoring or for preserving; also, oil squeezed from such a rind to flavor liquor, etc. *Imp. Dict.*—3. Relish imparted or afforded by anything; piquant nature or quality; agreeableness; charm; piquancy.

The zest
Of some wild tale or brutal jest
Hath to loud laughter stirred the rest.

Scott, Rokeby, iii. 15.

4. Keen relish or enjoyment of anything; stimulated taste or interest; hearty satisfaction; gusto.

Some forms of hypochondria, in which this extreme somatic insensibility and absence of zest leave the intellect and memory unaffected. J. Ward, Encyc. Brit., XX. 84.

zest (zest), *v. t.* [< *zest*, *n.*] 1. To add a zest or relish to; make piquant, literally or figuratively.

My lord, when my wine's right I never care it should be zested. Cibber, Careless Husband, iii. (Darius).

Hundreds sunk to the bottom by one broadside furnish out the topic of the day, and zest his coffee.

Goldsmith, Abuse of our Enemies.

2. To cut, as the peel of an orange or a lemon from top to bottom into thin slips, or to squeeze, as orange-peel, over the surface of anything. *Imp. Dict.*

zeta (zē'tā), *n.* [Gr. *ζῆτα*, the letter ζ, ζ; see *Z, zed*.] The sixth letter of the Greek alphabet, corresponding to the English Z.—**Zeta function**, one of a series of functions connected with elliptic integrals of the second kind, and derived from Jacob's zeta function, *Zu*, which differs only by a multiple of *u* from *fnh²u*, so that

$$Zu + Zv - Z(u + v) = k^2 \sin u \sin v \sin(u + v).$$

zeta (zē'tā), *n.* [< L. *zeta* for *dieta*, a chamber, dwelling, < Gr. *δαῖτα*, way of living, mode of life, dwelling; see *diet*.] A little closet or chamber; applied by some writers to the room over the porch of a Christian church where the porter or sexton lived and kept the church documents. *Britton*.

zetetic (zē-tet'ik), *a. and n.* [< Gr. *ζητητικός*, < *ζητάω*, seek, inquire.] 1. *a.* Proceeding by inquiry; seeking.—**The zetetic method**, in math., the analytical method used in endeavoring to discover the value of unknown quantities or to find the solution of a problem. [Rare.]

II. *n.* A seeker; a name adopted by some of the Pyrrhonists.

zetetics (zē-tet'iks), *n.* [Pl. of *zetetic* (see *-ics*).] That part of algebra which consists in the direct search after unknown quantities. [Rare.]

Zeuctocœlomata (zūk'tō-sē-lō-mā-tā), *n. pl.* [NL., < Gr. *κεκτοῦς*, joined, + *κοιλία*, a hollow, cavity; see *cœloma*.] Animals having a primitive archenteron in the embryo, with paired or yoked cœlomatic sacs or diverticula, as mollusks, worms, crustaceans, insects, and vertebrates; more fully called *Metazoa zeuctocœlomata*. A. Hyatt.

zeuctocœlomatic (zūk'tō-sē-lō-mat'ik), *a.* [< *Zeuctocœlomata* + *-ic*.] Of or pertaining to the *Zeuctocœlomata*.

zeuctocœlomic (zūk'tō-sē-lō-m'ik), *a.* Same as *zeuctocœlomatic*.

zeugite (zū'gīt), *n.* See *zygite*.

Zeuglodon (zūg'lō-don), *n.* [NL. (Owen), < Gr. *ζυγίον*, the strap or loop of a yoke (< *ζυγίον*, yoke, join), + *δόντις* (*δόντις*) = E. *tooth*.] 1. The typical genus of the family *Zeuglodontidæ*. Several species have been described from the Eocene of the United States and of England, as *Z. cetoides* of the former country, said to have attained a length of 70 feet. The genus had before been named *Basilosaurus* by Harlan, on the supposition that these fossils were reptiles, and has also been called *Hydrarchos* (by Koch), *Polyp-tychodon* (by Emmons), *Phocodon*, and *Zygodon*. See cut under *Zeuglodontia*.

2. [*l. c.*] A member of this genus; a zeuglodon.

zeuglodont (zūg'lō-dont), *a. and n.* [As *Zeuglodont* (*-t*).] 1. *a.* Having teeth (apparently) yoked in pairs; having the characters of, or pertaining to, the *Zeuglodontia*.

II. *n.* A fossil cetacean of the suborder *Zeuglodontia*; a zeuglodon.

Zeuglodontia (zūg-lō-don'shi-ā), *n. pl.* [NL.: see *Zeuglodon*.] A suborder of *Cete* or *Cetacea*, represented by the zeuglodonts; sometimes made to consist of two families, the *Basilosauridæ* (or *Zeuglodontidæ*) and *Cynocetidæ*. The intermaxillaries were expanded forward, normally interposed between the maxillaries, forming the terminal as well as anterior margin of the upper jaw; and the nasal apertures were produced forward, with freely projecting nasal bones. The teeth of the intermaxillaries were conic, and those of the maxillaries were two- or three-rooted. Also called *Phocodontia* and *Archæoceti*. Also *Zeuglodontes*.

Zeuglodontidæ (zūg-lō-don'ti-dē), *n. pl.* [NL., < *Zeuglodont* (*-t*) + *-idæ*.] A family of fossil toothed cetaceans, typified by the genus *Zeuglodon*, and representative of the *Zeuglodontia*. These primitive cetaceans in some respects approached the seals, or pinniped mammals, and some of the characters of the fragmentary remains first discovered caused them to be mistaken for reptiles. Also called *Basilosauridæ*. See cut under *Zeuglodontia*.

zeuglodontoid (zūg-lō-don'toid), *a. and n.* [As *Zeuglodont* (*-t*) + *-oid*.] Same as *zeuglodon*.

zeugma (zūg'mā), *n.* [< Gr. *ζεύγω*, lit. a yoking, < *ζεύγνυμι*, yoke, join; see *yoke*, *join*.] 1. A figure in grammar in which two nouns are joined to a verb suitable to only one of them, but suggesting another verb suitable to the other noun; or in which an adjective is similarly used with two nouns.—2. [*cap.*] [NL.] In entom., a genus of hemipterous insects. *Westwood*.

zeugmatic (zūg-mat'ik), *a.* [< *zeugma* (*-t*) + *-ic*.] Pertaining to, or of the nature of, *zeugma*.

Zeugobranchia (zū-gō-brang'ki-ā), *n. pl.* [NL., < Gr. *ζεύγνυμι*, yoke, + *βράγχια*, gills.] Same as *Zygobranchiata*.

Zeugophora (zū-gōf'ō-rā), *n.* [NL. (Kunze, 1818), < Gr. *ζεύγω*, a yoke, + *φορέω*, < *φορῶν* = E. *bear*.] A genus of leaf-beetles, of the family *Chrysomelidæ*, having a lateral prothoracic tubercle and emarginate eyes. The geographical distribution of this genus is remarkable, for of the 20 or more species known two are found in Ceylon and farther India, while the rest are North European and North American.

zeunerite (zū-nēr-it), *n.* [Named after Director *Zeuner*, of Freiberg.] A hydrous arseniate of copper and uranium, occurring in bright-green tetragonal crystals, isomorphous with *torbernite*.

Zeus (zūs), *n.* [< Gr. *Ζεύς* (gen. *Διός*, also *Ζητός*) = L. *Jovis* (gen.), *Ju-piter*, etc.; see *Jove*, *Jupiter*, *deity*.] 1. In Gr. myth., the chief and master of the gods, the supreme deity, omnipres-

Zeus.—The "Jupiter of Otricoli," in the Vatican Museum.

ent and all-powerful, generally looked upon as the son of Kronos and Rhea, and held to have dethroned and succeeded his father. In a narrower sense, he was the god of the heavens, and controlled all celestial phenomena, as rains, snows, and tempests, heat and cold, and the lightning. His consort was Hera. Zeus was worshiped universally; but the most renowned of his sanctuaries were those of Olympia in Elis and Dodona in Epirus. In art Zeus was represented as a majestic and powerful figure, with full beard and flowing hair, in early works sometimes fully draped, but in later art, in general, only lightly draped in the limation. The type fixed by Phidias in the second half of the fifth century B. C. in his great chryselephantine statue for the temple at Olympia, influenced all artists who came after him. The usual attributes of the god are a long staff or scepter, the thunderbolt, the eagle, and sometimes a figure of Victory borne on one hand. The head is generally encircled by a fillet or a wreath; in later sculptures the hair rises from the brow in luxuriant locks like a crown, and falls in masses on either side of the face. Compare *Jupiter*. See cut on preceding page, and cut under *thunderbolt*.

2. [NL. (Linnaeus, 1758).] In *ichth.*, a genus of acanthopterygian fishes, typical of the family *Zenidae*. It includes several fishes of remarkable appearance, as the John-dory, *Z. faber*, well known in classic times. See cut under *dory*, 1.

Zeuzera (zē-zē'ra), *n.* [NL. (Latreille, 1805): a corrupt form of unascertained origin.] A genus of bombycid moths, of the family *Cossidae*, or typical of a family *Zeuzeridae*, having the antennae of the male unequally pectinate and bare at the tips. The genus has a wide distribution, and comprises about 30 species. *Z. pyrina*, the wood-leopard, is common to Europe and the United States; its larva bores into the branches of the elm, maple, linden, ash, and many other trees.

zeuzerian (zē-zē'ri-an), *a.* and *n.* [*< Zeuzera + -ian*.] 1. *a.* Resembling or related to a moth of the genus *Zeuzera*; or of pertaining to the *Zeuzeridae*.

II. *n.* A moth of this genus or family.

Zeuzeridae (zē-zē'ri-dē), *n. pl.* [NL. (Newman, 1833), *< Zeuzera + -idae*.] A family of bombycid moths, founded on the genus *Zeuzera*; synonymous with *Cossidae*. Also *Zeuzerides* and *Zeuzeridi*.

zeylanite (zē-lan-it), *n.* Same as *ceylonite*.

zibeline (zib'e-lin), *n.* and *a.* [F., *< lt. zibellina*, *< ML. sabellinus*, *< sabellum*, sable; see *sable*.] 1. *n.* A fur, generally thought to be the same as sable.

II. *a.* Of, pertaining to, or related to the sable, *Mustela zibellina*. See *sable*.

In 1188 or thereabout no person was allowed to wear garments of vair, gray, *zibeline*, or scarlet color. W. A. Hammond, in *Pop. Sci. Mo.*, XXXVII. 34.

zibet (zib'et), *n.* [See *civet*.] A digitigrade carnivorous quadruped, of the family *Viverridae*, *Viverra zibetha*, a kind of civet found in India and some of the adjacent islands; the Asiatic or Indian civet. It secretes an odoriferous substance like that of other civets, and when tamed in the countries where it is found it lives in the houses like a domestic cat. The zibet is upward of 2 feet long, the tail about 10 inches. The form resembles that of other civets, and the fur is similarly marked in spots and lines of black and white, with rings of the same on the tail. It is sometimes reared for its civet in establishments conducted for that purpose. Also *zibeth*.

zibetum (zib'e-tum), *n.* [NL., *< zibet*.] The odoriferous substance of the zibet; a sort of civet.

ziczac, *n.* See *siesac*.

ziega (zē'gā), *n.* Curd produced from milk by adding acetic acid after rennet has ceased to cause coagulation. *Braude and Cox*.

Zieria (zēr'i-ā), *n.* [NL. (Sir J. E. Smith, 1798), named after J. Zier, member of the Linnean Society of London.] A genus of polypetalous plants, of the order *Rutaceae* and tribe *Boronicae*. It is characterized by opposite leaves usually of three leaflets, and flowers with four spreading free petals, and four stamens inserted on the glands of the disk. They are shrubs and trees, sometimes warty or covered with woolly or stellate hairs, bearing petioled glandular-dotted leaves, which are trifoliate or the upper ones sometimes undivided. The small white flowers are usually grouped in axillary or terminal panicles. There are 7 species, perhaps by all Australian. *Z. Smithii* (*Z. lanceolata*), a shrub or small tree found also in Tasmania, is known as *sandfly-bush* and, from the fetid wood, as *stinkwood*.

Ziervogel's process. See *process*.

zietrisikite (zē-tri-sik'i-tē), *n.* [*< Zietrisika* (see *def.*) + *-ite*.] In *mineral.*, a mineral resin closely related to *ozocerite*, found at Zietrisika in Moldavia.

Zif (zif), *n.* [*< Heb. Zif*.] A Hebrew month: same as *Iyar*. 1 Ki. vi. 1 [*Zif*, R. V.].

Ziffust (zif'us), *n.* A misspelling of *Xiphias*. Huge *Ziffus*, whom Mariners eschew.

Spenser, F. Q., II. xii. 24.

ziganka (zi-gan'kā), *n.* [Russ.] 1. A Russian country-dance.—2. Music for such a dance, which is quick in pace and usually founded on a drone-bass.

zigzackt, *n.* See *zigzag*.

zigzag (zig'zag), *n.* and *a.* [Formerly also *zig-zack*; *< F. zigzag*, *< G. zieckzack*, *zigzag*, a varied redupl. of *zacke*, a sharp point, prong, tooth, dentil; see *tock*. Cf. *G. zieckzack segeln*, 'sail zigzag,' tacked.] 1. *n.* 1. A sharp turning back and forth in one out: an irregular, abrupt angulation; one of a series of sharp turns in a linear or curvilinear course: nearly always in the plural.

Cracks and zigzags of the head. Pope, Dunciad, i. 124.

I looked wistfully, as we rattled into dreary Andermatt, at the great white zigzags of the Oberalp road climbing away to the left. H. James, Jr., Trans. Sketches, p. 248.

2. A formation with a succession of sharp turnings or angles; something that has a number of abrupt angulations, like those of chain-lightning.

A zigzag . . . will be seen to be simply a twill worked backwards and forwards. A. Barlow, Weaving, p. 99.

Long brown kaitans, upon the breasts of which had been sewn zigzags of red cloth. G. Kennan, The Century, XXXVIII. 69.

Specifically—(a) A winding path with sharp turns, as up the side of a steep mountain.

How proudly he talks

Of zigzags and walks!

Swift, My Lady's Lamentation.

(b) In fort., a trench of approach against a fortress, so constructed that the line of trench may not be entailed by the defenders; same as *bojau*. (c) In arch., same as *chevron*. 2. (d) In the fisheries, a salmon-stair or fish-way.

3. In entom., a British moth, *Bombyx dispar*.—*Billot and zigzag*. See *billot*.

II. *a.* Having sharp and quick turns or flexures; turning frequently back and forth; in *bot.*, angularly bent from side to side.

The road is steep and runs on zigzag terraces.

Longfellow, Hyperion, iii. 2.

I went through the zigzag passages [of a sap].

J. K. Hosmer, The Color-Guard, xiv.

Zigzag molding, in arch. See *chevron*, 2, *dancette*, 2.

zigzag (zig'zag), *adv.* [*< zigzag, a.*] In a zigzag manner; with frequent sharp turns.

We patrolled about, zig-zag, as we could; the crowd . . . having no chief or regulator.

Mme. D'Arbury, Diary and Letters, IV. 235.

What you, Reader, and I

Would call going zig-zag.

Barham, Ingoldsby Legends, II. 173.

zigzag (zig'zag), *v. t.*; pret. and pp. *zigzagged*, ppr. *zigzagging*. [*< zigzag, n.*] 1. *intrans.* To move or advance in a zigzag fashion; form zigzags in a course; turn sharply back and forth.

It was only by zigzagging in the most cautious manner . . . that we avoided getting floated altogether.

O'Donovan, Merv, xv.

Dread, uncanny thing,

With fuzzy breast and leathern wing;

In mad, zigzagging flight.

J. W. Riley, The Bat.

II. *trans.* To form in zigzags, or with short turns or angles. T. Watson.

zigzagery (zig'zag-ē-ri), *n.* [*< zigzag + -ery*.] The character of being zigzag; angular crookedness. [Rare.]

When my uncle Toby discovered the transverse zigzagery of my father's approaches towards it [his coat-pocket], it instantly brought into his mind those he had done duty in before the gate of St. Nicholas.

Sterne, Tristram Shandy, iii. 3.

zigzaggy (zig'zag-i), *a.* [*< zigzag + -y*.] Having sharp and quick turns; zigzag.

The zigzaggy pattern by Saxons invented

Was cleverly chiselled, and well represented.

Barham, Ingoldsby Legends, II. 295.

zillah (zil'ā), *n.* [Hind.] In Hindustan, an administrative division of a province.

zimb (zim'b), *n.* [Ar. *zimb*, a fly.] A dipterous insect of Abyssinia, resembling and related to the tsetse of southern Africa, and very destructive to cattle.

zimbi (zim'bi), *n.* [E. Ind.] A money-cowry, as *Cypræa moneta*. See cut under *cowry*.

The cowry shells, which under one name or another—chamgas, zimbis, bonges, porcelaines, etc.—have long been used in the East Indies as small money. Jevons, Money and Mech. of Exchange, p. 24.

ziment-water (zi-ment'wā'tēr), *n.* [After *G. ziment*, *cement*-water, 'cement-water,' cf. *re-mont-kupfer*, copper deposited in water.] Water found in copper-mines; water impregnated with copper.

Zimmermann's corpuscles, **Zimmermann's particles**. Blood-plates.

zimocca (zi-mok'ā), *n.* A kind of commercial sponge, *Euspongia zimocca*, a bath-sponge of fine quality.

zimome, *n.* See *zymome*.

zinc (zingk), *n.* [Also sometimes *zink*, the spelling *zinc* being after the F. form of the original; *< F. zinc* = Sw. Dan. *zink* = Russ. *tsinkā* (NL. *zincum*), *< G. zink*, zinc; connection with *G. zinn*, = E. *tin*, is doubtful.] Chemical symbol, Zn; atomic weight, 64.9. One of the useful metals, more tenacious than lead and tin, but malleable only at a temperature between 200° and 250° F. Its ore has long been known, and the manufacture of brass from it has been practised to a considerable extent. Zinc is believed to have been first distinctly recognized as a metal by Paracelsus about the beginning of the seventeenth century; but in the metallic state it has been of importance in the arts only since the beginning of the present century. Native zinc is not positively known to occur; if existing at all, it is exceedingly rare. Its ores, however, are widely disseminated, especially the combination with sulphur, called *blende*, which is almost as invariably present in greater or less quantity in metalliferous veins as is galena. The localities where zinc ores are abundant enough to be worked with profit are, however, not numerous. The uses of zinc are numerous and important. In combination with copper it forms the well-known alloy called *brass*, which has been known for an indefinite period; it is also one of the ingredients of German silver. Zinc is largely used in the metallic form for roofing and for cornices and the like, also for coating or "galvanizing" sheet-iron to protect it from rusting, and as the electropositive element in many batteries. It is also somewhat extensively used as a paint, in the form of the oxide. This metal is usually a little more expensive than lead, and from half to a third as valuable as copper. Zinc belongs to the magnesium group of metals, in which are comprised glucinum, magnesium, zinc, and cadmium; these are all volatile, burning with a bright flame when heated in the air; they all form one chlorid and one oxide only. The common commercial name of zinc, as offered for sale in flat cakes or ingots, is *spelter*.—*Butter of zinc*. See *butter*, 1.—*Chlorid of zinc paste*. See *paste*, 1.—*Flowers of zinc*, zinc oxide.—*Granulated zinc*, zinc reduced to the form of granules by pouring the molten metal into water.—*Oleate of zinc ointment*. See *ointment*.—*Precipitated carbonate of zinc*. See *precipitate*.—*Red oxide of zinc*, red zinc ore. Same as *zinkite*.—*Ruby of zinc*. See *ruby*.—*Zinc ash*, the impure gray oxide formed when zinc is heated in contact with air.—*Zinc caustic*, a mixture of 1 part of zinc chlorid to 2 or 3 of flour.—*Zinc cement*, a cement composed of zinc oxide made into a paste with a solution of zinc chlorid. It hardens quickly, and may be used for stopping teeth and for other purposes. A cheaper form of zinc cement is made from commercial zinc white mixed with an equal weight of fine sand and made into a paste with a solution of zinc chlorid, and is used to fill cracks in metallic apparatus, and to cement glass, crockery, etc. E. H. Knight.—*Zinc colloid*, a solution of 4 parts of zinc sulphate in 100 parts of styptic colloid.—*Zinc green*, ointment, plaster, soap, white. See the nouns.—*Zinc-oxide ointment*. See *ointment*.

zinc (zingk), *v. t.*; pret. and pp. *zinked*, ppr. *zinking*. [*< zinc, n.*] To coat or cover with zinc.

All the conditions under which the zinked pipe is to be used should be carefully considered. Jour. Franklin Inst., CXXX. 401.

zinc-amyl (zingk'am'il), *n.* A colorless transparent liquid, $Zn(C_5H_{11})_2$, composed of zinc and amyl. When exposed to the air it absorbs oxygen rapidly, emitting fumes, but does not take fire spontaneously.

zinc-blende (zingk'blend), *n.* Native sulphid of zinc; sphalerite. Also called simply *blende*.

zinc-bloom (zingk'blōm), *n.* Same as *hydro-zinkite*.

zinc-colic (zingk'kol'ik), *n.* A form of colic thought to be caused by zinc-oxide poisoning.

zinc-ethyl (zingk'eth'il), *n.* A colorless volatile liquid, $Zn(C_2H_5)_2$, having a peculiar but not unpleasant smell, composed of zinc and the radical ethyl. It has powerful affinities for oxygen, igniting spontaneously on exposure to air. It is formed by heating zinc with ethyl iodide under pressure. *Braude and Cox*.

zincic (zim'sik), *a.* See *zinkic*.

zinciferous, **zincification**, **zincify**, **zincite**. See *zinkiferous*, etc.

zinkenite (zing'ken-it), *n.* [Named after J. K. L. Zinken (1790–1862), a German metallurgist, mineralogist, and mining official.] A steel-gray mineral consisting of the sulphids of antimony and lead.

zinkic (zing'kik), *a.* [*< zinc (zink) + -ic*.] Related to, containing, or consisting of zinc. Also *zincic*.

zinkiferous (zing-kif'e-rus), *a.* See *zinkiferous*.

zinking (zingk'ing), *n.* [Verbal *n.* of *zinc, v.*] The act of coating iron with a weak solution of sulphate of zinc, or one of the double salts of chlorid of zinc and sal ammoniac.

zinkite, *n.* See *zinkite*.

zinky, *a.* See *zinky*.

zinc-methyl (zingk'meth'il), *n.* A disagreeable-smelling mobile liquid, $Zn(CH_3)_2$, fuming in the air and readily igniting.

zinc (zing'kō), *n.* [Short for *zincograph*.] A plate in relief for printing, made by etching with acid a design on prepared zinc. [Eng.]

zinc (zing'kō), *v. i.* [*< zinc, n.*] To etch with acid a zinc plate containing on its surface a design intended for printing by typographic methods. [Eng.]

Drawings Wanted (on litho paper for *zincing*) for a Provincial Journal. *Athenaeum*, No. 3235, p. 591.

zinc (zing'kō), *n.* [*< NL. zincum, zinc, + Gr. -ōs, way (cf. anode, cathode).*] The negative pole of a voltaic battery; the anode of an electrolytic cell.

zincograph (zing'kō-grāf), *n.* [See *zincography*.] A plate or a picture produced by zincography. Also *zincotype*.

Reproduced in *zincograph* by the aid of photography. *Edinburgh Rec.*, CXLV, 231.

zincograph (zing'kō-grāf), *v. i.* [*< zincograph, n.*] To transfer a design to the surface of a zinc plate with intent to etch it and make therefrom a plate in relief.

zincographer (zing-kog'rā-fēr), *n.* [*< zincograph-y + -er*.] One who makes zincographic plates.

zincographic (zing-kō-grāf'ik), *a.* [*< zincograph-y + -ic*.] Relating to zincography.

zincographical (zing-kō-grāf'i-kāl), *a.* [*< zincographic + -al*.] Same as *zincographic*.

zincography (zing-kog'rā-fi), *n.* [*< NL. zincum, zinc, + Gr. -ygraphia, < γράφω, write.*] The art of producing on zinc a printing surface in relief by etching with dilute acid the unprotected parts of the plate. Compare *panchromography*.

zincoid (zing'kōid), *a.* [*< NL. zincum, zinc, + Gr. -oid, form.*] Of, pertaining to, or resembling zinc.

zincoid pole of a voltaic cell, the negative pole, or zincode, constituted by the zincous plate connected with a copper plate which forms the positive pole; the anode of an electrolytic cell. See *chlorous pole*, under *chlorous*.

zincolysis (zing-kol'i-sis), *n.* [*< NL. < zincum, zinc, + Gr. -lysis, dissolving.*] A mode of decomposition occasioned by an electrical current; electrolysis.

zincolyte (zing'kō-lit), *n.* [*< NL. zincum, zinc, + Gr. -lytes, verbal adj. of λύνω, dissolve.*] A body decomposable by electricity; an electrolyte.

zincopolar (zing'kō-pō-lār), *a.* [*< NL. zincum, zinc, + E. polar.*] Having the same polarity as the zinc plate in a galvanic cell.

zincotype (zing'kō-tip), *n.* [*< NL. zincum, zinc, + Gr. -typos, type.*] Same as *zincograph*.

The two volumes are copiously illustrated by a *zincotype* process. *Athenaeum*, No. 3233, p. 492.

zincous (zing'kus), *a.* [*< zinc + -ous*.] Pertaining to zinc, or to the negative pole of a voltaic battery.—**Zincous element**, the basic or primary element of a binary compound.—**Zincous pole**, that pole of a particle of zinc, or of hydrochloric acid, which has the attraction or affinity which is characteristic of zinc, or the zincous attraction.

zinc-plating (zing'kō-plā-ting), *n.* Plating in zinc, executed with a preparation made of coarse rasped or granulated zinc boiled in a mixture of sal ammoniac and water. The deposit has a silvery brightness, and can be used as a first coat for articles to be twice plated, since any other metal can be deposited upon zinc. *E. H. Knight*.

zinc-salt (zing'kō-sālt), *n.* A salt of which zinc is the base.

zinc-spinel (zing'kō-spīn'el), *n.* Same as *gahnite*.

zinc-vitriol (zing'kō-vit'ri-ol), *n.* In chem., zinc sulphate; white vitriol ($\text{ZnSO}_4 + 7\text{H}_2\text{O}$). It is found as a native mineral (gossanite), as a product of the oxidation of zinc-blende, and can also be prepared by dissolving zinc in dilute sulphuric acid, and by roasting native zinc sulphuret. It is used as a dryer in oil paints and varnishes, as a mordant in dyeing, as a disinfectant, and sometimes as a source of oxygen.

Zingaro, Zingano (zing'ga-rō, -nō), *n.*; pl. *Zingari, Zingani* (-rē, -nō). [It.: see *Gipsy*.] A Gipsy.

zingel (zing'el), *n.* [G.; cf. *amzingeln*, encircle (see *ingle*).] A fish of the family *Percidae* and

zinghot, *n.* [Appar. intended for *zinc*, It. form of *zinc*.] Same as *zinc*.

For cobalt and *zingho*, your brother and I have made all inquiries. *Watpole*, To Mann, July 31, 1743.

Zingian (zin'ji-an), *a.* and *n.* A name sometimes given to the South African family of tongues; same as *Bantu*.

Zingiber (zin'ji-bēr), *n.* [NL. (Adanson, 1763; used earlier by Lobel, 1576, and, as *Gingiber*, by Mattioli, about 1554), < L. *zingiber*, < Gr. ζιγγίβηρ, ginger; see *ginger*.] A genus of plants, type of the order *Zingiberaceae* and of the tribe *Zingibereae*. It is characterized by a cone-like inflorescence, each flower having a three-celled ovary and a stamen composed of a short filament and an anther with contiguous cells having the connective extended into a long linear appendage—the two lateral stamens either absent or represented by two small adnate staminodes. About 35 species have been described, of which perhaps 23 are distinct. They are natives of India and of islands of the Pacific and Indian Oceans. They are leafy plants with horizontal tuberous rootstocks, the sterile stems differing from the flower-bearing ones. The dense cone of flowers is composed of imbricated bracts, each with from one to three flowers and spatheous bractlets. The inflorescence is sometimes borne on a leafless scape, more or less covered with sheaths, in other species terminating a leafy stem, or apparently lateral upon a recurved peduncle. Each flower produces a membranous or hyaline tubular calyx, and a cylindrical corolla-tube dilated into narrow spreading lobes, the posterior one erect and incurved. The fruit is a globose or oblong capsule, finally irregularly ruptured, and discharging rather large oblong seeds with a baccate aril which is sometimes much larger than the seed. The pungently aromatic roots of several species are the source of the ginger of commerce, especially those of *Z. officinale*, the ginger-plant of India (see *cut* under *ginger*). The root of *Z. cassumunar*, of India, is used as a tonic and stimulant, and is cultivated under the name of *cassumunar ginger* or *Bengal root*. Also *Zingiber*.

Zingiberaceae (zin'ji-bēr-ā-sē-ē), *n. pl.* [NL. (Richard, 1808), < *Zingiber* + *-aceae*.] An order of monocotyledonous plants, of the series *Epigynae*, distinguished from the order *Musaceae* by its single perfect stamen. It is characterized by irregular flowers with distinct calyx and corolla, inferior ovary, usually arillate seeds, and an embryo in a canal in the center of the albumen. There are over 470 species, of 36 genera, classed in 3 tribes, of which *Zingiber*, *Maranta*, and *Canna* are the types. They are perennial tropical herbs growing from a horizontal thickened rootstock, their leaves chiefly radical, large and ornamental, with numerous parallel veins diverging obliquely from the midrib. Their flowers are often of great beauty, as in species of *Hedychium*, *Alpinia*, *Curcuma*, *Komperia*, and *Canna*; in many, especially *Marantia*, they resemble orchids. They have a strong tendency to petaloid development, producing richly colored bracts in *Curcuma*; three petaloid staminodes and two scales usually represent the five imperfect stamens. The order contains many of the most stimulating aromatics, products derived chiefly from the root or rhizome of the plants ginger, galangale, and zedoary, of the genera *Zingiber*, *Alpinia*, and *Curcuma*; also from the fruit or seeds, as cardamoms and grains of paradise, from species of *Amomum* and *Elettaria*. The order also yields the valuable dye turmeric from *Curcuma*, a purple dye from *Canna*, and arrowroot from *Maranta* and *Curcuma*. The mucilaginous juice of species of *Costus* is used in medicine; edible tubers are produced by species of *Maranta*, an edible fruit by *Globose*, and a tough fiber by *Phrygium* and *Calathea*. Also *Zingiberaceae*.

zingiberaceous (zin'ji-bēr-ā'shūs), *a.* Of or pertaining to ginger, or the *Zingiberaceae*.

Zingibereae (zin'ji-bēr-ē-ē), *n. pl.* [NL. (Bentham and Hooker, 1883), < *Zingiber* + *-eae*.] A tribe of plants, of the order *Zingiberaceae*, typified by the genus *Zingiber*. It is characterized by flowers with a tubular or spatheous calyx and a single stamen, the two lateral undeveloped stamens being often represented by petaloid staminodes; and by an ovary with three cells or three parietal placentae, and a slender free style which at its apex clasps the two anther-cells. It embraces 23 genera, principally tropical, including the large and important aromatic genera *Amomum*, *Curcuma*, and *Alpinia* (besides *Zingiber*), as also many of the most highly ornamental plants of the order.

zink, *n.* See *zinc*.

zinke (tsing'ke), *n.* [G. *zinke*, a cornet.] A small cornet of wood or horn, once very common in Germany. It had usually seven finger-holes, and a cupped mouthpiece. It was made in several sizes, and both straight and curved. The serpent is properly a development of the old zinke or cornetto.

zinkiferous (zing-kif'e-rus), *a.* [Also *zinciferous*, *zinciferous*; < *zinc* (*zink*) + *L. ferre* = *E. bear*.] Containing or producing zinc: as, *zinkiferous ore*.

zinkification (zing'ki-fi-kā'shon), *n.* [Also *zincification*; < *zinkify* + *-ation* (see *-fy*).] The process of coating or impregnating an object with zinc, or the state resulting from such process.

zinkify (zing'ki-fi), *v. t.*; pret. and pp. *zinkified*, pp. *zinkifying*. [Also *zincify*; < *zinc* (*zink*) + *L. ferre*, < *facere*, make.] To cover or impregnate with zinc.

zinkite (zing'kit), *n.* [Also *zincite*, *zincite*; < *zinc* (*zink*) + *-ite*.] A native oxide of zinc, found at Franklin Furnace and Stirling Hill, near Ogdensburg, in Sussex county, New Jersey. It is

brittle, translucent, of a deep-red color, sometimes inclining to yellowish. Also called *red zinc ore*, or *red oxide of zinc*.

zinky (zing'ki), *a.* [Also *zincy*; < *zinc* (*zink*) + *-y*.] Pertaining to zinc; containing zinc; having the appearance of zinc.

The *Zincy Ores* [of common galena] are said to be greyer than other ores. *Kirwan*, Mineralogy (1796), II, 218.

Zinnia (zin'i-ā), *n.* [NL. (Linnaeus, 1763), named after J. G. Zinn (1727-59), who wrote on the plants of Göttingen.] 1. A genus of composite plants, of the tribe *Helianthoidae*, type of the subtribe *Zinninae*. It is characterized by solitary radiate flower heads with a conical or cylindrical receptacle, the flowers both of the disk and ray being fertile, and those of the ray almost or quite without a tube, and persistent upon the ripened achene; the achenes of the inner flowers each bear from one to three awns. There are 12 species, natives of Mexico, Texas, and Arizona 2 of which, long cultivated in gardens, are now widely naturalized. They are annuals, perennials, or sometimes shrubby plants, bearing opposite entire leaves and rather large and showy flower heads peduncled at the ends of the branches or in the forks between them. Five species occur within the United States, mostly with light-yellow or sulphur-colored rays. The cultivated species are chiefly of various shades of deep red; they have been called *guth-and-obl-ang*, from the lasting and somewhat rigid rays and the continued production of new disk-flowers; but are more usually known by the generic name *zinnia*, especially in the common double form.

2. [*l. e.*] A plant of this genus.

Zinn's corona. An arterial plexus about the optic nerve, in the sclerotic.

Zinn's ligament. See *ligament of Zinn*, under *ligament*.

Zinn's membrane. The anterior lamella of the iris of the eye.

Zinn's zonule. See *zonule of Zinn*, under *zonule*.

zinnwaldite (zin'wol-dit), *n.* [*< Zinnwald* (see *def.*) + *-ite*.] A kind of mica related to lepidolite, but containing both lithium and iron; it is often found associated with tin ores, as at Zinnwald in the Erzgebirge.

Zinziber, Zinziberaceae, etc. Same as *Zingiber*, etc.

Zion (zī'on), *n.* [Also *Sion*, LL. *Sion*, Gr. *Ζιων*, Heb. *Tsiyon*, orig. a hill.] Figuratively, the house or household of God, as consisting of the chosen people, the Israelites; the theocracy, or church of God; hence, the church in general, or heaven as the final gathering-place of true believers; so called from Mount Zion, the holy hill of Jerusalem, the center of ancient Hebrew worship.

Zion spreadeth forth her hands, and there is none to comfort her. Lam. I, 17.

Let Zion and her sons rejoice. Watts.

Zionward (zī'on-wārd), *adv.* [*< Zion + -ward*.] Toward Zion, in the figurative sense; toward the goal of salvation; heavenward.

If I were like you, I should have my face *Zionward*, though prejudice and error might occasionally tug a mist over the glorious vision before me.

Charlotte Brontë, in Mrs. Gaskell, viii.

zip (zip), *n.* [Imitative.] The sound of a bullet passing through the air or striking against an object.

The ping, zip, zip, of bullets, and the wounded men limping from the front, . . . were a prelude to the storm to come. *The Century*, XXX, 134.

Ziphiidae (zi-fi'i-dē), *n. pl.* [NL., < *Ziphius* + *-idae*.] The *Ziphiinae* rated as a family apart from *Physcteridae*, and divided into *Ziphiinae* and *Anarhacinae*. Also, more properly, *Niphiidae*.

ziphiiform (zif'i-i-fōrm), *a.* Same as *ziphioid*.

Ziphiinae (zif-i-i'nē), *n. pl.* [NL., prop. **Niphiinae*; < *Ziphius* + *-inae*.] A subfamily of *Physcteridae*, named from the genus *Ziphius*, often elevated to the rank of a family; the ziphioid or

Bottle-nosed Whale (*Ziphius cavirostris*), one of the *Ziphiinae*.

ziphiiform cetaceans, among those known as *bottlenoses* and *cow-fishes*. They have most of the lower teeth rudimentary or concealed, a distinct lacrymal bone, and a prolonged snout or rostrum above which the rest of the head rises abruptly in globose form; there is a small falcate dorsal fin; the flippers are small, with five digits; and the single median blow-hole is crescentic, as in dolphins. Several genera besides *Ziphius* have been recognized, of which *Hyperodon* is the most prominent; but their synonyms are involved, and some distinctions which have been drawn are not clear.

Zingel (*Aspro zingel*).

genus *Aspro*; specifically, *A. zingel* of the Danube and its tributaries. This fish is sometimes a foot long, and is of a greenish-brown color, lighter on the side and whitish on the belly, and marked with four brownish-black bands.

ziphioid (zif'i-oid), *a.* and *n.* I. *a.* Resembling or related to a cetacean of the genus *Ziphius*.

II. *n.* Any member of the *Ziphiidae* or *Ziphiinae*.

Also written *riphioid*.

ziphisternum, *n.* See *ziphisternum*.

Ziphius (zif'i-us), *n.* [NL. (Cuvier, 1834), prop. *Ziphius*, < Gr. *ζῆφις*, the sword-fish, < *ζῆφος*, a sword.] 1. A genus of odontocete cetaceans, or toothed whales, taken as type of the *Ziphiinae*: used with varying restrictions, and in some acceptations synonymous with *Mesoplodon*. It was based originally on a skull discovered in 1804 on the coast of France, and supposed to be fossil; the species was named *Z. cavirostris* by Cuvier. Numerous living individuals have since been found in various seas. There is normally one conical tooth on each side of the lower jaw; the vertebrae are forty-nine in number; and the anterior cervical are ankylosed, but the posterior are free. These whales are among those known as *bottle-nosed whales* and *cave-fishes*, and attain a length of from 15 to 20 feet. The genus is distinct from *Hyperoodon*; but variations in the dentition have been noted, and the relations of some forms known as *Mesoplodon* are in question. Also called *Diodon*.

2. [*l. c.*] A whale of this genus.

Ziphorhynchus, *n.* See *Ziphorhynchus*.

zippeite (zip'ē-it), *n.* [Named after F. X. M. Zippel, a German mineralogist.] A basic sulphate of uranium, occurring in delicate needle-like crystals of a bright-yellow color; it is found at Joachimsthal.

zircon (zēr'kōn), *n.* [Cf. Sp. *azurcon* = Pg. *azurcón*, *zarcón*, < Ar. *zarkūn*, cinnabar, vermilion, < Pers. *zargūn*, gold-colored; see *jargun*.] A mineral occurring in tetragonal crystals of adamantine luster and yellowish to brownish or reddish color; its hardness is somewhat greater than that of quartz. The reddish-orange variety is sometimes called *hyacinth* in jewelry. The colorless, yellowish, or smoky zircon of Ceylon is there called *jargon*. Zircon consists of the oxides of silicon and zirconium (SiO_2ZrO_2), and is usually regarded as a silicate of zirconium, though sometimes classed with the oxides of titanium (rutile) and tin (cassiterite), which have a similar form. See *zirconium*.

zirconate (zēr'kō-nāt), *n.* [*< zircon(ic) + -ate*.] A salt of zirconic acid.

zirconia (zēr'kō-ni-ā), *n.* [NL., < *zircon*.] An oxide, ZrO_2 , of the metal zirconium, resembling alumina in appearance. It is so hard as to scratch glass.—*Zirconia light*, an intensely brilliant light, differing from the ordinary oxyhydrogen light or lime-light only in that it is produced from zircon cones acted on by oxygen and a highly carburated gas, in place of the less durable lime balls of the other method.

zirconian (zēr'kō-ni-an), *a.* [*< zirconia + -an*.] Same as *zirconic*.—*Pop. Sci. News*, XXIII, 60.

zirconic (zēr'kō-nik), *a.* [*< zirconia, zirconium, + -ic*.] Of, pertaining to, or containing zirconium or zirconium.—*Zirconic acid*, an acid containing zirconium, not capable of existing in the free state, but forming definite salts.

zirconite (zēr'kō-nit), *n.* [*< zircon + -ite*.] A variety of zircon.

zirconium (zēr'kō-ni-um), *n.* [NL., < *zircon*.] Chemical symbol, Zr; atomic weight, 89.6. The metal contained in zirconia. It is commonly obtained in the form of a black powder, but is also known in the crystalline state, forming highly lustrous blackish-gray laminae, having a specific gravity of 4.15. The amorphous metal takes fire when gently heated in the air, but the crystalline variety requires an intense heat for its ignition. The common acids do not attack it. Zirconium is a remarkable element in that it is very widely and generally diffused in nature, but nowhere, so far as is known, found in any one locality in large quantity; in this respect it has a decided resemblance to titanium. The form in which it occurs is that of the silicate (zircon), and usually in minute or even microscopic crystals, which have been detected in many granitic and syenitic rocks, as well as in various gneisses and crystalline schists. Zircon has been found also, but less abundantly, in some eruptive rocks, both ancient and modern. Zirconium is chemically most closely related to titanium, and both these metals have certain affinities with silicon, forming dioxides and volatile tetrachlorides, as does that non-metallic element.

zirconoid (zēr'kō-noid), *n.* [*< zircon + -oid*.] In crystal, a double eight-sided pyramid belonging to the tetragonal system; so called because it is a common form with zircon.

zircon-syenite (zēr'kō-ni-sī'e-nit), *n.* See *zircon-syenite*.

Z-iron (zē' or zed'ī'ern), *n.* See *angle-iron*.

Ziphræa (zēr'fē-ā), *n.* [NL. (J. E. Gray, as *Zurfa*).] In conch., a genus of bivalves, of the family *Pholidæ*. *Z. crispata* is called *date-fish* in California, where it is available for food.

zither (zith'ēr), *n.* [*< G. zither* = E. *cither*, *cithara*, *q. v.*] Same as *cithern*.

zitherist (zith'ēr-ist), *n.* [*< zither + -ist*.] A player on the cithern.

zithern (zith'ēr), *n.* [Altered form of *zither*, after *cithern* as related to *cither*, *cithara*.] Same as *cithern*.

Zizania (zi-zā'ni-ā), *n.* [NL. (Linnæus, 1753). < LL. *zizania*, pl. tares. < Gr. *ζίζανον*, darnel, tare.] A genus of grasses, of the tribe *Oryzæ*.

It is characterized by numerous narrow unisexual spikelets in a long loose androgynous panicle, each spikelet having two glumes and six stamens or two more or less connate styles. Four or five species have been described, of which two, *Z. aquatica* and *Z. miliacea*, are usually considered distinct; both are natives of North America, the former also occurring in Japan and eastern Russia. They are tall aquatic grasses with long flat leaves and large terminal panicles with numerous slender elongated branches, made highly ornamental by the pendent red or purplish anthers. They are the favorite food of wild ducks, and the seeds are sold to plant in artificial fish-ponds to shade the young fish, and along watercourses to attract fowl. They are known as *wild water*, or *Indian rice*. See *Indian rice*, under *rice*.

zizany (ziz'ā-ni), *n.* [*< F. zizanie*, < LL. *zizania*; see *Zizania*.] Darnel.

They all stand or fall to their own masters, and many holy and excellent persons God has dispersed, as wheat among the tares and zizany.

Evelyn, True Religion, II, 314.

Ziziphora (zi-zif'ō-rī), *n.* [NL. (Linnæus, 1753).] A genus of gamopetalous plants, of the order *Labiata* and tribe *Monardææ*. It is characterized by a tubular thirteen-nerved two-lipped calyx, with the throat villous within, and commonly closed after flowering by connivent teeth. There are about 12 species, natives of eastern and central Asia and of southern parts of the Mediterranean region. They are low annuals or spreading undershrubs, usually hoary with close hairs, and bearing small leaves which are nearly or quite entire. The flowers form small axillary clusters, commonly crowded upon the upper part of the stem.

Zizyphæa (zi-zif'ē-ē), *n. pl.* [NL. (Bentham and Hooker, 1862). < *Zizyphus* + *-ææ*.] A tribe of polypetalous plants, of the order *Rhamnaceæ*. It is characterized by a superior or half-superior ovary, by a disk filling the calyx-tube, and by a drupaceous juicy or fleshy fruit with a one- to three-celled stone. It includes 9 genera, of which *Zizyphus* is the type. They are shrubs or trees, mainly of the northern hemisphere; one, *Berberis*, becomes a shrubby climber in *B. vulgaris*, the supple-jack of the southern United States.

Zizyphus (ziz'ī-fus), *n.* [NL. (Tournefort, 1700). < L. *zizyphus*, < Gr. *ζίζυφος*, the jujube-tree; see *jujube*.] A genus of polypetalous plants, of the order *Rhamnaceæ*, type of the tribe *Zizyphææ*. It is characterized by thorny branches, triple-nerved leaves, and cymose flowers each with five petals, and by a usually two-celled ovary immersed in the disk, and bearing two or three conical divergent styles. There are 65 species, natives chiefly of tropical Asia and America, occurring rarely in Africa and Australia. They are shrubs or trees, often decumbent or sarmentose, commonly covered with hooked spines. The leaves are alternate, coriaceous, entire or crenate, three- to five-nerved, and mostly arranged in two ranks. One or both of the stipules are spinose, often ending in a hook. The small greenish flowers form short few-flowered axillary cymes. The fruit is a globose or oblong drupe, with a woody or bony stone, containing one to three seeds. The species are known in general as *jujube-trees*; the name *jujube* is given especially to the fruit of *Z. sativa* (*Z. vulgaris*), of the Mediterranean region, which is there commonly eaten fresh, or used as a cough remedy when dried. *Z. Jujuba*, of India and China, also furnishes an excellent fruit, cultivated in numerous forms by the Chinese; a variety is known as the *Chinese date*. The true jujube does not now usually enter into the confection known as *jujube-paste*, but is commonly replaced by gum arabic or gelatin. *Z. Lotus*, the sadr, is one of the reputed sources of the classical lotus-fruit. (See *lotus-tree*, I, and *lotus-tree*.) Many other species bear edible fruit, as *Z. Bactri*, of Africa, which is there made into bread and into a pleasant beverage; several are valued for ornament on account of their foliage, or for hedges on account of their spines, especially *Z. sativa*, and also *Z. Spina-Christi*, one of the Christ's-thorns (for which see *nebuke-tree*). *Z. nummularia*, of Persia and India, is known as *camel's-thorn* (which see). *Z. Chlorozylon*, a recently determined species, is an important timber-tree of Jamaica, there known as *cog wood*. *Z. Parryi* occurs in southern California and Cerros Island; two former species of Florida, *Z. emarginatus*, or black ironwood, and *Z. Domingensis*, or nakedwood, are now known respectively as *Rhamnidium ferreum* and *Calubria cecinata*. See *jujube*, and *ent under ueration*.

Zn. In chem., the symbol for zinc.

zoa, *n.* Plural of *zoön*.

zoadula (zō-ad'ū-lā), *n.*; pl. *zoadulæ* (-lē). [NL., < Gr. *ζῷον*, life, + *-adul* + *dim. -ula*.] In bot., the locomotive spore of some *Conferææ*.

zoæa, zoæal. See *zoëa*, *zoëal*.

zoamylin (zō-am'i-lin), *n.* [*< Gr. ζῷον*, life, + *amylin*.] Same as *glycogen*.

Zoanthacea (zō-an-thā'sē-ā), *n. pl.* [NL., < *Zoanthus* + *-acea*.] A suborder of *Actiniaria*, containing permanently attached forms, as *Zoanthus* and related genera.

zoanthacean (zō-an-thā'sē-an), *a.* and *n.* [*< Zoanthacea + -an*.] I. *a.* Of or pertaining to the *Zoanthacea*; zoanthoid.

II. *n.* Any member of the *Zoanthacea*.

Zoantharia (zō-an-thā'ri-ā), *n. pl.* [NL. (De Blainville, 1830), < Gr. *ζῷον*, animal (see *zoön*), + *anthos*, flower, + *-aria*.] A division (order or subclass) of *Actinozoa*, containing the hexamerous or hexacoralline forms; the helianthoid polyps, or animal-flowers, contrasted with the *Alegonaria*, and characterized by the normal disposition of their soft parts in sixes, or multiples of six (not in eights, as in the *Alegonaria* or *Octocoralla*), and by the possession of simple (not fringed) and usually numerous tentacles: so called from the resemblance of some of them, as the sea-anemones, to flowers. The *Zoantharia* correspond to the *Hexacoralla* or *Coralligena*, and were divided by Milne-Edwards into three suborders (or orders): *Malacodermata*, with the corallum absent or rudimentary, as in sea-anemones; *Sclerobasicea*, with external non-calcareous corallum, as the black corals of the family *Antipathidae*; and *Sclerodermata*, with internal calcareous corallum, as the ordinary hard corals, or stone-corals. See the technical names.

zoantharian (zō-an-thā'ri-an), *a.* and *n.* I. *a.* Having the characters of or pertaining to the *Zoantharia*.

II. *n.* A member of the *Zoantharia*, as a sea-anemone.

Zoanthidæ (zō-an'thi-dē), *n. pl.* [NL. (J. E. Gray, 1840), < *Zoanthus* + *-idæ*.] A family of zoantharian or hexacoralline actinozoans, typified by the genus *Zoanthus*. They are sea-anemones in which the individual polyps are ordinarily united by a common creeping stolon, or connective cenosare; they multiply by buds which remain thus adherent. They have no true corallum, but a pseudo-skeleton of hard particles or spicules embedded in the ectoderm; the mesenteric septa are numerous, and of two sorts (one small and sterile, the other large and perfect and furnished with reproductive organs), generally alternating. Like most other sea-anemones, these are fixed organisms, incapable of locomotion; and they include all the colonial forms. Also *Zoanthes*.

Zoanthinæ (zō-an-thī'nē), *n. pl.* [NL., < *Zoanthus* + *-inæ*.] The *Zoanthidæ* named as a subfamily. *Edwards and Haimé*, 1851.

zoanthodeme (zō-an'thō-dēm), *n.* [*< Gr. ζῷον*, animal, + *anthos*, a flower, + *δέμα*, a bundle; literally, 'a bundle of animal-flowers'.] A compound zoantharian; the whole organism constituted by the coherent zooids produced by the budding of a single actinozoan polyp.

zoanthodemic (zō-an'thō-dem'ik), *a.* [*< zoanthodeme + -ic*.] Of the nature of or pertaining to a zoanthodeme.

zoanthoid (zō-an'thoid), *a.* [*< Zoanthus + -oid*.] Same as *zoantharian*.

zoanthropic (zō-an'thrōp'ik), *a.* [*< zoanthrop-y + -ic*.] Of the nature of or pertaining to zoanthropy: as, *zoanthropic mania* or delusion; *zoanthropic literature*. This is the generic name of such delusions, which take various forms, some of which are specified according to the animal concerned, as *lycanthropy*.

zoanthropy (zō-an'thrō-pi), *n.* [*< Gr. ζῷον*, animal, + *ἄνθρωπος*, man. Cf. *lycanthropy*.] A form of insanity in which a person believes himself to be one of the lower animals.

Zoanthus (zō-an'thus), *n.* [NL. (Cuvier, 1827), < Gr. *ζῷον*, animal, + *anthos*, flower.] The typical genus of *Zoantharia*.

The individual polyps are lengthened, and elevated upon a footstalk springing from the connective cenosare common to the several zooids of the compound organism; the mouth is linear and transverse, and surrounded by short slender rays or tentacles. The best-known species is *Z. couchi* of the European coasts; numerous others inhabit tropical seas, as *Z. volanderi*. Also *Zoanthas* (Lamarck, 1810), *Zoantha*.

Flowering Plant of *Zizania aquatica*.
a, branch of the panicle with male flowers;
b, branch of the panicle with female flowers;
c, male flower; d, female flower.

Zoanthus couchi,
two thirds natural size.
a, polyp, closed; b, the same, expanded;
c, stolon.

Zoarces (zō-är'sēz), *n.* [NL., (Cuvier, 1829), also *Zoarceus*, *Zoarchus*, and *Zoarcus*, < Gr. *ζωαρχία*, life-supporting, < *ζωή*, life, + *ἀρχαίω*, assist, defend.] The name-giving genus of *Zoarcidae*, including such species as *Z. viviparus*, the so-called viviparous blenny (formerly *Blennius viviparus*). This is a large eelpout, with an elongate compressed body, tapering behind, heavy oblong head, a large mouth, strong cone teeth in several series, a long low dorsal fin some of the hinder rays of which are developed as sharp spines, broad pectoral fins, and jugular ventrals of three or four soft rays; the scales are small, not imbricated, but embedded in the skin. Another species, with an increased number of fin-rays and vertebrae, is *Z. (Mac-zoarces) anguillaris*, known as *mutton-fish* and *mutter of eels*, found from Labrador to the Middle States, 20 inches long, of a reddish-brown color mottled with olive, with a dark streak along the cheek.

Zoarcidae (zō-är'si-dē), *n. pl.* [NL., < *Zoarces* + *-idae*.] A family of fishes, named from the

Lycodes vahli, one of the *Zoarcidae* (or *Lycodidae*).

genus *Zoarces*; now generally called *Lycodidae* (which see). Also *Zoarceidae*, *Zoarchidae*.

zoaria, *n.* Plural of *zoarium*.

zoarial (zō-ä'ri-äl), *a.* [*zoari-um* + *-al*.] Of or pertaining to a zoarium; composing or composed of a zoarium.

zoarium (zō-ä'ri-um), *n.*; *pl. zoaria* (-ä). [NL., < Gr. *ζωάριον*, dim. of *ζῷον*, an animal.] A polyzoary; the colony or aggregate of the polypides of a polyzoan; the polypidom or polypary of the moss-animalcules.

zobo (zō'bō), *n.* [Also *zhobo*, *dsomo*, etc., < Tibetan *mdzobo*, the male, *mdzomo*, the female of the *mdzo*, a hybrid of the yak and the so-called zebu. Cf. *zebu*.] A breed of zebu-cattle, supposed to be a hybrid of the common zebu with the yak, reared in the western Himalayan region for its flesh and milk, and also as a beast of burden.

zocco (zok'ō), *n.* [It., < L. *saccus*, sock: see *sock*, *socle*.] A socle.

zoccolo, **zocle** (zok'ō-lō, zō'kl), *n.* [*zoc-colo*, < *zocco*: see *zocco*.] A socle.

zodiac (zō'di-ak), *n.* [Formerly also *zodiack*; < ME. *zodiac*, *zodiak*, < OF. *zodiac*, *zodique*, F. *zodiaque* = Sp. *zodiaco* = Pg. It. *zodiaco*, < L. *zodiacus*, the zodiac (*L. orbis signifer*), also adj., of the zodiac, < Gr. *ζωδιακός*, the zodiac, prop. adj., 'of animals,' se. *κίρκος*, also called *ὁ κίρκος ὁ τῶν ζῴων*, or *ὁ τῶν ζῴων κίρκος*, 'the circle of animals' (also *ἡ ζωδιακή*, se. *ὁδός*, way), the ref. being to the constellations figured as animals; < *ζῷον*, dim. of *ζῷον*, animal: see *zōon*.] 1. A belt of twelve constellations, extending about 8° on each side of the ecliptic. The constellations are π , Aries; τ , Taurus; γ , Gemini; σ , Cancer; μ , Leo; ν , Virgo; ϵ , Libra; μ , Scorpio; ι , Sagittarius; ν , Capricornus; ϵ , Aquarius; π , Pisces. The zodiac is also divided into twelve equal parts called *signa*, named after these constellations, and the first point of the sign Aries begins at the vernal equinox. The above symbols refer to the signs. The signs have been carried back by the precession of the equinoxes until they are now 23° behind the corresponding constellations on the average. But the position of the vernal equinox was originally, no doubt, between Aries and Taurus. There is strong evidence that the zodiac was formed at Babylon about 2100 B. C. There is a poetical description of the heavens written by Aratus in Macedonia in latitude about 41°, and about 270 B. C. But the appearances described were never to be seen in that latitude, nor in any latitude in that age. Thus he mentions that the head of the Dragon—that is, Etamin (γ Draconis)—and the waist of Cepheus—that is, Fierae (γ Cephei)—are on the circle of perpetual apparition. Now, this was true only in the latitude of Babylon, 22° N., about 2200 B. C. He also describes pretty carefully the most southerly stars seen, mentioning the star now called the *Pavo's eye* (α Pavonis), as well as Canopus (α Argus), but saying that there are no bright stars between the latter and ϵ etus, so that a Phoenix must have been invisible. Now these descriptions will suit only a station of latitude 32° N. to 35° N., and an epoch between 1500 B. C. and 2200 B. C. Aratus also describes the courses of the tropics among the stars. That of the tropic of Cancer best agrees with 2200 B. C., that of the tropic of Capricorn with 2000 B. C. The equator is also described in a manner which answers perfectly to 2100 B. C. Finally, there are twelve descriptions of the appearances of the heavens at the rising of each of the constellations of the zodiac, which, while not very decisive, are not in positive disagreement with the other indications. But there is no doubt that the early part of the poem (written long before the precession of the equinoxes was suspected) copies indirectly early Aecadian records. The zodiac was, therefore, formed before 2000 B. C. It cannot have been formed very long before, since there is much reason to believe that the constellation Aries either contained the sun or rose just before the sun at the time of the vernal equinox. Now, it was about 2100 B. C. when the vernal equinox fell upon the last point of Aries, and the other constellations were in similar mean positions. Some highly competent writers, however, regard the first formation of the zodiac as vastly more ancient. Several of the ancient constellation figures have a remarkably Babylonian character, as

Virgo, Capricornus, Sagittarius, Centaurus, and Ophiuchus; one (Cepheus) has a barbarian name; and nearly all may be explained from Babylonian mythology. Two at least of the symbols for signs, those of Gemini and Scorpio, much resemble the Babylonian ideographs for the corresponding months. Yet the origin of the Bears, Auriga, Pegasus, Lyra, and Corona was probably not Babylonian. Moreover, certain subjects of common Babylonian fable, such as the tree of life, are not found among the constellations. It is noticeable that it was about 2200 B. C. that He and Ho are said to have reformed the Chinese calendar and divided the heavens into seasons; but the attempt to connect our constellations with the Chinese asterisms has conspicuously failed. The figures of the Chinese zodiac are Tiger, Rabbit, Dragon, Serpent, Horse, Ram, Ape, Cock, Dog, Pig, Rat, Bull. The zodiac was marked out by the ancients as distinct from the rest of the heavens because the apparent places of the sun, moon, and the planets known to them were always within it. This, however, does not hold good of all the newly discovered planetoids. See cuts under constellations named.

2. Figuratively, a round or circuit; a zone; a complete course.

The Poet . . . goeth hand in hand with Nature, not inclosed within the narrow warrant of her gifts, but freely ranging only within the Zodiac of his own wit.

Sir P. Sidney, *Apoll for Poetrie*.

In your years zodiacs may you fairly moue,
Shin'd on by angels, blest with goodness, loue.

Dekker, *London's Tempe*.

3. In *her.*, a bearing representing a part of the imaginary zodiacal circle, forming an arched bend or bend sinister, and with several of the signs upon it, the number being specified in the blazon.—**Lunar zodiac**, a circle of 27 or 28 asterisms, or groups of stars, selected and established to mark the moon's daily progress around the heavens. It was used in ancient India, in China, and in Arabia, with only minor variations in the star-groups selected. Its place of origin is uncertain and disputed.—**Zodiac ring**, a ring decorated with one of the signs of the zodiac, either as the sign under which the possessor was born, or perhaps the sign influencing a certain part of the body.

zodiacal (zō-di-ä'-kal), *a.* [*zodiac* + *-al*.] Of or pertaining to the zodiac; as, the *zodiacal* signs; *zodiacal* planets.—**Zodiacal light**, a luminous tract of the sky, of an elongated triangular figure, lying nearly in the ecliptic, its base being on the horizon, and its apex at varying altitudes, seen at certain seasons of the year either in the west after sunset or in the east before sunrise. It appears with greatest brilliance within the tropics, where it sometimes rivals the Milky Way. Its nature is unknown; the most plausible hypothesis, supported by many of the most eminent modern astronomers, is that it is the glow from a cloud of meteoric matter revolving round the sun.—**Zodiacal parallel**. See *parallel*.

zodiophilous (zō-di-ō'f-i-lus), *a.* [*Gr. ζῳδιον*, dim. of *ζῷον*, animal, + *φιλος*, love.] In *bot.*, animal-loving: applied to those flowers which from their structure are especially adapted for fertilization by insects: it is the converse of *anthophilous*, said of the insects concerned.

zoëa, **zoëa** (zō-ē-ä), *n.*; *pl. zoëæ*, *zoæ* (-ē), rarely *zoëus* (-i-iz). [NL., < Gr. *ζῷον*, animal.] The name given by Bose (1802) to the larvæ of certain decapod crustaceans under the impression that they were adults constituting a distinct genus. The name is retained for the zoëa-stage, and for the animal itself in this stage. The zoëa is also called the *copepod-stage*, intervening in some crustaceans between the nauplius-stage and the schizopod-stage; in others, in which a nauplius-stage is apparently wanting, the zoëa passes into the megalopa-stage. Also *zoëa*, *zœa*.

zoëa-form (zō-ē-ä'-fōrm), *n.* The zoëa or zoëa-stage of a crustacean.

zoëal, **zoëal** (zō-ē-ä'l), *a.* Of the nature of a zoëa; pertaining to a zoëa or to the zoëa-stage; zoëiform. Also *zoëal*.

zoëa-stage (zō-ē-ä'-stāj), *n.* That early stage of certain crustaceans which is a zoëa. In this stage of development the cephalothorax is relatively stout and usually spined, with conspicuous eyes, and long fringed antennæ and mouth-parts serving as swimming-organs; the thoracic legs are undeveloped; and the abdomen is long and slender and with or without appendages. This stage usually passes into that of the megalopa.

zoëform, **zoëform** (zō-ē-ä'-fōrm), *a.* [*NL. zoëa*, *q. v.*, + *L. forma*, form.] Having the form of a zoëa; being or resembling a zoëa.

zoëpraxiscope (zō-ē-prak'si-skōp), *n.* Same as *zoopraxiscope*.

zoëther (zō-ē-thēr), *n.* [*Gr. ζῷον*, life, + *E. (c)ther*.] A supposed substance which manifests the phenomena of animal magnetism and the like: same as *protyle*.

zoëtheric (zō-ē-thēr'ik), *a.* [*zoëther* + *-ic*.] Having the character of zoëther; relating to zoëther in any way.

zoëtic (zō-ē-t'ik), *a.* [Irreg. < Gr. *ζῷον*, life, + *-tic*.] Pertaining to life; vital.

Zoëa-stage of Shore-crab (*Cancer nauplius*).

zoëtrope (zō-ē-trōp), *n.* [*Gr. ζῷον*, life, + *τροπή*, a turning.] An optical instrument which exhibits pictures as if alive and in action, depending, like the thaumatrope, the phenakistoscope, etc., on the persistence of vision. It consists of a cylinder open at the top, with a series of slits in its circumference. A series of pictures representing the different attitudes successively assumed by an object in performing any act from its beginning to its close, as by a horseman in leaping a gate or an acrobat in performing a somersault, is arranged along the interior circumference. The instrument is then set in rapid motion, and the person applying his eye to the slits sees through them the figure appearing as if endowed with life and activity and performing the act intended. Compare *zoëroscope* and *zoëpraxiscope*. Also *zoëtrope* and *wheel of life*.

zoëtropic (zō-ē-trōp'ik), *a.* [*zoëtrope* + *-ic*.] Pertaining to or resembling the zoëtrope; adapted to or shown by the zoëtrope.

zoiatry (zō-iät'ri-ä), *n.* [NL., < Gr. *ζῷον*, an animal, + *ιατρία*, healing, < *ιατρειν*, heal, < *ιατρος*, a physician: see *iatric*.] Veterinary surgery.

zoic (zō'ik), *a.* [*Gr. ζῳστικός*, of animals, < *ζῷον*, animal.] Of or pertaining to animals or living beings; relating to or characterized by animal life; marked by the presence of life.

Zoilean (zō-il'ē-an), *a.* [*L. Zoilus*, < Gr. *Ζαῖλος*, Zoilus (see def.).] Characteristic of Zoilus, a Greek critic (about the fourth century B. C.), noted for his severe criticism of Homer: having the character of Zoilism.

Zoilism (zō-i-lizm), *n.* [*Zoilus* (see *Zoilean*) + *-ism*.] Criticism like that of Zoilus; illiberal or carping criticism; unjust censure.

Bring candid eyes unto the perusal of men's works, and let not Zoilian or detractor blast well-intended labors.
Sir T. Browne, *Christ, Mor.*, ii. 2.

Zoist (zō-i-list), *n.* [*Zoilus* (see *Zoilean*) + *-ist*.] An imitator of Zoilus; one who practises Zoilism; a carping critic.

Out, rhyme; take 't as you list:

A tho for the sour-brow'd Zoist?

Marston, *What You Will*, ii. 1.

zoisite (zōi'sit), *n.* [Named by Werner in 1805 after Baron von Zois, from whom he received his specimen.] A mineral closely related to epidote, but orthorhombic in crystallization. It occurs in prismatic crystals, often deeply striated and rounded, also massive; it varies in color from white to yellow, greenish, and rose-red. Its composition is similar to that of epidote, except that it contains calcium and but little iron. Thallite is a variety of a rose-red color, found in Norway. Also called *saundersite*.

zoism (zō'izm), *n.* [*Gr. ζῷον*, life, + *-ism*.] The doctrine that the phenomena of life depend upon a peculiar vital principle; any vitalistic theory. [A word current from about 1840 to 1850.]

zoist (zō'ist), *n.* [*Gr. ζῷον*, life, + *-ist*.] One who studies the phenomena of life from the standpoint of zoism; one who upholds the theory or doctrine of zoism. See *zoism*.

zoistic (zō-is'tik), *a.* [*zoist* + *-ic*.] 1. Pertaining to zoism or to the zoists; as, *zoistic* views. See *zoism*.—2. Pertaining to living organisms or to vitality; vitalistic; animal; as, *zoistic* magnetism (that is, animal magnetism). See *zoism*.

Zolaism (zō-lä-izm), *n.* [*Zola* (see def.) + *-ism*.] The characteristic quality of the works of Emile Zola (born 1840), a French novelist characterized by an excessively "realistic" treatment of the grosser phases of life; coarse "realism" or "naturalism."

Set the maiden fancies wallowing in the troughs of Zolaism—

Forward, forward, ay and backward, downward too into the abyss.

Tennyson, *Locksley Hall Sixty Years After*.

Zöllner's lines. Parallel lines which seem not

Zöllner's Lines.

to be parallel by reason of oblique intersecting lines. Also called *Zöllner's pattern*.

zollverein (tsöl'fär-in'), *n.* [G., < *zoll* (= E. toll), custom, + *verein*, union, < *ver-* (= E. for-) + *ein* (= E. one), one.] 1. A union of German states for the maintenance of a common tariff, or uniform rates of duty on imports from other countries, and of free trade among themselves.

It began with an agreement in 1828 between Prussia and the grand duchy of Hesse, received a great development in 1844 and succeeding years, ultimately including all the German powers excepting Austria and a few small states, and is now coextensive with the German empire.

Hence—2. A commercial union, or customs-union, in general; any arrangement between a number of states for regulating rates of duty with reference to their common benefit.

The result would be a Protectionist group and an Australian Zollverein. *Fortnightly Rev.*, N. S., XXXIX, 296.

zomboruk (zom'bo-ruk), *n.* Same as *zumbooruk*.
zona (zō'nā), *n.*; pl. *zonæ* (-nē). [*L.*] 1. In *anat.*, a zone, belt, or girdle, or part likened to a zone; chiefly used in human anatomy.—2. *Herpes zoster* (which see, under *herpes*).—**Zona alba**, the white zone of the eyeball—a thickening of the sclerotic where the muscles are attached.—**Zona arcuata**, the inner zone of the basilar membrane, extending from the lower edge of the spiral groove of the cochlea to the external edge of the base of the outer rods of Corti.—**Zona cartilaginea**, the limbus of the spiral lamina.—**Zona choriacea**, same as *zona cartilaginea*.—**Zona ciliaris**, the ciliary zone of the eye; the ring or belt of ciliary processes, or their impression upon the vitreous humor. See *cut* under *eye*.—**Zona denticulata**, the inner zone of the basilar membrane together with the limbus of the spiral lamina.—**Zona fasciculata**, the layer of the cortical part of the suprarenal body, just beneath the zona glomerulosa.—**Zona ganglionaris**, a collection of gray matter on the filaments of the cochlear branch of the auditory nerve.—**Zona glomerulosa**, the outer layer of the cortical part of the suprarenal body.—**Zona ignea**, same as *def.* 2.—**Zona incerta**, a continuation of the formatio reticularis forward under the optic thalamus.—**Zona levis**, same as *zona arcuata*.—**Zona mediana**, same as *zona cartilaginea*.—**Zona membranacea**, same as *basilar membrane* (which see, under *basilar*).—**Zona nervosa**, same as *zona arcuata*.—**Zona orbicularis**, a collection of circular fibers in the capsular ligament of the hip joint.—**Zona pectinata**, the outer zone of the basilar membrane, extending from the rods of Corti to the spiral ligament.—**Zona pellucida**, a transparent membrane surrounding the yolk of the ovum; so called from its appearance in the human ovum under the microscope. It is simply the wall of the ovum, corresponding to any other cell-wall. It is traversed by numerous, more or less evident, radiating pore-canal, through which spermatozoa are supposed to enter the ovum.—**Zona perforata**, the lower edge of the spiral groove of the cochlea.—**Zona radiata**, the zona pellucida when the radiating pore-canal are especially distinct.—**Zona repens**, same as *herpes zoster*. See *herpes*.—**Zona reticularis**, the inner layer of the cortical portion of the suprarenal body.—**Zona serpinigosa**, same as *def.* 2.—**Zona spongiosa**, the extreme dorsal tip of the posterior horn of the gray matter of the spinal cord.—**Zona tecta**, the inner part of the lamina spiralis membranacea, covered by the organ of Corti.—**Zona tendinosa**, a fibrous ring situated at each auriculoventricular opening in the heart.—**Zona Val-salvæ**, the membranous spiral lamina of the cochlea.—**Zona volatica**, same as *def.* 2.

zonal (zō'nāl), *a.* [*< L. L. zonalis, < L. zona, zone; see zone.*] 1. Having the character of a zone or belt.

Frequently storm clouds appeared zonal—that is, alternate portions positively and negatively electrified.

G. J. Symons, in *Modern Meteorology*, p. 163.

2. Of or pertaining to the rings, somites, or body-segments of an articulate or annulose animal; arthromeric; metameric; as, *zonal symmetry*, the serial homology or metameric symmetry of a segmented animal, as an arthropod or an annelid. See *symmetry*, 5 (*b*).

3. In *crystal.*, arranged in zones; as, the *zonal structure* of a mineral.—4. In *bot.*, noting that view of a diatom in which the zone or suture of the valves is presented to the eye—the "front view" of some writers.—5. In *hort.*, marked on the leaves with a zone or circle, as many pelargoniums, also called *horseshoe geraniums*.—**Zonal harmonic**. See *harmonic*.—**Zonal stratum**. See *stratum zonale*, under *stratum*.

zonally (zō'nāl-i), *adv.* In a zonal manner; in zones, or in the form of a zone.

Crystals of the hyacinth variety of quartz . . . contain numerous inclusions of anhydrite arranged zonally.

Amer. Nat., XXIII, 814.

Zonaria¹ (zō-nā'ri-ä), *n.* [*NL.* (Agardh, 1824), fem. of *L. zonarius*; see *zonary*.] A small genus of widely distributed phosphorous algae, of the order *Dicophyceæ*, having a more or less fan-shaped form obscurely marked with concentric zones, and roundish or linear sori formed beneath the cuticle of the frond.

Zonaria² (zō-nā'ri-ä), *n.* pl. [*NL.*, neut. pl. of *L. zonarius*; see *zonary*.] One of two primary groups (the other being *Inscoidae*) into which Huxley divided the decalcate *Mammalia*, consisting of those *Decidua* which have a zonary placenta; the *Zonoplacentalia*.

zonarioid (zō-nā'ri-oid), *a.* [*< Zonaria*¹ + *-oid*.] In *bot.*, pertaining to or resembling the genus *Zonaria*.

zonary (zō'nā-ri), *a.* [*< L. zonarius, < zona, a zone; see zone.*] Pertaining to or characterized by a zone; having or presenting the form of a belt or girdle. A zonary placenta is one

in which the fetal villi form a belt or zone. See *Zonaria*², *Zonoplacentalia*, and *zonular*.

The placenta of the dugong is zonary and non-deciduate. *Nature*, XL, 611.

zonate (zō'nāt), *a.* [*< NL. zonatus, < L. zona, zone; see zone.*] 1. In *bot.*, marked with zones or concentric bands of color.—2. In *zool.*, having zones of color or texture; belted, girdled, or ringed; zoned.

zonda (zon'jā), *n.* [Named from the village of *Zonda*.] A local foehn wind occurring at the eastern base of the Andes, in the vicinity of San Juan, Argentine Republic. It is a hot dry west wind blowing down from the Cordillera, and carrying clouds of dust and fine sand. It may occur at any season, but is especially frequent during July and August (mid-winter) when its high temperature and parching effects are especially noticeable. The name is also applied to a hot dry north wind occurring on the Argentine plains during the summer, and reported especially from the vicinity of Mendoza. This is essentially a desert wind, charged with sand, and oppressive and suffocating in its effects.

zone (zōn), *n.* [*< F. zone, < Sp. Pg. It. zona, < L. zona, < Gr. ζώνη, a girdle, belt, one of the zones of the sphere, < ζώνω, to gird.*] 1. A girdle or belt worn as an article of dress. [Now only poetical.]

Germination, in green, with a zone of gold about her waist.
B. Jonson, *Masque of Beauty*.

With a side
 White as Hebe's, when her zone
 Slept its golden clasp, and down
 Fell her kirtle to her feet. *Keats*, *Fancy*.

2. A belt or band round anything, as a stripe of different color or substance round an object; figuratively, any circumscribing or surrounding line, real or imaginary; a circuitous line, path, or course; an inclosing circle.

That milky way,
 Which nightly, as a circling zone, thou seest
 Powder'd with stars. *Milton*, *P. L.*, vii, 580.
 And four great zones of sculpture, set betwixt
 With many a mystic symbol, gird the hall.
Tennyson, *Holy Grail*.

Very frequently the colors form stripes or zones in the stone (Egyptian jasper), which are probably the result of decomposition of the upper surface.

E. W. Streeter, *Precious Stones*, p. 201.

3. Specifically, in *geog.*, one of five arbitrary divisions of the earth's surface, bounded by lines parallel to the equator, each named according to its prevailing temperature: a climatic belt. These climatic zones are (a) the *torrid zone*, extending from tropic to tropic, or 23½° north and 23½° south of the equator; (b) two *temperate zones*, extending from the tropics to the polar circles—that is, from the parallel of 23½° north or south to that of 66½° north or south, and therefore called the *north temperate* and *south temperate zones*; and (c) two *frigid zones*, extending from the polar circles to the north and south poles respectively.

4. Any continuous tract or belt differing in character from adjoining tracts; a definite area or region within which some distinguishing circumstances exist or are established: as, the *zones* of natural history, distinguished by special forms of vegetable or animal life; a *zone* of free trade; a free *zone* on the border of a country or between adjoining states. Naturalists formerly divided the sea-bottom into five zones in accordance with the depth of water covering each, which was supposed to determine its fauna and flora. They were called respectively *littoral*, *circumlittoral*, *median*, *inframedian*, and *abyssal*. Later researches have proved that the assumed facts were to a great extent erroneous, organisms supposed to be confined to the littoral zone having been found at the greatest depths. In geology *zone* has nearly the same meaning as *horizon*. A stratum, or a group of strata, may be characterized by the presence of a certain assemblage of fossils, or by one particular fossil; in such cases the most abundant or typical fossil may give a name to the subdivision in which it occurs, which will then be designated as the *zone* of that particular species. Thus, the Lower and the Middle Lias have together been divided into twelve zones, each characterized by the presence of a certain species of ammonite: as, the "zone of the *Arietites* (*Ammonites*) *raricostatus*," etc.

They [the people of Savoy] would . . . lose their commercial zone or free frontier with Switzerland.
C. K. Adams, *Democracy and Monarchy*, ix.

The zone of youthful fancy . . . is now well passed; the zone of cultured imagination is still beyond us.

Stedman, *Viet. Poets*, p. 15.

How vast must have been that earlier period wherein were deposited those fine alternations of lime and clay which form hills, such as Mont Perrier, several hundred feet in height, divisible into distinct zones, each characterized by peculiar assemblages of fossils.

Geikie, *Geol. Sketches*, v.

Attacks of a spasmodic or of a lethargic nature in hysterical patients can often be excited by touching or pressing upon certain spots or zones on the surface of the body.

Lancet, 1886, li, 1243.

5. In *math.*, a part of the surface of a sphere included between two parallel planes.—6. In *crystal.*, a series of planes having their lines of intersection parallel.—**Annual zone**. Same as *annual ring* (which see, under *ring*).—**Bathymetric zone**. See *bathymetric*.—**Cervical zone**, that part of the preg-

nant uterus, embracing about the lower fourth, within which attachment of the placenta is dangerous, as liable to cause alarming hemorrhage during childbirth. The centric attachment of the placenta in this zone constitutes placenta previa (which see, under *placenta*).—**Ciliary zone**, in *anat.*. See *ciliary*.—**Coralline zone**. See *coralline*.—**Epileptic zone**, an area of the skin covering the lower part of the face and the neck, irritation of which will excite an epileptic paroxysm. Brown-Séquard found that section of the spinal cord in the lumbar region in animals, usually guinea-pigs, was followed by epilepsy, and that the progeny of animals so treated had these epileptic zones.—**Epileptogenous or epileptogenic zone**. Same as *epileptic zone*.—**Hyperesthetic zone**, a hyper-sensitive portion of the integument, sometimes found, in cases of spinal paralysis, at the border of the affected part.—**Hypnogenic zone**, a place or region on the surface of the body stimulation or irritation of which tends to induce hypnotism. [Recent.]

Spots which have been described by Pitres as *hypnogenic zones*. *Bjornstrom*, *Hypnotism* (trans.), p. 18.

Hysteric zone, a part of the surface of the body pressure upon which will excite a paroxysm in cases of hysterical epilepsy.—**Intermediate zone of the stomach**, that part of the wall of the stomach, near the pylorus, where the peptic glands begin to disappear.—**Isothermal zones**. See *isothermal*.—**Lissauer's zone**. Same as *Lissauer's tract* (which see, under *tract*).—**Marginal zone**, the border where the synovial membrane is gradually converted into articular cartilage.—**Neutral, pectinate, pellucid, primordial zones**. See the adjectives.—**Posterior marginal zone**. Same as *Lissauer's tract* (which see, under *tract*).—**Three-mile zone**. See *mile*.—**Zone of defense**, in *fort.*, the belt of territory around a fortification which falls under the effective fire of the besieged.—**Zone of Haller**. Same as *zone of Zinn*.—**Zone of Lissauer**. Same as *Lissauer's tract*. See *tract*.—**Zone of operations** (*milit.*), the region containing the lines of operations of an army, extending from the base of operations to the objective point. See *strategy*.—**Zone of vegetation**, a belt of characteristic vegetable growth following a particular line of altitude on mountain sides.—**Zone of Zinn**. Same as *zone of Zinn*. See *zone*.

zone (zōn), *v.*; pret. and pp. *zoned*, ppr. *zoning*. [*< zone, n.*] 1. *trans.* To encircle with or as if with a zone; bring within a zone, or divide into zones or belts, in any sense.

I could hear he loved
 Some fair immortal, and that his embrace
 Had zoned her through the night.
Keats, *Endymion*, ii.

II. *intrans.* To be formed into zones.

What Mr. Lockyer had called the *zoning* of colour in the heavens. *Nature*, XXXVIII, 225.

zone-axis (zōn'ak'sis), *n.* In *crystal.*, the line in which all the planes of a zone would intersect if they were supposed to pass through the same point.

zoned (zōnd), *a.* [*< zone + -ed*.] 1. Wearing a zone, as a woman.—2. Having zones, or bands resembling zones; zonate.

zoneless (zōn'les), *a.* [*< zone + -less*.] Without a zone or girdle; ungirt; hence, loosely robed.

That reeling goddess with the zoneless waist.

Corper, *Task*, iii, 52.

zonic (zō'nik), *n.* [*< zone + -ic*.] A girdle; a zone; a belt. [Rare.]

I know that the place where I was bred stands upon a zonic of coal. *Smollett*, *Travels*, iv. (*Davies*).

zoniferous (zō-nif'ē-rus), *a.* [*< L. zona, zone, + ferre = E. bear*.] Having or bearing a zone; zoned.

Zonites (zō-nī'tēz), *n.* [*NL.* (Montfort, 1810), *< Gr. ζώνη, girdle, < ζώνω, to gird; see zone.*] In *conch.*, a genus of pulmonate gastropods, referred to the family *Helicidae*, or to the *Limacidae*, or to the *Vitrinidae*, and giving name to the *Zonitinae*. The species are numerous, as *Z. cellaria* (see *cellaria*). *Z. milium* is a very small species of the United States; *Z. unilobata* is known as the *open snail*. The genus in a broad sense includes species of *Umbonia* and related forms; but it is also restricted to about a dozen species of the Mediterranean region, as *Z. alpinus*.

Zonitidae (zō-nī'ti-dē), *n. pl.* [*NL.*, *< Zonites + -idae*.] A family of terrestrial gastropods, typified by the genus *Zonites*; same as *Vitrinidae*. *Trans. New Zealand Inst.*, 1883.

Zonitinae (zō-nī-ti-nē), *n. pl.* [*NL.*, *< Zonites + -inae*.] A subfamily of *Vitrinidae* or another family, typified by the genus *Zonites*, and including forms with a helicoid shell (into which the animal can completely withdraw) and with lateral bicuspid and marginal acute teeth.

Zonitis (zō-nī'tis), *n.* [*NL.* (Fabricius, 1775), *< Gr. ζώνη, fem. of ζώνω; see Zonites*.] A genus of blister-beetles, of the family *Cantharidae*, of wide distribution and comprising about 40 species, of which 6 are North American. They are very variable in color and size, but are distinguished by having the outer lobe of the maxilla not prolonged.

zonochlorite (zō-nō-klor'it), *n.* [*< Gr. ζώνη, girdle, + χλωρός, greenish-yellow, + -ite*.] A zeolitic mineral, perhaps related to thomsonite, occurring in massive form in cavities in amygdaloid; it often shows bands of different colors.

zonociliate (zō-nō-sil'i-āt), *a.* [*< L. zona, zone, + NL. ciliatus, ciliate.*] Zoned with a circlet

of cilia; encircled with eilia, as a trochosphere or telotrocha. See these words, and cut under *religer*.

The fertilized egg of the *Phylactohema* does not give rise to a *zonociliate* larva. *Encyc. Brit.*, XIX, 437.

zonoid (zō'noïd), *a.* [*< Gr. ζώνη, like a girdle, < ζών, girdle, + ιδος, form.*] Like a zone; pertaining to zones; zonular. [Rare.]

zonoplacental (zō-nō-plā-sen'tāl), *a.* [*< L. zona, girdle, + NL. placenta + -al.*] In *mammal.*, having a zonary deciduate placenta; of or pertaining to the *Zonoplacentalia*.

Zonoplacentalia (zō-nō-plas-en-tā'li-ā), *n.* *pl.* [*NL.*; see *zonoplacental*.] Those deciduate mammals in which the placenta is zonary, as contrasted with *Discoplacentalia*; the *Zonaria*. The carnivores, the elephant, and the hyrax are examples.

Zonotrichia (zō-nō-trik'i-ā), *n.* [*NL.* (Swainson, 1831), *< Gr. ζών, girdle, + τριχία, hair.*] A genus of large and handsome American finches, of the family *Fringillidae*; the crown-sparrows. The white-crowned is *Z. leucophrys*, abundant in many parts of North America. More numerous and familiar is the white-throated, or peabody-bird, *Z. albicollis*, whose white throat is sharply contrasted with the dark ash of the

Zonure (*Zonurus giganteus*).

genus of *Zonuridae*; so named from the rings of spiny scales on the tail, as of *Z. giganteus*.

Zoo (zō), *n.* [The first three letters of *zoological*, taken as forming one syllable.] With the definite article, the Zoological Gardens in London; also used of any similar collection of animals. [From a mere vulgarism, this corruption has passed into wide colloquial use.]

zoöamylin (zō-ō-am'i-lin), *n.* [*< Gr. ζῷον, animal, + E. amylin.*] Same as *glycogen*.

zoöbiotism (zō-ō-biō-tizm), *n.* [*< Gr. ζῷον, animal, + βίος, life, + -ism.*] Same as *biotics*.

zoöblast (zō-ō-blāst), *n.* [*< Gr. ζῷον, animal, + βλαστός, germ.*] An animal cell; a bioplast (which see).

Zoöcapsa (zō-ō-kap'si), *n.* [*NL.*, *< Gr. ζῷον, animal, + L. capsula, box, chest; see capsule.*] A genus of fossil barnacles of the Liassic period, representing the oldest known form of *Balanidae*.

zoöcarp (zō-ō-kārp), *n.* [*< Gr. ζῷον, animal, + καρπός, fruit.*] Same as *zoöspore*.

zoöcaulon (zō-ō-kā'lon), *n.* [*NL.*, *< Gr. ζῷον, animal, + καλός, stem, stalk; see caul3, caulis.*] The erect branching tentaculiferous colony-stock of some infusorians, as of the genus *Dendrosoma*. *W. S. Kent*.

zoöchemical (zō-ō-kem'ik-al), *a.* [*< zoöchem- + -ic.*] Of or pertaining to zoöchemistry.

zoöchemistry (zō-ō-kem'is-tri), *n.* [*< Gr. ζῷον, animal, + E. chemistry.*] Animal chemistry; the chemistry of the constituents of the animal body.

zoöchemy (zō-ō-kem-i), *n.* [*< Gr. ζῷον, animal, + E. chemy (F. chimie); see alchemy.*] Same as *zoöchemistry*. *Dunglison*.

zoöchlorella (zō-ō-klē-rel'ā), *n.* *pl. zoöchlorellæ (-æ).* [*NL.*, *< Gr. ζῷον, animal, + χλωρός, pale-green, + dim. -ella.*] One of the green pigmentary particles, or minute corpuscles of green coloring matter, which are found in various low invertebrates, as the hydras among polyps and the stentors among infusorians. Compare *zoöanthella*.

zoöcyst (zō-ō-sist), *n.* [*< Gr. ζῷον, animal, + κύστις, bladder.*] A cyst, formed by various protozoans and protophytes, whose contents break up into many germinal granules or spores; a kind of sporocyst.

zoöcystic (zō-ō-sis'tik), *a.* [*< zoöcyst + -ic.*] Pertaining to or of the nature of a zoöcyst.

zoöcytial (zō-ō-sit'i-al), *a.* [*< zoöcytium + -al.*] Pertaining to or of the nature of a zoöcytium.

zoöcytium (zō-ō-sit'i-um), *n.* *pl. zoöcytia (-ā).* [*NL.*, *< Gr. ζῷον, animal, + κύτος, cavity.*] The common gelatinous matrix or support of certain compound or colonial infusorians, composed of a substance secreted by and containing the individual animalcules; an infusorial syncytium; a zoöthecium. Compare *zoöndrium*. See cut under *Epistylis*.

zoöndrial (zō-ō-den'dri-āl), *a.* [*< zoöndrium + -al.*] Of the nature of or pertaining to a zoöndrium.

zoöndrium (zō-ō-len'dri-nm), *n.* *pl. zoöndria (-ā).* [*NL.*, *< Gr. ζῷον, animal, + δένδρον, tree.*] The zoöcytium or zoöthecium of certain infusorians, which is much branched or of arborescent form. *W. S. Kent*. See cut under *Epistylis*.

zoödynamic (zō-ō-dī-nam'ik), *a.* [*< Gr. ζῷον, animal, + δυναμικός, dynamic; see dynamic.*] Of or pertaining to zoödynamics.

zoödynamics (zō-ō-dī-nam'iks), *n.* [*Pl. of zoödynamic (see -ics).*] The dynamics of the animal body; the science of the vital powers of animals; animal physiology, as a branch of biology; correlated with *zoöphysics*.

zoöa, **zoöal**, *n.* See *zoöa*, *zoöal*.

zoöcial (zō-ō-shi-āl), *a.* [*< zoöci-um + -al.*] Having the character of a zoöcium; of or pertaining to the zoöcia of polyzoans.

zoöcium (zō-ō-si-um), *n.* *pl. zoöcia (-ā).* [*< Gr. ζῷον, animal, + οἶκος, house.*] The ectocyst, or outer chitinous or calcified cell, in which a polypide of the *Polyzou* is lodged, and into which a polypide can be retracted after protrusion; one of the cells of the zoöcium, containing a polypide. It is the cuticle of the polypide itself, dense and tough, or hard, changing without solution of continuity into the soft delicate pellicle at the mouth of the animalcule. In the ectoproctous polyzoans it forms a case or shield into which the soft protrusible parts of the polypide can be withdrawn. See *ectocyst*, and cut under *Plumatella*.

zoöform, *a.* See *zoöform*.

zoöerythrin (zō-ō-e-rith'rīn), *n.* [*< Gr. ζῷον, animal, + ἔρυθρος, red, + -in.*] 1. A red coloring matter obtained from the plumage of the *Musophagidae* or turakos, giving a continuous spectrum. See *turacin*.—2. A kind of red pigment of the lipochrome series widely diffused in sponges, and regarded as having a respiratory function. *W. J. Sollas*, *Encyc. Brit.*, XXII, 420.

Also *zoöerythrin*.

zoöfulvin (zō-ō-ful'vin), *n.* [*< Gr. ζῷον, animal, + L. fulvus, tawny, + -in.*] A yellow coloring matter obtained from the plumage of the *Musophagidae* or turakos, showing two absorptive bands not the same as those of turacin.

zoögamete (zō-ō-ga-mēt), *n.* [*NL.*, *< Gr. ζῷον, animal, + γαμή, a wife, etc.*] In bot., a motile gamete. Also *planogamete*.

zoögamous (zō-ō-gā-mus), *a.* [*< zoögam- + -ous.*] Of or pertaining to zoögamy; noting the pairing of animals or their sexual reproduction.

zoögamy (zō-ō-gā-mī), *n.* [*< Gr. ζῷον, animal, + γαμός, marriage.*] The coupling, mating, or pairing of animals of opposite sexes for the purpose of reproduction or propagation of their kind; sexual reproduction; gamogenesis.

zoögen (zō-ō-jen), *n.* [*< Gr. ζῷον, animal, + γενεή, producing; see -gen.*] A glairy organic substance found on the surface of the thermal waters of Baden and elsewhere. Also called *zoödin*.

zoögenic (zō-ō-jen'ik), *a.* [*< zoögen + -ic.*] Of or pertaining to zoögeny, or the origination of animals.

zoögeny (zō-ō-jē-nī), *n.* [*< Gr. ζῷον, animal, + γενεή, production; see -geny.*] The fact or the doctrine of the origination of living beings and the formation of their parts or organs. Also *zoögonny*.

zoögeog. An abbreviation, used in this work, of *zoögeography*.

zoögeographer (zō-ō-jē-ōg'ra-fēr), *n.* [*< zoögeograph- + -er.*] One who studies the geographical distribution of animals, or is versed in zoögeography.

It is therefore . . . the business of the zoögeographer, who wishes to arrive at the truth, to ascertain what groups of animals are wanting in any particular locality.

Encyc. Brit., III, 788.

zoögeographic (zō-ō-jē-ō-graf'ik), *a.* [*< zoögeograph- + -ic.*] Of or pertaining to zoögeography; faunistic; chorological.

zoögeographical (zō-ō-jē-ō-graf'ik-āl), *a.* [*< zoögeographic + -al.*] Same as *zoögeographic*.

zoögeography (zō-ō-jē-ōg'ra-fī), *n.* [*< Gr. ζῷον, animal, + E. geography.*] The science or the description of the distribution of animals on the surface of the globe; faunal or faunistic zoölogy; animal chorology; correlated with *phytogeography*. This is an important branch of zoölogy, of much intrinsic interest in several respects, and of special significance in its bearing upon the questions of the origin of species and their modification under climatic and other physical conditions of environment. It has been much studied of late years with the result of mapping the land-surface of the globe into several major and numerous minor areas, which can be bounded and graphically represented in colors with almost the precision attained in depicting civil or political boundaries. Zoögeography is related to paleontology as the distribution of animals in space is related to their succession in time; but the principles of zoögeography are of course as applicable to any former as to the present dispersion of species on the face of the globe. See *proince*, 6, and *region*, 7.

zoöglæa (zō-ō-glē'ā), *n.* *pl. zoöglææ (-æ).* [*NL.*, *< Gr. ζῷον, animal, + γλοιή, a sticky substance.*] 1. A peculiar colony of *Schizomycetes* in which they form a jelly-like mass by the swelling up of their cell-membranes. It was formerly regarded as a distinct genus, but is now known to be a kind of resting stage in which the various elements are glued together by their greatly swollen and diffused cell-walls becoming contiguous. It corresponds to the palmella stage of certain of the lower algae.

White-throated Sparrow, or Peabody-lark (*Zonotrichia albicollis*).

breast. In the adult the head is striped with black and white, there is a distinct yellow spot before each eye, and the edge of the wing is yellow. The length is 6½ inches, the extent 9½. This sparrow abounds in shrubbery of the eastern half of North America, and has a limpid pleasing song, some notes of which are rendered in the word *peabody*. *Z. querula* is Harris's finch, of the Missouri and Mississippi region; the male when adult has nearly the whole head hooded with jet-black. *Z. coronata*, of the Pacific slope, is the golden-crowned.

zonula (zō-nū-lā), *n.* *pl. zonulæ (-læ).* [*NL.*; see *zonule*.] In *anat.* and *zool.*, a small zone, belt, or ring; a zonule.—**Zonula ciliaris**. Same as *zonule of Zinn*.—**Zonula of Zinn**. Same as *zonule of Zinn*.

zonular (zō-nū-lār), *a.* [*< zonule + -ar3.*] 1. Of or pertaining to a zone or zonule; zonary; zoned.—2. In *zool.*, specifically, diffuse; applied to a diffuse form of placenta. See *zonary*.

The zonular type of a placenta. *Dana*.

Zonular cataract, a form of cataract, occurring usually in young children, in which the opacity is situated between the cortex and the nucleus of the lens.

zonule (zō-nū-lē), *n.* [*< L. zonula, dim. of zona, girdle; see zone.*] A little zone, belt, or band; a zonula.—**Zonule of Zinn**, the suspensory ligament of the crystalline lens of the eye. See under *suspensory*.

zonulet (zō-nū-lēt), *n.* [*< zonule + -et.*] A little zone or girdle.

That riband 'bout my Julia's waste,
... that zonulet of love.

Herrick, Upon Julia's Riband.

zonure (zō-nūr), *n.* [*< NL. Zonurus.*] Any lizard of the genus *Zonurus* in a broad sense, or of the family *Zonuridae*; as, the rough-tailed *zonure*, *Zonurus cordylus*.

Zonuridæ (zō-nū-rī-dē), *n. pl.* [*NL.*, *< Zonurus + -idæ.*] A South African and Madagascar family of agamoid eriglossate hœertilians, with erineiform intercalicles, short, simple tongue, and roofed-over supratemporal fossæ, typified by the genus *Zonurus*. The family was formerly much more loosely characterized, and then contained various forms from different parts of the world, which have since been separated as types of other families.

Zonurinae (zō-nū-rī-nē), *n. pl.* [*NL.*, *< Zonurus + -inae.*] A subfamily of *Zonuridæ*, containing normally laeertiform species with well-developed limbs, and including the greater part of the family; distinguished from *Chamaesaurinae*.

Zonurus (zō-nū-rus), *n.* [*NL.* (Merrem), *< Gr. ζών, a belt, zone, + οὐρά, tail.*] The typical

Bacteria sometimes form a jelly-like mass by the swelling up of their cell-membranes; this is the *zoöglæa* stage. *Bessey, Botany*, p. 212.

2. A massing together of micro-organisms which occurs in a certain stage of their development, the collection being surrounded by a gelatinoid envelop.

Liquids in which any of these Schizomycetes are actively developing themselves usually bear on their surface a gelatinous scum, which is termed by Prof. Cohn the *Zoöglæa*. *W. E. Carpenter, Micros.*, § 303.

zoöglæic (zō-ō-glē'ik), *a.* [*< zoöglæa + -ic.*] Of the nature of zoöglæa; pertaining to zoöglæa. **zoöglæoid** (zō-ō-glē'oid), *a.* [*< zoöglæa + -oid.*] In *bot.*, resembling, characteristic of, or belonging to the zoöglæa stage or condition of a micro-organism.

zoögonidium (zō-ō-gō-nid'i-um), *n.*; pl. *zoögonidia* (-ä). [*N.L.*, *< Gr. ζῳγον, animal, + NL. gonidium.*] In *bot.*, a locomotive gonidium; a gonidium provided with cilia, and hence capable of locomotion.

Each *zoögonidium* breaks itself up into sixteen new *zoögonidia*, forming sixteen small and new colonies. *Bessey, Botany*, p. 221.

zoögonous (zō-ō-gō-nūs), *a.* [*< Gr. ζῳγονος, producing animals, < ζῳγον, animal, + -γος, producing: see -gonous.*] Same as *viriparous*.

zoögony (zō-ō-gō-ni), *n.* [*< Gr. ζῳγονία, production of animals, < ζῳγον, animal, + -γία, production: see -gony.*] Same as *zoögony*.

zoögraft (zō-ō-grāft), *n.* [*< Gr. ζῳγραφ, animal, + E. graft.*] In *surg.*, a piece of living tissue taken from one of the lower animals to supply a defect in the human body by grafting it on the latter. Also *zoöplastic graft*.

zoögrapher (zō-ō-grā-fēr), *n.* [*< zoögraph-y + -er.*] A zoögraphist.

zoögraphic (zō-ō-grāf'ik), *a.* [*< zoögraph-y + -ic.*] Descriptive of animals; pertaining to zoögraphy.

zoögraphical (zō-ō-grāf'i-kal), *a.* [*< zoögraphic + -al.*] Same as *zoögraphic*.

zoögraphist (zō-ō-grā-fist), *n.* [*< zoögraph-y + -ist.*] One who describes or depicts animals; a descriptive zoölogist.

zoögraphy (zō-ō-grā-fi), *n.* [*< Gr. ζῳγραφ, animal, + -γραφία, < γραφω, write.*] The description of or a treatise on animals; descriptive zoölogy.

zoögyroscope (zō-ō-jī-rō-skōp), *n.* [*< Gr. ζῳγραφ, animal, + E. gyroscope.*] An application of the principle of the zoetrope in which a series of pictures are placed in a rotating frame, and, as they pass between a lantern and a lens, are thrown in extremely rapid succession on a screen, so as to form a continuous but constantly changing picture. This device is used in the exhibition of continuous series of instantaneous pictures of animals in motion, etc. *E. H. Knight*.

zoöid (zō-oid), *a.* and *n.* [*< Gr. ζῳονίδης, like an animal, < ζῳον, animal, + -ίδης, form.*] **I.** *a.* Like an animal; of the nature of animals; having an animal character, form, aspect, or mode of existence, as an organism endowed with life and motion. See **II**.

II. *n.* In *biol.*, something like an animal; that which is of the nature of an animal, yet is not an animal in an ordinary sense, and is not the whole of an animal in a strict sense; one of the "persons" or recognizably distinct entities which compose a zoön; that product of any organism, whether of animal, vegetable, or equivocal character, which is capable of spontaneous movements, and hence may have an existence more or less apart from or independent of the parent organism. The biological conception of a zoöid is a fundamental one bordering upon an almost metaphysical definition of what may constitute individual identity or non-identity in a given case; the term covers a multitude of cases which seem at first sight to have little in common, and its use in ordinary zoölogy and botany is consequently various. The general sense of the word is subject to the following specifications: (*a*) An ambiguous or equivocal organic body intermediate between a plant and an animal, and not distinctly either one or the other; a micro-organism or microbe not amenable to ordinary classification in natural history, as bacteria, bacilli, and micrococci; a protistan, as a moner; one of the lowest protozoans; a protophyte. Such zoöids are microscopic, and for the most part of extreme minuteness. See the distinctive names, and *Monera, Primordia, Protista, Protophyta, Protozoa*. (*b*) One of certain peculiar cells of multicellular animals and plants which are endowed with special activities, have as it were an individuality of their own and are capable of a sort of separate existence. Zoöids of this class are mainly germinal or reproductive. The female germ (ovum) and the corresponding male element are respectively types of the whole. They occur under many modifications, which receive distinctive names; many of the smallest and simplest forms are indifferently known as *spores*. See *spore*, *spore-formation*, *ovospore*, *zoospore*, *sporozooid*, *anthozooid*, *spermatozooid*, and *sper-*

matozoön, with various cuts. The foregoing definitions are independent of any distinction to be drawn between plants and animals; the following are zoölogical. (*c*) Any animal organism which has acquired separate existence from another by partition of that other into two or more in the processes of fission, gemination, and the like. Such cases are numerous and diverse. Viewing the zoön or zoölogical unit as the entire product of an impregnated ovum, the parts or persons into which it may be subsequently separated, without any true sexual generation, and consequently without the origination of a new zoön, are appropriately termed *zoöids*. The simplest case is when a zoön breaks into two or more pieces, and every piece proceeds to grow the part which it lacks, and thus becomes wholly like the organism from which it was detached. Various annelids offer a case in point. Another and large class of cases is furnished by hydrozoans which suffer segmentation directly, or detach from their main stock various parts, as free medusoids and the like, these zoöids serving to found new organisms. Allman defines the zoöid of a hydrozoan as a more or less independent product of non-sexual reproduction. Proliferation or strobilation of parts which may become detached is also well illustrated in the proglottides or deutostolices which form the joints of tapeworms; these are zoöids in so far as the parent worm is concerned, consisting of detachable genitals containing the elements of a new sexual generation. A similar multiplication by zoöids without generation takes place among tunicates; it is unknown of true vertebrates. One of the most interesting cases is afforded in the parthenogenesis of some insects, as aphids, in which, by a sort of internal gemination, swarms of zoöidal aphids are budded in succession from one another to several removes from the original impregnation. The term *zoöid* with some writers specifies all these "inferior individuals" which thus intervene in alternation of generation between the products of proper sexual reproduction; and such have been described as "the detached portions of an individual in discontinuous development." (*d*) Any one of the recognizably distinct persons of a compound organism, whether actually detached or detachable or not; any member of a colonial or social aggregate, as the polypites of a polypid, the polypides of a polyzoy, and the like. Such zoöids offer every degree of separateness or separability. In some cases they are extremely numerous, all alike, and inseparable from the common stock which they fabricate and inhabit, as the members of a coral or sea mat. In other cases they are less numerous, and but slightly connected, and all alike, as the several members of a composite sea-anemone of the genus *Zoanthus* (see cut there). But the zoöids of many hydrozoans, for instance, are quite different in both form and function, in the same individual, for the purpose of division of labor; and the zoöids which thus act as the different organs of one individual are commonly distinguished by name, as *gonozooids*, *gasterozooids*, *dactylozooids*, *spermatozooids*, etc. See the distinctive names. Also *zoönite* (a mistaken use).

zoöidal (zō-oi'dal), *a.* [*< zoöid + -al.*] Same as *zoöid*.

zoöks (zōks), *interj.* A minced oath: same as *gaulzoöks*. [Obsolete or (rarely) archaic.]

Zoöks! see how brave they march.

Sheridan (?), *The Camp*, i. 2.

Zoöks! are we pilchards, that they sweep the streets,

And count fair prize what comes into their net?

Browning, *Fra Lippo Lippi*.

zoöl. An abbreviation of *zoölogy*.

zoölater (zō-ol'a-tēr), *n.* [*< zoölatry, after idolatry.*] One who worships animals or practises zoölatry.

zoölatria (zō-ō-lā'tri-ä), *n.* [*N.L.*] Same as *zoölatry*.

The system of *zoölatria*, or animal worship, was said to have been introduced into Egypt by King Kekau of the 11th dynasty. *W. E. Cooper, Archaic Dict.*, p. 57.

zoölatrous (zō-ol'a-trūs), *a.* [*< zoölatry + -ous.*] Worshipping animals; practising zoölatry; of or relating to zoölatry.

zoölatry (zō-ol'a-tri), *n.* [*< N.L. zoölatria, < Gr. ζῳω, animal, + λατρεία, worship.*] The worship of particular animals, as in the religion of the ancient Egyptians and of many other primitive peoples, either as representatives of deities, or on account of some fancied qualities or relations.

zoölite (zō-ō-lit), *n.* [*< Gr. ζῳω, animal, + λίθος, stone (see -lite).*] A fossil animal; an animal substance petrified. Also *zoöolith*.

zoöolith (zō-ō-lith), *n.* Same as *zoölite*.

zoölitic (zō-ō-lith'ik), *a.* [*< zoöolith + -ic.*] Same as *zoölitic*.

zoölitic (zō-ō-lit'ik), *a.* [*< zoölite + -ic.*] Having the character of a zoölite; relating to zoö-lites. Also *zoölitic*.

zoöloger (zō-ol'ō-jēr), *n.* [*< zoölog-y + -er.*] A zoölogist. [Now rare.]

zoölogic (zō-ō-loj'ik), *a.* [*< zoölogy + -ic.*] Same as *zoölogical*.

zoölogical (zō-ō-loj'i-kal), *a.* [*< zoölogie + -al.*] Of or pertaining to zoölogy.—**Zoölogical garden**, a park or other large inclosure in which live animals are kept for public exhibition.—**Zoölogical province, region**, etc., in *zoögeogr.*, one of the faunal areas, varying in extent, into which the land-surface of the globe is naturally divisible with reference to the geographical distribution of animals. (See *province*, 6, *region*, 7, and *zoöogeography*.) Corresponding divisions of the waters of the globe may take the same name when their surface extent is considered, or are distinctively named (see *Arctalia*, etc.). Zoölogical areas regarded vertically, or as to depth of water, are often called *zones* or *belts*. See *zone*, *n.*, 4.

zoölogically (zō-ō-loj'i-kal-i), *adv.* In the manner of a zoölogist; on the principles or according to the doctrines of zoölogy; from a zoölogical standpoint.

zoölogist (zō-ol'ō-jist), *n.* [*< zoölogy + -ist.*] One who is versed in zoölogy; a biologist.

zoölogize (zō-ol'ō-jiz), *v. i.* To study zoölogy practically.

zoölogy (zō-ol'ō-jī), *n.* [= *F. zoologie* = *Sp. zoología* = *Pg. It. zoologia* = *G. zoologie*, *< N.L. zoologia*, *< Gr. ζῳον, animal, + -λογία, < λέγω, speak: see -ology.*] 1. The science of animals; the natural history of the animal kingdom; the body of fact and doctrine derived from the scientific study of that series of organisms whose highest term is man; correlated with *phytology* (or *botany*) as one of the two main branches of biology. The connotation which the term has acquired during the last fifty years is very extensive, as a result of the application to zoölogical science of the most general laws and principles of biology. So far is zoölogy freed from the former restriction of its scope to the mere formalities of description, classification, and nomenclature (which constitute only *systematic zoölogy*) that it now includes the results of all the biological sciences in so far as these are applicable to the study of animal structure and function. Such are *phylogeny*, or the origination of species, genera, etc.; *ontogeny*, or the origination of the individual animal; *embryology*, or the prenatal life-history of organisms; *paleontology* or *paleozoölogy*, the history of animals in geologic time; *zoögeography*, the history of animals as to their spatial relations; *zoöonomy* or *zoöphysics*, the comparative anatomy of animals; *zoödynamic* or *biodynamics*, animal physiology; *zoöchemistry*, the chemistry of animal substances and tissues; *zoöpsychology*, the science of animal instincts; *zoötechnics*, *biotechnics*, or *threumatology*, which regards the relations of living animals to man; and various other cognate branches of the general science. The name *zoölogy* is an old one, and some of its branches have been cultivated from antiquity. One of the earliest classifications of animals in which a modern zoölogical group can be clearly recognized is that ascribed to Moses, which was based primarily upon certain hygienic and sacerdotal considerations: for the "clean" beasts that "cleave the hoof" are ruminants; certain "unclean" birds are carrion-feeding birds of prey, as the vulture; and the non-ruminant artiodactyls (swine) are characterized with special emphasis. The germ of modern zoölogy, as of other sciences, is commonly ascribed to Aristotle. Though he tabulated no scheme, his three treatises on zoölogical subjects include a classification which shows great discernment. He divided the animal kingdom into two main branches: (1) *ἑρμα, ἑρμαία, &c.*, or "blooded" animals, in the four classes of mammals, birds, reptiles, and fishes—the *Vertebrata*, and nearly as they stand to-day; (2) *ἄρμα, ἄρμα, &c.*, or "bloodless" animals, exactly the *Invertebrata*, of which he had four classes, his *Μαλακία* being cephalopods; *Μακροκόρρακα*, crustaceans; *Ἐρτορα*, insects (other arthropods than crustaceans); and *Ὀστρακόδερματα*, univalve and bivalve mollusks (together with sea-urchins). Pliny the naturalist was an industrious and indiscriminate compiler; and no name of special note in zoölogy appears again until the middle of the sixteenth century, when the almost simultaneous works of three authors securely founded the science and greatly enlarged its scope. Wotton (1552) followed Aristotle, but added to the system the *Zoophyta* (which long afterward became the *Fernes* of Linnaeus and the *Radiata* of Cuvier, and continue to be the "zoophytes" of the present day); Gesner and Belon published treatises in 1555; and in 1560 was started at Naples a society which had zoölogy among its objects, the *Academia Secretorum Naturæ*, suppressed by the church. The period between Gesner and Linnaeus is sometimes styled the "heroic age" of zoölogy. The advance upon Gesner was comparatively unmarked for a hundred years from his death in 1565; but the latter half of the seventeenth century witnessed great progress. The collection of animals from distant parts of the world increased; such anatomical examinations as had been practicable and had long been practised without the aid of the microscope were carried on with that instrument; and several still-existing societies were founded—the *Academia Naturæ Curiosorum* (in 1651), the *Royal Society* (chartered in 1662), and soon afterward the *Paris Academy*, under Louis XIV. The immediate predecessor of Linnaeus in this period was John Ray (1628-1705), who fixed the word *species* in the sense it was to bear from his day to Darwin, and did more than any other person to make the "Systema Naturæ" of the Swedish naturalist possible. This work passed through twelve editions (1735-68) in the lifetime of its author; the present binomial system of nomenclature was first applied consistently to zoölogy in the tenth edition (1758). Linnaeus also gave fixity to certain graded groups above the species—namely, the genus, order, and class of the "Regnum Animale"—and he recognized the variety below the species. The classes in 1766 were six: *Mammalia*, with *Ordres*; *Avēs*, *Ordres*; *Amphibia*, *Ordres*; *Pisces*, *Ordres*; *Insecta*, *Ordres*; *Fernes*, *Ordres*. The Linnaean diagnoses were always crisp and sententious, if not always correct; and, faulty or inadequate as many of them may now appear to be, the practical convenience of this machinery of classification and nomenclature is inestimable. Though the notion of the fixity of species and other groups as special creations, to which this system gave rise, is now known to be radically fallacious, the Linnaean classification acquired almost the character of dogma, such as had many centuries before attached to the writings of Aristotle and to the Mosaic traditions. This system may be said to have culminated with the close of the eighteenth century; and the early years of the nineteenth wrought important changes, both in form and substance, notably at the hands of Lamarck and Cuvier. Lamarck was the pivot upon which zoölogy turned from Linnaeus to Darwin. His "Zoölogical Philosophy" of 1809 is separated by a half-century to a year from the "Systema Naturæ" of 1758, and by exactly a half-century from Darwin's "Origin of Species" which was first published in November, 1859. Lamarckianism brought up the whole subject of modern

evolution as opposed to special creation, and the variability of organisms by their aptency, as opposed to their fixity in character. Lamarck recognized the two Aristotelian main branches as *Vertebrata* and *Invertebrata*, the former with 1, the latter with 12 classes, and both with many ordinal and lower groups. Cuvier was profoundly versed in comparative anatomy, gave also special prominence to paleontology, and reached the conclusion (1-12) that all animals are modeled upon four types, for which he adopted the names *Vertebrata*, with 4 classes; *Mollusca*, 6 classes; *Articulata*, 4 classes; *Radiata*, 5 classes—each with more or fewer orders. Except the first of these (borrowed from Lamarck and so from Aristotle), none of these "types" are found to hold; and few of the classes or orders are now accepted as framed by Cuvier, whose views and methods in the main were upheld in England by Owen. Cuvier's system was completed in 1829. Among the last notable views of classification before the appearance of Darwinism are those of Leuckart (1818), giving 5 types and 11 classes of invertebrates (without the protozoans); of H. Milne Edwards (1855); and of L. Agassiz (1859). The period between Lamarck and Darwin was one of extraordinary activity in all branches of zoological investigation, involving the accumulation of a wealth of material, the description of thousands of new genera and species, and the multiplication of distinctions founded upon little difference; but philosophical generalizations did not keep pace with the elaboration of analytical details. Zoological systems in various departments became almost as numerous as the specialists engaged; and the subject acquired a huge literature, descriptive, iconographic, and classificatory, as well as controversial. This aspect of zoology has continued during the past thirty years or so (1859-96); but the real history of the zoology of this period is the history of Darwinian evolution, or the application of general principles of individual development (ontogeny) to the solution of broader biological problems (phylogeny)—the development of the theory of evolution being itself an illustration of its own underlying principle.

2. Zoögraphy; the written description of animals; a treatise on animals, especially a systematic treatise, or zoölogical system. Several of the main classificatory divisions of the animal kingdom represent formally named departments of systematic zoology. Such are *mammalogy* or *mastology* or *therology*, the formal science of mammals; *ornithology*, of birds; *herpetology*, of reptiles, including amphibians; *ichthyology*, of fishes in their several classes; *conchology* or *malacology*, of mollusks; *carcinology* or *crustaceology*, of crustaceans; *entomology*, of insects (more extensive than all the others combined); *helminthology*, of worms; and *zoophytology*, of zoöphytes. From some of these again subdivisions are formed, in consequence either of the intrinsic importance of certain of their subjects or of the special activity of investigation of these subjects—as, for example, *anthropology* (including *ethnography* and *sociology*), or the particular study of man from a biological standpoint; *cetology*, the study of whales as differing much from ordinary mammals; *selachology*, of one of the classes of fishes; *ascidiology*, of the connecting links between invertebrates and ordinary vertebrates; and especially of *bacteriology*, the lately created science of microbes or micro-organisms, which probably of all the departments of zoology has the most direct and important bearing upon human welfare and happiness.

Zoöloog, *n.* and *a.* See *Zoöla*.

zoömagnetic (zō-ō-mag-net'ik), *a.* [*zoömagnetism* + *-ic*.] Of or pertaining to zoömagnetism.

zoömagnetism (zō-ō-mag'ne-tizm), *n.* [*Gr. ζῶον, animal*, + *E. magnetism*.] Animal magnetism.

Turning to the other subjects of which Dr. Liébeault treats (in his *Thérapeutique Suggestive*, Paris, 1891), the most remarkable, and almost the most puzzling, chapter is on *zoömagnetism*. *Proc. Soc. Psychological Research* (London), July, 1891, p. 261.

zoömancy (zō-ō-man-si), *n.* [*Gr. ζῶον, animal*, + *μαντία, divination*.] The pretended art of divination from observation of animals, or of their actions under given circumstances.

zoömantic (zō-ō-man'tik), *a.* [*zoömancy* + *-ic*.] Of or pertaining to zoömancy.

zoömechanics (zō-ō-mē-kan'iks), *n.* [*Gr. ζῶον, animal*, + *E. mechanics*.] Same as *zoö-dynamics*.

zoömelanin (zō-ō-mel'ā-nin), *n.* [*Gr. ζῶον, animal*, + *μελάς (melas)*, black, + *-in*.] A black pigment derived from the feathers of some birds.

zoömetric (zō-ō-met'rik), *a.* [*zoömetr-y* + *-ic*.] Of or pertaining to zoömetry.

zoömetry (zō-ō-mē'tri), *n.* [*Gr. ζῶον, animal*, + *μετρία, measure*.] Measurement of the proportionate lengths or sizes of the parts of animals; correlated with *anthropometry*.

zoömorphic (zō-ō-mōr'fik), *a.* [*Gr. ζῶον, animal*, + *μορφή, form*.] 1. Representative of animals, or of their characteristic forms, as a work of art; of or pertaining to zoömorphism; correlated with *anthropomorphism*.—2. Especially, representing or symbolizing the conception of a god under the form of an animal whose characteristic traits or habits suggest the idea attached to the god. The most thoroughly zoömorphic religion was probably that of the ancient Egyptians, resulting in a complex system of zoölatry, many elements of which were appropriated and adapted by the Greeks and Romans.

Oghams, as is well known, occur on some of the crosses bearing the interlaced ornamentation and *zoomorphic* designs found on the Manx crosses.

N. and Q., 7th ser., II, 240.

Under Dynasty XII, the gods that had previously been represented in art as beasts appear in their later shapes, often half anthropomorphic half *zoomorphic*, dog-headed, cat-headed, hawk-headed, bull-headed men and women.

Nineteenth Century, XX, 428.

zoömorphism (zō-ō-mōr'fizim), *n.* [*zoömorphism* + *-ism*.] 1. The character of being zoömorphic; zoömorphic state or condition; representation or exhibition of animal forms as distinguished from the human form; especially, the characterization or symbolization of a god in animal form. Compare *anthropomorphism*.—2. The conception or representation of men or supernatural beings under the form of animals, or of men or gods transformed into beasts; the attribution of human or divine qualities to beings of animal form; worship of the images of animals; zoötheism.

Zoomorphism is much more absurd than *Anthropomorphism* after all. Surely the rational mode is to employ the highest conceptions you can, while freely acknowledging their utter inadequacy.

Miscell., Nature and Thought, p. 205.

zoömorphic (zō-ō-mōr'fik), *a.* [*zoömorphic* + *-ic*.] Same as *zoömorphism*.

zoön (zō'on), *n.*; pl. *zōō* (zō-ō). [*NL.*, < *Gr. ζῶον, an animal*; cf. *ζωή, life*; < *ζῆν, ζῆν, Ionic ζῶεν, live*.] An animal form containing all the elements of a typical organism of the group to which it belongs; a morphological individual regarded as the whole product of an impregnated ovum, which may or may not be divided into persons or zooids without true generation. See *zooid*.

It is urged that whether the development of the fertilized germ be continuous or discontinuous is a matter of secondary importance; that the totality of living tissue to which the fertilized germ gives rise in any one case, is the equivalent of the totality to which it gives rise in any other case, and that we must recognize this equivalence, whether such totality of living tissue takes a concrete or a discrete arrangement. In pursuance of this view a zoological individual is constituted either by any such single animal as a mammal or bird, which may properly claim the title of a *zoön*, or by any such group of animals as the numerous Medusæ that have been developed from the same egg, which are to be severally distinguished as zooids.

H. Spencer, *Prin. of Biol.*, § 73.

Zoa impersonalia, organisms resulting from the coalescence or confluence of zoons, as of many sponges, which thus lose their "personality."

The remarkable cases (among sponges) of *zoa impersonalia*, or what we should call degraded colonies.

A. Hyatt, *Proc. Bost. Soc. Nat. Hist.*, 1881, p. 393.

zoönal (zō-ō-nāl), *a.* [*Irreg.* < *zoön* + *-al*.] Having the character of a zoön; of or pertaining to zoa.

zoönerythrin (zō-on-e-rith'rin), *n.* [*Irreg.* < *Gr. ζῶον, animal*, + *ερυθρός, red*, + *-in*.] Same as *zoöerythrin*. Also *zoönerythrine*.

zoönic (zō-on'ik), *a.* [*Irreg.* < *Gr. ζῶον, animal*, + *-ic*.] Relating to animals; obtained or derived from animal substance; as, *zoönic acid*.—**Zoönic acid**, a name given by Berthollet to acetic acid in combination with animal matter, obtained by distilling animal matter.

zoönite (zō-ō-nit), *n.* [*Irreg.* < *Gr. ζῶον, animal*, + *-ite*.] 1. One of the rings, segments, or somites of which the body of a worm, crustacean, insect, vertebrate, or other segmented or articulated animal is composed; a zomule; a metamere or an arthromere of an articulated invertebrate; a diarthromere of a vertebrate; used generically for any segment, to which special names are given in special cases.—2. Same as *zooid*; a mistaken use of the word. *Eng. Cyclop.* (Zool.), IV, 561. (*Encyc. Diet.*)

zoönitic (zō-ō-nit'ik), *a.* [*zoönite* + *-ic*.] Of or pertaining to a zoönite; somitic.

zoönomia (zō-ō-nō-mi-ā), *n.* [*NL.* (the title of a celebrated treatise by Dr. Erasmus Darwin); see *zoönomy*.] Same as *zoönomy*.

zoönomic (zō-ō-nōm'ik), *a.* [*zoönomy* + *-ic*.] Of or pertaining to zoönomy.

zoönomist (zō-on'ō-mist), *n.* [*zoönomy* + *-ist*.] One who is versed in zoönomy; a biologist, in a broad sense.

zoönomy (zō-on'ō-mi), *n.* [*NL. zoönomia*, < *Gr. ζῶον, animal*, + *νόμος, law*.] The laws of animal life collectively considered; the science which treats of the causes and relations of the phenomena of living animals; the vital economy of animals; animal physiology.

zoönosis (zō-on'ō-sis), *n.*; pl. *zoönoses* (-sēz). [*NL.*, < *Gr. ζῶον, animal*, + *νόσος, disease*.] A disease communicated to man from the lower animals. Hydrophobia and glanders are examples of zoönoses.

zoönosology (zō-ō-nō-sol'ō-jī), *n.* [*Gr. ζῶον, animal*, + *E. nosology*.] The classification of diseases affecting the lower animals; a system of zoöpathology; zoöpathy.

zoöparasite (zō-ō-par'ā-sit), *n.* [*Gr. ζῶον, animal*, + *παράσιτος, parasite*.] A parasitic animal.

zoöpathology (zō-ō-pā-thol'ō-jī), *n.* [*Gr. ζῶον, animal*, + *E. pathology*.] The study of disease in animals; veterinary pathology.

zoöpathy (zō-ō-pā'thi), *n.* [*Gr. ζῶον, animal*, + *πάθος, suffering*.] Animal pathology; the science of the diseases of animals, excepting man. See *zoötherapy*.

Zoöphaga (zō-ō-fā-gā), *n. pl.* [*NL.*, neut. pl. of *zoöphagus*; see *zoöphagus*.] 1. [*l. c.*] Flesh-eating or carnivorous animals collectively considered; a term of no exact classificatory meaning.—2. The carnivorous and insectivorous marsupials, as collectively distinguished from the herbivorous marsupials, or *Botaomphaga*. The opossum is an example.—3. A division of gastropods including carnivorous forms. *Lamarck*, 1822.

zoöphagan (zō-ō-fā-gan), *n.* A carnivorous animal; a sarcoophagan; especially, a member of the *Zoöphaga*, 2.

zoöphagous (zō-ō-fā-gus), *a.* [*NL. zoöphagus*, < *Gr. ζοοφαγός, living on animal food*, < *ζῶον, animal*, + *φαγέω, eat*.] Devouring animals; sarco-phagous; carnivorous; opposed to *phytophagous*. Specifically applied by Blyth, in editing Cuvier, to one of two primary types of placental *Mammalia*, including man, *Quadrumania*, *Carnivora*, and *Citacea*; the last constituting the order *Vesodontia*, the first three the order *Typodontia*.

zoöphilist (zō-ō-fī-list), *n.* [*zoöphil-y* + *-ist*.] A lover of animals or living creatures; one whose sympathy embraces all living creation.

Our philosopher and zoöphilist . . . advised those who consulted him as to the best manner of taking and destroying rats. *Smalley*, *The Doctor*, cxxviii. (*Davies*.)

The zoöphilists vowed their determination to force through Parliament a prohibitory act.

N. A. Rev., CXL, 207.

zoöphilily (zō-ō-fī-lī), *n.* [*Gr. ζῶον, animal*, + *φιλία, love*, < *φίλειν, love*.] A love of animals; a sympathy or tender care for living creatures which prevents all unnecessary acts of cruelty or destruction. *Cornhill Mag.*

zoöphoric (zō-ō-for'ik), *a.* [*zoöphor-us* + *-ic*.] Bearing a living being, or a figure or figures of one or more men or animals; as, a *zoöphoric* column.

zoöphorus (zō-ō-fō-rus), *n.* [*NL.*, < *Gr. ζωοφόρος, a frieze bearing the figures of living beings*, < *ζῶον, animal*, + *φορέω, carry* = *E. bear*.] In *anc. arch.*, a continuous frieze, unbroken by triglyphs, carved in relief with figures of men and animals, as the Panathenæic frieze of the Parthenon, or the frieze of the Phigaleia. Also *zophorus*. See cuts under *Doric* and *Illeus*.

zoöphysics (zō-ō-fiz'iks), *n.* [*Gr. ζῶον, animal*, + *φυσικά, physics*.] The study of the physical structure of animals; comparative anatomy as a branch of zoology; correlated with *zoö-dynamics*, or animal physiology.

Zoo-Dynamics, Zoo-Physics, Zoo-Chemistry.—The pursuit of the learned physician— anatomy and physiology; exemplified by Harvey, Haller, Hunter, Johann Müller.

Encyc. Brit., XXIV, 503.

Zoöphyta (zō-ō-fī-tā), *n. pl.* [*NL.*, pl. of *zoöphyton*; see *zoöphyte*.] The alternative name of the Cuvierian *Radiata*, or the *Phylozoa*; the animal-plants, or plant-like animals. In later systems, especially following the classification of Cuvier, the name has been much used for a large artificial and heterogeneous assemblage of the lower invertebrates, many of which, like the corallines, have a plant-like habit, and branch from a fixed base. It thus covers, or has covered, all the true coelenterates (actinozoans, hydrozoans, and ctenophorans), all the echinoderms (starfishes, sea-urchins, holothurians, and erinoids), the polyzoids, the sponges, some of the worms which used to be classed as radiates, and all the infusorians and other protozoans known, having thus no better standing than "the radiate mob" of Cuvier. (See *Radiata*, 1.) In some of its various restricted applications, however, it has excluded certain forms that obviously belonged elsewhere, and the tendency has been to adapt the name to the coelenterates, with or without the sponges. Quite recently the proposition has been made, and by some accepted, to use the name in this strict sense, and instead of *Coelentera* or *Coelenterata*; in which case it would cover the *Actinozoa*, *Hydrozoa*, *Ctenophora*, and *Siphonaria*. The New Latin form of the term is attributed to Watton (1492-1555), who in his "De Differentiis Animalium" (Paris, 1552) included under this name practically its present content; namely, holothurians, starfishes, jellyfishes, sea anemones, and sponges.

zoöphyte (zō-ō-fī-ti), *n.* [*NL. zoöphyton*, < *Gr. ζωοφύτον* (Aristotle), lit. 'animal-plant', < *ζῶον, animal*, + *φύτον, plant*.] A member of the *Zoöphyta*, in any sense; a radiate; a phytozoan.

The term is a loose popular equivalent of the technical designation; but it is convenient, and may be employed for any of the *Zoophyta* in a proper sense, as corals, sea-anemones, acleophis, and sponges. The chief objection to its use is its continued application to those polyzoans which are of coralline aspect, as these have no affinity with celerates. — **Glass-rope zoöphytes**, the glass-rope sponges, or *Hyalonemites* (which see).

zoöphyte-trough (zō'ō-fīt-trof), *n.* A device for retaining living zoöphytes or infusoria which are to be examined under the microscope. It consists of a frame with two movable sides of glass, and a false bottom, also of glass, small enough to admit of the insertion of the sides between it and the frame. The upper edges of the sides are pressed together by a spring, and can be separated as desired by a wedge. *E. H. Knight.*

zoöphytic (zō'ō-fīt'ik), *a.* [*< zoöphyte + -ic.*] Of the nature of a zoöphyte; of or pertaining to zoöphytes; phytozoic. — **Zoöphytic series**, the series of animals composing the *Zoophyta* as defined by Haeckel and Huxley, beginning with the lowest sponges and ending with the highest celerates.

zoöphytical (zō'ō-fīt'ikal), *a.* [*< zoöphytic + -al.*] Same as *zoöphytic*.

zoöphytoid (zō'ō-fīt'oid), *a.* [*< zoöphyte + -oid.*] Resembling a zoöphyte; related to the zoöphytes.

zoöphytological (zō'ō-fīt'ol'oj'ikal), *a.* [*< zoöphytology + -ical.*] Pertaining to zoöphytology.

zoöphytologist (zō'ō-fīt'ol'oj'ist), *n.* [*< zoöphytology + -ist.*] One who is versed in the natural history of zoöphytes. *R. F. Tones*, *Geol. Mag.* (1885), p. 549.

zoöphytology (zō'ō-fīt'ol'oj'i), *n.* [*< Gr. ζῳόφωρος, zoöphyte, + -λογία, *logia*, speak: see -ology.*] The science or natural history of zoöphytes.

zoöphyton (zō'ō-fīt'on), *n.*; pl. *zoöphyta* (-tā). [*NL.: see zoöphyte.*] A zoöphyte.

zoöplastic (zō'ō-plas'tik), *a.* [*< Gr. ζῳον, animal, + πλάσσειν, form: see plastic.*] In *surg.*, noting a plastic operation by which living tissue is transplanted from one of the lower animals to man; of or pertaining to zoögrafts. — **Zoöplastic graft**. Same as *zoögraft*.

zoöpraxinoscope (zō'ō-prak'si-nō-skōp), *n.* [*< Gr. ζῳον, animal, + Ε. praxinoscope.*] A philosophical toy, somewhat on the principle of the phenakistoscope, by which images of animals are made to execute natural movements upon a screen upon which they are thrown.

zoöpsychology (zō'ō-sī-kol'ō-jī), *n.* [*< Gr. ζῳον, animal, + Ε. psychology.*] The psychology of animals other than man; that body of fact or doctrine respecting the minds or mental activities of animals which may be derived from the study of their instincts, habits, etc.

zoöscopic (zō'ō-skōp'ik), *a.* [*< zoöscop-y + -ic.*] Of or pertaining to zoöscopy.

This condition of *zoöscopic* hallucination is one of the commonest among the phenomena of alcohol poisoning. *Science*, XV, 43.

zoöscopy (zō'ō-skō-pi), *n.* [*< Gr. ζῳον, animal, + σκοπεῖν, *skopein*, view.*] A kind of hallucination in which imaginary animal forms are perceived.

zoösperm (zō'ō-spēr'm), *n.* [*< Gr. ζῳον, animal, + σπέρμα, seed.*] 1. Same as *zoöspermium*. — 2. In *bot.*, same as *zoösperm*.

zoöspermatic (zō'ō-spēr-mat'ik), *a.* [*< zoösperm + -atic* (see *spermatic*).] Pertaining to, or of the nature of, a zoösperm; spermatozoic.

zoöspermium (zō'ō-spēr'mi-um), *n.*; pl. *zoöspermia* (-jī). [*NL.: see zoösperm.*] The sperm-cell, or male seed-cell; a spermatozoon. Also *zoösperm*.

zoösperorange (zō'ō-spō-ran'j), *n.* [*< NL. zoösperangium.*] Same as *zoösperangium*.

zoösperangial (zō'ō-spō-ran'j'al), *a.* [*< zoösperangium + -al.*] Pertaining to a zoösperangium.

zoösperangium (zō'ō-spō-ran'j'i-um), *n.*; pl. *zoösperangia* (-jī). [*NL.: < Gr. ζῳον, animal, + σπέρμα, seed, + ἄγγειον, vessel.*] In *bot.*, a sporangium or spore-case in which zoöspores or zoögametes are produced. See *sporangium*, and *ents* under *Puccinia* and *spermogonium*.

There is then formed in each *zoösperangium* a number of zoöspores. *Farlow*, *Marine Algae*, p. 14.

zoösperm (zō'ō-spōr), *n.* [*< Gr. ζῳον, animal, + σπέρμα, seed: see spore.*] 1. In *bot.*, a spore capable of moving about; a motile spore, or swarm-spore. Zoöspores are produced by many algae, and occur also in some fungi (*Peronospora*, *Suppellemea*, *Myxozetes*, etc.); they are spores destitute for a time of any cell-wall, and motile by means of either cilia or pseudopodia. See *spore*, *macrozoospore*, 2, and *ent* under *Chetophora*. Also *zoösperm*.

2. An animal spore; one of the minute flagelliform bodies which issue from the sporocyst of sporiparous animalcules; a swarm-spore. *Cienkowski*, 1865.

Also *zoöcarp*. **Zoösperæ** (zō'ō-spō-rē-ē), *n.* pl. [*Thuret*]: see *zoösperæ*.] A somewhat doubtful class or order of green or olive-green algae in which reproduction is by means of zoöspores. Conjugation occurs between the zoöspores, but without clear distinction of male and female cells. The group includes the greater part of the *Chlorospermeæ* of Harvey. See *Algae*, conjugation, 1.

zoösporic (zō'ō-spōr'ik), *a.* [*< zoösperæ + -ic.*] Of the nature of a zoösperæ; pertaining to zoöspores.

zoösperiferous (zō'ō-spō-rif'e-rus), *a.* [*< zoösperæ + L. ferre = E. bear.*] In *bot.*, bearing or producing zoöspores.

zoötaxy (zō'ō-tak-si), *n.* [*< Gr. ζῳον, animal, + τάξις, arrangement.*] The science of the classification of animals; systematic zoölogy. Compare *phytotaxy*.

zoötechnic (zō'ō-tek'nik), *a.* and *n.* [*< zoötechny + -ic.*] 1. *a.* Of or pertaining to zoötechny. 2. *n.* Zoötechny.

zoötechnics (zō'ō-tek'niks), *n.* Same as *zoötechny*.

zoötechny (zō'ō-tek-ni), *n.* [*< NL. zoötechnia, *zoötechny*, art.*] Domestication of animals; the breeding and keeping of animals in domestication or captivity. See *acclimatization*.

zoötheca (zō'ō-thē'kū), *n.*; pl. *zoöthecæ* (-sē). [*NL., < Gr. ζῳον, animal, + θήκη, case.*] The case or sheath of a zoösperm; a cell containing a spermatozoid.

zoöthecal (zō'ō-thē'kal), *a.* [*< zoötheca + -al.*] Of the nature of or forming a zoötheca.

zoöthecial (zō'ō-thē'sial), *a.* [*< zoöthecium + -al.*] Of or pertaining to a zoöthecium.

zoöthecium (zō'ō-thē'sium), *n.*; pl. *zoöthecia* (-sij). [*NL., < Gr. ζῳον, animal, + θήκη, case, dim. of θήκη, case, chest: see zoötheca.*] A compound tubular investment or domiciliary sheath in which certain infusorians are incased. Compare *zoöcytium*, *zoöcendrium*.

For these aggregations of ordinary simple loriceæ the distinctive title of *zoötheca* has been adopted. *W. S. Kunt*, *Mammal of Infusoria*, p. 61.

zoötheism (zō'ō-thē-izm), *n.* [*< Gr. ζῳον, animal, + Ε. theism.*] The attribution of deity to an animal; the treatment of animals or animal forms as objects of worship. See *zoölatry* and *zoömorphism*, 2.

In the stage of barbarism all the phenomena of nature are attributed to the animals by which man is surrounded, or rather to the ancestral types of these animals, which are worshipped. This is the religion of *zoötheism*. *Pop. Sci. Mo.*, XXXVI, 63.

zoötheistic (zō'ō-thē-ist'ik), *a.* Of or pertaining to zoötheism; relating to the worship of animals; zoölatrous. See *zoömorphie*, 2.

The prophets tried to pull the Israelites too rapidly through the zoötheistic and phyltheistic stages into monotheism. *Pop. Sci. Mo.*, XXXVI, 208.

zoötherapy (zō'ō-ther'a-pi), *n.* [*< Gr. ζῳον, animal, + Ε. therapy.*] The treatment of disease in the lower animals; veterinary therapeutics.

Zoötoca (zō'ō-tō-kā), *n.* [*NL. (Wagler), < Gr. ζῳοτοκος, viviparous, < ζῳον, animal, + τίκτειν, bring forth.*] A genus of ovoviviparous lizards, of the family *Lacertidae*, very near *Lacerta* proper. There are about 8 species, chiefly of southern Europe and of Africa, as the well-known *Z. vivipara*.

Zoötoca (zō'ō-tō-kā), *n.* pl. [*NL., neut. pl.: see Zoötoca.*] Same as *Vivipara*. In its application to mammals, the term is traceable to Aristotle.

zoötocology (zō'ō-tō-kol'ō-jī), *n.* [*< Gr. ζῳοτόκος, viviparous, + -λογία, *logia*, speak: see -ology.*] The biology of animals. See the quotation. [Rare.]

Dr. Field tells us we are all wrong in using the term biology, and that we ought to employ another; only he is not quite sure about the propriety of that which he proposes as a substitute. It is a somewhat hard one—*zoötolology*. *Huxley*, *Amer. Addresses*, p. 138.

zoötomic (zō'ō-tōm'ik), *a.* [*< zoötom-y + -ic.*] Same as *zoötomic*.

The zoötomic and embryological works of the last ten years. *Nature*, XXXVII, 70.

zoötomic (zō'ō-tōm'ikal), *a.* [*< zoötomic + -al.*] Of or pertaining to zoötomy.

zoötomically (zō'ō-tōm'ikal-i), *adv.* By means of or according to the principles of zoötomy.

Such being the position of apes as a whole, they are zoötomically divisible into a number of more and more subordinate groups. *Encyc. Brit.*, II, 148.

zoötomist (zō'ō-tōm'ist), *n.* [*< zoötom-y + -ist.*] One who dissects the bodies of animals; one who is versed in zoötomy; a comparative anatomist.

zoötomy (zō'ō-tō-mi), *n.* [*< Gr. ζῳον, animal, + -τομή, *temnēin*, cut.*] The dissection or the anatomy of animals; specifically, the science, art, or practice of dissecting or anatomizing animals other than man; distinguished from *human anatomy*, *andrology*, or *anthropotomy*; equivalent to *comparative anatomy* in a usual sense; correlated with *phytotomy*, or the dissection of plants. The zoötomy of living animals for other than surgical purposes is known as *vivisection*.

zoötrope (zō'ō-tōp), *n.* Same as *zoötrope*.

An ingenious and effective application of the zoötrope, for the illustration of the relation between certain isomeric forms. *Sci. Amer. Supp.*, XXII, 9097.

zoöthrophic (zō'ō-trof'ik), *a.* [*< Gr. ζῳον, animal, + τροφή, *trōphē*, nourish.*] Serving for the nourishment of animals; of or pertaining to animal alimentation.

zoöxanthella (zō'ō-zan-thel'ä), *n.*; pl. *zoöxanthellæ* (-ē). [*NL., < Gr. ζῳον, animal, + ξανθός, yellow, + -ella.*] One of the yellow pigmentary particles, or minute corpuscles of yellow coloring matter, found in certain radiolarians.

zoözo (zō'zō), *n.* [Imitative; cf. *coo*, *croo*.] The wood-pigeon. [Prov. Eng.]

zoze (zōp), *n.* [G.] A certain fresh-water bream of Europe, *Abramis ballerus*.

Zopherus (zōf'e-rus), *n.* [*NL. (Laporte, 1840), < Gr. ζῳόφρος, dusky, < ζῳος, darkness, gloom.*] A genus of tenebrionid beetles, remarkable for their large size, bold sculpture, and special coloration, the elytra having shining callosities. About 15 species are known, all from South America, Mexico, and the southwestern United States.

zopilote (zō-pi-lō'te), *n.* [Also *zopilot*; < Mex. *zopilot*.] One of the smaller American vultures or *Cathartidae*, as the turkey-buzzard or earlion-crow; a gallinazo; a urubí. See *aurá*, and *ents* under *Cathartes* and *urubí*.

zopissa (zō-pis'sä), *n.* [*NL., < Gr. ζῳπίσσα, pitch and wax from old ships, < ζῳ- (zō-) + πίσσα, pitch: see pitch.*] In *med.*, a mixture of pitch and tar, impregnated with salt water, scraped from the sides of ships, formerly used in external applications as having resolutive and desiccative properties. *Simmonds*.

zoppo (tsop'pō), *a.* [It.] In music, "limping," alternately with and without syncope. — **Alla zoppa**, a duple or quadruple movement in which there is a syncope in the midst of each measure, giving the metric figure $\frac{1}{2}$ $\frac{1}{2}$ $\frac{1}{2}$ $\frac{1}{2}$ $\frac{1}{2}$ $\frac{1}{2}$.

zorgite (zōr'gīt), *n.* [*Zorge* (see def.) + *-ite*.] A metallic mineral consisting of the selenides of lead and copper, found at Zorge, in the Harz mountains.

zoril, **zorille** (zor'il), *n.* [*< F. zorille* (Buffon), < Sp. *zorilla*, *zorillo* (> NL. *zorilla*), dim. of *zorra*, *zorro*, a fox.] 1. An African animal of the genus *Zorilla*. — 2. Some Central or South American skunk; one of the *Mephitis*, as the eonepate; a zorino. See *ent* under *Conepatus*.

Zorilla (zō-ril'ä), *n.* [*NL. (J. E. Gray): see zoril.*] 1. A genus of African skunk-like quadrupeds, representing the subfamily *Zorillinae*. The common zoril, or mariput, is *Z. striata* (or *Ictonyx zorilla*), a nocturnal, burrowing, carnivorous animal, capable of emitting a very fetid odor, like a skunk. It is as large as a small house-cat, and is entirely striped and spotted

Striped Zoril (*Zorilla striata*).

with black and white, thus closely resembling the small American skunk figured under *Spilogale*. The genus is also called *Rhabdogale* and *Ictonyx*. Its name *Zorilla* is quite recent; but *zorilla* as a specific New Latin name is more than a century old, having long designated a com-

posite species in which the African zoril was confounded with some American skunks: whence also the two senses of *zoril* (which see).

2. [*l. e.*] A zoril.

Zorillinae (zōr-i-lī'nē), *n. pl.* [NL., < *Zorilla* + *-inae*.] An African subfamily of *Mustelidae*, represented by the genus *Zorilla*; the zorils, or skunk-like quadrupeds of Africa. They are closely related to the American skunks, or *Meophilinae*. See out under *Zorilla*.

zorilline (zōr-i-līn), *a.* Resembling or related to animals of the genus *Zorilla*; pertaining to the *Zorillinae*.

Zoroaster (zō-rō-as'tēr), *n.* [NL. (Thomas, 1873), pun on *Zoroaster* (see *Zoroastrian*), involving NL. *aster*, starfish.] In *zool.*, a genus of starfishes, giving name to the *Zoroasteridae*, and containing such species as *Z. fulgens*, of the North Atlantic.

Zoroasteridae (zō-rō-as'tēr-i-dē), *n. pl.* [NL., < *Zoroaster* + *-idae*.] A family of starfishes, typified by the genus *Zoroaster*. It contains forms with very small body, very long arms, and quadri- or penta-radial symmetry, attaining a diameter of 8 or 10 inches.

Zoroastrian (zō-rō-as'tri-an), *a. and n.* [*< L. Zoroastres* (> *E. Zoroaster*), the *L.* form of the Old Pers. name *Zarathustra*, + *-ian*.] 1. *a.* Of or pertaining to Zoroaster, the founder of the Mazdayasnian or ancient Persian religion; relating to or connected with Zoroastrianism.

II. *n.* One of the followers of Zoroaster, now represented by the Guebers and Parsees of Persia and India; a fire-worshiper.

Zoroastrianism (zō-rō-as'tri-an-izm), *n.* [*< Zoroastrian* + *-ism*.] The system of religious doctrine taught by Zoroaster and his followers in the Avesta; the religion prevalent in Persia till its overthrow by the Mohammedans in the seventh century, and still held by the Guebers and Parsees, and commonly, though incorrectly, called *fire-worship*. The religion is dual, recognizing two creative powers—Ormuzd (Ahuramazda), the god of light and creator of all that is good, with six principal and innumerable inferior amshaspands, or ministers of good, and Ahriman (Angra-mainyu), the god of darkness and creator of evil, with a corresponding number of devils, or ministers of evil. Zoroaster taught that Ormuzd created man with free will; that his state after death depends upon the preponderance of good or evil in his life, an intermediate state being provided for those in whom these principles are evenly balanced; and that Ormuzd will finally prevail over Ahriman in the constant war between them, and redeem him and his ministers, as well as man, from all evil.

Zoroastrism (zō-rō-as'trizm), *n.* [*< L. Zoroastres*, Zoroaster, + *-ism*.] Same as *Zoroastrianism*. [Rare.]

All these alleged facts conspire to prove that *Zoroastrianism* and its Scriptures had their origin in eastern Iran before the rise of Median or Persian dominion.

Amer. Antiq., IX, 118.

zorra (zōr'ā), *n.* [NL., < Sp. *zorra*, fem. of *zorro*, a fox.] A South American skunk; same as *atok*.

zorino (zō-rē'nō), *n.* [Sp. Amer., dim. of Sp. *zorro*, fox.] A South American skunk. The skunks of the Neotropical region belong to the same subfamily (*Meophilinae*) as the others of America, but are generically different, and like the coneate.

zorro (zōr'ō), *n.* [Sp., a fox.] One of the South American fox-wolves, as *Canis azarce*. *Encyc. Brit.*, XVIII, 353.

zorrico, *n.* [Basque.] A kind of song in quintuple or septuple rhythm common among the Basques.

Zosmeridae (zos-mer'i-dē), *n. pl.* [NL. (Douglas and Scott, 1865), < *Zosmerus* + *-idae*.] A family of heteropterous insects, of the superfamily *Coreoidea*, forming a transition between the *Lygaeidae* and the *Tingitidae*, but by the structure of the abdomen more nearly related to the former than to the latter. It contains only the Old World genus *Zosmerus*.

Zosmerus (zos'me-rus), *n.* [NL. (Laporte, 1833), irreg. < Gr. *ζωστήρ*, a girdle, < *ζωρίαν*, girdle.] A genus of Old World heteropterous insects, typical of the family *Zosmeridae*.

zoster (zōs'tēr), *n.* [*< Gr. ζωστήρ*, a girdle, < *ζωρίαν*, girdle: see *zone*.] 1. In *anc. Gr.*, *cos-tume*, a belt or girdle; originally, a warriors' belt round the loins, afterward any girdle or zone, but chiefly one of a kind worn by men.

The chiton . . . is girt round under the breast, to keep it from falling by a girdle (*zoster*). *Encyc. Brit.*, VI, 453.

2. Same as *herpes zoster* (which see, under *herpes*).

Zostera (zos-tē'rā), *n.* [NL. (Linnaeus, 1753), so called from the long tape-like leaves; < Gr. *ζωστήρ*, a girdle: see *zoster*.] A genus of aquatic plants, of the order *Najadaceae*, type of the tribe *Zostereae*. It is characterized by monococious flowers and ovoid carpels. The 4 species are natives of marine waters of both the Old and the New World. They grow immersed

in shallow bays and other waters, often forming large masses, growing from slender creeping rootstocks. The long narrowly linear two-ranked leaves are the place of attachment of great numbers of algae, and the feeding-places of many of the smaller forms of animal life. *Z. marina* is known in America as *eel-grass* and in England

1. Flowering Plant of Grass-wrack or Eel-grass (*Zostera marina*); 2, the stamens; 3, the pistil; 4, fruit.

as *grass-wrack*, also as *turtle-grass*, *sweet-grass*, and *bell-ware*; when dried, it is used, under the name of *alga marina*, *sea-sedge*, or *sea-hay*, for stuffing mattresses and as bedding for horses. This, together with the related *Cymodocea sepioides*, constitutes the glazier's seaweed of England. *Z. nana* of Europe is known as *heart grass-wrack*.

Zostereae (zos-tē're-ē), *n. pl.* [NL. (Kunth, 1841), < *Zostera* + *-eae*.] A tribe of monocotyledonous plants, of the order *Najadaceae*. It is characterized by bisexual flowers on a flattened spathe without a perianth, and with a subulate or capillary stigma. The 2 genera, *Phyllospadix* and *Zostera* (the type), are submerged grassy plants of sea-water, the former including 2 species, both natives of the Pacific coast of the United States.

Zosterops (zos-tē'rops), *n.* [NL. (Vigors and Horsfield, 1826), < Gr. *ζωστήρ*, a girdle, + *ὤψ*, eye.] 1. A very extensive genus of *Meliphagidae* (also referred to the *Dicaeidae*), giving name to the subfamily *Zosteropinae*, characterized among related genera by the absence or spurious character of the first primary, and named from the conspicuous orbital ring of most of its members. The genus is now held to cover a number of forms which have been made types of several (about 8) other genera. They are known as *white-eyes* and *silver-eyes*. The range of the genus in this broad sense is very extensive, embracing most of Africa, all of India, Ceylon, Burma, China, and Japan, the Malay Peninsula and Archipelago, the Papuan Islands, Australia, Tasmania, and most of the Polynesian Islands, including New Zealand. The bill is about as long as the head, straight, and broad at the base. The pattern of coloration is characteristic, consisting of olives and yellows as the ground-colors, and the diagnostic white eye-ring of most species. The sexes are alike in plumage. The size is very small, only 4 or 5 inches. About 85 species are recognized as valid. The type is *Z. lateralis*, of Aus-

Silver-eye or White-eye (*Zosterops lateralis*).

tralia, the Chatham Islands, and New Zealand, the common creeper, and rusty-sided warbler of the older ornithologists. *Z. madagascariensis* is the white-eyed warbler of Latham. *Z. olivacea* is the olive creeper of Bourlon (Réunion). *Z. mauritiana* is the Mauve warbler of Mauritius. *Z. lugubris*, *Z. borbonica*, *Z. chloronota*, *Z. fallax*, *Z. leucophaea*, *Z. nivalis*, *Z. finchii*, and *Z. senegalensis* have severally been made types of other genera. Some of these birds have been placed in *Dicaeum*, and are among those known to the French ornithologists as *sou-mangas*.

2. [*l. e.*] Any bird of this genus.

zotheca (zō-thē'kā), *n.*; *pl. zothecae* (-sē). [*< Gr. ζῳθήκη*, < *ζῳν*, live, + *θήκη*, a receptacle: see

theca.] In *anc. arch.*, a niche or an alcove; also, a small living-room, or room used by day, as opposed to a sleeping-room or dormitory.

Zouave (zō-āv'), *n.* [F., from the name of a tribe inhabiting Algeria.] 1. A soldier belonging to a corps of light infantry in the French army, distinguished for their dash, intrepidity, and hardihood, and for their peculiar drill and showy Oriental uniform. The Zouaves were organized in Algeria in 1831, and consisted at first of two battalions chiefly of Kabyles and other natives, but ultimately became almost entirely French, with increased numbers. They served exclusively in Algeria till 1854, and afterward fought in European wars.

2. A member of one of the volunteer regiments of the Union army in the American civil war (1861-5) which adopted the name and to some extent imitated the dress of the French Zouaves.—**Papal** or **pontifical Zouaves**, a corps of French soldiers organized at Rome in 1860 for the defense of the temporal sovereignty of the Pope, under Gen. Lamoricière, one of the first commanders of the Algerian Zouaves. After obstinately resisting the entrance of the Italian government into Rome in 1870, they served in France against the Germans and the Commune, and in 1871 were disbanded.

Zouave-jacket (zō-āv'jak'et), *n.* 1. A short jacket, not reaching to the waist, cut away in front: a part of the Zouave uniform.—2. A similar jacket, usually ornamented, with or without sleeves, worn by women.

zounds (zoundz), *interj.* [For *'srounds*, abbr. of *God's wounds*, referring to the wounds of Christ on the cross; one of the innumerable oaths having reference to Christ's passion.] An exclamation formerly used as an oath or as an expression of anger or wonder.

Zounds, sir! then I insist on your quitting the room directly. *Sheridan, School for Scandal*, v. 3.

zoutch (zouch), *v. t.* [Origin obscure.] To stew, as flounders, whittings, gudgeons, eels, etc., with just enough of liquid to cover them. [Prov. Eng.]

Zr. In *chem.*, the symbol for zirconium.

zucchetta (tsük-ke'tā), *n.* [It. *zucchetta*, a small gourd, a skullcap, dim. of *zucca*, a gourd.] 1. In the *Rom. Cath. Ch.*, the skullcap of an ecclesiastic, covering the tonsure. That of a priest is black, of a bishop purple, of a cardinal red, and of the Pope white. Also written *zucchello*.—2. A late form of burgonet, distinguished by having a movable nasal, hinged cheek-pieces, and an articulated convex muffle.

zufolo, zuffolo (zō'fō-lō), *n.* [It. *zufolo*, < *zufolare*, hiss, whistle.] A little flute or flageolet, especially such as is used in teaching birds.

Zuggun falcon. See *falcon*.

zuisin, *n.* The American widgeon, *Mareca americana*. *Webster's Dict.*, 1890. [Local, U. S.]

zules, zulis, *n.* In *her.*, a chess rook used as a bearing.

Zulu (zō-lō), *n. and a.* [Also *Zooloo*; S. African.] 1. *n.* A member of a warlike and superior branch of the Kafir race of South Africa, divided into many tribes. In the beginning of the nineteenth century several tribes of Zulus established a kingdom including the present British colony of Natal and the country north of it called Zululand, which was broken up and mostly absorbed by the British and the Boers during a succession of wars ending in 1888.

II. *a.* Of or pertaining to the Zulus; as, the *Zulu language* (a principal member of the Bantu group of languages) or government.—**Zulu cloth**, a fine twilled woolen cloth used as a background for embroidery. *Dict. of Needlework*.

Zulu-Kafir (zō-lō-kaf'ēr), *n.* Same as *Kafir*, 3.

zumbooruk (zum'bō-ruk), *n.* [Also *zumbooruck*, *zomboruk*, *zumboorak*; < Hind. Pers. Ar. *zambūrak*, < Turk. *zambūrak*, a small gun, dim. of Ar. *zambūr*, a hornet.] A small cannon mounted on a swivel, usually shorter and with larger bore than the zingal. In English writings the name is especially applied to such a piece carried on a camel, the pivot which supports it being erected on the saddle in front of the rider.

Eighteen or twenty camels, caparisoned in the Rajah's colours of red and white, with *zumbooraks*, or swivel guns, mounted on their backs.

W. H. Russell, Diary in India, II, 237.

zumatic (zū'mik), *a.* An improper form of *zymic*, *zomologic*, *zomology*, etc. Same as *zymologic*, etc.

Zuñi (zū'nyē), *n.* [Amer. Ind.] A member of the best-known community or tribe of the semi-civilized Pueblo Indians of New Mexico, living in a village of the same name on the Zuñi river, composed of large communal houses.

Zuñian (zū'ni-an), *a. and n.* [*< Zuñi* + *-an*.] 1. *a.* Of or pertaining to the Zuñis.

All the *Zuñian* clay effigies of owls have horns on their heads. *Science*, VI, 266.

II. *n.* A Zuñi.

zunyite (zū'nī-it), *n.* [*< Zūñi* (see def.) + *-ite*².] A fluorite of aluminum, occurring in glassy transparent tetrahedral crystals of the hardness of quartz: found at the Zūñi mine in Colorado.

zurf (zūrf), *n.* Same as *zarf*.

zwanziger (tswān'tsi-ger), *n.* [*G.*, *< zwanzig*, twenty.] A silver coin of Austria of the nineteenth century, equivalent to 20 kreutzers, and worth 8½ pence English (about 17 cents).

zwieselite (tswē'zel-it), *n.* [*< Zwiesel* (see def.) + *-ite*².] A variety of tripelite found near Zwiesel in Bavaria.

Zwinglian (zwing'- or tswing'-gli-an), *a.* and *n.* [*< Zwingli* (see def.) + *-an*.] *I. a.* Of or pertaining to Ulrich (Huldreich) Zwingli (1484-1531), a Swiss religious reformer, or his doctrines. Zwingli's revolt from the Roman communion took place at Zurich in 1516, a year before Luther's, with whom he differed in denying the real presence in the eucharist in any sense, and upon other points.

II. n. A follower of Zwingli.

Zygadenus (zi-gad'e-nus), *n.* [*NL.* (Richard, 1803), named from the conspicuous pair of glands at the base of the sepals in *Z. glaberrimus*; *< Gr.* *zygon*, a yoke, + *adon*, gland.] A genus of liliaceous plants, of the tribe *Feracae*. It is characterized by pedicelled flowers with a flatish perianth nearly equal in its length by the stamens, and narrow angled seeds without prominent wings. The 10 species are natives of Siberia, and of North America including Mexico. They are perennials with a horizontal rootstock or a coated bulb, producing an erect stem unbranched beneath the terminal raceme or panicle, which consists of numerous whitish or greenish flowers. The long linear leaves are radical or crowded toward the base of the stem. The poisonous root of *Z. venenosus* of the northwestern United States is known as *death camas* and as *hoy's potato*, being innocuous to hogs and greedily eaten by them. *Z. glaucus* extends northward to Kotzebue Sound. *Z. glaberrimus* and *Z. leimanthoides*, sometimes referred to *Amianthus*, are tall wand-like species with conspicuous white or cream-colored compound racemes, resembling the black cohosh.

zygadite (zi-gad'it), *n.* [*< Gr.* *zygon*, jointly, *< zygon*, a yoke: see *yoke*¹.] A variety of albite, occurring in thin tabular twin crystals: it is found at Andreasberg in the Harz.

Zygæna (zi-jē'nā), *n.* [*NL.* (Fabricius, 1775), *< Gr.* *zygon*, supposed to mean the hammer-headed shark.] *1. In entom.*, a genus of moths, typical of the family *Zygenidae*, the species of which are known as *burnet-moths*, as *Z. minus*, the transparent burnet; *Z. trifoli*, the five-spotted burnet; *Z. lonicæ*, the narrow-bordered burnet; *Z. filipendulæ*, the six-spotted burnet; etc. It was at first coextensive with the family, but now includes only those forms that have the antennæ claviform, a little longer than the body; the wings elongate, and spotted; the palpi short, hairy, and acute; and the larvæ contracted, stout, hairy, and transforming in a fusiform parchment-like cocoon. Nearly 100 species are known, of which 52 occur in Europe, the others in Asia and Africa; 26 are British. The larvæ are remarkable in hibernating in the half-grown condition. Some entomologists change the name to *Anthracæna*, because it is the same as the genus *Zygæna* in ichthyology; but this is a mistake, for entomology has the prior claim upon the name, and it is the genus of fishes that should not be named *Zygæna*.

2. In ichth., a genus of sharks, so named by Cuvier in 1817; the hammerheads: now called *Sphyrna* (which see). See cut under *hammer-head*.

zygenid (zi-jē'nid), *a.* and *n.* *I. a.* In *entom.* and *ichth.*, of or pertaining to the *Zygenidae*, as a moth or a shark.

II. n. A member of the family *Zygenidae*, whether in entomology or in ichthyology.

Also *zygenid*, *zygenoid*.

Zygenidae (zi-jē'nī-dē), *n. pl.* [*NL.* (Leach, 1819), *< Zygon*, *1. + -idae*.] *In entom.*, a family of hawk-moths, named from the genus *Zygon*; also wrongly called *Anthracidae*. The family comprises a more or less definite and characteristic series of moths intermediate between the *Bombycidae* and the *Cossidae*. By most modern authors a section of the old family *Zygenidae* is separated into a family *Amastidae*. The *Zygenidae* proper have pectinate antennæ, rather narrow wings rounded at the tip, and a venation similar to the arctians. Their larvæ are short, hairy, and transform in cocoons composed entirely of silk or mainly of hair. The European forms belong mainly to *Zygon*, while the principal American genera are *Procris*, *Hemeris*, *Oncocera*, *Eucosmophora*, and *Glaucospis*, the latter containing more than 100 South American species. *Eucosmophora* is another large genus, comprising more than 150 species, mainly South American. See cut under *Procris*. Also *Zygonæ*, *Zygonæ*, *Zygonæ*, and *Zygonæ*.

2. In ichth., a family of sharks, named from the genus *Zygon*: now called *Sphyrnidae* (which see). See cut under *hammer-head*.

zygenine (zi-jē'nin), *a.* [*< Zygon* + *-ine*¹.] In *ichth.*, same as *zygenid*.

zygenoid (zi-jē'noid), *a.* and *n.* [*< Zygon* + *-oid*.] Same as *zygenid*.

zygal (zī'gal), *a.* [*< zyg-on* + *-al*.] *1.* Of or pertaining to a zygon: connecting, as a yoke. — *2.* Formed like the letter H, with a cross-bar connecting two other bars. See *zygon*.

The frequency of the *zygal* or H-shaped form of fissure [of the brain].

Buck's Handbook of Med. Sciences, VIII. 125.

[Rare in both uses.]

zygantrum (zi-gan'trum), *n.*: *pl.* *zygantra* (-trā). [*NL.*, *< Gr.* *zygon*, yoke, + *antrum*, cave.] In *herpet.*, the fossa upon the posterior face of the neural arch of a vertebra of serpents and some lizards, for the reception of the zygosphenæ of a succeeding vertebra, the series of vertebræ being more effectively interlocked thereby than is accomplished by the zygapophyses alone. Compare cut under *zygosphenæ*.

Posterior face of a dorsal vertebra of the python, showing *za*, the zygantrum; *ns*, postzygapophysis; *nc*, neural canal; *cp*, convex posterior face of centrum.

The anterior surface of the arch above the neural canal is produced into a strong wedge-shaped zygosphenæ, which fits into a corresponding zygantrum of the next preceding vertebra, and on the posterior surface of the arch there is a zygantrum for the zygosphenæ of the next preceding [read succeeding] vertebra. *Huxley, Anat. Vert.*, p. 201.

zygapophysial (zi-gap-ō-fiz'i-al), *a.* [*< zygapophysis* + *-al*.] Of or pertaining to a zygapophysis: articular, as a vertebral process.

zygapophysis (zi-ga-pof'i-sis), *n.*: *pl.* *zygapophyses* (-sēz). [*NL.*, *< Gr.* *zygon*, yoke, + *apophysis*, process: see *apophysis*.] A process upon the neural arch of a vertebra corresponding to that called *oblique* or *articular* in human anatomy, provided with a facet for articulation with the same process of a preceding or succeeding vertebra, thus serving to interlock the series of vertebral arches. There are normally two pairs of zygapophyses to a vertebra, the two processes (right and left) which are situated upon the anterior border of any arch being called *prezygapophyses*, and those upon the posterior border, *postzygapophyses*. Each pair of any one vertebra articulates with the other pair of the next vertebra. See cuts under *cervical*, *dorsal*, *endoskeleton*, *hypapophysis*, *lumbar*, *vertebra*, *zygantrum*, and *zygosphenæ*.

zygite (zī'git), *n.* [Also erroneously *zeugite*; *< Gr.* *zygon*, *< zygon*, yoke, cross-beam, thwart: see *zygon*.] In *Gr. antiq.*, an oarsman of the second or middle tier in a trireme. Compare *thranite* and *thalamite*.

Zygnema (zig-nē'mā), *n.* [*NL.* (Kützinger, 1843), irreg. *< Gr.* *zygon*, yoke, + *rhema*, thread.] A genus of fresh-water alga, typical of the order *Zygnemataceæ*, having cells with two axile many-rayed chlorophyll-bodies near the central cell-nucleus, each containing a starch-granule, and the zygospore undivided, mostly contracted, and developed in the middle space between two united pairing-cells or in one or the other of the conjugating-cells. Several of the species are among the commonest of fresh-water alga in both stagnant and running water, forming dense bright-green masses. See cuts under *chlorophyll* and *conjugation*.

Zygnemataceæ (zig-nē-mā'sē-ē), *n. pl.* [*NL.*, *< Zygnema* + *-aceæ*.] A very distinct order of fresh-water alga, of the class *Conjugata*. The individual consists of a usually simple and unbranched filament of cells placed end to end, and the individuals are joined in filamentous families. The chlorophyll-mass is dilated or of a definite form, often forming a spiral band. Propagation is by means of zoospores which result from conjugation. See *Conjugata*, *conjugation* (with cut), and cut under *chlorophyll*.

Zygnemææ (zig-nē'mē-ē), *n. pl.* [*NL.*, *< Zygnema* + *-ææ*.] A subfamily or tribe of fresh-water alga, of the order *Zygnemataceæ*, characterized by having a mostly contracted, undivided zoospore, which after a period of rest develops into a germ-cell.

zygobrach (zī'gō-brang), *a.* and *n.* [*< Gr.* *zygon*, yoke, pair, + *brachia*, gills: see *branchia*.] *I. a.* Zygobranchiæ.

II. n. A zygobranchiæ mollusk.

Zygobranchia (zī'gō-brang'ki-ā), *n. pl.* [*NL.*: see *zygobranchia*.] Same as *Zygobranchiata*.

Zygobranchiata (zī'gō-brang'ki-ā'tā), *n. pl.* [*NL.*, neut. *pl.* of **zygobranchiatus*: see *zygobranchiæ*.] An order or suborder of *Gastropoda*, having paired gill-combs, or right and left etendia, symmetrically disposed in the pallial chamber on each side of the neck, a pair

of osphradia or olfactory tracts, paired nephridia of unequal size, and distinct sexes. As an ordinal group, it contains the ormers or sea-ears, the pleurotomarioids, the keyhole-limpets, and the true limpets, and is divided into *Ctenidiobranchiata* and *Phyllidiobranchiata* (the latter being the *Patellidæ* alone). Also called *Zygobranchia*, *Zygobranchia*. See cuts under *abalone*, *Fissurellidæ*, *Patella*, *patelliform*, *Pleurotomaria*, *Pleuromariidæ*, and *sea-ear*.

zygobranchiæ (zī'gō-brang'ki-āt), *a.* and *n.* [*< NL.* **zygobranchiatus*, *< Gr.* *zygon*, yoke, + *brachia*, gills: see *branchiæ*.] *I. a.* Having paired and as it were yoked gills or etendia, as certain mollusks; having the characters of or pertaining to the *Zygobranchiata*; zygobranchiæ.

II. n. Any member of the *Zygobranchiata*, *zygocardiac* (zī'gō-kār'di-ak), *a.* [*< Gr.* *zygon*, yoke, + *kardia* = *E. heart*: see *cardiac*.] Noting a certain hard protuberance of the stomach of a crustacean, formed by a thickening of the chitinous lining of the cardiac division (in the crawfish an elongated posterolateral ossicle, connected with the lower end of the anterolateral ossicle, and passing upward and backward to become continuous with the pyloric ossicle): correlated with *pteryocardiac* and *arocardiæ*.

zygodactyl, **zygodactyle** (zī'gō-dak'til), *a.* and *n.* [*< NL.* **zygodactylus*, *< Gr.* *zygon*, yoke, + *daktylos*, finger, toe.] *I. a.* In *ornith.*, yoke-toed; noting those birds, or the feet of those birds, which have the toes disposed in pairs, two before and two behind. In all yoke-toed birds, excepting the trogons, it is the outer anterior toe which is reversed: in trogons, the inner anterior one. See cut under *pair-toed* and *parrot*.

II. n. A yoke-toed bird; a bird having the toes arranged in pairs.

Zygodactyla (zī'gō-dak'ti-lā), *n. pl.* [*NL.* (Brandt, 1835), fem. of **zygodactylus*: see *zygodactylous*.] *1.* A genus of aculephs, of the family *Ægoreidæ*. It includes some large jellyfishes, 6 or 8 inches in diameter, with long violet streamers, found in the north Atlantic waters.

2. A section of pachydermatous mammals, corresponding to the *Suidæ* in a broad sense; the swine. The name implied the cloven hoof of these animals, in distinction from the solidungulate or multungulate hoof of the quadrupeds with which swine were formerly classed as *Pachydermata*. See *Artiodactyla* (with cut).

Zygodactylæ (zī'gō-dak'ti-lē), *n. pl.* [*NL.*: see *Zygodactyla*.] A group of arboricole non-passerine birds whose toes are yoked in pairs, two before and two behind: synonymous with *Scansores* (which see). The group is artificial, being framed with reference to the single character expressed in the name, insistence upon which brings together some birds which belong to different orders, as *Psittaci* and *Picariæ*, separates the picarian families which are not yoke-toed from their near relatives which are yoke-toed, and ignores the exceptional zygodactylism of the trogons. Various attempts — as by Blyth (1849), Sundevall (1872), and Slater (1880) — to restrict the name to a part of the birds it originally designated, and retain it in the system in a stricter sense, have not been entirely successful. Also *Zygodactylæ*.

zygodactyle, *a.* and *n.* See *zygodactyl*.

zygodactylic (zī'gō-dak'til'ik), *a.* [*< zygodactyl* + *-ic*.] Same as *zygodactyl*.

zygodactylism (zī'gō-dak'ti-lizm), *n.* [*< zygodactyl* + *-ism*.] The yoking of the toes of a bird's foot in anterior and posterior pairs; the zygodactyl character or condition of a bird or its toes.

zygodactylous (zī'gō-dak'ti-lus), *a.* [*< zygodactyl* + *-ous*.] Same as *zygodactyl*.

Zygodon (zī'gō-don), *n.* [*< Gr.* *zygon*, yoke, + *odon* (ōdon) = *E. tooth*.] In *zool.*, same as *Zenogodon*, *1.* *Oreon*.

zygodont (zī'gō-dont), *a.* [*< Gr.* *zygon*, yoke, + *odon* (ōdon) = *E. tooth*.] Noting molar teeth whose even number of cusps are paired and as it were yoked together: having such molars, as a mammal or a type of dentition.

It is thus probable that triconodontie is to be regarded as an earlier and more primitive form of molar than those of the *zygodont* (quadrutubercular) type. *Amer. Naturalist*, XXII. 832.

Zygomorphia (zī'gō-gom'fī-ā), *n. pl.* [*NL.*, *< Gr.* *zygon*, yoke, + *morphe*, grinder-tooth.] In Ehrenberg's classification, a division of rotifers.

Zygomma (zī'gō-gram'ā), *n.* [*NL.* (Chevrolat, 1843), *< Gr.* *zygon*, yoke, + *gmma*, letter.] *1.* A notable genus of chrysomelid beetles, comprising about 70 American species, mainly from South America and Mexico. By most American coleopterists it is considered a subgenus of *Chrysomela*, from the typical forms of which it is separated by the possession of a tooth on the last tarsal joint.

2. A genus of reptiles. *Cope*, 1870.

zygoite (zī'gō-it), *n.* [*< Gr.* *zygon*, yoke, + *-ite*².] An organism resulting from the process of zygosis or conjugation.

zygoblabialis (zi-gō-lā-bi-ā'lis), *n.*; pl. *zygoblabiales* (-lēz). [NL., < *zygo* (ma) + *labialis*, labial.] The lesser zygomatic muscle; the zygomatic minor. *Coues*, 1887. See first cut under *muscle* 1.

zygoma (zi-gō-mā), *n.*; pl. *zygoma* (-mā-tā). [NL., < Gr. *ζυγωμα*, the zygomatic arch, also a yoke, bolt, bar, < *ζυγόν*, yoke, join, < *ζυγόν*, a yoke, joining; see *yoke* 1.] 1. The bony arch or arcade of the cheek, formed by the malar or jugal bone and its connections; so called because it serves to connect bones of the face with those of the skull about the ear. In mammals, including man, the zygoma consists of a malar bone connected behind with the squamosal bone, usually by a zygomatic process of the latter, and abutting in front against a protuberance of the superior maxillary bone, or of the frontal or the lacrymal bone, or any of these. It is usually a stout

Skull of *Mylodon*, a gigantic extinct sloth, showing the massive zygoma *a*, with strong superior and inferior processes *a*, *a'*. (Greatly reduced.)

bony arch, sometimes with a strong descending process, giving principal origin to a masseter muscle, and bridging over the temporal muscle. It is sometimes a slender rod, and may be imperfect, as in shrews. The part taken in its formation by the malar bone is very variable in extent. (See cut under *skull*.) Below mammals the construction of the zygoma posteriorly is entirely altered. In birds the arch is articulated there with the quadrate bone, or suspensorium of the lower jaw, representing the malleus of a mammal, and an additional bone, the quadrate, intervenes between the quadrate and the malar proper. In such cases the anterior connection is more particularly with the maxillary bone, or with this and the lacrymal, and the zygoma is generally a slender rod-like structure. (See cut under *Gallina*.) In reptiles further modifications occur, such as the completion of the arch behind by union of the jugal bone with the postfrontal and squamosal; or there may be no trace of a structure to which the term *zygoma* is properly applicable, as in the *Ophidia*, in which there is no jugal or quadrate bone. Among batrachians, as the frog, a zygomatic arch is represented by the connection of the maxillary bone, by means of a quadrate bone, with a bone called *tepiromastoid* (see cuts there and under *Anura*). In any case a zygoma consists of a suborbital or postorbital series of ossifications in membrane, or membrane-bones, developed on the outer side of the maxillary arch of the embryo (the same that gives rise to the pterygopalatine bar), and when best differentiated is lacrymal, maxillary, jugal, and quadrate bone; and its connection with the sphenoid, as occurs in man, is quite exceptional.

2. The malar or jugal bone itself, without its connections. [Rare.]—3. The cavity under the zygomatic process of the temporal bone; the zygomatic fossa. *Brande*.

zygomatic (zi-gō-mat'ik), *a.* [NL. *zygomatikus*, < *zygoma*, *q. v.*] In *zool.* and *anat.*, of or pertaining to the malar or jugal bone, or to this bone and its connections; constituting or entering into the formation of the zygoma; jugal.—**Zygomatic apophysis**. Same as *zygomatic process*.—**Zygomatic arch**, the zygoma. See cut under *skull*.—**Zygomatic bone**, the malar.—**Zygomatic canals**, two canals in the malar bone of man, through which pass branches of the superior maxillary nerve; the temporomalar canals: (a) the *zygomatofacial*, or *malar*, running between the orbital and anterior surfaces; (b) the *zygomatocotemporal*, or *temporal*, running between the orbital and temporal surfaces.—**Zygomatic crest**, that edge of the human alisphenoid which articulates with the malar.—**Zygomatic diameter**, the greatest distance between the zygomatic arches of the skull.—**Zygomatic fossa**. See *fossa* 1.—**Zygomatic glands**, lymph nodes found along the course of the internal maxillary artery.—**Zygomatic muscle**. Same as *zygomatice*.—**Zygomatic process**. See *process*, and cuts under *skull* and *temporal* 2.—**Zygomatic suture**, the squamosal suture; the innominate connection of the squamosal, usually of its zygomatic process, with the malar or jugal bone.—**Zygomatic tuberosity**, that protuberance of the superior maxilla which articulates with the malar.

zygomatice, *n.* Plural of *zygomatice*.

zygomatice-auricular (zi-gō-mat'ik-ō-ā-rik'ū-lār), *a.* 1. In *anat.* and *zool.*, of or pertaining to the zygoma and the auricle; as, a *zygomatice-auricular* muscle. See *zygomatice-auricularis*.—2. In *craniom.*, noting the ratio between the zygomatic and auricular diameters of the skull, called the *zygomatice-auricular index*.

zygomatice-auricularis (zi-gō-mat'ik-ō-ā-rik'ū-lār'is), *n.* A muscle of the external ear of some animals, which arises from the zygoma and is inserted in the auricle; in man, the *atrahens aurem*.

A strong *zygomatice-auricularis* is also seen as we remove the integuments of the head [of the reindeer].

Proc. Acad. Nat. Sci. Phila., 1891, p. 232.

zygomaticefacial (zi-gō-mat'ik-ō-fā-shāl), *a.* In *anat.*, of or pertaining to the zygoma and the face; specifying (a) the anterior connections of the zygoma, and (b) the anterior one of the two zygomatic canals which traverse the malar bone of man. See *zygomatice canals*, under *zygomatice*.

zygomatice-temporal (zi-gō-mat'ik-ō-tem'pō-rāl), *a.* In *anat.*, of or pertaining to the zygoma and the temporal bone or fossa; specifying (a) the posterior connections of the zygoma with any element of the temporal bone, as the squamosal zygomatic of a mammal, and (b) the posterior one of the two zygomatic canals which traverse the malar bone of man. See *zygomatice canals*, under *zygomatice*.

zygomatice (zi-gō-mat'ik-us), *n.*; pl. *zygomatice* (-sī). [NL.; see *zygomatice*.] One of several small subcutaneous muscles arising from or in relation with the zygoma, or malar bone.—**Zygomatice auricularis**, a muscle of the external ear, the *atrahens aurem* of man, commonly called *zygomatice-auricularis* (which see).—**Zygomatice major**, **zygomatice minor**, two muscles of the face, arising from the malar bone, inserted into the orbicularis oris at the corner of the mouth, and serving to draw the corner of the mouth upward and outward, as in the act of laughing. The former is sometimes called *distortor oris*, and the latter *zygoblabialis*. See first cut under *muscle* 1.

Zygomaturus (zi-gō-mat'ū-rus), *n.* [NL., < Gr. *ζυγματος*, the zygomatic arch, + *αὐρος*, tail.] 1. A genus of large fossil marsupials from the Post-tertiary deposits of Australia.—2. [*l. c.*] A member of this genus. *Imp. Diet.*

zygomorphic (zi-gō-mōr'fik), *a.* [< *zygomorphos* + *-ic*.] In *bot.*, same as *zygomorphous*.

zygomorphism (zi-gō-mōr'fiz-m), *n.* [< *zygomorphos* + *-ism*.] The character of being zygomorphous.

zygomorphous (zi-gō-mōr'fus), *a.* [< Gr. *ζυγόν*, yoke, + *μορφή*, form.] Yoke-shaped; specifically applied to flowers which can be bisected into similar halves in only one plane; monosymmetrical. Such extends the term to cases where bisection into similar halves is possible in two planes at right angles to one another, the halves of one section being different from the halves of the other. *Goebel*. Compare *actinomorphic*.

zygomorphy (zi-gō-mōr'fi), *n.* [< *zygomorphos* + *-y*.] In *bot.*, same as *zygomorphism*.

zygomycete (zi-gō-mī'set), *n.* In *bot.*, a fungus belonging to the group *Zygomycetes*.

Zygomycetes (zi-gō-mī-sē'tez), *n. pl.* [NL., < Gr. *ζυγόν*, yoke, + *μύκης*, *pl. μυκήτες*, a mushroom.] A group of fungi characterized by the production of zygospores. It embraces the *Mucorini*, *Eutomophthoraceae*, *Chytridiaceae*, *Ustilaginaceae*, etc.

zygomycetous (zi-gō-mī-sē'tus), *a.* In *bot.*, of or pertaining to the *Zygomycetes*.

zygon (zi'gon), *n.* [NL., < Gr. *ζυγόν*, a yoke, cross-bar; see *yoke* 1.] 1. A connecting rod or bar; a yoke in general.

Zygal fissures are defined as "H-shaped or quadrate, presenting a pair of branches at either end of a connecting bar or yoke, the *zygon*." A zygal fissure contains a bar or *zygon*, a yoke in the most general sense. *E. G. Wilder*.

2. In *anat.*, an H-shaped fissure of the brain, as the paroccipital fissure. It consists of anterior and posterior stipes, anterior and posterior rami, and the connecting bar (the *zygon* in strictness). *E. G. Wilder*.

Zygonectes (zi-gō-nek'tez), *n.* [NL. (Agassiz, 1844), so called because said to swim in pairs; < Gr. *ζυγόν*, yoke, + *νέκτης*, swimmer.] A large genus of small carnivorous American cyprinodonts; the top-minnows. They are closely related to the killifishes (*Fundulus*), the technical difference being chiefly in the smallness and backwardness of the dorsal fin, which has usually less than ten rays and is commonly inserted behind the front of the anal fin. The top-minnows are on the average smaller than the killifishes, being usually only 2 or 3 inches long. They are surface swimmers, and feed on insects. The species are numerous, and individuals abundant. One of the best-known is *Z. notatus*, common in ponds from Michigan to Alabama and Texas.

Zygotetrum (zi-gō-pet'ā-hum), *n.* [NL. (Hooker, 1827), so called with ref. to the union of the perianth with the foot of the column; < Gr. *ζυγόν*, yoke, + *τετρών*, leaf (petal).] A genus of epiphytic orchids, of the tribe *Fandee* and subtribe *Tyrtopodiceae*. It is characterized by showy solitary or loosely racemed flowers with spreading sepals, the lateral ones united to the short foot of the incurved column; by a flatish lip, bearing a transverse crest at its base; and by an anther with four obovoid pollen-masses, attached by a rather broad stalk or gland. There are about 50 species, natives of tropical America from the West Indies and Mexico to Brazil. They are handsome plants with short leafy stems thickened into pseudobulbs. Their leaves are two-ranked, membranous or somewhat rigid, and slightly plicate or with elevated veins. They are highly prized in cultivation under glass, especially *Z. Mackaili*, the original species.

Zygothryceae (zi-gō-thrī'sē-ē), *n. pl.* [NL., < Gr. *ζυγόν*, yoke, + *θρύος*, seaweed, + *-aceae*.] A group or order of unicellular or multicellular freshwater algae, not now generally accepted, with the cells single, or segregate, or geminate, or united in a series. Multiplication is effected by division in one direction, and by means of zygospores resulting from the conjugation of the cells. It embraces the families *Desmidiaceae*, *Zygnemaceae*, etc.

Zygothryllaceae (zi-gō-thrī-lā'sē-ē), *n. pl.* [NL., < *Zygothryllum* + *-aceae*.] Same as *Zygothryllaceae*.

Zygothryllae (zi-gō-thrī-lā'sē-ē), *n. pl.* [NL. (R. Brown, 1814), < *Zygothryllum* + *-ae*.] An order of polypetalous plants, the bean-caper family, belonging to the series *Disciflorae* and the cohort *Geraniales*. It is characterized by flowers which usually bear a fleshy disk, five free glandless sepals, filaments augmented each by a small scale, and a four-angled or lobed ovary with two or more filiform ovules in each of the four or five cells. It includes about 110 species, classed in 18 genera, natives of tropical and warm climates, especially north of the equator. They are commonly shrubs or herbs with a woody base, bearing divaricate branches jointed at their nodes. Their leaves are usually opposite and pinnate or composed of two entire leaflets; the twin persistent stipules are sometimes developed into spines. The flowers are white, red, or yellow, very rarely blue, usually solitary in the axils of the stipules. The principal genera are *Zygothryllum* (the type), *Trilobus*, *Guaianum*, and *Fagonia*; 10 genera are monotypic; two species of *Guaianum* (lignum-vitae) become moderate trees. The woody species are remarkable for the extreme hardness of their wood, and several, as *Guaianum*, produce a bitter and acrid bark. Their detestive foliage is used in the West Indies to scour floors. Some of the family are so abundant in the Egyptian desert as to constitute a characteristic feature of its vegetation.

Zygothryllum (zi-gō-thrī-lūm), *n.* [NL. (Linnaeus, 1757), < Gr. *ζυγόν*, yoke, + *θρύον*, leaf.] A genus of plants, type of the order *Zygothryllae*. It is characterized by opposite bifoliate leaves, flowers with four or five petals, and a sessile ovary with the ovules fixed upon the axis. There are about 60 species, natives of the Old World and of Australia. They are diminutive shrubs, often prostrate, and with spine-cent branches. The leaves are opposite, usually composed of two fleshy leaflets armed at the base with spines which represent stipules. The flowers are white or yellow, usually marked near the base with a purple or red spot. *Z. Fagonia* is the bean-caper of the Levant; its flower-buds are used as capers. The aromatic seeds of *Z. coccineum* are used by the Arabs as pepper. Several species are of local medicinal repute—*Z. Fagonia* as a vermifuge, and *Z. simplex*, an Arabian plant of nauseous odor, as a remedy for diseases of the eye.

zygophyte (zi-gō-fīt), *n.* [NL., < Gr. *ζυγόν*, yoke, + *φύτον*, plant.] A plant characterized by the production of zygospores; a plant in which reproduction consists in a confluence of two similar protoplasmic masses. See cut under *conjugation*, 4.

In most of these *zygophytes* there is no plain distinction of sex. *G. L. Goudale*, *Physiol. Bot.*, p. 439.

zygopleural (zi-gō-plō'rāl), *a.* [< Gr. *ζυγόν*, yoke, + *πλευρά*, side.] Bilaterally symmetrical in a strict sense. Zygopleural forms are distinguished as *dipleural* and *tetrapleural*.

Zygosaurus (zi-gō-sā-rus), *n.* [NL. (Eichwald, 1848), < Gr. *ζυγόν*, yoke, + *σαῦρος*, lizard.] A genus of labyrinthodonts, based on *Z. lucius* from the Middle Permian of Perm in Russia.

zygose (zi-gō'sē), *a.* [< Gr. *ζυγόν*, yoke, + *-ose* after *zygosis*.] In *bot.*, pertaining to or characteristic of zygosis or conjugation.

Zygoselmidae (zi-gō-sel'mī-dē), *n. pl.* [NL., < *Zygoselmis* + *-idae*.] A family of dimastigote eucytomatous flagellate infusorians, named from the genus *Zygoselmis*. They have two similar vibratile flagella, and the endoplasm includes no pigmentary bands.

Zygoselmis (zi-gō-sel'mis), *n.* [NL., < Gr. *ζυγόν*, yoke, + *σέλμη*, noose.] The typical genus of *Zygoselmidae*. These animals are highly plastic and variable in form, with two unequal flagella from the fore end, at the base of which are the mouth and pharynx. *Z. nebulosa* and *Z. inaequalis* inhabit fresh water.

zygosis (zi-gō'sis), *n.* [NL., < Gr. *ζυγών*, a joining (used in sense of balancing), < *ζυγόν*, join, yoke; see *zygoma*.] 1. Asexual intercourse of protoplasmic bodies, resulting in their confluence and coalescence; the process and result of conjugation in protozoans or other of the lowest organisms. See *conjugation*, 4.—2. [*cap.*] [NL. (Förster, 1869).] A genus of hymenopterous insects.—3. In *bot.*, conjugation; the fusion or union of two distinct cells or protoplasmic masses for reproduction. See *conjugation*, 4.

zygosperm (zi-gō-spērm), *n.* [NL., < Gr. *ζυγόν*, yoke, + *σπέρμα*, seed.] In *bot.*, same as *zygosporic*.

zygosphe (zi-gō-sfēn), *n.* [< Gr. *ζυγόν*, yoke, + *σφήν*, wedge.] In *herpet.*, the wedge-shaped process from the fore part of the neural arch

of the vertebræ of serpents and some lizards, which fits into a corresponding fossa, the zygtrum, on the posterior part of the neural arch of a preceding vertebra, and serves thus to interlock the series of arches more effectively than would be done by zygapophyses alone. Compare cut under *zygtrum*.

Anterior face of a dorsal vertebra of the python, showing *zs*, zygosphe; *pz*, prezygapophysis; *ns*, neural spine; *nc*, neural canal; *cp*, centrum of the procelian vertebra, whose concavity fits the convexity of the centrum shown under *zygtrum*.

zygosporangium

(zī-gō-spō-ran'-jū-m), *n.*; pl. *zygosporangia* (-jī). [NL., < Gr. ζυγός, yoke, + σπορά, seed, + ἄγγιον, vessel.] In *bot.*, a sporangium in which zygospores are produced.

zygospore (zī-gō-spōr), *n.* [NL., < Gr. ζυγός, yoke, + σπορά, seed.] In *bot.*, a spore formed in the process of reproduction in some algae and fungi by the union or conjugation of two similar gametes or protoplasmic masses: called *isospore* by Rostafinski. Also *zygospERM*, *zygotc*. See *spore* 2, *conjugation*, 4 (with cut).

Zygosporeæ (zī-gō-spō-rē-ē), *n. pl.* [NL., < Gr. ζυγός, yoke, + σπορά, seed, + -æ.] In Sachs's system of classification, a group of plants characterized by the production of zygospores. It is no longer maintained.

zygosporephore (zī-gō-spōr'ō-fōr), *n.* [NL., < Gr. ζυγός, yoke, + σπορά, seed, + φέρω = E. bear.] In *bot.*, a club-shaped or conical section of a hypha adjoining a gamete-cell after its delimitation. *De Bary*.

zygote (zī-gōt), *n.* [< Gr. ζυγός, yoked, < ζυγός, yoke; see *zygoma*.] Same as *zygospore*.

Zygotrocha (zī-gōt'rō-kā), *n. pl.* [NL., < Gr. ζυγός, yoke, + τροχός, wheel.] In Ehrenberg's classification, a division of rotifers: correlated with *Schizotrocha*.

zygotrochous (zī-gōt'rō-kus), *a.* Of or pertaining to the *Zygotrocha*.

zygozoospore (zī-gō-zō'ō-spōr), *n.* [NL., < Gr. ζυγός, yoke, + ζώον, animal, + σπορά, seed.] In *bot.*, a motile zygospore.

zylo-. For words so beginning, see *xylo-*.

zylonite, *n.* Same as *xylonite*.

Zylophagus (zī-lof'a-gus), *n.* The original (incorrect) form of *Xylophagus*. *Latreille*, 1809.

zymase (zī'mās), *n.* [< Gr. ζύμη, leaven, + -ασ (after *diastase*).] Same as *enzym*.

zyme (zīm), *n.* [< Gr. ζύμη, leaven, < ζέω, boil; see *yeast*.] 1. A ferment.

A yeast and a ferment signify the same thing, and, as a *zyme* also means a ferment, the term *zymotic* has arisen to express a certain class of diseases. *Nineteenth Century*, XXIV, 843.

2. The living germ or other poison, of whatever nature, which is believed to be the specific cause of a *zymotic* disease.

zymic (zīm'ik), *a.* [Also improperly *zymie*; < *zyme* + -ic.] Pertaining to or of the nature of leaven: applied by Pasteur to the microbes which act as ferments only when the air is excluded, as distinguished from those which require the presence of air.

zymogen (zī'mō-jen), *n.* [< Gr. ζύμη, leaven, + γενής, producing.] A substance from which an *enzym* may be formed by internal change. Also *zymogene*.

A ferment is found to exist as a *zymogen* in the resting seed, which is readily developed by warmth and weak acids into an active condition. *Nature*, XLI, 380.

zymogenic (zī-mō-jen'ik), *a.* [As *zymogen* + -ic.] Exciting fermentation: as, *zymogenic* organisms.

zymogenous (zī-mōj'e-nus), *a.* [As *zymogen* + -ous.] Same as *zymogenic*.

zymoid (zī'moid), *a.* [< Gr. ζυμοίδης, ζυμώδης, like leaven, < ζύμη, leaven, + εἶδος, form.] Resembling a *zyme* or ferment.

zymologic (zī-mō-loj'ik), *a.* [< *zymology* + -ic.] Of or pertaining to *zymology*. Also *zumologic*.

zymological (zī-mō-loj'i-kal), *a.* [< *zymologic* + -al.] Same as *zymologic*.

zymologist (zī-mōl'ō-jist), *n.* [< *zymology* + -ist.] One who is skilled in *zymology*. Also *zumologist*.

zymology (zī-mōl'ō-jī), *n.* [Also *zumology*; < Gr. ζύμη, leaven, + λογία, < λέγω, speak; see -ology.] The science of or knowledge concerning fermentation.

zymolysis (zī-mōl'i-sis), *n.* [< Gr. ζύμη, leaven, + λύνω, dissolving.] Same as *zymosis*, 1.

zymolytic (zī-mō-lit'ik), *a.* [< *zymolysis* (-lyt-) + -ic.] Same as *zymotic*.

Prof. Salkowski . . . concluded from his researches that fermentative (*zymolytic*) processes are continually taking place in living tissues. *Nature*, XLI, 599.

zymome (zī'mōm), *n.* [< Gr. ζύμα, a fermented mixture, < ζύω, leaven, ferment, < ζύμη, leaven; see *zyme*.] An old name for the gluten of wheat that is insoluble in alcohol. Also *zinome*.

zymometer (zī-mōm'e-tēr), *n.* [< Gr. ζύμη, leaven, + μέτρον, measure.] An instrument for ascertaining the degree of fermentation of a fermenting liquor. Also *zyinosimeter*.

zymophyte (zī'mō-fīt), *n.* [< Gr. ζύμη, leaven, + φυτόν, plant.] A bacterioid ferment that

liberates fatty acids from neutral fats. *Bil-lings*.

zymoscope (zī'mō-skōp), *n.* [< Gr. ζύμη, leaven, + σκοπεῖν, view.] An instrument, contrived by Zenneek, for testing the fermenting power of yeast, by bringing it in contact with sugar-water and observing the quantity of carbonic anhydrid evolved. *Watts*.

zymosimeter (zī-mō-sim'e-tēr), *n.* [< Gr. ζύμασις, fermentation, + μέτρον, measure.] Same as *zymometer*.

zymosis (zī-mō'sis), *n.* [NL., < Gr. ζύμασις, fermentation, < ζύω, ferment; see *zymome*.] 1. Fermentation of any kind. Also *zymolysis*.— 2. An infectious or contagious disease.

zymotechnic (zī-mō-tek'nik), *a.* [< Gr. ζύμη, leaven, + τέχνη, art.] Relating to the art of inducing and managing such fermentations as are useful in the arts; pertaining to *zymotechnics*.

zymotechnical (zī-mō-tek'ni-kal), *a.* [< *zymotechnic* + -al.] Same as *zymotechnic*.

zymotechnics (zī-mō-tek'niks), *n.* [Pl. of *zymotechnic* (see -ics).] The art of managing fermentation. Compare *zymurgy*.

zymotic (zī-mōt'ik), *a.* and *n.* [< Gr. ζυματικός, < ζύμασις, fermentation; see *zymosis*.] 1. *a.* Pertaining to fermentation; of the nature of fermentation. Also *zymolytic*.—*Zymotic disease*, any disease, such as malaria, typhoid fever, or smallpox, the origin and progress of which are due to the multiplication within the body of a living germ introduced from without.—*Zymotic papilloma*, frambesia.

II. *n.* Same as *zymotic disease*. See I.

zymotically (zī-mōt'ik-ly), *adv.* [< *zymotic* + -al + -ly².] In a *zymotic* manner; according to the manner or nature of *zymotic* diseases.

zymurgy (zī-mér-jī), *n.* [< Gr. ζύμη, leaven, + ἔργον, work (cf. *metallurgy*, etc.).] That department of technological chemistry which treats of the scientific principles of wine-making, brewing, and distilling, and the preparation of yeast and vinegar, in which processes fermentation plays the principal part. *Watts*.

Zyrichthys, *n.* See *Xyrichthys*. *Strausson*, 1839.

zythepsary (zī-thep'sa-ri), *n.* [Irreg. < Gr. ζύθος, beer, + ψάω, boil (related to πέσσω, boil, cook; see *peptic*), + -ary.] A brewery or brew-house. [Rare.]

zythum (zī'thum), *n.* [< L. *zythum*, < Gr. ζύθος, beer, applied to the beer of Egypt and also to that of the northern nations (κοίρη).] A kind of beer made by the ancient Egyptians.

Zyomma (zik-som'ā), *n.* [NL. (Rambur, 1842), prop. **Zenomma*, < Gr. ζεύω, join, < ζεύω, join, + ὄμμα, eye; see *ommatidium*.] A genus of Indian dragon-flies, of the family *Libellulidae*, having the head large, the face narrow, the eyes of great size, and the first three abdominal segments vesicular.

LIST OF AMENDED SPELLINGS

RECOMMENDED BY THE PHILOLOGICAL SOCIETY OF LONDON AND THE AMERICAN PHILOLOGICAL ASSOCIATION

THE American Philological Association, giving voice to the general opinion of the most eminent scholars in English philology, as reflected in previous discussions in that body and elsewhere and expressed in the annual reports of a special committee, adopted and published, in 1876, a declaration in favor of a reform in English spelling. That declaration, as printed in the List of Amended Spellings subsequently recommended by the Association, is as follows:

1. The true and sole office of alphabetic writing is faithfully and intelligibly to represent spoken speech. So-called "historical" orthography is only a concession to the weakness of prejudice.

2. The ideal of an alphabet is that every sound should have its own unvarying sign, and every sign its own unvarying sound.

3. An alphabet intended for use by a vast community need not attempt an exhaustive analysis of the elements of utterance and a representation of the nicest varieties of articulation; it may well leave room for the unavoidable play of individual and local pronunciation.

4. An ideal alphabet would seek to adopt for its characters forms which should suggest the sounds signified, and of which the resemblances should in sum measure represent the similarities of the sounds. But for general practical use there is no advantage in a system which aims to depict in detail the physical processes of utterance.

5. No language has ever had, or is likely to have, a perfect alphabet; and in changing and amending the mode of writing of a language already long written regard must necessarily be had to what is practically possible quite as much as to what is inherently desirable.

6. To prepare the way for such a change, the first step is to break down, by the combined influence of enlightened scholars and of practical educators, the immense and stubborn prejudice which regards the established modes of spelling almost as constituting the language, as having a sacred character, as in themselves preferable to others. All agitation and all definite proposals of reform are to be welcomed so far as they work in this direction.

7. An altered orthography will be unavoidably offensive to those who are first called upon to use it; but any sensible and consistent new system will rapidly win the hearty preference of the mass of writers.

8. The Roman alphabet is so widely and firmly established in use among the leading civilized nations that it cannot be displaced; in adapting it to improved use for English, the efforts of scholars should be directed towards its use with uniformity, and in conformity with other nations.

In pursuance of this declaration, further action was taken by the Association from year to year; and, a similar declaration having been made by the Philological Society of London, the two bodies agreed, in 1883, upon certain rules (the Twenty-four Rules) for the correction of the orthography of certain words and classes of words. Subsequently an alphabetical list of the principal words covered by the rules was made. "The corrections are in the interest of etymological and historical truth, and are to be confined to words which the changes do not much disguise from the general reader." The rules are printed in the "Proceedings" of the American Philological Association for 1883. The list was printed in the "Transactions" for 1886, and later in the periodical "Spelling," in October, 1887, from which it is here reprinted, with some slight corrections.

In the following list, as in the Twenty-four Rules, many amendable words have been omitted for reasons such as these: 1. The changed word would not be easily recognized, as *nee* for *knee*. 2. Letters are left in strange positions, as in *edg* for *edge*, *eusq* for *cusque*. 3. The word is of frequent use. Final *g* = *j*, *v*, *q*, *z*, and syllabic *l* and *n*, are strange to our print but abundant in our speech. Many of them are in the list: *hav*, *freez*, *singl*, *eatn*, etc.; but *iz* for *is*, or for *of*, and many other words, as well as the final *z* = *s* of inflections, are omitted. 4. The wrong sound is suggested, as in *vay* for *vague*, *acer* for *acre*. 5. A valuable distinction is lost: *cusque* from *cusk*, *dost* from *dust*.

Unusual words having a familiar change of ending, as *-le* to *-l*, and simple derivatives and inflections, are often omitted. Words doubtful in pronunciation or etymology, and words undecided by the Associations, however amendable, are omitted. Inflections are printed in italics.

The so-called Twenty-four Rules are many of them lists of words. The rules proper are as follows:

TEN RULES.

1. *e*.—Drop silent *e* when phonetically useless (writing *-er* for *-re*), as in *live* (*liv*), *single* (*singl*), *eaten* (*eatn*), *rained* (*raind*), etc., *theatre* (*theater*), etc.

The list is printed here as a record of an important movement which promises to be of special interest to lexicographers in the near future, and as a recognition, in addition to the remarks made in the Preface (p. ix), of the desirableness of correcting the anomalies and redundancies of English spelling in the directions indicated. It is the main office of a dictionary to record actual usage, not to recommend better usage; but in cases of unsettled usage it must adopt, and thus by inference recommend, one form as against the rest; and, in view of the fact that the amended spellings in question have been recommended by the highest philological authorities in the English-speaking world, and that they have been to a considerable extent already adopted, in whole or in part, by many respectable newspapers and other periodicals, and by a large number of persons in private use, besides those who take part in the agitation for spelling reform, they can hardly be ignored in a dictionary which records without wincing the varying orthography of times just past, and of earlier generations. The reformed orthography of the present, made with scientific intent and with a regard for historic and phonetic truth, is more worthy of notice, if a dictionary could discriminate as to worthiness between two sets of facts, than the oftentimes capricious and ignorant orthography of the past.

It need not be said in this dictionary that the objections brought on etymological and literary and other grounds against the correction of English spelling are the unthinking expressions of ignorance and prejudice. All English etymologists are in favor of the correction of English spelling, both on etymological grounds and on the higher ground of the great service it will render to national education and international intercourse. It may safely be said that no competent scholar who has really examined the question has come, or could come, to a different conclusion; and it may be confidently predicted that future English dictionaries will be able to recognize to the full, as this dictionary has been able in its own usage to recognize in part, the right of the English vocabulary to be rightly spelled.

It is to be noted that many of the corrected spellings in the following list are merely reversion to a simpler mode of spelling formerly common; indeed, such is largely the intent of the list. Examples are *engin*, *genuin*, *wil*, *shrill*, and the like, and especially verbal forms like *dropt*, *kist*, *mist*, *tost*, etc.—a mode of spelling in use for more than a thousand years (compare Anglo-Saxon *cyste*, English *kist*; Anglo-Saxon *miste*, English *mist*, etc.), and still familiar in the usage of the best modern poets, as Tennyson and Lowell (*hapt*, *mist*, *tost* are in Lowell's last poem, "My Brook," December, 1890). All considerations, historical, literary, and economical, are in favor of such corrected forms.

W. D. WHITNEY.

2. *ea*.—Drop *a* from *ea* having the sound of *e*, as in *feather* (*fether*), *leather* (*lether*), etc.
3. *o*.—For *o* having the sound of *u* in *but* write *u* in *above* (*abuv*), *tongue* (*tung*), and the like.
4. *ou*.—Drop *o* from *ou* having the sound of *u* in *trouble* (*trubl*), *rough* (*ruf*), and the like; for *our* unaccented write *-or*, as in *honour* (*honor*), etc.
5. *u*, *ue*.—Drop silent *u* after *g* before *a*, and in native English words and drop final *ue*: *guard* (*gard*), *guess* (*gess*), *catalogue* (*catalog*), *league* (*leag*), etc.
6. *u*.—Drop silent *u* after *g* before *a*, and in native English words and drop final *ue*: *guard* (*gard*), *guess* (*gess*), *catalogue* (*catalog*), *league* (*leag*), etc.
7. *d*.—Change *d* and *ed* final to *t* when so pronounced, as in *looked* (*lookt*), etc., unless the *e* affects the preceding sound, as in *chafed*, etc.
8. *gh*, *ph*.—Change *gh* and *ph* to *f* when so sounded: *enough* (*enuf*), *laughter* (*lafter*), *phonetic* (*fonetic*), etc.
9. *s*.—Change *s* to *z* when so sounded, especially in distinctive words and in *-ise*: *abuse*, verb (*abuz*), *advertise* (*advertize*), etc.
10. *t*.—Drop *t* in *tch*: *catch* (*cach*), *pitch* (*piech*), etc.

SUPPLEMENTARY NOTE TO PREFACE.

DURING the publication of the dictionary but one change has occurred in the staff of specialists mentioned in the preface issued with the first part. While the proofs of "T" were coming from the press, Dr. James K. Thacher, who had labored upon the dictionary from its beginning, died, leaving his work upon the last letters of the alphabet unfinished. The task of completing it was taken up by Dr. Thomas L. Stedman, and has been carried through by him.

The dictionary has also received additional aid from many others not mentioned in the preface. Help has thus been given most notably by Prof. Charles A. Young, in many important definitions (in particular those of the words *sun*, *solar*, *telescope*, and *lens*) and in continuous criticism of the final proofs; by Prof. Thomas Gray, of Rose Polytechnic Institute, in electrical definitions; by Mr. George E. Curtis, of the Smithsonian Institution, and Prof. Cleveland Abbe, in definitions of meteorological terms; by Mr. Edward S. Burgess, Mr. E. S. Steele of the National Museum, Mr. F. V. Coville of the United States Department of Agriculture, Prof. N. L. Britton of Columbia College, and the late Dr. J. I. Northrop, also of Columbia, in botany; by Mr. Leicester Allen, in definitions of mechanical terms; by Prof. S. W. Williston, of the University of Kansas, in medicine and physiology; by Dr. Theobald Smith, of the United States Department of Agriculture, in veterinary pathology and surgery; by Lieut. Arthur P. Nazro, in naval and nautical definitions; by Capt. Joseph W. Collins, of the United States Fish Commission, in material relating to fishing and the fisheries; by Prof. William H. Brewer, of Yale University, in many definitions, particularly those of the gaits of horses; by Mr. A. D. Risteen, in certain mathematical definitions; by Rev. George T. Packard, in the preliminary arrangement of certain literary material; by Mr. Austin Dobson, in the definitions of the names of various forms of verse; by Prof. Douglas Sladen, in the collection of Australian provincialisms and colloquialisms; and in various special matters by Dr. Edward Eggleston, Mr. George Kennan, Mr. George W. Cable, Mr. G. W. Pettes, and many others.

The staff of editorial assistants has been enlarged by the addition of Miss Katharine G. Brewster, and of Rev. George McArthur, to whom special recognition is due for his efficient revision of the final proofs.
